## PREFACE

This book is a slightly revised version of my book from 1988 Middle Egyptian An Introduction. The different look of it is mostly due to a more modern computer technique.

The book presents a short introduction to the Egyptian language suitable for use in beginning classes. It is meant as a simplified presentation of Middle Egyptian grammar according to Polotsky's analysis of the structure of the language. The aim has been to utilize the same approach and terminology without burdening the beginner with a critical analysis of the ideas involved. It is intended to introduce the student to the basic terminology and thus to prepare him or her for future studies of modern works dealing with ancient Egyptian grammar. This being the aim much in the book may appear oversimplified to the linguist and specialist in Egyptian grammar.

After many years of teaching beginners I have deemed it necessary to devote space to the definition of basic grammatical terms, attempting to compensate for the gaps in the teaching of grammar in today's schools. I hope that the terminology definitions will help the beginning student to overcome the problems of studying a foreign language of different structure.

The difficulty involved in learning Egyptian is, however, not only that associated with grammatical structures but also one of learning a new script. The many examples are intended to acquaint the student with frequently used signs and to assist in the acquisition of a basic vocabulary.

The hieroglyphs appearing in this book have been drawn by a computer using the program Glyph for Windows made by Hans van den Berg at the Centre for Computer-aided Egyptological Research at Utrecht University, The Netherlands.

I want to repeat my thanks to those who assisted in the elaboration of the previous version: my colleagues Paul J. Frandsen, Copenhagen, Lana Troy, Uppsala, and Britta Eriksson, Uppsala as well as to two students in Uppsala, Åsa Strandberg and Geoffrey Metz who took over most of the new encoding of the hieroglyphs for this version.

Uppsala in May 1995
Gertie Englund

## INTRODUCTION

## LANGUAGE AND LANGUAGE RELATIONSHIP

The language used in Ancient Egypt belongs to the Hamito-Semitic family. This family, that is also called Afro-Asiatic, comprises five sub-groups of languages in the Middle East and North Africa: 1. Semitic, 2. Egyptian, 3. Cushitic, 4. Berber, and 5. Chadic.

To the Semitic group belongs languages such as Akkadian, Aramaic, Hebrew, Phoenician, and Arabic. Cushitic comprises certain languages in Somalia and Ethiopia such as Somali and Galla. Berber is found in Northern Africa and includes the languages of the Tuaregs and the Kabyles. Chadic, which is used in Northern Central Africa, has come of late to be counted as a member of this language family.

The relationship of these languages is established on the basis of similarities in grammar and basic vocabulary. The exact relationship of the languages is, however, a very delicate question as some of them are modern languages lacking written documentation for earlier stages (Berber, Cushitic, and Chadic), others go back 2000 to 5000 years and are now extinct (Egyptian, Akkadian, and Aramaic).

## Evolution of the language

Written documents covering 3500 years of Pharaonic civilization have acquainted us with the language of Ancient Egypt and enabled us to follow its evolution, which is closely related to that of the historic periods. At the beginning of our era, after the end of the Pharaonic kingdoms and the closing of the temples, the language survived in Coptic. This means that we have written evidence of the same language from the exceptionally long period of more than four thousand years.

During this long period changes occurred that allow us to separate the language into different stages:

- Old Egyptian, c. 3000-2140 B.C., is the name of the language from the beginning of the historical period throughout the Old Kingdom, i.e. from the 1 st to the 6 th dynasty.

The written material from the first three dynasties consists in names and titles, lables on storage jars, and brief inscriptions concerning historical and religious events. Longer texts appear from the beginning of the 4th dynasty. The most important text corpus from this period is the Pyramid Texts, i.e. the texts in the pyramids of King Ounas, the last king of the 5th dynasty, and of the kings of the 6th dynasty.

- Middle Egyptian, c. 2140-1360 B.C., is the language used from the 9th to the 18 th dynasty. This stage of the language is generally called 'classical Egyptian'. It was in
use until the end of the Egyptian civilization in royal inscriptions and religious texts, although succeeded in the spoken language and other types of written material by later stages of the language.

As Middle Egyptian was used during such a long period of time, documents written in Middle Egyptian are abundant and of many different kinds, religious, legal, administrative, literary, etc.

The Middle Egyptian treated in this introduction to the Egyptian language is mainly taken from texts from the Middle Kingdom and the early New Kingdom.

