PREFACE

THIS little work is an attempt to adapt the Berlitz method of learning modern European languages to the needs of the student of Swahili ; its aim is to enable the learner to acquire a working knowledge of the language without laborious research or great feats of memory. Grammatical rules occupy a subordinate place : they are introduced incidentally and are not to be regarded as a separate subject of study : the ear, rather than the eye, is the organ to be pressed into the service. Words are arranged in subject-groups in order that, by the natural association of ideas, the student may help himself to learn Swahili much as a child picks up its mother tongue. The exercises should, if possible, be reiterated and amplified with the aid of a native teacher, until the ear is thoroughly accustomed to the sounds and the mind trained to follow the constructions. This method, if carefully pursued, should soon lead to technical accuracy.

The standard of Swahili adopted is that set by the Rev. W. E. Taylor, M.A., to whose valuable works the writer is greatly indebted. He has kindly furnished the Syllabary and Part I. of the work.

PART I

INTRODUCTION

SWAHILI is a member of the Bantu family of African languages found in the region, and to the south, of the Equator, and all partaking of certain remarkable features peculiar to this family alone, of which the most striking is, that all objects in the known universe are divided into classes, which not only mark the nouns, but also all the adjectives, pronouns, and verbs connected with them. This is effected by means of the classifier prefix which differs according to the class of the noun, and whether it is singular or plural. Besides this, the Nominative or Subjective Prefixes and the Objective Infixes, are thrown together with tense particles into one word with the verb stem; so that one word may form a complete and luminous sentence.

The conveniences of this system will be seen from a study of the Rev. W. E. Taylor's Groundwork sheet.

Swahili has the additional advantages above others of these languages, first that it has been enriched and diversified by the influence of Arabic, Hindustani, and to a slighter extent, of Persian and Portuguese and also by a written poetical and religious literature extending over a long period.

The Swahili language is broadly divided into three main Dialect-Groups :

THE SOUTHERN ;
THE NORTHERN ;
THE CENTRAL.

(a) The *Southern* includes Ki-Unguja, the Zanzibari, in which the labours of Bishop Steere and the U.M.C.A. have been directed to producing the existing version of the Bible: Ki-P'emba, spoken on P'emba, the Emerald Isle, from which comes a moiety of the clove supply :

Ki-Mrima, on the *Southern Mrima* or "Mainland," opposite and to the south of Zanzibar.

(b) The *Northern* comprises Ki-Amu, the speech of Lamu or Amu and its neighbourhood; Ki-Pate, the Pate dialect; Ki-Gunya, the brogue of the Northern Islanders called Wa-Gunya or, by the Arabs, Bajuni: Ki-ti-kuu is the Mainland variety of this brogue (*Ti-kuu*, connected with *nti-kuu*, = Main-land.)

(c) The *Central*. The only member of importance in this group, is the Mombasa or Ki-Mvita, but this speech is taken as the standard for some distance along the coast N. and S. of Mombasa Island, and in and among the districts on the confines of the other groups.

TABLES SHOWING THE INTER-RELATIONS OF THE CENTRAL WITH THE SOUTHERN AND NORTHERN GROUPS OF SWAHILI DIALECTS.

To be studied as occasion requires.

TABLE I. shows how nearly the Central Group is related to the Southern, and in what respects the Northern Group stands in *contrast* to the former two.

(a) Literal Changes—

<i>Southern.</i>	<i>Central.</i>	<i>Northern.</i>
Cerebral T (in some Mrima R)	Cerebral T	CH (Bajuni)
J	J	Y
SH (in P'emba FY)	SH	S
Z	Z	DH (Bajuni)
W	W	V (frequent)
M (prefix)	M (prefix)	N (prefix, frequent)
VI (prefix)	VI (prefix)	ZI (prefix)
YU (prefix)	YU (prefix)	U (prefix)

(b) Grammatical Changes—

Relative suffixes various, according to class and number	Relative suffixes various, according to class and number	All classes except Locative relative suffix <i>o</i> (sing. and plur.)
The suffix - perfect quite obsolete	The suffix - perfect seldom used except in poetry	The suffix-perfect in full use

(c) Verbal Changes—

-je, how? (suffix)	-je, how? (suffix)	ye? how? (not a suffix)
hivi, thus, etc.	hivi, thus, etc.	hiyau, thus, etc.

TABLE II. shows on the other hand some of the affinities the Central Group possesses with the Northern dialects.

Southern.	Central.	Northern.
CH	Dental T	Dental T
NJ	Dental ND	Dental ND
ninakupendani (and several other more or less "barbarous" Zr. forms), I love you (plur. obj.)	nawapenda, I love you (plur. obj.)	nawapenda, I love you (plur. obj.)

TABLE III.—A third Table is capable of being constructed of points wherein each group differs from the others. One chief word may be cited as an example—

Southern.	Central.	Northern.
ninakuja, I am coming	naja, I am coming	niyao, I am coming

TABLE IV.—Central differs, where Northern and Southern agree, to the advantage of the Mombasa Group.

Southern.	Central.	Northern.
Ar. <i>th</i> (kuzani), <i>dh</i> (ramazani), <i>dh</i> (zambi), frequently are pronounced like Z	Ar. <i>th</i> (kuthaui), <i>dh</i> (-dhani), <i>dh</i> (dhambi), are pronounced as in Arabic	Ar. <i>th</i> (kuzani), <i>dh</i> (-zani), <i>dh</i> (zambi), sometimes pronounced like Z
Ar. <i>th</i> (selasa) is pronounced S, sometimes.	Ar. <i>th</i> (thalatha) is always pronounced TH (except in -su-butu.)	Ar. <i>th</i> (thelatha or sel-) is pronounced S (occasionally).
-ake (poss. pron.) ¹	-akwe (poss. pron.)	-ake (poss. pron.)

¹ Accordingly, in S. and N. Swahili, wake, *female* (pl.), is indistinguishable from wake, *his* (pl. of I), the inconvenience of which may be imagined.

The above Tables demonstrate the truth of the assertion that Mombasa is linguistically the Central dialect, as well as geographically. They also show that, generally speaking, in form the Mombasa dialect resembles rather the Southern dialect group than the Northern. Again it is nearer the Northern in the important quality of richness of vocabulary, compression, and flexibility, and to the Southern in the greater distinctness and variety of the prefixes. The Tables will prepare the student to deal with the other groups of the language as occasion arises.

PHONETICS

THE Swahili sounds are capable of being represented by means of twenty-four of the letters of the Roman Alphabet, singly or in combination, supplemented by the use of three diacritical marks, and, where necessary, by the use of an inverted comma (‘) to represent the Arabic ‘ain. *Q* and *x* are not used in writing Swahili. *C* is not used alone. Its soft sound is represented by *s* and its hard sound by *k*.

INSTRUCTIONS ON THE PHONETICAL EXERCISES.

We begin with the simpler sounds and pass gradually to the more difficult, taking each as it comes, each to be practised with the native teacher.

VOWELS.

Of single sounds first take the Vowels, which should be practised by themselves for at least one whole day, and should be rehearsed before other work daily for the first three weeks, in order to get ear and voice weaned from the English ring. This is most important. After that, one should go over them certainly once weekly for three months, and even then they should be occasionally run over with the teacher, so that any relapse into a false pronunciation or accent should be corrected directly it is observed. Such relapse, though to be guarded against, will seldom occur, if the vowels are once for all well fixed in the “language centres” of the brain, by dint of assiduous practice at the beginning of the long task of perfecting oneself in this language.

In Swahili the vowels are represented by the ordinary five letters, *a, e, i, o, u*. Swahili vowel sounds

are distinguished by their purity, and are never indistinctly slurred, nor do they in the Mombasa dialect form "diphthongs," as in English speech. Instance the English final syllables *ey, ay, y*, which are at least usually pronounced exactly alike. Nor are the Swahili vowels affected to the same degree as the English by the presence of certain consonants. Hence their pure and unerring pronunciation is a matter of the greatest importance, and in our study must take precedence of everything else.

In the vowels, and with succeeding sounds studied, one should exercise oneself as follows: Let the teacher say each vowel, etc. *ten times over*, then follow him with your best possible imitation *once*, when he should immediately "chime in" with the correct sound once again, in order that you may correct by the ear any error. (A friend will no doubt be at hand to explain his duty to the teacher.) This process should be gone through once again, after which he need only "sandwich" *one* utterance of your own with *two* of his; after ten or twenty of such sandwiched repetitions, you may be considered to have done enough for the occasion, and can go on with something else.

NOTE.—The learner beginning these exercises will probably be *quite unconscious* of the distinctions marked, which are nevertheless keenly felt by the sensitive ears of the natives.

A pronounced somewhat as in English *far*.

E as the pure sound in *eh!* (very short, more forward); perhaps nearer still, is the *é* in French.

I as *ee* in *feet*.

O as *o* in *lo*. (*O* represents also another sound somewhat as *oe* in *toe*, pronounced shortly and without the *second* half of the English sound.)

U as *oo* in *food*.

NOTE.—*English* faults are such as these:

An *r* sound after a Swahili *a*;

An impure *ee* sound instead of the Swahili *e*;

An "*oo*" at the close of the *o*; as *Nooo* (=No).

Exercise 1. The vowels to be gone through singly as already directed. Then, taking them in order, *double* each vowel thus: a—a, e—e, i—i, o—o, u—u, and see that each member of the pair is pronounced distinctly (as by the teacher) with the accent or stress on the former of the two (á—a, etc.). Then *triple* the vowels and as before lay the *stress* on the last but one of the groups, a—á—a, etc. .

NOTE.—This, the last syllable but one, is *the natural place for the accent in a Swahili word*: the object of the latter variations is to secure the purity of the unaccented syllables. Do not drop the voice on the last syllable.

Exercise 2.—Again go through the vowels singly as before. Then try in order the following combinations. If between the two vowels you hear a *w* or a *y* sound, see you imitate the teacher; for instance, if he pronounce i—a “iya,” or o—a “owa.” For between certain vowels occurring together, such a consonantal sound often arises, though theoretically it is not required.

a—e	e—a	a—i	i—a
a—o	o—a	a—u	u—a
e—i	i—e	i—o	o—i
o—e	e—o	i—u	u—i
u—e	e—u	o—u	u—o.

Exercise 3.—Repeat Exercise 2, and then go through the following as a test exercise, saying the *contrasted pairs together* with the teacher as before.

Pair 1.	a—o,	a—u.
Pair 2.	o—u,	o—o.
Pair 3.	e—i,	e—e.

These present resemblances in sound, which it is exceedingly easy for the English learner to confuse; and as several of them are of very common occurrence in the language, it is well to guard against an habitual mispronunciation—so very easily picked up—from the outset, and to test in this way the effect of the previous exercises in “clarifying” the voice.

Exercise 4.—The following actual Swahili words consist entirely of vowels.

au, ai ! (*oh!* of admiration), oa, ua, aoa, aua, aoe, aue, aoae, uuao, uuae, auuae, uuuao, auae, auuao, aiuae.

The meanings of these words are quite unnecessary to be learnt at the present stage, and if given would only confuse.

NOTE.—Just as *o* has two sounds, one open and “forward” in the mouth, and the other close and “high” (as in the examples given above of “toe” and “lo!” respectively), so the other vowels have each an open and a close sound. However, as these distinctions are not so important in their practical use as they are in some neighbouring languages, and as the close and the open sounds of the vowels are unvarying in the words in which they occur, it has been thought sufficient at this stage to remark, that of all the five, the sound which is the most important linguistically is the *o* in its contrasts, and it is that one which should be mastered to begin with.

Exercise 5.—Practise pronouncing with the teacher this series of five vowels with a “catch in the voice” before each :

'a 'e 'i 'o 'u

The (') represents what is called in Arabic a “hamza.” It enters into certain interjectional sounds common in the language.

'a 'a strongly spoken, with stress on the first 'a, means “No!”

'a 'a 'a is yet stronger, the stress as before on the last 'a but one, and means “Not at all!”

'ee, gently sustained,—a woman's word for “Yes!”

CONSONANTS.

We will comment on those only that seem to require notice.

W has two sounds :

1. The ordinary English sound, when it follows on another consonant.
2. The letter, when it stands alone before the vowel,

has something of a *v* sound, which is however more *w* than *v*.

NOTE.—This letter is liable to mispronunciation by some East Africans, not Swahilis, as if it were the ordinary *w* in English.

Y has its English sound. It is not *written* between *i* and *a*.

Exercise 6.—Pronounce with the teacher the following words, neglecting for the present their meaning:—

Wa, ya, yao, yawa, wayawaya, uwayewaye, wewe, yeeye, wao, wawao, yaua, yawaua, iwauayo, wawayawaya, wawayawayao, wao wauawe wao, iwe wewe wauawa.

(H) In Swahiland “poor letter *h*” is far from having lost its importance—indeed, Swahili without its *h* sounds, would be like the play of “Hamlet” without the Prince of Denmark!

(1) The letter in Swahili is usually pronounced exactly at that point of the larynx where the “catch in the throat” above-mentioned takes place—though this may be neglected by the beginner.

[(2) The letter, when it represents the Arabic *χ* (*h*) in proper names and in certain other words derived from the Arabic, similarly corresponds in its formation to the sound *χ* ('), and can be practised after the more important sounds among the Arabic consonants. (See Inset.)]

(3) The “aspirate” belonging to the aspirated consonants draws its breath not from the chest, as does the ordinary *h* (1), but from the breath that has been already passed through the windpipe and stored up *in the mouth*; and this will also be treated of in its place.

Exercise 7.—Ha, he, hi, ho, hu.

Haya, hawa, haya hayawi, hao waua, hawa hawaui, huyu awiwa, huyu hawiwi, huyu awawia, huyu hawawii, hawa wawiwa, hawa hawawiwi, hun wawaa, huu hauwai, yaya haya, wao hao, ii hii, wawayawaya wewe, yeeye hawaiwai, wawa hawa. (Haa’! is a very strong negative.)

(M) Another very common and most important consonant pronounced with the lips *lightly* pressed together, while the larynx produces sound which passes through the nose.

(1) When the lips are kept together this sound is called "Sonant *m*" as it forms a syllable of itself without requiring a vowel, and is therefore not strictly speaking a consonant at all (consonant meaning, a letter "only to be sounded *with* the help of a vowel"). This is a very frequent form of *m* and, where necessary to distinguish, it is to be written *m'*.

A variety of the "sonant *m*" is that—

(2) "Blended" with *b*; it will be treated of in its place.

(3) Open *m*, a consonant proper, is produced by the lips opening, *not* as in English at the centre of the *upper* lip, which is slightly raised, but rather by gradually drawing down the whole of the lower lip from the corners, the voice or sound from the larynx being sustained evenly and gently from the beginning of bringing the lips into position and not "snapped" as in English.