- Late Egyptian, 14th century to c. 700 B.C., is the spoken language of the Middle Kingdom and the New Kingdom that was raised to the status of an official language by Akhenaton c. 1360 B.C.
- Demotic, c. 700 B.C. to c. 300 A.D. Demotic is, as the name indicates, the language of the people, spoken but also used in writing in commercial and juridical contexts and in all other documents concerned with everyday life. There are, however, also a few literary texts in Demotic, whereas the royal and the religious inscriptions of the period use Middle Egyptian.
- Coptic is the last stage of the Egyptian language as used by the Christians in Egypt from the 3rd century and onwards. Although no longer a spoken language it still survives in the liturgy of the Coptic church.

## Writing

Writing appears in Egypt around 3000 B.C. It is a much discussed question that cannot be decided unequivocally at present, whether writing is an autochtonous invention in Egypt or was imported or influenced from Mesopotamia. At the time when the North and the South came together and formed one kingdom writing became a necessity for administrative, economic, and religious reasons in order to keep the state together. Apart from a few signs on pottery that might be considered as carrying written information, there are no preliminary stages of writing and that is why it seems justified to speak about 'the invention of writing'.

Writing appeared from the very beginning in two variant forms: the hieroglyphic and the hieratic scripts. Hieroglyphs were used on stone monuments, where they were cut in by means of a chisel, whereas the hieratic script, which is more cursive, was used on pottery and papyrus, where it was applied by means of a brush and paint.

The writing is pictorial. It depicts objects, for instance the sun ${ }^{\ominus}$, a man 盆, a woman ${ }^{\top}$ ? , a house $\square$. It is, however, not a purely ideogrammatical script, where every idea has its own sign. Certain signs depicting something concrete can be used to express a related abstract idea. Thus the sign for 'sun' can be used to denote 'day' and that for 'moon' to denote 'month'. The signs used alone representing a whole word, either the depicted object or the connected notion that the sign evokes are called ideograms.

The ideogram thus depicts an object. The Egyptians could of course also talk about this object. There was a phonetic shape attached to the notion. Let us take an example. The sign $\square$ depicts a house. The word for house was pr or, to be more precise, the consonants of the word for house were pr. This is a peculiarity of the Egyptian writing - it gives only the consonants of the words, never the vowels. This was not a problem for the Egyptians because they knew the language and knew which vowel to put in and where to put it (whether it was to be 'iper', 'per', or 'pro' for instance). We who don't know what the pronunciation was like are in the habit of putting ' e ' between the consonants.

Fig. 1 To dance by the dancers $=$ The dancers dance . Hieroglyphic text in vertical line.

Certain phonetic values came to be attached to certain signs. In that way [] came to stand for pr in a general way and could be used in any word having this combination of consonants like walk pr $\square \wedge$. Used like this pr is no longer an ideogram but a phonogram. There was of course a risk involved in such a way of writing. The reader might get into trouble how to interpret the sign if the context was not absolutely clear. In order to avoid confusion and to have an explicit, nonambiguous writing, the Egypitans invented explanatory signs that were put at the end of the word. They had no phonetic value, they were only written to guide the thought of the reader in the right direction. If after the sign ${ }^{\square}$ pr they put two walking legs $\wedge$ it was clear that it was not the word 'house' but the word 'to walk' that was meant. We call a sign used like this in order to direct the reader on the right sense a determinative. (A collection of signs is given at the end of this book. See Sign list.)

The script can be arranged in different ways - in vertical lines (see Fig. 1) or in horizontal lines (see Fig. 2). Further it can be arranged so as to be read from left to

Fig. 2 The black (earth) = Egypt. Hieroglyphic text in horizontal line.
right (Fig. 2) or from right to left (Fig. 1). The signs, e.g. the birds in these examples and also human beings, animals etc. are placed so as to face the reader and the reader must turn towards them.

A hieroglypnic text is like a never-ending stream of signs, one sign sometimes following the other, sometimes being stacked on top of the other (Fig. 3). There is a system in the way of arranging them that is called the 'square principle'. The signs were placed so as to fill imaginary square blocks in which the upper signs have precedence over the lower ones (Fig. 3).

Fig. 3 Hieroglyphs are arranged according to the 'square principle'.

## 1. <br> THE EGYPTIAN ALPHABET and INTRODUCTORY REMARKS ABOUT NOUNS

Old Egyptian was written with a large number of signs, hieroglyphs. The sign lists referring to normal classical texts comprise a little more than 700 hieroglyphs, whereas we have to count with 7000 to 10000 signs to cover all kinds of texts from the different periods of the Egyptian language.