*Exercise 8.—Ma, me, mi, mo, mu, m'.*¹

When this exercise shall have been thoroughly digested and assimilated, say in about a fortnight from the time of commencing it, the pronunciation of these syllables should be made once or twice in the ordinary English way, and the extraordinary contrast that really exists between that and the African pronunciation will become apparent.

Ham', hamu, hamo, ham'muui, m'memuua, haumi, mama, mimi, mee mee, hayawi mema, hawi mwema, maua haya, mwawaua hawa, muwe, wawe, amuo, hamuo, hao muwauao, mamae, mamayo, hamuumi, aumia, haumi, haumii, aumie, ham' Waamu, hm'.

(B) Pronounced with the same movement of the lips as *m* (3), but the sound is not allowed to escape through the nose, only upon the opening of the lips,

¹ This is really a contraction for "mu," the vowel suppressed being always *u*.

the sound slightly *preceding within* (with somewhat of the effect of an organ with the swell stop). It therefore differs from the English *b* in the same way as the *m*.

The full exercise for this letter will be brought in with the consonant *p*, with which it is closely connected. It will be sufficient here to practise—

Exercise 9.—Ba, bi, bu.

(N) (1) The Swahili *n* is more palatal than the English, and has a deeper and evener sound.

(2) The Arabic *n* (*nūn*) is on the contrary more dental—on the teeth—and lighter than the English. The latter need not be practised at present.

Notice the position of the tongue in pronouncing the *n*, the fore-edge or point laid evenly across the palate behind the eye teeth on either side (bicuspids).

(3) The “sonant *n*” (see on “sonant *m*”) is a frequent sound in Swahili, forming a distinct independent vowelless syllable, the breath and voice being conducted freely through the nose, while the channel through the mouth is stopped.

NOTE.—As the vowel *u* is always suppressed after the “sonant *m*” proper, although grammatically required, so the vowel *i* is often required to be understood after the “sonant *n*.”

(4) “Blended *n*,” which differs from “sonant *n*” in the same way as “blended *m*” does from “sonant *m*” not forming a syllable by itself, will be discussed in its proper place. We need only practise varieties (1) and (3) at this point.

*Exercise 10.—Na, ne, ni, no, nu, n'.*¹

Nina, n'na, n'nani? n'nini? amenona, n'nene, mvi hun
n'nauona, una nini? wewe u nani? m' nani na nani?
anionae n'nani? nawaona, ham'nioni, n'na nini mimi na
wewe? amuonae humuua, humuua amuonae, huua m'no,
huua m'no-m'no, 'n'!—hn'!—'n'n'!

¹ Practise these syllables in the same way as M' was, and with the same conditions. The vowel suppressed after a sonant *n* is *i*.

(D) D holds the same relation to *n* as *b* to *m*—it is pronounced from the same point as *n* and with the tongue in the same position. It therefore differs from English *d* in being pronounced further back on the palate from the teeth. The voice must be uttered from the throat exactly at the time the tongue is brought into position, and not, as in English *d*, just after that instant.

*Exercise 11.—Da, de, di, do, du.*¹

Dada, dede Dodo, Dada, anenae nae *n*' nani? anenae ni mwanayo, ni Dede, mdudu huyu wamuona? ni mdude wa nini? Ya Dodo ni ya mamae? mdimu hui umeao ni wa baba, midomo yao ni minene m'no, dada, wana hawa wanidona-dona.

Dental *d* will be further noticed later, and the “blends” of both.

(L) (1) The native *l* formed on the palate and front teeth, by the blade *and* point of the tongue (the English *l* being formed chiefly by the *point* of the tongue behind the front teeth), the tongue being *convex* and not *concave* as in English *l*.

(2) The Arabic *l* on the other hand, though pronounced with the convex tongue, is *more dental* than the English, but need not be practised.

Exercise 12.—La, le, li, lo, lu.

NOTE.—In two or three words a double “*l*” occurs, and these are all of Arabic derivation, and in which the first *l* of the *ll* can often be traced to an original *n*—they are Allahu, *God*; illa, and its derivatives, *except*, *but*; illi, *in order that*; killa or kulla, *every*.

Lala, lele-mama, lulu, ulili, lilo hilo, alilo nalo, haliwi *n* nani aliye lala? lini? *n* lini? na alale, lalani malaloni. Hana mali, aliyo nayo ni ya Mola (a name for God).

(R) (1) A sound formed by *trilling* the rim of the concave but well extended front of the tongue. Being trilled it stands in contrast to the English sound, but is entirely different from the French and German sounds.

¹ Practise these sounds in the same way as those above.

(2) The Arabic *r* is much more strongly trilled than the Swahili, but need not be practised in these exercises. Swahili *r* and *l* are often confounded by some natives, especially by Zanzibaris.

Exercise 13.—Ra, re, ri, ro, ru.

Bara, bahari, Rabai, heri, mara habari, mabaharia waharibu, marere ni mororo, minara ni miema. Rabai na Ribe, ni heri Rabai, ni heri Ribe? Rabi (a name for God).

We are now again to take up the nasal or *n* sounds. These are very frequent indeed in the language in the mechanism of which *n* plays a distinguished part, as will be more plain further on when we come to the numerous aspirates and blends which that letter forms with other consonants. The two consonants we are now to discuss,—although each is represented, owing to the exigencies of the Roman alphabet, by two letters apiece,—are quite simple sounds, and not compounded of *n* and the other consonant which follows it. This fact must be grasped to begin with, so that the eye is not allowed to mislead the ear, as would almost certainly occur if the warning is not attended to from the first to regard them as, not compounds, but simple sounds.

NY. Pronounced with the *back* of the tongue against the palate, the point being all the while kept well down; a nasal sound corresponding to the Spanish *ñ*, and not at all to be confounded with “ni.”

Exercise 14.—Nya, nye, nyi, nyo, nyu.

Yanya, nyanya, nyuni, nyama, nyonyoa, unyo, nyii (*cry of hyæna*), nyali, nyuma yenu nyoani, m'nyoe, huyu nyanya hanyoi, m'nyonyoe nyuni huyu, nyuni anyonyolewa, nyanya hanyolewi, yaninyea, munyu ni wa nyanyae.

(NG') is nasalised *n*, as in Eng. “singer,” “ringer;” to be contrasted with *ng* in finger. *Exercise 15.*—Practise pronouncing the former as if written *si-ngr'er*, *ri-ngr'er*; then reverse, thus, *ng'er-si*, *ng'er-ri*. NOTE: Further exercises below, in connection with the blend *ng* (the sound in finger).

VOICE AND BREATH CONSONANTS.—In every language most of the consonants are divisible into these two classes. *Exercise 16.*—(a) Utter a loudly whispered *hiss*, thus, *sss*. (b) Do this again, only during the *hiss*, and in the middle of it, practise bringing your voice suddenly into play, and in a moment you will find that the *consonant* has altered, and you have changed unawares from the *sss* to a continuous “*ezz*” sound; thus *sssszzz*. The difference therefore between *s* and *z* depends upon the voice accompanying the sound or not; *s* accordingly is called a breath consonant, and *z* a voice consonant. (c) Now do the same with *fff* (*efff*). On bringing the voice to bear you find yourself beginning to say *rrr* (*errv*). (d) Reverse the above, stopping the voice accompaniment in the middle of saying the *zzz* (*eazzz*) and *rrr* (*errv*), and you will have again the “breath” sounds *sss*, *fff*. Further correspondences can be traced in the Syllabary, after that we have stopped to examine, first, a few pairs of simple consonants; and, secondly, consonants in combination with N, and the strange effect it has upon them.

(CH and J.) These are produced very simply with the *back* of the tongue against the *palate*, making a soft velvety sound, which some vainly try to imitate by saying them as if *ty*, *dy*. *Exercise 17.*—ja, je, ji, jo, ju; cha, che, chu; jana, juzi, chema, jema, chuma, jua, chua.

(K and G.) Somewhat resemble the pair ch and j in their character and method of production. NOTE: Beware of uttering ch or k with the English *stress*, or you may seem to aspirate them, and so possibly say something quite different from what you intended. (See the table of HOMONYMS.) *Exercise 18.*—Ka, ke, ki, ko, ku; ga, ge, gi, go, gu. *Jee, Unguja, waja? siji; sijui.*

(D, T.) From previous practice (p. 18) this pair will come easily, the t corresponding to the d, as s to the z. *Exercise 19.*—Ta, te, etc.; dada, tata; dede, tete; dodo, toto; dudu, tutue, mtoni.

(D, T.) A pair contrasted with the preceding in that the utterance is from a point *forward* of the English sound, the tip of the tongue being laid close against the back of the upper front teeth (*cp. Ar. dal and te*).

Exercise 20.—*Da, de, etc. ; ta, te, etc., tata ; tete ; dia, dua.*
Contrasts : tua mto wako mtoni ; mti huu utue na tini.
Namtuma kutuma ; natumia atumacho.

COMPOUNDS OF N; BLENDS AND ASPIRATES.—The rule is that with *voice* consonants, N forms “blends,” but with breath consonants, “aspirates”; thus: Blends, mb, mv, nj, ng, nz. Aspirates, ch', p', k', t', t''. In the blends ng, mb, we have the hard (English) sounds of g, b, and similarly the soft sounds of ch and j in ch' and nj become hard as English ch and j; while d in nd has a strange “cerebral” sound like a rolled r. N before v becomes mv; before s and f it is simply absorbed and disappears. Note that the aspirates are pronounced with the supply of breath already in the mouth, and not from the chest.

Exercise 21.—(a) Practise mbá, ndá, ngá, nzá as single syllables, *e.g.* not as if emba, but as mbá. (b) Go through the whole five vowels with *mb*,—as mba, mbe, mbi, etc. (c) And with nz, ng, nj, nd, nd. (d) Practise similarly ta, t'e, t'i, t'o; and go through the vowels also with t', p', ch', and k'. (e) Practise the Homonyms (see end of book) with your teacher. (f) Go through the Syllabary, and get your teacher to fit each syllable as far as possible with a meaning, or find it in a “living” word.¹

¹ That difficult interjection “Mng’wpc” described in African Aphorisms, § 396, will form an excellent vocal gymnastic; and so will the “click assentive,” used by women, and produced by drawing down the back of the tongue from the soft palate at the same time that, with a rapid jerk, the chin is thrown into the air—the lips, meanwhile, being kept well closed.

PART II

There is no article proper in Swahili, neither definite, indefinite, nor partitive.

The Swahili Verb has no special interrogative Form. The difference between statement and question is made solely by the voice.

¹ Lit. "affair," "matter," plur. *mambo* (v.), used idiomatically as a greeting.

² *Ni, u, yu* = three pers. sing., pres. indic., strong verb "to be," conjugated with *hali* (state), refer to state of health (also *tu, mu, wa*, in plur.).

³ *Si, hu, ha* = three pers. sing., neg., pres. indic., strong verb "to be," conjugated with *jambo*, stand for, "Is there nothing the matter with you?" "There is nothing the matter with me," etc. (also *hatu, hamu, hawa*, in plur.).

⁴ -*yo* = *yako*, thy (poss. adj.).

⁵ A noun may, by its structure, belong to one of the irrational classes and form its plural accordingly (e.g. *mabwana, mabibi*), and yet by its meaning belong to the living being or sentient class. In this case it usually takes the concords of Cl. I. As *Huyu bwana yuaja* (this gentleman is coming), *wale mabibi hawaji* (those ladies are not coming). See "Groundwork of Swahili Language," by Rev. W. E. Taylor, published by S.P.C.K.

⁶ Lit. "for good."

My fellow [servant] has come now, Ma'am, it is (*ni*) ¹⁰ his (*yakwe*) turn to serve. Very well, let him bring [the] food then, we want to eat. Be quiet, boy, you make too much noise, it won't do. Very well, Ma'am, I will be quiet now. Bring [the] lamp quickly, we want to look at something. That will do, you can go now.

² *Ndoo* = imperative of *kuja*. *Lete* = imperative of *kuleta*. These are the only two irregular imperatives in Swahili. All others retain the final vowel of the stem, e.g. *shika*, hold! *samehe*, forgive! *rudi*, return! *tubu*, repent!

³ The objective particle may be omitted in familiar language.

⁴ *Yako* (your) understood.

⁵ Conjunctions are used more freely in Swahili than in English.

⁶ Contraction of "mwenzi wangu" (my fellow-companion). For contracted suffixes see Study XVI.

⁷ Lit. "water of heat," i.e. hot water or water just from the fire. See Study XI. for variable preposition "of" or "from."

⁸ *Kwenda*, to go, *kwisha*, to finish, and all monosyllabic verbs retain the *ku* of the infin. in certain tenses. *Vide* Study VI.

⁹ The interrogative, like other adverbs, follows the verb in Swahili.

¹⁰ Adjectives usually follow their substantives.

¹ The English custom of suppressing titles in the conversation of equals would appear abrupt and discourteous if attempted in Swahili.

² “-ni” suffixed to nouns denotes locative case, and may be variously translated by the prepositions *by, at, to, within, on, of, from, etc.* See Table of Concord.

³ Most Swahili verbs of posture really signify the taking up of a position, e.g. *kuk'eti* = to sit on the ground. Hence the perfect tense (*nimek'eti*) = I have taken up a position (*I am seated*), and the Present Tense (*nak'eti*) = I am in the act or habit of (*sitting*) and so, in this case, has come to mean I dwell, or stay.

⁴ Here the Swahili construction analyzes more logically than the English “me to write.”

⁵ After an auxiliary, the Infin. *ku* of the principal verb is frequently omitted.

⁶ See note 7, Study II.

⁷ Contraction of *niambia*. All objective particles preceding imperatives, require the final *a* of the stem (either primary or derivative) to change to *e*, except when the 1st pers. sing. obj. particle precedes, in which case the final *a* is retained. E.g. *Nipeleka, Nipelekani, Nipelekea*, but *Mpeleke, Tupeleke, Wapelekee*.

⁸ See “General Notes on Nouns,” note 2, Study XXI.

⁹ *Yakwe* (not *yao*, although it refers to *words*). N.B.—Possessive adjectives, having reference to inanimate objects, never take a plural form.

¹⁰ Lit. “Are they clear to you?”—*maana* has no sing.

Come down, I pray you, at once. Your sister is looking for you. Where is she? She is in the private room. Tell her to come (pres. subj.) into the hall. The bedrooms want sweeping (pass. inf.) and [the] store-room also. Is the door of the upper-storey open? No, it is ⁵shut. Open [it] then. The boy wants to come inside. Very well, let him come inside and go down below (sub. subj.). The teacher has laughed all day. Why did he laugh? Ask him. He says he saw a rat looking (part. tense) in the mirror (loc.). Are there (*wako*) many rats in the house? Yes, there are very many.

¹ The use of the auxiliary verb *kwisha* (to finish), is a favourite way of expressing an emphatic perfect. It may be translated "already," but is more often omitted altogether in English. This verb *kwisha* has an idiomatic perfect, much used—

nsha, <i>I have finished.</i>	tunsha, <i>we have finished.</i>
unsha,	mnsha,
ausha, unsha, insha, etc.	wansha, insha, yansha, etc.

² See note 3, Study II.

³ See note 5, Study I.

KUWA, "TO BE" (STRONG VERB)

NOTE — The verb **kuwa**, strictly speaking, approaches very nearly to the sense of "become," of which there is no other equivalent in Swahili. The real Pres. Indic., positive and negative, is—

nawa	twawa	siti	hatuwi
wawa	mwawa	huwi	hamwi
awa	wawa	hawi	hawaii

Of these the 3rd pers. sing. is most frequently met with; hawi being idiomatically used for "In no case will he." Also the "hu" tense (see Study XIV.), which, used impersonally, gets to bear the meaning of "perhaps." **Huwa akenda** = *It will come that he will go* = *Perhaps he will go*.

Ndoni tukak'eti mezani, chai italetwa sasa hivi. Nguo ya meza si safi, mbona? Nasikia kwamba Juma alimwaya kahawa hapa asubuhi. Mwite Juma. Juma! waitwa. Naam bibi, n'nakuja, ^{4a} ulinita? Ndiyo n'nakwita. Ni kweli ulimwaya kahawa katika nguo ya meza leo? Si kweli bibi. Kahawa imemwaika, lakini si mimi! ⁵ N'nani basi? Labuda ni p'aka, nalimuona chumbani. P'aka aweza kumwaya kahawa? Aweza, akisikia kiu na ⁶ kutaka kunwa. Haya basi, ondoka sasa. Mwambie Ali alete sukari na mkate na asali. Viko wapi visa-hani? Vimo sandukuni, walishau kuviweka mezani. Vilete upesi, chai itapoa moto. ⁷ Imekwisha kuwa baridi kabisa; haifai, watoto, kuchelewa hivi. Sasa nataka vijiko na vikombe.

⁴ -tamu, tupu, tungu, and other adjectives are capable of an adverbial use, in which case there is no concord.

^{4a} The unavoidable use of the familiar pronoun "thee" and "thou" to persons of all ranks and ages is as much to be regretted as the exclusive use in English of the polite form "you."

⁵ "N'" = copula "ni" contracted.

⁶ "Na" (*and*) cannot connect two finite verbs. In the Past Indic., Subj., and Imper., the subordinate tense with "ka" introduces the "and" and obviates the difficulty. In all other cases, the second verb must be put in the Infinite, which then bears the force of the tense and mood of the preceding verb. Neither will "na" connect two adjectives. If we wish to predicate two or more qualities of one substantive, the second or last (whichever follows the "na") must be converted into an abstract noun. Ex. Mt'u huyu ni mwema na upole.

⁷ See note 1, Study IV.

Glasses and plates ⁸ are wanted for the table, people are coming for ⁹ mid-day meal here to-day. Shall I bring spoons and forks too? Yes, I want to set the table now in readiness. Will they drink water? Yes, they will drink water ¹⁰ if it is clean. Take a tray and dish up the food, then ring the bell to call the people. You have forgotten to put the dish-covers ¹¹ over the dishes. Tell the cook to warm up ¹² yesterday's fowl. Try to fold the cloth properly. Can you set the table nicely if the cloth is not clean? No! it will not do. We tasted the honey and we found [it] sweet. The child swallowed something and he said, "It is sugar." If it ¹³ was sugar he would have smiled, but now he is crying. Let us go away, he will leave off. If a child cries he will not get (*hapati*) cake (loaf of sweetness).

EXPLANATION OF DIFFERENCE BETWEEN STRONG VERB
To Be AND SIMPLE COPULA

1. *The strong verb "to be"* is that which affirms, not the peculiar quality or identity of the thing or things, person or persons, but the place, the circumstance, state, or surroundings, in which it, or they, happen or are desired to be, differing according to number and person, tense and mood, as seen above.

2. (a) *The weak verb "to be" or simple copula* (*ni* = "is" or "are"—same for all classes) is confined to the present tense of the Indicative, and differs only from the strong verb in the third persons of that tense. It is used when

⁸ Verb must take concords of cl. iii. to which both nouns belong. But see note 2, Study XII.

⁹ Trans. "meal of mid-day," and so in all cases where one substantive is used to qualify another.

¹⁰ Participle tense.

¹¹ See note on Adverbial Prepositions, Study XX.

¹² There is no possessive form in Swahili. See note 9.

¹³ The impersonal "it" when not referring to any afore-mentioned noun, is translated by the pronominal "i" (as in cl. iii.) and its correlatives.

one wants to affirm of a thing or things, person or persons, that it or they "is" or "are" of a certain quality (not involving the state or position in which it (or they) happen to be) or to identify two titles or nouns—

Fulani ni mwema,	so and so is good.
Wevi ni wangi,	thieves are many.
Walimu wangu ni Ali na Abudulla,	my teachers are Ali and Abdallah.

(b) The *Negative Simple Copula* is *si* (he, she, or it) "is not," (they) "are not";

Ex. Fulani si mwema,	so and so is not good.
Wevi si wangi,	thieves are not many.
Walimu wangu si Ali na Abudulla,	my teachers are not Ali and Abdallah.
Si kweli?	is it not true?
Ni kweli,	it is true.

PASSIVE VERBS

Passive stems are formed—

1. By inserting *w* before final vowel in verbs ending in *a*, or *ea*—

Ex. Kufungwa,	to be shut.
Tutaelewa,	we shall be enlightened.

2. By adding *wa* to verbs ending in *i* or *e*.

Ex. Kurudiwa,	to be punished.
Alisamehewa,	he was forgiven.

3. By inserting *liw* or *lew* between the final vowels of the stem when it ends in *ia*, *oa*, or *ua*.

Ex. Kuoa,	to marry, to wed.
Kuolewa,	to be married (said only of the bride).

Kufua,	to wash.
Kufuliwa,	to be washed.
Kukimbia,	to run away.
Kukimbiliwa,	to be pursued.

Kutia, *to put in*, makes kutiwa and kutiliwa. Kuua, *to kill*, makes kuuwawa.

4. Verbs ending in *u*, change the *u* into *i* and add *wa*.

Ex. Kutubu, *to repent*, kutubiwa; kushukuru, *to give thanks*; kushukuriwa, except kusahau, *to forget*, which makes kusahauliwa.

Monosyllabic verbs are mostly irregular—

Kula, *to eat*, kuliwa, *to be eaten*; kupa, *to give*, kuperwa and kupawa; kuja, *to come*, kujiwa; kufa, *to die*, kufiwa.

Passive subjunctive is formed as follows :—

Nirudiwe,	that I may be punished.
Kifuliwe,	that it (cl. iv.) may be washed.

Passive negative is formed thus :—

Sifungwi,	I am not bound.
Hasamehewi,	he is not forgiven.

<i>Perfect Indic.</i>	<i>n'makula or nimekula,</i>	<i>I have eaten.</i>
<i>Past Indic.</i>	<i>ulikuja,</i>	<i>you came.</i>
<i>Future Indic.</i>	<i>atakifa,</i>	<i>he will die.</i>

<i>Participial Neg.</i>	<i>isipokunya (mvua),</i>	<i>if (the rain) does not fall.</i>

Kupa, *to give*, requires an objective infix to be conjugated with it which euphonically replaces the infinitive *ku*.
Ex. *Atanipa*, *uliwapa*, etc.

Only men are wanted, they are beating the drum to call³ them. The women are tired, they cannot go. Perhaps they will follow afterwards? No, they have missed the trolley, they will⁴ stay at home now. Never mind, they can go to-morrow morning. Will they not be late? Yes, they will be rather late, but the men will wait [for them]. People are assembling at our house, what are they looking for? We are told that they are poor, they want⁵ bread. It is better to give them (*kuwapa*) bread, that they may not steal. If they steal they will be put in prison. There is (*ziko*) much mud and dirt here, let us pass to one side. Will you be able to reach home the day after to-morrow? Yes, we shall be able [to] if we do not meet [with] wind or rain. THE VERB "To HAVE"

kuwa na,	to have.
kutokuwa na,	not to have.

The verb *To Have* is formed from the verb *To Be* by subjoining the word “na” (*with*) to the Strong Verb in all persons and tenses, positive and negative.

Ex.—Nina, or n’na, I have; sina, I have not; utakuwa na, thou wilt have; wasiwe na, that they may not have.

NOTE I.—In the present tense only does the “na” form one word with the verb stem.

NOTE II.—Occasionally the verb *To Have* has to translate the (English) verb *To Be*. Where we say, *there is*, *there are*, the Swahilis say *there has*, *there have* [*i.e.* the place, etc., *has* (in it such and such things)]. For instance—Hapa pana wat’u-tele, Here there are many people, lit. This (place) has people plenty. Kuna upopo mwangi leo? Is there (does there exist) much wind today? Hapana mkate. There is no bread (here). Hakuna kuimba, There is no singing.

NOTE III.—This verb has an idiomatic inversion of subject and object. Whereas in English we say—Salehe has them (*the keys*), in Swahili we get “zina Salehe” (*funguo*), they have Salche! Vide Psalm xxxvi. 9; Luke ii. 14.

Never mind, he will stay at home⁸ and rest.

² The verb "kupa" only takes the *indirect objective participle*, which must always be conjugated with it.

³ See note 5, Study III.

⁴ Verbs frequently precede their subjects.

⁵ "Ko" = relative particle of place. See Study XI.

⁶ "Are lost" = state, hence use of perf. tense.

⁷ The possessive and demonstrative precede the qualifying and numeral adjective—both follow the noun. For concords, see note 1, Study VIII.

⁸ See note 6, Study V.

POSSESSIVE ADJECTIVES

(SOMETIMES CALLED POSSESSIVE PRONOUNS)

The possessive adjective immediately follows the noun it qualifies—taking precedence of other adjectives.

The fish-market is not far away, will you go and visit it? Yes, but I have not paid [for] this flour. That flour is dear, let us go to another man. That man is⁵ used to cheat Europeans. You are (have) right, he is a thief. The day before yesterday he disputed with me about (*juu ya*) a parrot. He wanted much money (many pice), but I knew that he (that parrot) was ill, and besides he could not speak a word. So (*basi*) I picked up my basket and left him. He was very angry, and now if I pass by he always does something (*neno*) to annoy me. What is all this confusion about (confusion this all, its meaning is what?) This poor woman has met with loss—all her eggs have fallen down, and she (*nac*) cannot gather them up. Washermen and carpenters and all artizans are found at the Market.

It is a good thing to trade (to make trade is well), it brings much profit. If you begin with one sovereign you will get two before ⁵ many days. But you must reflect and calculate a great deal when you buy your merchandise. And, moreover, you must not (to) have false scales (scales of falsehood), or people will sue you [and] (again) they will run away from you [and] (they) will say, "He is a bad man, do not let us buy from him (his direction)." A good man cannot deceive his neighbours. You (pl.) are in debt to that shopkeeper—you bought of him four yards (eight hands) of nainsook yesterday and (*tr.* neither) you have not paid him. It is not your business, why do you annoy us for nothing? We shall pay him to-morrow. Gold and copper are not breakable. Iron is a good thing. A debtor is not always a liar. Chop this firewood (pl.). RELATIVE PRONOUNS

There is no separable Relative Pronoun in Swahili. The variable relative particles given below, which run through all the classes, are bound up in the construction of the verb, just as the personal particles are—some tenses preferring them as suffixes, some as infixes. The Verbs "To Be" and "To Have," which have no verb-stem proper in the Present Tense, borrow the particle of the Historical Past Tense to tack the relative on to, so making aliye, he who *is*, aliye na, he who *has*. The Present Negative of "To Have" takes the common negative particle "si" as a stem on which to fix the relative, and by adding "kura" to this we obtain the Present (and Past) Negative of the Verb "To Be."

¹ This always agrees with the noun that precedes it.

¹ Objective pronouns with the Verb "To Have" are expressed by relative suffixes, instead of by the ordinary infix. Tunayo = we have them (nouns in Cl. ii. and v.).

² When one adjective, verb, adverb, or preposition qualifies or refers to two or more substantives of different classes, it may either agree with the last of these substantives or take the concords of cl. iv. as here.

³ See note 1, Study X.

⁴ This neuter verb can only be used transitively of pain to the object's own person. When inflicted by another "umiza" is used.

⁵ Since the relative particle with the verb "To Have" is employed as an objective, the relative sense is obtained in this indirect way—"it is it which is having," or "it is it which is with."

² The pronominal particle must agree with the *pronoun* antecedent in number and person.

³ "Hufika" = "can go" or "often go," as opposed to "yafika"—they are going. See Study XIV.

⁴ See note 2, Study X.

⁵ The verb "pata" is often used as an auxiliary. *Asipate kuzama* = *asizame*.

MORE ABOUT RELATIVES

There being no objective relative particle in Swahili, the personal objective infix is used, and the relative made to agree in number and person with this instead of with the nominative—

atufungao, we whom he binds.
awafungao, ye or they whom he binds.
akifungacho, it (the thing) which he binds.
niufungao, it (the tree) which I bind.
aliowataka, they whom he wanted.

wanifungae, I whom they bind.
wakufungae, thou whom they bind.
wazifungazo, they (the houses) which they bind.
ulifungalo, it (the word or thing) which thou bindest.
waliyempa, he to whom they gave.

When, therefore, the subject and object are alike in number, the sentence may bear a double meaning—

anifungae, he who binds me or I whom he binds.
am'fungae, he who binds him or he whom he binds.
watufungao, they who bind us or we whom they bind.
m'wafungao, ye who bind them or they whom ye bind.

For the use of a relative with other than the four tenses given on p. 75, and to avoid ambiguity generally, there exists in Swahili a convenient relative stem on to which the varying suffixes of nouns and pronouns can be attached—amba; this immediately precedes the verb.

¹ *Ai* is sometimes contracted into *e*; e.g. *wete* for *waite*, *kefa* for *kaifa*.

² There are no degrees of comparison in Swahili. “**Mdogo wao**” stands for “the younger (or youngest) of them,” and “**mdogo wakwe**” for “his younger (or youngest) brother (or cousin).” See Study XVI.

³ When “shamba” takes the locative ending, a special plantation or garden is referred to; but in the expression “amekwenda shamba” “the country” generally is understood.

⁴ When the locative is followed by the variable preposition *-a* (of) or either of the possessive adjectives, different meanings can be obtained, according as to whether the word is put in—

cl. viii. shambani pa **Mzungu**, signifying *at* or *by* the European's plantation.

cl. ix. shambani kwa **Mzungu**, „ *in the direction of*, or to the European's plantation.

cl. x. shambani mwa **Mzungu**, „ (a) *in* or *within* the European's plantation.

cl. x. mashambani mwa **Mzungu**, „ (b) *to* or *into* the European's plantations.