All the different consonants of the language had their particular sign. These are the signs we refer to as the alphabet. There are also signs for a combination of two or three consonants. One sign for two consonants is called a biliteral sign, and one sign for three consonants is called a triliteral sign. Signs that are used for their phonetic value are called phonograms. Let us start with phonograms of the alphabet.

THE ALPHABET

| Trans- |  |
| :--- | :--- | :--- |
| literation | Depicted |
| object |  |$\quad$ Sound value

A.

A few words consist of only one of those alphabetical signs.

| $f$ | he, (him, his, it, its) |  |
| :--- | :--- | :--- |
| she, (her, it, its) |  |  |
| $m$ | $n$ | you, (your) |
| $n$ | $n$ | in, with |
| to, for, because, belonging to |  |  |
|  | $r$ | to, at, concerning, more than, from |

When a sign is used to indicate the object it represents, it is generally followed by a stroke. When a sign is used because of the idea it represents, it is called an ideogram. Thus

## B.

Sometimes the hieroglyphs are followed by a sign that has no phonetic value, which means that it is not 'pronounced' but is only placed there to indicate the meaning, in order to help the reader to get the right idea. A sign of this kind is called a determinative. Determinatives are used not only in these short words consisting of only one letter but in all words of any length.
(In order to understand the determinatives, consult the sign lists, at the end of this book.)

## C.

Sometimes there is also another alphabetical sign behind, a $t$. $t$ is a feminine ending and the words with this final $t$ are thus feminine nouns. Sometimes the two signs are also accompanied by a stroke (the signal of singular) and/or a determinative.

| $0$ | st | woman | $\infty$ | $h t$ | belly |
| :---: | :---: | :---: | :---: | :---: | :---: |
| - |  |  | 口0 |  |  |
| 00 | ' | limb | $\longmapsto$ | $p t$ | sky |
| 0 |  |  |  |  |  |
| の 5 | 't | room. chamber |  |  |  |

## 2. <br> SYLLABIC SIGNS AND MORE ABOUT NOUNS

## A. Syllabic signs

Apart from the alphabetic signs, all hieroglyphs designate two or three consonants each. A hieroglyph that is read as two consonants is called a biliteral sign and one that is read as three consonants a triliteral sign.

| $\pm$ | 13 | earth, land, country | 9 | $n t r$ | god |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\stackrel{0}{4}$ | $i b$ | heart | $f$ | 'nh | live, life |
| $[$ | $p r$ | house | 0 | $s d m$ | hear |
|  | $n b$ | lord |  |  |  |

The Egyptians often added one or several alphabetic signs to these biliteral and triliteral signs. These alphabetic signs constitute a phonetic complement to the biliteral and triliteral signs. They are redundant and they are not pronounced separately.

and

$$
f^{\sim} r_{n h} \quad \text { life consists of } f^{n h}+{ }_{n+\cdots} n .
$$

So far we have thus seen that words can be written with alphabetic signs only, with biliteral or triliteral signs only, and with biliteral or triliteral signs accompanied by phonetic complements. A word of three consonants could of course also be written with a summing up method of for instance one biliteral sign and one alphabetic sign.
 determinative.

## B. Nouns, Gender, and Number

## Gender

There are two genders in Egyptian, masculine and feminine. The masculine has no distinctive element ( $\varnothing$ ), the feminine takes a $t$.

## Masculine Feminine

0
$t$

## Number

There are three numbers：singular，dual，and plural．The dual is used to express duality．The distinctive element of the masculine is wy and of the feminine $y$ added to the feminine form．The plural takes the ending $w$ ，which in the case of a feminine word，is placed before the feminine ending $\%$ ．

| Singular | Dual | Plural |
| :--- | :--- | :--- |
| Masc．$\emptyset$ | $w y$ | $w$ |
| Fem．$\quad$, | $\boldsymbol{y}$ | $w$ |

In writing there are several ways of marking the plural： Mi， $\begin{array}{llll}1 & 1 & 1 & 1 \\ 1 & \text { ，as well as }\end{array}$ the archaistic forms： －。○， いい and the repeating of the determinative or the ideogram（see examples below）．

N．B．There is no distinctive element to mark the definite form．
Singular $\quad$ Plural
Masculine

a／the servant

b3kw／the／servants
$\infty$
$r n$ $a$／the name

rnw／the／names

it a／the father
 itw／the／fathers

hrd a／the child
吴束要：
hrdw／the／children

## Feminine

bis b3kt a／the maid a／the sister

Note

| $9$ | $n+r$ | a/the god | 丹n 号 | ntrw | /the/ gods |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\Delta$ | $n s t$ | a /the throne | $\frac{\square}{\square \square \Delta}$ | nswt | /the/ thrones |
| 피 | 13 | $a /$ the country | $\begin{aligned} & \pi \\ & \cdots \\ & \pi \end{aligned}$ | t3w | /the/countries |

## Dual

II 13 a /the country

## C. Genitive

1. The direct genitive

The direct genitive is made up of two nouns placed side by side without a connecting link. This kind of genitive is particularly common in titles and set phrases where the nouns are closely linked, but it can be used with any nouns in any expression.