⁵ All names of trees are in cl. ii. The names of their respective fruits (in the singular) are found by omitting the class prefix. The fruits (themselves) are in cl. v. with “*ma*” plurals. **Nazi**, **ndizi**, **ndimu**, are exceptions, being in cl. iii.

⁶ **Mgomba** is the only tree which differs in nomenclature from its fruit.

⁷ Elliptical for “**Mna vit'u vyot'e m'vitakavyo**.”

Farmers who sow bad seed will not reap a good harvest. The owner of (*mwenyi*) this garden always gives us [some] beautiful flowers. There are not many fruits in this country (there are)¹⁰ only mangoes and guavas and pine-apples and bananas—that is all! But there are others besides—limes, cocoa-nuts, oranges, tamarinds, custard-apples and lemons, you forgot these. Our neighbours have not yet dug a well in their plantation, they are still building a hut. Your path is broad, ours is narrow. The jungle which was here has all been cut down with a hatchet. The grass and the crops are all dried up¹¹ with the hot (fierce) sun, even the undergrowth and leaves and thorns as well. Cut that root with [your] hoe. It is not the sower alone who knows that this soil is bad. These fruits are not fit for eating (pass inf.), they are quite green. Only one is ripe.

⁸ The impersonal use of the Negative Participial Tense of the verb "To Be" for expressing *except, with the exception of, but*, has made the word practically a preposition.

⁹ See note 9, Study III.

¹⁰ Tu and pia generally stand at the end of a phrase or sentence.

¹¹ Use "kwa," the instrumental preposition—never "na" which means together with.

The people of these countries always build fences to (loc. case)¹ their villages. They fight with bows and arrows, spears and clubs; [and] each one carries a shield. Although we are tired, we must break up camp to-morrow when the cock² crows (particp. tense); tell that simple fellow to wake us [at] daybreak. When the government mail-man comes (fut.), the soldiers will fire a cannon. This path is overgrown, we had better go back. If you are bitten³ by a soldier ant, it will pain (you will suffer pain); but the small ants do not hurt [one]. A strong man (man having strength) can lift a crowbar. The women's head-pads fell into a hole. Our porters would have been cheerful if we had not quickened the pace. Do not scold them, only supervise (them). Tell them if they get castor oil from these plants, they will be able to sell it when they return to the coast.

⁴ Nights take the name of the day that follows and not of the one that precedes.

⁵ Swahili time, like Jewish, is reckoned from sunrise to sunset (6 p.m.), and from sunset to sunrise (6 a.m.). Hence noon is the 6th hour of the day (*saa sita za mtana*), and midnight is the 6th hour of the night.

People of old followed it, and it became their (tr. to them) guide. In these countries the sun sets [at] six o'clock [in the] evening; [in the] morning it begins to dawn ⁸(*kwacha*) [at] five o'clock. Next Sunday they will come still earlier (tr. will exceed to come early). Good people are decreasing in the world. The sky is covered with clouds (tr. clouds are spread out). Famine has ⁹come into the country. God has for ever given (added) grace and strength to (*kwa*) His people.

⁶ The Swahilis are fond of omitting the conjunction "or," both when it connects words and sentences.

⁷ Since the "me" infix in verbs of posture (see note 3, Study III.) is used for time present, past time can only be expressed by introducing the past tense of the verb "To Be" before it, making it a compound verb.

⁸ "**Kwacha**" = *kuacha* (the impersonal pronominal with the Pres. Indie. of a monosyllabic verb). We can say "*Jua latwa*" or "*lita-kutwa*," but cannot make "*Jua*" the subject of the verb "*kucha*."

⁹ With the verb "*ngia*," used in its wide sense, there is an inversion of subject and object. Whereas in English we say "An epidemic has come into the town," in Swahili it is "The town has come into an epidemic" "**Mji unangia maradhi**" (cf. Luke xxi. 26). For another of these inversions, see note on Verb "To Have," Study VII.

SOME OTHER CONTRACTIONS

The verb prefixes "ha," "hi," "hu" are contracted respectively from "nika," "niki," "ni ku" by the following process—

$$nik = nk = k' = h$$

In the same way the future prefix nita becomes n'ta, and finally t'.

Similarly,

$$\begin{aligned} mbwa &= ni wa \\ nda &= ni ya \end{aligned}$$

For full explanation see p. 20, "African Aphorisms."

SOME INVARIABLE ADJECTIVES AND QUASI-ADJECTIVES

The following adjectives cannot be used directly to qualify a noun. They may be employed with the relative verb "To Be," or as adverbials to the strong verbs, or substantively following the preposition "of" (-a):—

hai, alive, living	ni hai, I am alive	mtu aliye hai, a living man
tamu, sweet, nice	uji huu n tamu, this porridge is sweet	ujii ulio tamu, sweet porridge
safi, clean, pure	yu safi, he is clean	k'itu kilicho safi, a clean thing

mato (lit. eyes), awake	yu mato, he is awake	hulala mato, he always sleeps with his eyes open
tupu-tupu, naked	alikimbia tupu-tupu, he ran away naked	

COMPARISON OF ADJECTIVES

Swahili has no degrees of comparison. There are various ways of comparing—

(1) By contrasting one statement with another—
wewe ni mdogo, yeeye ni mkubwa is equivalent to “He is bigger than you.”

(2) By the use of the verbs kushinda and kupita (to surpass, to excel), also the verb kuzidi, to increase—

Salim anamshinda Hamisi
kwa nguvu, lakini Hamed
anawashinda wote,

Wao ni wangi kupita
swiswi,

Mwaka jana watoto wali-
kuwa wema, mwaka huu
wanazidi,

Salim is stronger than Ha-
misi, but Hamed is the
strongest of all.

They are more numerous
than we are.

Last year the children were
good, this year they are
even better.

(3) By the adverb “zaidi,” more, and the relative
“kuliko,” than (lit. “where there are”).

Nyumba hii ni ndogo, hii
ni ndogo zaidi,

Mato yako ni mazuri kuliko
yangu,

This house is small, that is
smaller.

Your eyes are more beauti-
ful than mine.

(4) The indeclinable adjectives “heri” (better) and
“bora” (best) are used respectively with a comparative
and superlative force.

Ni heri wende,

It is better (or well) for
you to go.

Bora afia,

The most important thing
is health.

Also they have a plan to bring a stream of water from that big lake into their fields, in order (*illi*) to irrigate (*kutia maji*) [in the] dry season (time of fierce sun or north-east monsoon). ⁷ This (*hayo*) water is continually bubbling up, and pours ⁶ over that patch of jungle to no purpose. ² "Where there is, or are" (lit. "the place which has" contracted from "palipo na").

³ The adverbs "kama" (as), "jinsi" (as or how), and "kama vile" (just as) require the relative suffix "vyo" to terminate the verb they precede, in order to complete the sense. There are other instances where plural concords of cl. iv. have an adverbial force—

vizuri, vyema, well, nicely. hivi, hivyo, vivyo, thus, so, likewise.

vibaya, badly. vivi hivi, precisely so.

vyengine, differently. vile vile, in like manner.

⁴ "Time after time," "From time to time," "Now and again."

⁵ Where in English we change the demonstrative "*this*" to "*that*" in order to sharpen the contrast, in Swahili the same adjective is repeated with a change in the tone of voice only.

⁶ See Adverbial Prepositions, Study XX.

⁷ Demonstratives may sometimes precede their nouns; other adjectives, never.

DERIVATIVE FORMS OF THE VERB

1. The Causative. The simple verb, and some of the following verb forms, may become causative by changing the termination into -sha, -za, -sa, -ya, -nya or -vya.

(a) -sha. *Kupasha* (from *kupata*), to cause to get ; *kusomesha* (from *kusoma*) to cause to read (hence to teach) ; *kufundisha* (from *kufunza*) to cause to learn (hence to teach) ; *kunyosha* (from *kunyoka*) to cause to be straight ; *kurusha* (from *kuruk'a*) to cause to fly (hence to throw).

(b) -za. Most verbs whose stems end in two vowels form their causatives in -za. *Kukataza*, to prohibit (from *kukataa*), to cause to refuse ; *kukweza* (from *kukwea*) to raise ; *kukimbiza* (from *kukimbia*) to cause to run away ; *kutoza* (from *kutoa*) to cause to give out (hence to tax, to fine) ; *kupunguza* (from *kupungua*) to lessen, to diminish (trans.) ; *kusahauza*, to make forget.

(c) -sa. *Kutakasa* (from *kutakata*) to cleanse ; *kunusa* (from *kunuk'a*) to take snuff.

(d) -ya. *Kuponya* (from *kupona*) to cause to escape or get out of ; *kuonya* (from *kuona*) to warn (*i.e.* to cause to see) ; *kukanya* (from *kukana*) to forbid (*i.e.* to cause to refuse or deny).

(e) -nya. *Kufunganya* (from *kufunga*) to have (baggage, *mizigo*) tied up ; *kugawanya* (from *kugawa*) to have divided up.

(f) -vya. *Kunavya* (from *kunawa*) to cause (hands) to be washed *i.e.* (to wash some one's hands, or face, or feet) ; *kulevya* (from *kulewa*) to make (some one) drunk ; *kujurya* (from *kujua*) to make known.

NOTE.—A verb may have two causative forms with different meanings. *Ex.* *kuapa*, to swear ; *kuapisha*, to adjure, to administer an oath ; *kuapiza*, to swear at, to curse.

NOTE.—Frequently the causative idea would not occur to an English mind which would employ a different verb altogether. *Ex.* *kupandisha* (to cause to climb) stands for to raise, to promote.

2. The Neuter (also called Resultant or Quasi-Passive) used (i) When a state resulting from an action is considered not necessarily implying an agent; (ii) when we desire to predicate of a substantive that it is capable of receiving a given action. Terminations = ika, ikana (following an *a*, *i*, or *u*, in the stem); eka, ekana (following an *e*, or *o*, in the stem); uka, ukana (following a penultimate *u* in a trisyllabic stem); *Ex.*—

(a) Kupatikana, to be obtainable; kupigika, to be beatable; kuvundika, to become broken, to be breakable.

(b) Kutendeka, to be "doable," to be done, to have happened; kukosekana, to be missing, absent.

(c) Kuraruka, to be torn or tearable; kufumukana, to be separated, broken up; kuzumbukana, to be found, to come to light.

NOTE.—The student must distinguish between Neuters and Reciprocals with -ana terminations; also between Neuters and Transitives with -ika terminations. In each case the sense will decide. *Ex.* Kuonana (rec.), to see each other; kuonekana (neut.), to be visible; kufitamana (neut.), to be hidden; kupika (trans.), to cook; kuzika (trans.), to bury; kufitika (neut.), to be concealable; kuangika (trans.), to hang up; kualika (trans.), to invite; kualika (neut.), to crack or split; kusimika (trans.), to erect, to set up.

3. The Applied or Prepositional has four uses: (I) To supply the simple verb with a prepositional meaning; (II) To express completeness (with the word "mbali" (*right away*) suffixed); (III) To attach to the verb a new meaning; (IV) To localize action. It is formed by inserting *i* (after an *a*, *i*, or *u*, preceding in the root), or *e* (after an *e*, or *o* preceding in the root), before the final vowel of the stem.

Examples of Use I.—

(a) Kupatia (from kupata), to procure *for* (some one); kupitia (from kupita), to pass *by*; kuangukia (from kuanguka), to fall down *to*, *at*, or *before* (some one or something).

(b) Kunenea (from kunena), to speak *against*; kuombea (from kuomba), to pray *for*.

(c) When the stem ends in two vowels, the letter *l* is inserted before the prepositional vowel for the sake of euphony. *Ex.* Kuzuilia (from kuzuia), to prevent *by*; kupasulia (from kupasua), to split *with*; kutembelea (from kutembea), to walk *about*; kung'olea (from kung'oa), to root up *with or for*.

(d) The same rule holds when a Causative becomes a Prepositional. *Ex.* kuangushia, to cause to fall down *to*; kusomeshea, to cause to read *from*; kujalizia (from kujaa), to cause to fill up *with*.

Examples of Use II.—

(e) Kutupia, or kutupilia mbali, to throw right away; kuishilia (or kupotelea) mbali, to be gone out of reach altogether, to be lost for ever; Kuulia mbali, to kill off out of sight. The prepositional syllable *lia* is occasionally separated from the verb and made an independent word. See Psalms ii. 3, lxxxiii. 4 (Ed. 1904).

Examples of Use III.—

(f) Some verbs reduplicate the termination to impart a different meaning from that conveyed by the simple prepositional form: *Ex.* Kupiga, to beat; kupigia, to beat for or with; kupigilia, to consolidate a floor or roof by a special process of hammering peculiar to the Swahilis. Kuata, to leave; kuatia, to leave to or for; kuatilia, to forgive, to remit. Kwenda, to go; kwendea, to go to (a person); kwendelea, to go on, to make progress. Kupenda, to love; kupendelea, to favour.

NOTE.—Some verbs have two prepositional forms which can be used interchangeably. *Ex.* Kuja, to come, makes kujia or kujilia; kufa, to die, makes kufia or kufilia; kufika makes kufikia or kufikilia.

Examples of Use IV.—

(g) Limia hapa, cultivate here; imeishia huko, it finished off there.

4. The Reciprocal.—Transitive verbs are made reciprocal by adding -na to the root, intransitive verbs by adding -na to their prepositional form. *Ex.* Kusaidia, to help; kusaidiana, to help each other: kushika, to hold; kushi-

kana, to hold each other (or to hold together): kuimba, to sing (intrans.); kuimbiana, to sing to one another: kulia, to cry, to call; kuliliana, to call to one another. Causative reciprocals are common—Kusomeshana, to cause each other to read; kutozana, to fine each other. When the stem ends in two vowels the syllable *li* or *le* must be inserted before the *ana*; kutoleana, to give out to each other; kufuliana, to wash for each other, to beat on each other (as waves).

5. The Reflexive.—This is formed by the insertion of the particle *ji* (self) immediately before the verb stem. *Ex.* Kujipenda, to love oneself (*i.e.* to be selfish); kujifanya, to make oneself (*i.e.* to pretend); wajifitia nini? what are you hiding yourself for? (prepositional reflexive); tutajingiza, we will force ourselves in (causative reflexive).

6. The Subtractive.—The idea expressed by the English prefix *un-* is conveyed in Swahili by inserting the vowel *u* (and in rare instances *o*) before the final *a* of the root of transitive verbs. *Ex.* Kufumba, to close (eyes, hands, etc.); kufumbua, to open, to unclose (eyes, hands, etc.); kukunda, to fold; kukundua, to unfold; kuvala (nguo), to put on (clothes); kuvua, to take off (clothes), to undress.

7. The Reduplicated, or Modified Form.—This is obtained by doubling the verb stem, and has the effect of weakening the signification. *Ex.* Kum'piga-piga, to beat him gently; Mtoto alia-lia, the child is fretting (not actually crying); kukunda-kunda, to crease (*i.e.* to make little folds); kulewa-lewa, to be giddy (from kulewa, to be drunk).

NOTE (1)—Most of these forms may be made upon one another as well as upon the simple root.

NOTE (2)—Some verbs are only extant under one or other of the derived forms.

NOTE (3)—There are *roots* which have the appearance of being derived forms, but the sense shows that this is only apparent.

Mwindaji alikwenda¹ bara kuwinda nyama wakubwakama simba, na ndovu na nyati na kifaru. Aliandika (*wrote on*, i.e. *made a written agreement with*) wapagazi mia wa kikamba kufuatana nae. Alitukua farasi wawili na nyumbu watano. Ndiani alipiga t'ia mmoja, k'ongoni watatu na p'aa wane illi awapatie chakula wat'u wakwe. Baada ya mwendo wa siku sitashara walifikilia mahali penyi t'umbiri na nyani wangi. Walipokuwa wakitezama nyama hao jinsi waruk'avyo miti hata miti, walisikia simba kunguruma² karibu nao. Wof'e walifanya khofu isipokuya mwindaji mwenyewe ambae alitukua banduki k'ubwa ya³ kizungu makusudi apate kupiga nyama wakali (of) nam'na hii. Aliposongea karibu kupeleleza, simba mko alitokea² mbele yakwe. Mara akalekeza bunduki yakwe, akampiga risasi mbavuni, akaanguka akafa⁴ pale pale. Lakini wengine wawili simba waume walioandama nao waliposikia kulia kwakwe, wakatoka mbio mwituni.⁵ Hapo

¹ The “-ni” of the locative is occasionally omitted to give a general and indefinite sense as opposed to a particular and special force which the locative termination conveys.

² See Adverbial Prepositions, Study XX.

³ The syllable *ki* has various uses—

(a) *Diminutive Prefix*—*Kibweta*, little box; *kidude*, a little thing.

(b) *Language and Nationality Prefix*—*Kisawahili*, the Swahili language; *Kimasai*, the Masai language; *Kingereza*, the English language; *Viazi vya Kizungu*, European potatoes; *Wapagazi wa Kitaita*, Taita porters.

(c) *Descriptive or “Sort” and “Kind” Prefix*—*Nguo za kifaume*, royal garments (i.e. of a kingly sort); *mwendo wa kiume*, manly gait; *mambo ya kike*, feminine matters; *maneno yo kitoto*, childish language; *kiususo*, face downwards; *kifulifuli*, in eager haste; *kingalingali*, prone, lying flat on the back.

(d) The characteristic particle of singular nouns in the fourth class.

⁴ There are two ways of making an emphatic demonstrative—

(a) *By reduplicating*—Ex. *yule yule*, that same (man); *pale pale*, that same (place) or on that spot, etc.

(b) *By prefixing the pronominal particle*—Ex. *ye yule*, that very same man; *pa pale* (or *pa pale pale*), that very same place, etc.

⁵ The concords of “mahali,” have a *time* as well as a *place* significance.

ndipo yule mtukuzi wa bunduki alishikwa ni khofu k'uu, akasema Kazi hii yatisha, nae akakimbia. Hivi mwindaji, masikini, aliatwa pekee, bila silaha. Simba walimruk'ia, wakamrarua vipande-vipande, wakam'la. Wadudu wak'e-tio nyumbani mwa wat'u ndio hawa—m'bu na ng'ge, na t'andu, na kiroboto na k'unguni na mjisi kafiri. Wajao mara kwa mara na kuharibu vit'u sana sana, ni mtwa.

The python is a large snake, he can crush a donkey or a small zebra. Leopards and hyenas prowl about (*tembea tembea*) [at] night singly (*mmoja-mmoja*), hippopotami go in (*hwenda kwa*) a herd. Foxes have their dens in the forest, but dogs like to live in their masters' houses (*nyumbani mwa bwanazao*). All birds and butterflies have wings; they fly about in the air. Ducks, guineafowls, kites, and pigeons can fly; ostriches are very large birds, they do not fly. The crocodile has no tongue. The monitor lizard has a long tail, he eats eggs. The flesh of pigs and rabbits was forbidden to people of old. Cats and lions have rough tongues (*zakuparuza*). The slow gait of (*ya*) the tortoise takes him (tr. cause him to arrive) far. Apes and big monkeys resemble men. He who creeps [about] in the darkness deserves to be shot. Camels are huge beasts that carry heavy loads—one camel can carry a load of ivory of (*wa* referring to *mzigo*) 380 lbs. [weight].

¹ Etymologically the word "p'ole" cannot bear the meaning put upon it here; it is rather the tone that conveys it.

² A very common ellipsis. The omitted word, "ndia" (ways) is never inserted.

³ Familiar abbreviation of "wewe."

This is a Government hospital where white people are nursed. Black people go to the Mission Hospital, which is (*iliyoko*) on the island. There (*huko*) medicine is given daily (*killa siku*) to every one who comes, whoever he may be. Those who are ill receive medical treatment (*hugangwa*) and are cared for. Besides this (*zaidi ya haya mambo*) the doctors train (*hufundisha*) intelligent (having intelligence) young men [in] this work of mercy. These helpers wash sores, dispense (*hutoa*) medicine, take out (*ng'oa*) teeth, and bandage (*funga*) wounds. Those who have colds, coughs, chest complaints, rheumatism, catarrh and fever live [in] one house, smallpox patients (having s.p.) [in] another (house), and those who are suffering from (*wauguo*) boils, (or) abscesses, (or) the itch, (or) big sores, or yaws live [in] a third (house). The daughter of (tr. his daughter) the lame rich man came yesterday with a malignant boil; to-day it came to a head and the doctor lanced it. Much pus came away (*toka*). These two dumb men have fever. Give them each (*killa mt'u*) five drops of this drug (of) to cause (*toa*) perspiration, and tell them to go home and go to bed (*lala*). It is the custom here that every one who wants medicine must⁷ bring a bottle—empty and clean! Why do you not keep still? Because you⁸ hurt my sore place. My adopted (*wa kunilea*) mother has (feels) pains all over her body; she coughs and sneezes continually. Do not go into that house⁹ lest you get chicken-pox.

⁶ This and many other Arabic words do not follow the Swahili rule of accentuating the penultimate.

⁷ A favourite expression for "bring" is "kuja na" (to come with).

⁸ When transitive verbs express an action that affects a man's person or being, the idea of possession is conveyed by inserting the personal objective infix in the verb, excluding the possessive adjective from the sentence. Ex. *Umenikanyaga guu*, you have trodden on me (the foot); *itakuumiza kitwa*, it will hurt you (the head).

⁹ "Lest" is translated by the Negative Subjunctive of "kuja" used as an auxiliary followed by the "ka" tense of the principal verb.

ADVERBS AND ADVERBIAL PHRASES

Adverbs generally follow the words they modify, be they verbs, adjectives, or other adverbs. Pure adverbs—especially of manner—are not very numerous, but they can be extemporized to an almost unlimited extent by prefixing the preposition *kwa* to both nouns and infinitives of verbs. *Ex.* *kwa furaha, joyfully*; *kwa kuteka, laughingly*.

The beginning of all wisdom is to fear God and to keep (*shika*) His commandments. The liwali's son (his son the liwali) does not study any longer, he has finished his education. His father sent him to school when he was quite small and he himself persevered, and endeavoured [to get on], so that (*hata*) he got great praise (many praises) from his master the other day when he left school. If a boy transgresses he must ask forgiveness, and he (*nae*) will be forgiven; but if he hides his faults and tells lies he will be disgraced (*pata aibu*), and (*nao*) his parents will be sorry. These girls have no manners nor respect, they play [about] all day and (*tena*) have no one to teach them. If they were allowed (got leave) to come to school they would not be [so] mischievous and obstinate as they are (*kama vile walivyo*). Love is a thing of (having) great value in the world. By love we can help those who are oppressed, and instruct those who have no knowledge. It is not the correct thing here to ask for gratuities. He who does this (thing) has no sense of shame. If your companion is ahead of you do not be displeased. The young men who get promotion are those who honour their parents and teachers. I can see plainly that you will not be able to complete your task this week.

PREPOSITIONS

Pure prepositions are few in Swahili, the reason, presumably, being that the prepositional form of the verb and the locative case of the noun largely obviate the necessity of using them. They are:—

katika, in, into, among, about,
out of, on.

hata, even, until, as far as.

mpaka, until, till, as far as.

kutoka, *toka*, *tokea*, from, since.

tangu, from, since, for (*tangu*
siku nyingi, for many days).

na, with, together with.

kwa (instrumental) by, by means
of, with, for, to, through.

ni, by (said of the agent).

pasipo, without.

bila, except, without.

(i)*sipokuwa* (var.), save, except.
-a (var.), of.

Frequently the same preposition is used with two entirely opposite meanings, each being imparted to it by the verb with which it is employed. *Ex.*—

Ametoka katika nyumba,	<i>he came out of the house.</i>
Amengia katika nyumba,	<i>he went into the house.</i>
Nalitoka kwa mwalimu,	<i>I came out of the teacher's [house].</i>
Nalingia kwa mwalimu,	<i>I went into the teacher's [house].</i>

ADVERBIAL PREPOSITIONS

These are formed by combining in one phrase an adverb and the variable preposition *-a* (of). Pronouns following these require to be in the possessive case. *Ex.*—

mbele yangu = *before me.*
 nyuma yakwe = *behind him.*
 kinyume chako = *against you.*

juu ya, <i>upon, above, over, against, about, with regard to.</i>	baada ya, <i>after (time).</i>
tini ya, <i>under, underneath.</i>	k'ando ya, <i>by, by the side of, beside.</i>
mbele ya (or za), <i>in front of, before (time and place).</i>	k'ando k'ando ya, <i>on both sides of, round about.</i>
nyuma ya, <i>behind, after (time and place).</i>	karibu ya, <i>near, near to, nearly.</i>
ndani ya, <i>inside of, in.</i>	kati ya, <i>during.</i>
nde ya, <i>outside of, out of.</i>	kati kati ya, <i>in the middle or midst of.</i>
cabla ya, <i>before (time).</i>	kinyume cha, <i>against, contrary to.</i>
kwa ajili ya, <i>for the sake of.</i>	upande wa, <i>on the . . . side of.</i>
kwa sababu ya, <i>because of, on account of.</i>	zaidi ya, <i>beside, in addition to.</i>
badala ya, <i>instead of, in exchange for.</i>	mahali pa, <i>in lieu of, in place of, instead of.</i>
	mfano wa, <i>like, similar to.</i>

Occasionally *na* (with) is substituted for (*y*)*a*. Karibu na, mbali na, pamoja na. These are followed by the objective not the possessive pronoun. *Ex.*—

mbali naswi = *far away from us.*
 karibu nae = *near him.*
 pamoja nao = *together with them.*

CONJUNCTIONS

Several verb tenses have a conjunctive force. *Ex.*—

(1) The Subordinate Tenses of the Indicative, Imperative, and Subjunctive with “*ka*” (and). *Ukafanya* (*and you made*), *kafanye* (*and make*), *ukafanye* (*and that you may make*).

(2) The Participial with “*ki*” (if). *Akifanya*, *if he makes*.

(3) The Negative Participial with “*sipo*” (if not). *Wasipofanya*, *if they do not do [it]*.

(4) The “Even should” or “Although” Tense with “*japo*.” *Nijapofanya*, *although or even should I do*. . . .

(5) The “Though” Tense with “*nga*” or “*ngawa*.” *Tungafanya* or *ingawa twafanya*, *though we do*. . . .

Other conjunctions not bound up in verbs are—

na, and, but (this combined with the pronominal suffix of a noun preceding it in fact or thought means “also”: *mfaume nae akenda*, *the king went also*).

pia, also, too (stands at the end of a phrase or sentence).

tu, provided that, if so be that, if only, so long as (stands at the end of a phrase or sentence).

lakini, but (see note subjoined).

walakini, but.

illa, *ela*, but (except)—not strongly adversative.

tena, again, moreover, furthermore, besides.

bali, but, rather, but rather.

basi, therefore, then, now, so.

ndiposa, therefore, and so, that is how it was.

kwamba, *kama*, *kana kwamba*, that, whether, if.

ya kwamba, *ya kuwa*, that.

illi, *illi kwamba*, in order that, to the intent that, so that.

au, *au* . . . *au*, or, either . . . or.

wala, nor, neither . . . nor.

pamoja na haya, nevertheless, notwithstanding.

kisha, then.

kwa kuwa, *kwa maana ya*, *kwa sababu ya*, *kwani maana*, for, because, for as much as, the reason being.

hata, and, even.

kwa ajili ya hayo, wherefore.

k'wenda (followed by “*ka*” tense), supposing that, may be that.

isipokuwa, howbeit, but.

mithali na (*u* . . .), supposing (you were to . . .), (followed by Subj.).

NOTE ON "AND" AND "BUT"

"Na" bears both meanings. In using this word its original force should be kept in mind, which is not that of the conjunction "and," but of the preposition "with."

It means "and" as a conjunctive particle—

Juma na mkewe, *Juma and (or with) his wife.*

It means "but" as a contrastive particle—

Juma ni mzuri sura zakwe, *Juma is handsome as to his countenance, but his wife is ugly.*
na mkewe ni m'ovu,

Note.—Here "lakini" (but) would be quite out of place.

Na is used to introduce a subjunctive phrase: na tuombe, *let us pray.* When it precedes a vowel the "a" may be elided to form one word. Ex. Naje for na aje.

Illa, ela, but. The root-meaning "except" must be borne in mind.

Wat'u wot'e wamekuja, illa *Everybody came, but you did not come.*

Juma ni mzuri, ela mkewe *Juma is handsome, but his wife is not.*

Lakini, but. This is always used by way of qualifying what has been stated in the previous sentence, or what is implied by it—

Juma ni mzuri, lakini ni *Juma is handsome, but he is a cripple.*

Ulinambia ya Juma, lakini *You told me about Juma, but not about his wife.*

Isipokuwa, but. The use of this is much the same as "illa" with an extension of meaning.

Dini ya kweli ndiyo ituongozayo kwa Mngu na kutufariji roho, Twaamini kwamba Mmasibia ndiye mwcoyi kuwa nayo dini hiyo. Muisilamu humwita Mnasara, kafiri; lakini pamoja na haya husema, Kafiri akufaae¹ si Muisilamu asiyekufaa; maana, ajapo² shikana sana na dini yakwe³ yeyo na kudharau wenyi dini nyengine

¹ “Si” = is better than. This is a common ellipsis in bye-words and proverbs, and seems to stand for, “[Give me] . . . and not . . .”