The word order changes with the words $\xlongequal{ }$ ntr and $\nsim n$ nsw, which for honorific reasons are always written in the first place.

nb t3wy the lord of the two lands
irt $\mathrm{Hr} \quad$ Horus' eye
nst $R^{r} \quad$ Re's throne
nb nswt t3wy the lord of the thrones of the two lands
t3sw Kmt the frontiers of Egypt
hat w'b
the wife of a priest

$s 3 s$
the son of a man

$s 3 n s w$
the king's son

msw nsw
the king's children
98
$h^{r} n t r \quad$ the body of the Neter

## 2. The indirect genitive

The indirect genitive is made up of two nouns linked up with a genitival adjective derived from the preposition - $n$ 'to', 'for'. In number and gender this adjectival word agrees with the previous noun in the following way:

This adjectival word gradually becomes invariable, and $n$ takes the place of the declined forms.

$r n n$ wnwt the name of the hour
s.
wnwt $n t$ grh an hour of night
${\underset{1111}{2}}_{0}^{1} 1$
$\Longrightarrow$ 3w n shty the asses of the peasant

## 3. <br> PERSONAL SUFFIXES or SUFFIX-PRONOUNS

An ending can be attached to the noun indicating to whom the thing belongs. These personal endings called suffixes or suffix-pronouns are:

Singular
lIst pens.

and pers. masc. $\quad k$
fem. $\quad$.t var. $\triangle$

3rd prs. masc. $f$

Plural
lIst prs. | | | . $n$
and pers.

Dual
lIst pers. \I .ny
2nd pecs.

3rd pers.

The suffix-pronouns are used:
a. as subjects after the verb;
b. as possessives after a noun;
c. as personal pronouns after a preposition;
d. as objects after the infinitive (a substantival form of the verb).

The suffix-pronoun of the first person is often omitted.
After a dual noun the suffix-pronouns are sometimes made to agree with this noun.
pro your house
nb.i my lord

THE PRONOUN of $w$
The pronoun $t w$ means 'one'. It is used like the suffix-pronouns but can also be used after the non-enclitic particles (see ch. 8).

- $t w$ is also used to form the passive voice (see ch. 22).
$-t w$ is often used in historical texts to indicate the pharao.

## 4. <br> NOMINAL SENTENCES

In sentences expressing the identity between two ideas (type: His father is an Englishman, He is an Englishman) the words are simply placed in juxtaposition in the Egyptian sentence. There is thus no word corresponding to 'to be'. The words placed in juxtaposition can be nouns or pronouns in the following combinations.
A. Noun + Noun
His abomination is falsehood.
(Urk. IV 490.14)

## B. Independent Pronoun + Noun

If one of the members of the sentence is a pronoun, the pronoun then used in Egyptian is called an independent pronoun. (For independent pronouns, see below at the end of this chapter.)
ink Pth $\quad 1$ am Ptah. (Coffin of Mes-het, Assiut)

I am your father. (Urk. IV 346.8)

He is the lord of the realm of the dead. (Budge 38.9)

## C. Independent Pronoun + Independent Pronoun

In certain cases, especially in religious texts, one finds sentences expressing the identity between two pronouns (type: I am you). In that case both are independent pronouns.
 hy R $^{\text {c ink }}$ ntk $\quad \mathrm{ORe}$ I am you. (Sonnenlit. 101)

## Independent pronouns

Obsolete form
$\underset{(=\text { classical Egyptian) }}{\text { Later form }}$
Sing. 1st pers. $\quad{ }^{0} \quad i n k \quad 0$

2nd pers. masc. ${ }^{2}$

Independent pronouns are also used in emphatic nominal sentences, see chapter 20, and in possessive expressions, see chapter 26.
(There are also nominal sentences with interrogatives, see chapter 21.)

## 5. <br> NOMINAL SENTENCES (cont.) <br> SENTENCES WITH pw

## 1. Noun $+p w$

A sentence of identification (type: it/he is a man) is formed by means of a noun or an independent pronoun followed by the word pw.