² Reciprocal verbs are usually followed by “na” (with) reminding us of the frequent English prefix (or infix) “con-” (com-), with. Equivalents for reciprocals may readily be found in words of this category. Ex. *Pigana*, to combat; *shindana*, to contend, to compete, to conflict; *shikana*, to be connected; *patana*, to be reconciled, to consent, to make a contract; *jadiliana*, to contradict; *gandamana*, to congeal, etc.

³ This insertion of the separable pronoun in addition to the possessive makes the phrase correspond exactly to the English, “His own religion.”

wo'e, haoni vibaya kamwe kuwatumia makafiri, akijiona kufaidiwa nao tu. Muumba wa mbingu na nt'i na vyot'e vilivimo ndiye Mwenyiezi Mngu. Aliyetukomboa, kwa kutufilia msalabani, ni mwanawewe pekee, Bwana wetu Jesu Masihi, ambae ni Mwokozi wa walimwengu wo'e. Afunzae nia zetu na kututawala n'afusi ni Yeye Roho Mtakatifu, aabudiwae na kutukuzwa pamoja na Baba na Mwana. Katika kanisa la Masihi kuna daraja t'atu—mabishopu, makasisi na mashemasi. Kazi yao wo'e ni kuhubiri injili na kulisha kundi la Mngu. Kundi hilo ndiyo jamaa barikiwa ya waaminifu wo'e. Masihi ali-weka sakaramenti mbili kwa wafuasi wakwe—Mabaputizi na Karamu ya Bwana, hiyo yaitwa nayo Ushirika Utakatifu. Katika chuo cha Biblia kuna taureti, vyuo vya manabii, zaburi, mithali, injili, matendo ya mitume, na nyaraka kadh'awakadha. Vyuo hivi vyo'e vyam'shudia Jesu Masihi kuwa ndiye Mwanawewe Aliye Juu Sana; wanafunzi wakwe nao walimkubali wakitiwa hakika kwa ishara zakwe zot'e alizotenda mbele yao muda wa kuwamo ulimwenguni. Illa neno k'uupita yo'e nikule kufufuka kwakwe mautini kwa ajabu kulikomwonyesha wazi kuwa mshindi halisi juu ya kifo na ahera na nguvu zot'e za kuzimu.

Man's lifetime is short and (*tena*) his thoughts are evil. Saying (Inf.) prayers will not take away sin, neither will bowing (Inf.) down to idols cleanse the soul. Muhammedans say there are five things necessary to salvation: To pray, to give tithes for alms, to witness to Muhammed by reciting the creed, to fast [in] Ramadhani, and to go to Mecca. The New Testament teaches us that we are not saved by good works, nor by tears of repentance; but by faith in the Lord Jesus Christ who died for our sake and offered His body as (*kuwa*) a sacrifice to God for the sins of the whole world. They who believe [in] Him have their nature changed (*hugeuzwa asili*) by the Holy Spirit, so that they love (*waka-*) the things which they formerly hated, and hate those which they

loved in the first instance. The Muhammedan religion is called the "Easy Way"; the reason being that those who follow it are not required to give up worldly pleasures or the lusts of the flesh. If a man becomes a Muhammedan, sins such as hypocrisy and deceit are not forbidden to him. He who does righteousness is blessed, he who breaks the law of God is cursed. The writings which are accepted and believed by Muhammedan converts are called the Koran, a book containing (*chenyi*) 114 chapters. In chapters four, six, seven and forty-eight the doctrine of devils and angels is set forth. All the faithful meet in the Mosque every Friday, when the Imam preaches to them. The Swahilis say, "Give thanks [for] what you have," and again, "The torture of the grave the dead man knows."

INTERJECTIONS

Emotion is so much expressed by gesture in Swahili that Interjections are at a discount. Particularly is this true of the more educated classes. The following are a few Interjections in common use :—

a! oh!	hebu! (hwebu), please do! won't you?
a-a! no!	howe! there then!
ahasanta! thank you! it is well!	kumbe! what! behold!
ai! oh! (of pain).	ngawa . . . ! (followed by Neg. Ind.), oh that!
aka! what next!	lai'i! oh that! would to God!
ati! I say! look! you know!	lau kwamba! (followed by Pres. Ind.), oh that!
basi! stop! that will do! enough.	lo'! well! (great surprise).
chapu chapu! look sharp! hurry up!	ngoja kwanza! wait a minute!
'ewa! all right! very good!	ole wangu! alas! woe is me!
'ee wallah! yes, by God!	sa'! yes! here I am!
ewe! ee! O! halloo! hi!	salala! plague upon you!
haraka! haste! hasten!	sumile! make way! move!
haya! get on! come along!	
haya basi! there now! there!	
hima! make haste!	

[“] See p. 111, "African Aphorisms."

NOTE ON REDUPLICATION

Reduplication is common in undeveloped or partially developed languages. In Swahili it affects syllables, words, and phrases, and its uses may be classified as follows:—

1. *To intensify or emphasize.*—*Ex.* Papale, just there; pale-pale, on that very spot; kubwa-kubwa, very large; moto-moto, decidedly hot; pana-pana, very broad; (ku)sihi-sihi, to beseech earnestly; kuponda-ponda, to crush to pieces.
2. *To modify.*—*Ex.* Maji-maji, watery, thin, liquid; mawe-mawe, stony, pebbly, having little stones; (ku)k'ata-k'ata, to cut about, to make little cuts; (ku)zunguka-zunguka, to walk about; (ku)lewa-lewa, to be giddy; kulia-lia, to fret; (ku)ugua-ugua, to feel unwell, to be out of sorts; kunuk'a-nuk'a, to have a slight smell.
3. *To show continuous action.*—*Ex.* Kuruka-ruka, to keep jumping; (ku)sukuma-sukuma, to go on pushing, driving, agitating; (ku)tuma-tuma, to be always sending on errands; kubadili-badili, to be for ever changing.
4. *To give a distributive force.*—*Ex.* Mbili-mbili, two at a time; usiku-usiku, every night, “of a night”; kidogo huku, kidogo huku, a little here and there; kikao wat'u hamsini, kikao wat'u hamsini, fifty in a row (or batch or company); kijaacho kiweke k'ando, kijaacho kiweke k'ando, as each one is full, put it aside.

THE FORMATION OF VERBAL NOUNS

Verbal nouns may be formed—

1. From primary verb stems, active or passive.

(a) By simply prefixing a sonant m' (mu or mw) to denote an agent and by prefixing u (w or mw) to form an abstract. *Ex.*—

mrithi, heir, inheritor	kurithi, to inherit	urithi, inheritance
mtunga (ii.), shepherd	kuitunga, to herd, to tend	(utungaji), shepherding

GENERAL NOTES ON NOUNS AND THEIR CLASSES

1. Many nouns in "ma" (mostly concrete) have a singular meaning and are in cl. iii. *Ex.*—

mashua, a boat.	maradufu, thick calico.
masikini, a poor man.	mashariki, east.
marehemu, the late so and so.	magaribi, west.
marikabu, a ship.	mali (pl.), wealth, property ("mali" takes plural concords also from cl. v.).
malaika, an angel.	
mari ^l adi, a dandy.	majilisi, seat (outside a house— used for palavers).
mai ^l i, dead person. See note 5, Study I.	

2. Others, also in "ma," having a plural form and taking only plural concords (of cl. v.) stand for English nouns which have no plurality in the idea. These are largely abstract nouns and names of liquids. *Ex.*—

mafuta, oil.	mauti, death.
maji, water.	majira, time.
maziwa, milk.	majonzi, grief.
marashi, perfume.	majuto, repentance.
manuk'ato, perfumed ointment.	maradhi, sickness.
mapenzi, love, will.	maridhawa, abundance.
maisha, life.	majaaliwa, enabling (divinely bestowed).
mazoea, habit, custom, use.	mali, property (also in cl. iii.).
mashizi, soot.	manyези, abhorrence, disgust.
maana, meaning, reason, cause.	mate, saliva.
manufaa, profit.	mamlaka, authority, power.
matukio, hatred.	

"Vita" (cl. iv. pl.), *war*, is an instance of this in another class.

3. The student will observe that nouns beginning with an aspirated consonant belong usually to cl. iii. or cl. vii. (pl.). The following, though bearing a resemblance to nouns of cl. iv., are no exception to the rule—

k'in (yangu), (my) thirst.	k'ima (wangu), (my) black monkeys.
ch'unvi (hii), (this) salt.	

ch'aga (zetu), (our) store-houses.

kinda (young bird or animal) has a "ma" plural (cl. v.).

4. Several nouns are in two or more classes with variations of meaning—

mkono (cl. ii.), arm, hand (of body)	lango (cl. v.), large door, gate, entrance
mlango (cl. ii.), door	kuta (cl. v.), high wall
ukuta (cl. vii.), wall	k'apu (cl. iii.), large basket
kikapu (cl. iv.), small basket	manyasi (cl. v.), grass, weeds
unyasi (cl. vii.), blade of grass	madhambi (cl. v.), individual sins
dhambi (pl. cl. iii.), sin (collectively)	goma (cl. v.), big drum
ngoma (cl. iii.), dance, drum	jembe (cl. v.), hoe
kijembe (cl. iv.), pocket knife	mapesa (cl. v.), small change
pesa (cl. iii.), pice	mawingu (cl. v.), clouds
mbingu (cl. vii. pl.), heaven	kiti (cl. iv.), stool, chair (of wood)
mti (cl. ii.), tree, wood	machungwa (cl. v.), large oranges
ckungwa (cl. iii.), oranges	
kono (cl. v.), arm (of river, creek, etc.)	

5. Sentient nouns may be found in nearly all the classes taking the respective plurals of those classes.
Ex.—

CLASS II.

mtume, apostle	mitume
miteea, a laying hen	miteea

CLASS III.

mbari, relative, kinsman	mbari
p'epo, evil spirit	p'epo
k'ala, ichnumen	k'ala

CLASS IV.

kibarua, day labourer	vibarua
kip'ungu, osprey	vipungu
kiumble, mortal creature	viumbe
kiroboto, flea, swift mail-runner	viroboto

CLASS V.

Yahudi, Jew	Mayahu ^{di}
asi, rebel	maasi
tajiri, rich man	matajiri
shekhe, chief, elder	mashekhe
kadhi, judge	makadhi
kuhani, priest	makuhani

CLASS VI.

jana, big lad	mijana
---------------	--------

CLASS VII.

utitiri, utawatawa, poultry lice (used collectively)	
--	--

No invariable rule can be given for the concords of other parts of speech used to qualify such nouns; these sometimes follow cl. i. (*e.g.* malaika wale watakatifu), and sometimes the "irrational" class to which the word belongs (*Ex.* Jimbi hili lawika sana). Others again require some "sentient" and some "irrational" concords (*Ex.* Ndugu zangu watatu wanakuja. Wajolize walimwona. Kijana kike huyu akwita). See note 1, Study VIII.

STUDY V

Come and let us sit down at the table, tea will be brought directly. The tablecloth is not clean, why (is that)? I hear that Juma spilt some coffee here this

morning. Call Juma! Juma! You are called. Yes, Ma'am, here I am (lit. I am come), did you call me? Yes, I did call you. Is it true (that) you spilt coffee on the tablecloth to-day? It is not true, Ma'am. Coffee was spilt; but I did not do it (lit. "not I"). Who was (lit. "is") it then? Perhaps it was the cat. I saw her in the room. Can a cat spill coffee? She can if she is thirsty and wants to drink. That will do, go away now. Tell Ali to bring sugar and bread and honey. Where are the saucers? They are in the cupboard, they forgot to put them on the table. Bring them quickly, the tea will be cold. It is absolutely cold already. It will not do, boys, to be late like this. Now I want spoons and cups.

Bilauri na sahani zatakwa mezani, wat'u waja kula chakula cha mtana hapa leo. Jee, nilete vijiko na uma pia? Ndiyo nataka kuandika meza tayari sasa. Jee, watakunwa maji? Ndiyo, watakunwa maji yakiwa safi. Twaa sinia ukapakue chakula, kisha pigi k'engele ku-waita wat'u. Umesahau kuweka kawa juu ya sahani. Mwambie mpishi apashe moto k'uku wa jana. Jaribu kukunda nguo ya meza sawa sawa. Waweza kuandika meza vizuri nguo ikiwa si safi? La! haifai! Tulionda asali tukaiona tamu. Mtoto alimiza k'itu akasema, Ni sukari. Kwamba ilikuwa sukari angeliteka, lakini sasa alia. Tuondoke, ataata. Mtoto akilia hatapata mkate wa tamu.

STUDY VI

The cook forgot to light the fire. Why did you not do it then? I had no firewood, that is why: the cook has gone to buy (some) in the market. Never mind, you can kill the fowl in readiness. Where is the fowl? It is in the courtyard walking about. Will it be wanted for the mid-day meal? Yes, it will be wanted. Give me a box of matches, please, the fire won't light. Put a little oil in, it will burn up quickly. I do not see (any) oil, perhaps it is finished. No! it is not finished, it is in the storeroom. I saw it yesterday. Are you boiling the

meat? No! I am frying it. Have you cooked rice as well? I have not cooked any. Give me a knife to cut up the vegetables. The vegetables are rotten. They are not rotten, you do not know anything (at all about it). Look, the milk is boiling over. Take the saucepan off the fire. Soot has got into the milk. It does not matter.

Jee unatia munyu na pilipili mtuzini? Ndiyo, kidogo; lakini sikutia katika mboga. Usikoroge maziwa kwa kisu, koroga kwa kijiko. Tezama, umeteketeza nguo, hukuona moto? La! Sikuona k'itu. Jee, mtoto anakuna nazi? Bado, atakuna kisha. Mpishi ametukua mbuzi. Jee, wapika kwa makaa? La! Twapika kwa k'uni. Tukitaka kuoka twafinika sufuria kwa makaa ya moto. Mbona mtoto hakuondoa maivu? Labuda alisahau. Maji yachemka, jee kandarinya itayaika? La! Najua haitayaika. Ilifanywa makusudi kupika maji. Naona moshi yatoka dirishani.

STUDY VII

Come along, let us go out for a little walk. Let us go in the shade then, here the sun is very *hot*. I want to go to the Fort, which road shall we take? I do not know the way, but some one told me that the Main Street leads to the Fort. I am told (or I hear) that the Gate of the City stood (was) here formerly. Perhaps it is true, I was not there. Listen! I hear a noise, the porters are fighting. You had better not go to look, there are a lot of people and a lot of dust. (And) then it is going to rain, we had better return home. No! do not let us go in yet, the rain is not coming, the wind is blowing too much. Let us go to the Custom-house then and see the trollies. Make way! Make way! A trolley is coming at great speed, move out of the road. Take care, there is a stone here, it has fallen from the wall. There is the teacher—he is talking to a poor man—shall we (go and) speak to him? Yes, let us speak to him, he is a good man. Some children are following us: tell them not to come. If a slave runs away we call him a runaway (or renegade).

Watakwa waume tu ; wapiga ngoma kuweta. Wana wake wanachoka, hawawezi kwenda. Labuda watafuata baadae ? La ! wamekosa gari, watak'eti nyumbani sasa. Haidhuru, waweza kwenda kesho asubuhi. Hawatachelewa ? Ndiyo, watachelewa kidogo lakini wanawaume wata-wangoja. Wat'u wakut'ana kwetu, watafuta nini ? Twa-ambiwa kwamba ni masikini, wataka chakula. Ni heri tuwape chakula wasiibe. Wakiiba watatiwa gerezani. Ziko t'ope na t'akat'aka tele hapa, tupite k'ando. Jee, utaweza kufika kwenu kesho-ku'twa ? Naam, tutaweza tusipok'uta upepo wala mvua. Walipiga mbiu langoni asubuhi kusema kwamba watumwa watiio bwanazao wataatika huru.

STUDY VIII

My father's friend has come to visit us, welcome him. I know him, he is not a stranger. Welcome, Bwana, come inside. Do not disturb yourself, Bibi, (please) do not get up. I am only come to bring news. What news ? Are all well ? All are well, thank you. The tidings are only of (good) health. Moreover your father and mother send warm greetings, they want news of you. All are well here. We want news of (the place) you come from. With us, there has been heavy rain, so much so that every one is rejoicing. For rain means abundance (of food). That is true, Bwana, and let us trust (pray) that it will come here as well. Please God it will come. Boy ! bring biscuits and lemonade for the visitor. (There's a knock at the door.) May I come in ? Come in ! Do come inside. Sit down, gentlemen ! How do you do ? We are well, thank God. These guests come from Europe. They have brought a letter for (our) master. Call that lad (and tell him) to take this letter quickly. Look, boy, go with this letter to Abdullah the teacher, he will give you an answer himself. The teacher is talking to his Uncle and Aunt.

Mt'u apiga hodi. Mwambie angie ndani. Yatosha kusema "Karibu," atangia hapana budi. Jina lako

n'nani? Hunijui, ni mgeni kwenu. Niwia radhi, n'na-kuja kuomba wali, ni mgonjwa mimi. Ukiwa mgonjwa, huwezi kula wali. Afudhali unwe maziwa. Twaa pesa hizi, ukununue maziwa. Ahasanta, Bibi, sipendi maziwa, t'anunua kikombe cha kahawa. Wako wagonjwa tele mjini siku hizi. Ndiyo, lakini zamani walikuwa zaidi. Nduguyo anakuja, atakani? Ataka kuonana nawe. Atangoja hata kesho usipoweza kusema nae sasa. N'angoje basi, yuaja sikuzot'e. Asema kwamba jamaa zakwe wam'tukia, tena wanazua neno juu yakwe.

My waistcoat wants stitching. Take it to the tailor in the Main Street. That tailor does not sew well. Perhaps if he borrows a machine he could do it. I will tell him. Your tunic is torn, you must take it off. What shall I do? I cannot wear my father's tunic. Take mine (tunic), it will do for you. Thank you, my friend, it will do nicely. Truly, without a friend a man cannot live in the world. I have lost my handkerchief. No! It is not lost, this child found it this morning here on the verandah. I am very glad because my mother gave it to me some time ago. The girls' skirts want washing; ask them if they have bought some soap. The girls are not here now, they are gone for a walk in the town. Are they gone far? I do not know where they went. I will send this neighbour to look for them.

Vilemba vya wapagazi vinapotea, wasema kwamba wevi walikuja jioni wakaviiba. Wakiwaona wale wevi watawapiga na kuwatia p'ingu. Si vyema kuiba. Tumvike leso kijana kike huyu, yatosha. Hataona baridi, jua ni kali intana. Atalala wapi usiku? Atalala na ndugu zangu wake, wao watam'tunza. Jirani yetu amepimiwa joho, atanycta sana. Mwavuli wako uko wapi? N'nanata ukumbini, tafadhali ulete. Nisamehe, nalisahau kuleta mshipi wako wa hariri na mfuko wako.

Mwalimu wenu alikuja knomba viatu vyangu jana, lakini sikuweza kumpa. Haidhuru, atak'eti nyumbani na ku-pumuzika.

Europeans are very fond of oranges, they are always coming to the market to buy them. How are the Zanzibar oranges sold nowadays? They are (sold) dear, three pice each, for this reason, they are not easy to obtain (many). Our friends were looking for a goat to purchase, but they did not see one. What would they have done with a goat? they have no place to put it. (Quite) true, they have no place; probably they would have killed it for food. A goat has a lot of meat (on it), sufficient for many persons. If you buy it cheap it is very profitable. Look, sir! do you want some bananas? How much are your bananas? Four for a pice, sir. Oh! I can't buy those bananas, they are rotten. Let us go to that poor man, he is selling many things — young cocoanuts, dates, sweet potatoes, vegetable marrows, pumpkins, limes, and even onions and rice. Ask him how he sells the rice; what price per pound? Don't touch that bull, he is very fierce.

Soko ya samaki si mbali, jee utakwenda kuiangalia? Ndiyo, lakini sikulipa unga huu. Unga ule ni ghali, twende kwa mt'u mwengine. Mt'u yule amezoea kudanganya Wazungu. Una haki ni mwivi. Juzi alishindana nami juu ya kasuku. Yeye alitaka pesa nydingi, lakini mimi nalijua kwamba yule kasuku alikuwa mgonjwa, na tena hakuweza kusema neno. Basi nikatukua kikapu changu, nikamuata. Alikasirika sana, na sasa, nikipita, sikuzot'e afanya neno kunisumbua. Fujo hili lot'e maana yakwe n'nini? Mwanamke huyu masikini anapata hasara—mai yakwe yo'e yanaanguka nae hawezikuyazoa. Madobi na masaramala na mafundi wot'e hupatikana sokoni.

STUDY XI

That shopkeeper is a dishonest man (man who has not honesty). If he changes a rupee he gives (people) bad pice. Look here, old fellow, a groat is worth how much (has how many pice) nowadays? A groat, (my) child, is sixteen pice, or four annas. Some time ago I got seventeen pice for a groat. I do not think you got all those pice for a groat; perhaps you have forgotten. I owe so-and-so two dollars, and I have nothing to pay him.. I saw him the other day, and I said to him, "Wait a little." You are indeed poor; you had better go and work somewhere that you may earn (get) some money; so-and-so will not wait long. If I had half a rupee I would have bought a little unbleached calico (and) have (had) a coat made for me. Half a rupee is not enough for a coat, you will want more; perhaps for a rupee and a half, or three-quarters of a dollar, they will let you have a very small coat. Ask the owner (of the shop). Is any one there? Come in, welcome! Give us four hands of twill calico, sir. That will do for a coat, will it not? It will do quite well, my boy; it is good cloth, it comes from Europe. And you yourself, do you want something? I want some nails and some sacks and some brass wire.

Kufanya biashara ni vyema, yaleta faida nyingi. Ukianza na pauni moja utapata mbili baada ya siku chache. Lakini yakupasa kufkiri na kuhasibu sana ununuapo bidhaa yako. Na *tena* yakupasa kutokuwa na mizani ya uwongo, au wat'u watakudai, *tena* watakukimbia, wata-sema, "Ni mt'u mbaya, tusinunue kwakwe." Mt'u mwema hawezি kudanganya jirani zakwe. Wawiwa ni mwenyi duka yule—ulinunua kwakwe mikono minane ya bafuta jana, wala hukumlipa. Si shuhuli yako, mboya watusumbua bure? Tutamlipa kesho. Dhahabu na sifuri hazivundiki. Chuma ni k'itu chema. Mdeni si mwongo sikuzot'e. Pasua kuni hizi. Aina ile ya nguo haifai kwa k'anzu, ina alama-alama.

His hair is black, his teeth are white. Blood is (a) red (thing). Legs and arms and shoulders and lips and eyes and ears and knees we have in twos, but head and face and mouth and stomach and heart we have singly. How many fingers have you? I have ten fingers. How many fingers and toes have you? I have twenty fingers and toes. The tongue has no bone. Teeth and nails and bones are hard things, but the skin and the tongue and the cheeks and the uvula and the tonsils are soft. A man with a stiff neck (*i.e.* obstinate) is no good. The skin of the body and the legs needs to be (thoroughly) washed, but a man will only dip his face and hands in water. So-and-so's leg hurts him. The ear is not greater than the head. A man's brain is that which has intelligence, his body that which has strength, his heart and veins are where the blood is (*lit.* are those which have blood). Women's hair needs to be combed with a comb.

Nyosha mkono wako upande huu. Mwambie anionyeshe guu lakwe. Ni p'ua inuk'ayo harufu, ni ulimi uondao tamu ya chakula. Kundani mikono, watoto, msimame sawa sawa. Ni kilimi kinisumbuacho, chataka kuk'atwa Yanipasa kwenda kwa dakitari. Mweenyezi Mngu aliumba binadamu akampa akili na nguvu. Waume wanyoa, wanawake hawanyoi. Alituonyesha ini na mafigo na mbavu za kondoo aliyeuzwa sokoni jana. P'umzi zatoka kifuani. Wevi walimumumiza k'oo na mangungo. Ngovi yakwe ni laini. STUDY XIII

The sea is vast; there is nothing that binds it. That old man was formerly a sailor; he travelled as far as Muscat and distant islands. The rivers of this country

are not large. This Arab's boat is the one that always takes us to Frere Town. Pull hard (the oars), boys, the tide is going out; we should have reached the other side (by now), but you have not been rowing. I am the fisherman who throws the net. The wind is strong (much); we had better furl the sail. The vessels of the Swahilis go as far as Malindi and Lamu and Zanzibar, but they do not reach to Europe. A canoe has no anchor, nor a rudder, nor a compass. He who will travel by the mail-boat must pay the fare. Where are the Indians today? They have crossed over to the landing-place to ship a cargo in their dhow. The vessel that left here the other day met with, (lit. was struck by) a storm. Many passengers were drowned in the sea, not being able to swim: Where the wave (breaker) is, just there is the entrance (to the harbour).

Wavuvi hwenda killa siku kutafuta samaki katika uzio, wakiwaona wafurahi. Nahodha mmoja, waliyemjua rafiki zetu, alimfunga mwanawewe mlingot'ini kwa kamba asipate kuzama. Mzungu mdogo kule Forodhani ndiye apokeae vyeti kwa wale wasafirio katika madau. Vukani ng'ambu ya pili, maji yajaa. Asiyevua kwa mshipi, avua kwa nyavu. Walimuata yule masikini ambae alikuwa karibu na kufa. Umekwisha choka, wala hatukuona n'ti k'avu bado. Twekani tanga, twende kinani; hatutaona mawimbi wala miamba, kuna shuari. Watakapotakwa mabaharia, ham'tawak'uta pwani. Mashua yetu ni fupi, tena makasia ni marefu.

STUDY XIV

Our brothers whom you were calling have gone to hoe in the field. The younger one does not even know how to pull up weeds; that is the reason of the elder one going that he may teach his younger brother. What trees are there in your plantation? There are mango trees, cocoa-nut palms, guava trees, plantain trees, lime

trees, tamarind trees and baobabs—all bear fruit. Besides, there are cassava and pineapple plants, beans and beds of sweet potatoes. Very good indeed! You have everything you want, then, except orange trees. Yes, and orange trees we do not want because their fruit is no good. Why? The oranges which I ate here the other day were very sweet. That may be, but the (their) trees did not grow here; those nice eating ones (which are eaten) come from Zanzibar. Do not draw water with a bucket that leaks.

Wak'ulima wapandao mbayu mbaya hawatavuna mavuno mazuri. Mwenyi bustani hii hutupa sikuzo'e maua mazuri. Hakuna matunda mangi katika nt'i hii; kuna maembe na mapera na mananasi na ndizi tu-basi! Lakini kuna mengine zaidi—ndimu na nazi na machungwa na k'waju na matomoko na malimau, uliyasahau haya. Jirani zetu hawajatimba kisima shambani mwao, wakali wakijenga kibanda. Ndia yenu ni p'ana, yetu ni nyembamba. Mwitu uliokuwapo hapa umetemwa wo'e kwa mndu. Nyasi na mimea yo'e inakauka kwa jua kali, hata magugu na majani na miba pia. Tema lile shina kwa jembe. Simpanzi peke yakwe ajuae kwamba udongo huu ni mbaya. Matunda haya hayafai kuliwa, ni mabiti kabisa. Moja tu ni bivu.

STUDY XV

The porters do not want to carry the loads, they say they are heavy. If they do not carry them they get no food money then. Tell them it is not far where we are going to-day, when they arrive they (will) can rest. The headman is very severe, he has no pity; he is always scolding the men. And then again this morning the guide missed the way and we got lost in the jungle. When we were in there we came across some other travellers who were each carrying a flag and a gun. The chief of that village is coming to talk to our interpreter, who is the only one able to translate his language. This

old man loves to hear the news of the coast. He wants us to stay here for some days, to camp out altogether and put up our tents. No! I do not like (this) place, and besides the water is finished in the soldiers' gourds, and the corporal says that they will not put up with it, waiting much longer. Let them start on the march now at once then and get off; we have had a halt, that is enough, my good fellow.

Wat'u wa nt'i hizi hujenga maboma mijini mwao. Hupigana kwa nyuta na mishare, mikuki na rungu ; killa mmoja hutukua ngao. Tujapochoka yatupasa kuvunda k'ambi kesho jimbì likiwika ; mwambie yule mjinga atuamshe alifajiri. Taarishi atakapokuja, asikari watapiga mzinga. Ndia hii imekufa, ni heri turudi. Ukiumpwa ni siafu, utaumia ; ela tungu hawaumizi. Mt'u mwenyi nguvu aweza kuinua mtaimbo. K'ata za wana-wake zilianguka shimoni. Wapagazi wetu wangeli tangamka kwamba hatukukaza mwendo. Usiwasemee, wasimamie tu. Wambie wakipata mafuta ya mbono katika miti hii, wataweza kuyauza watakaporudi p'wani.

STUDY XVI

This year it did not rain much in the rainy season (or great rains) but the lesser and latter rains were plentiful, thank God. It is right that people should rest on Sunday and work for six days. Why is the rain late (in coming)? It is not yet the proper time for the great rains; they may come on to-morrow, the sky has been very cloudy all day, doubtless rain will soon fall. On Thursday night the people came back from their stay at Jomvu at 11 p.m. The moon now is shining all night. Long ago there was darkness on the earth, then God Almighty created light and there was brightness everywhere. There will be new moon next week, at the time the sun sets; then the heathen people will get an opportunity for their dances. Last year the N.E. monsoon (blew) was very strong, but the S.E. only very slight. What time is it

now? It is ten o'clock in the morning. So-and-so possesses a silver watch and a gold chain.

Dalili ya mvua ni mawingu. Miongo miwili inapita tangu alipokufa babaetu. Ulikuwa wapi mwanangu muda huu wo'te? Sikwenda pahali, nalike'ti papahapa. Mamaako alikwita mara mbili t'atu, hukusikia? Sikusikia lolot'e, nalikuwa nimelala. Zamani moja nyota k'ubwa ilionekana mbinguni. Wat'u wa kale waliifuata, ikawa kiongozi kwao. Katika nt'i hizi jua latwa saa thinaashara jioni. Asubuhi kwacha saa hidaashara. Jumaa-pili ijayo watazidi kuja mapema. Wat'u wema wapungua ulimwenguni. Mawingu yametanda mbinguni. Nt'i imengia ndaa. Mwenyiezi Mngu daima ameongeza neema na nguvu kwa wat'u wakwe.

STUDY XVII

A traveller is a poor man even though he be a king. He who goes up-country must of necessity have patience, (for) he will doubtless meet dangers and difficulties (lit. hard things), maybe he will also suffer loss. Nowadays travelling is not like (what it used to be) long ago. Now there is a train which takes you anywhere you like —hills, valleys, precipices or plains. It goes uphill, it goes downhill; where there are rivers or streams it crosses by a bridge, there is no obstacle that it cannot surmount (lit. there is nothing that hinders it). And in addition to this the white man has built railway stations at every place where the train stops, so that those who are travelling may have an opportunity of getting in and getting out just as they like. Now and again there is war up-country—this tribe quarrels with that tribe over a spring of water or some other matter. Then they fight and a great many are killed. All sorcerers, wizards, and witches, are the enemies of mankind.

Hapa pana misheni, wat'u wamepanda mahindi na mpunga, nganu na mtama. Kisha wana shauri kuleta

mkondo wa maji katika ziwa lile kubwa mashambani mwao illi kutia maji wakati wa kasikazi. Hayo maji hububujika daima na kumiminika bure juu ya kishaka kile. Washenzi wak'etio k'ando ya nguu t'atu hutafuna tumbaku mtana kutwa. Avutae tumbaku sharti atumie kiko. Walipatana kutuongoza mahali penyi mipira na mipingo pamoja na mikoma, lakini tulipofika mjini mwao, walikataa. Taifa hii ina ng'ombe chacho tu, wenyewe huketia nti ya kunge na umande. Maji yatiririka mlimani hata nti ya t'ambarare.

STUDY XVIII

A sportsman went up-country to hunt big game—such as lions, elephants, buffalo and rhinoceros. He wrote on a hundred Wakamba porters to accompany him. He took two horses and five mules. On the way he shot one giraffe, three haartebeest, and four gazelles in order to procure food for his men. After sixteen days' march they came to a place abounding with monkeys and apes. While they were watching how these creatures jump from tree to tree, they heard a lion roar near them. They were all afraid except the hunter himself who was carrying a large European rifle for the purpose of shooting fierce beasts of this kind. When he went near to examine, a lioness appeared in front of him. He immediately levelled his gun and shot a bullet into her side; she dropped down and died on the spot. But her two male companions who accompanied her, when they heard her cry, ran out of the jungle. At this juncture his gun-carrier was seized with fright, and saying, "This sort of work terrifies," he ran away! Thus the poor hunter was left alone without a weapon. The lions leaped on him, tore him in pieces and ate him. Insects which inhabit people's houses are these—mosquitoes, scorpions, centipedes, fleas, bugs and wall lizards. The ones that reappear constantly and cause great destruction of property are the white ants.

Satu ni nyoka mkubwa, aweza kusheta p'unda au p'unda milia mdogo. *T'u* na mafisi hutembea-tembea usiku mmoja-mmoja, vibok'o hwenda kwa kundi. Mbweha wana makao yao mwituni, ela mbwa hupenda kuk'eti nyumbani mwa bwana zao. Nyuni wo'te na p'opo wana mabawa; wapuruka-puruka angani. Mabata, k'anga, mwewe na ndiwa waweza kupuruk'a; mbuni ni nyuni wakubwa hawapuruki. Ngwena hana ulimi. Mburuk'enge ana nkia mrefa, hula mai. Nyama ya nguuwe na vitungule ilikatazwa kwa wat'u wa kale. P'aka na simba wana ndimi za kuparunza. P'ole p'ole ya k'obe humfisha mbali. Nyani na t'umbiri k'ubwa hufanana na wat'u. Atambaae kizani asitahili kupigwa bunduki. Ngamia ni nyama wakubwa, watukuao mizigo mizito—ngamia mmoja aweza kutukua mzigo wa p'embe wa ratili mia t'atu u thamanini.

STUDY XIX

Sir, this man is very ill, his whole body is swollen. Tell him to come here, then, that I may examine him. Good morning, my good fellow, how are you feeling? I am ill, sir, very ill indeed. Poor fellow, cheer up! God will heal you of the sickness you have and you will get better. I am only a physician. He who works the cure is (God) Himself. Oh! but I am very ill, sir, and I do not know whether I shall pull through this disease or not. Please God, you will pull through. How old are you now? Maybe I am about fifty-five, sir. Well, stay here with us a few days and keep in bed. We will give you some medicine to make you sleep and then presently you will feel better and will go back home again. Thank you, sir, thank you, I will stay and I'll try and make myself happy (lit. comfort or quiet my heart). What is the matter with *you*, child? Oh! I have a great many troubles—first of all I have jiggers in my feet, then I've been pricked by a thorn in my finger. Your troubles are not very serious, my child; they will soon be got over, I think. Come here to me and let me take out both the jiggers and the thorn—it's only a little matter, it can all

be done in a minute. Doctor! this blind man is calling you. He says he has suffered great pain in his eyes since he went to that "Nyika" witch-doctor. It is his own stupidity then, I warned him not to go. Those medicine-men know absolutely nothing unless it is how to injure and deceive people. Tell him to sit down and I will come directly, there are others who are waiting for me—people with leprosy and anaemia and skin disease and various other complaints.

Hii ni Asipitali ya Sirikali wauguzwapo wat'u weupe. Wat'u weusi hwenda Asipitali ya Misheni iliyoko kisiwani. Huko dawa hutolewa killa siku kwa killa mt'u ajae awae yot'e. Wauguao hugangwa na kutunzwa. Zaidi ya haya madakitari hufundisha hirimu wenyi akili, kazi hii ya huruma. Wasaidia hao huosha vidonda, hutoa dawa, hung'oa meno na kufunga majaraha. Wale wenyi baridi, makohozi, vifua, baridi yabisi, mafua na homa huk'eti nyumba moja, wenyi t'ete nyumba ya pili, na wale wauguao maipu, au t'ambazi, au p'ele, au madonda au mbuba huk'eti nyumba ya tatu. Binti yakwe yule kiwete tajiri alikuja jana na kiipu tungu; leo kinaiva, dakitari akakipasua. Usaha mwangi ukatoka. Hawa mabubwi wawili wana homa. Wape killa mt'u matone matano ya hiyo dawa ya kutoa jasho, kawambie warudi nyumbani na kulala. Ni dasituri hapa, killa mt'u atakae dawa sharti aje na tupu—tupu na iliyo safi. Kwa nini hutulii? Kwa sababu wanitonesha jaraha. Mama wa kunilea aona maumivu mwilini mot'e, akoho na kuchemua daima. Usingie nyumba ile usije ukapata t'ete za maji.

STUDY XX

As you bring up your child, so will he grow. An Indian professor has opened a school in the Old Town, for teaching English. His pupils are neither taught writing nor sums. He has written down the names of twenty-four children in his register, but I hear that they do not attend regularly (lit. do not persevere to come every day)

and he (himself) has no authority over them. At our school we are taught Addition, Subtraction, Multiplication, and Division. We have maps on the wall, that we may get to understand about the world we live in—this study is called Geography. Then again we have slates and pencils and pens and a blackboard and chalk—everything that is necessary. Our teacher is very clever at playing the harmonium—he makes us sing all sorts of pretty songs. On Prize Day (lit. the great day for giving out prizes) we are to sing them before all the Europeans and a whole crowd of people. There will be races, too, on that day, each boy competing with his fellows in running and jumping and other things. Those who win will get presents and prizes, while all the people clap. All parents ought to send their children to our school. Obstinacy and laziness and vulgar language are not allowed under any circumstances. Every one must take pains to make progress.

Mwanzo wa hikima yo'e ni kumcha Mngu na kushika amri zakwe. Mwanawe liwali hasomi tena, amehitim. Babakwe alimpeleka skuli alipokuwa mdogo kabisa, nae inwenyewe akafanya bidii na kujitahidi, hata akapata sifa nyingi kwa mwalimu wakwe juzi, alipoondoka madarasani. Mtoto akikosa, sharti atake msamaha, nae atasamehewa; lakini akifita kosa lakwe na kunena uwongo, atapata aibu, nao wazazi wakwe watasikitika. Watoto hao wanawake hawana adabu wala hishima; huteza mtana kutwa, tena hawana mt'u wa kuwafunza. Kwamba walipata ruhusa kuja kusoma hawangekuwa watukutu na ushupavu kama vile walivyo. Mapenzi ni k'itu chenyi thamani k'uu duniani. Kwa mapenzi twaweza kusaidia wale waonewao na kuwafunza wale ambao hawana ilimu. Si kawaida huku kuomba bakishishi, afanyae neno hili hana haya kabisa. Mwenzio akikutangulia usitukiwe. Hirimu wapatao daraja ni wale wahishimu wazazi wao na wakufunzi wao. Naona waziwazi kwamba huaweweza kumaliza kazi yako ijumaa hii.

STUDY XXI

True religion is the one which leads us to God and comforts our souls. We believe that it is the Christian who has this religion. The Muhammedan calls the Christian unbeliever (or infidel); but at the same time he holds (says) that, "An unbeliever who suits your purpose is better than a Muhammedan who does not." The meaning of this is that, although he is very tenacious of his religion and despises all other religionists except his own, he is not at all above making use of (these so-called) unbelievers, if he finds profit in doing so. The Creator of heaven and earth and of all things therein is God Almighty. He who redeemed us by dying for us on the Cross, is His only Son, our Lord Jesus Christ, who is the Saviour of all the inhabitants of the world. He who instructs our minds and controls our spiritual beings is the Holy Spirit, who is worshipped and glorified together with the Father and the Son. In the Church of Christ there are three orders—bishops, priests (or presbyters) and deacons. The work of them all is to preach the gospel and to feed the flock of God. This flock is the whole company of faithful people. Christ ordained two sacraments for His followers—Baptism and the Lord's Supper: this latter is also called the Holy Communion. The Bible contains—the Law of Moses, the books of the Prophets, Psalms, Proverbs, the Gospels, the Acts of the Apostles and various Epistles. All these books testify to Jesus Christ that He is the Son of the Most High; His disciples also received Him (as such) being convinced by all the miracles He did in their presence while He was in the world. But the greatest thing of all is His wonderful resurrection from the dead which demonstrated plainly that He is the complete conqueror over death and hades and all the powers of hell.

Maisha ya binadamu ni mafupi, *tena mawazo yakwe ni maovu*. Kusali hakuondoi dhambi, wala kusujudia sanamu hakutakasi roho. Waisilamu hunena kwamba kuna

mambo matano yapasaya kwo wokofu—kusali, kutoa zaka kwa sadoka, kupiga shahada, kufunga Ramadhani na kwenda Maka. Maagano Mapya yatufundisha kwamba hatuokolewi kwa vitendo vyema, wala kwa matozi ya toba; illa kwa imani katika Bwana Jesu Masihi aliyekufa kwa ajili yetu, akatoa na muwili wakwe kuwa sadaka kwa Mngu kwa madhambi ya ulimwengu mzima. Wale wamwaminio hugeuzwa asili ni Roho Mtakatifu, hata wakapenda yale mambo ambayo zamani waliyatukia na kutukia yale ambayo kwanza waliyapenda. Dini ya Islam huitwa "Ndia rahisi," maana, wale waifuatao hawatakwi kuata anasa za dunia wala tamaa za muwili. Mt'u akisilimu kisawahili madhambi kama unafiki na udanganyifu si marufuku kwakwe. Afanyae haki hubarikiwa, avundae sharia ya Mngu hulaaniwa. Maandiko yakubaliwayo na kusadikiwa ni waongofu wa Islam yaitwa "Kuruani"—chuo chenyi sura mia u arubaataashara. Katika mlango wane, wa sita, wa sabaa na wa arubaini-na-nane ilimu ya masheitani na malaika hutangazwa. Waaminifu wot'e liukut'anika msikit'ini killa siku ya ijumaa ndipo awa hubiripo imamu. Wasawahili hunena, "Shukuru uliyo nayo," na tena "Adhabu ya kaburi ajua maiti."

SWAHILI CALENDAR

The Muhammedan year consists of twelve lunar months, or 354 days, leaving a discrepancy of eleven days between it and the solar year. As this is never rectified by the introduction of intercalary months, there is no correspondence between the calendar and the seasons, and we find the Fast of Ramadhan, for instance, occurring at all times of the year as it works its way round.

The calendar has thus very little practical value—the seasons, not the months, become the mile-stones in their annual records. In native letters and documents circulating among themselves their own dates are still used; but in commercial and legal transactions the European system of reckoning time is often adopted, and the English names of the months are being gradually assimilated into the language.

The Swahili names for their lunar months are as follows—

Mfunguo Mosi	Mfunguo Sabaa
Mfunguo Pili	Mfunguo Nane
Mfunguo Tatu	Mfunguo Tisia or Kenda
Mfunguo Nne	Rajab
Mfunguo Tano	Shaban
Mfunguo Sita	Ramadhan

The seasons are briefly—

Kasikazi or Musimu, period of N.E. monsoon from November to March.

Maleleji, short period of calms between the former and the

Kusi or period of S.W. monsoon lasting from April to September.

Kipupwe, part of Kusi, period of cool winds in June and July.

Demani, "fair winds" in August and September.

Tanga Mbili, "variable winds" in September and October.

Maleleji, second period of calms before N.E. monsoon breaks.

The "rainy seasons" are three, but only the "mwaka" is really dependable. They are: *Mwaka* ("former" or "great" rains) in April or May, *Mchoo* ("lesser" rains) in July, *Vuli* ("latter" rains) in October or November. (For fuller information see "African Aphorisms," p. 28.)

In this Vocabulary, words beginning with a capital letter are complete in themselves: those with a hyphen before them require some variable prefix.

Nouns are always given in the singular form when one exists. Derivative forms of the verb are only given in a few instances; the student is referred to Study XVII., where the subject is dealt with in detail. Verbal nouns, obviously derived, are usually omitted, unless there be some variation in meaning or in form. Numerals placed after a noun indicate the class it belongs to.