In these nominal sentences $p w$ is called the topic and the noun/independent pronoun the comment, pw being the communicative point of departure about which new information is given.
$p w$ is invariable in number and gender. As for the word order pw can be inserted in the loose construction of an indirect genitive or between a noun and its adjective.
$p w$ is originally a demonstrative pronoun (for demonstrative pronouns, see below at the end of this chapter).

ink $p w$
It is I. (Peas.B 1 20)
$=0$ 気成
nsw pw
It is the king. (Urk. IV 17.16)
$m w . n$ pw It is our water．（Adm．3．13）
nb．n pw He is our lord．（Urk．IV 17．11）

ت口
II
ntf pw It is he．（Sin．B 267）
$s 3 s p w \quad H e$ is the son of a man．（Peas．R 39）
t3pwnfr It was a wonderful land．（Sin．B 81）

nb s3t pw He is a master of knowledge． （Sin．B 48）

$h m t \quad w^{\prime} b$ She is the wife of a wab－priest $p w n R^{r} \quad$ of Re．（Westc．9．9）

$w 3 w$ pw $n$ It was the surf of the sea（lit．the $w 3 d w r \quad$ great green）．（Sh．S．58）

$n h$ pw $n$ It is the prayer of this servant． b3k im（Sin．B 213）

bw pw $n$ It is the main product of this iw pn island．（Sh．S．152）

## 2．Noun $+\boldsymbol{p w}+$ Noun

There are also three－membral nominal sentences including $p w$ ．These consist of a noun $+p w+$ a noun．This pattern gradually replaces the older nominal pattern ：noun + noun．

In these three－membral nominal sentences $p \boldsymbol{w}$ functions as a link，a copula， between the topic and the comment．The first member of the sentence is the point of departure of the communication，the known or presupposed part about which new information is added．

－81积院
thpwns．k Your tongue is the plummet． （Peas．B 1．165）
dmi pw A landing place is the West． imnt（Leb．38）

DEMONSTRATIVE PRONOUNS

Singular Masculine

pw this
Feminine

var. ${ }^{3} 40$ fwy 141 twa

These demonstrative forms are used in the following way:
a. the singular forms and the plural forms in $4 \cap$ ip are placed behind the noun. Exception: $p 3$ always appears in front of the noun.
b. the plural forms in $n$ followed by the - of the genitive are placed in front of the noun.

an$p 3$, the weakest of the demonstratives, gradually looses its demonstrative sense and becomes a definite article;

楽雨 $p 3$ agrees in gender but not in number with the noun, if the noun is followed by a number.

72 $n n$ is often used alone as a pronoun with the neuter sense of 'this'.
 $p w$ also means 'it is';
 $p w$ is also used in exclamations with the sense 'oh'.

NB. 1. Possessives can be inserted between the noun and the demonstrative.
2. A new possessive appears in New Egyptian consisting of $p 3 y+$ a suffix.

shy ph this peasant (Peas. passim)

hast tn this country (Sin.B 42)
th pf that country (Sin.B 43)

$d p t$ ff
hrw pry this day (Urk.V 12,5)

int two this eye (Urk.V 35.17)

smrwipn these friends (Urk.IV 165.7)

nt ow pw these Meters ( BD ch. 125)

$t 3$ wit
the road (Urk.IV 814.17)
mmann min
$n 3 n s m 3 w \quad$ these bulls (RB 66.4)

nw n ntrw these Neters (Urk.V 39.2)

nn $n$ smrw these friends (Sin.B 256)

p3 ntrw 42 these 42 Neters (BD ch. 125)

p3 hrdw 3

$h^{〔} w . f$ ipn these his appearances in glory (Urk.I 161.4)
\%n

their father (Westc.9.12)
6.

## PREPOSITIONS

The prepositions $m, n$, and $r$ have already been mentioned (see ch. la). Let us now look at a more complete list of simple prepositions:

| $n$ | to, for, because of |
| :--- | :--- |
| $m$ |  |
| $m$ | in, by, from, as, ' $m$ ' of equivalence $(X=X)$ |
|  | $r$ |

hr on, upon, before, conceming, because of

A preposition and a noun or a suffix-pronoun form together an adverbial phrase. (An adverbial phrase can also consist of a preposition + an infinitive, cf. chapter 7 , or of a stative, $\mathbf{c f}$, chapter 9.)

## ADVERBIAL PHRASES:

$h n^{c} . i \quad$ together with me

$h r m w$
on the water
mib.i
in my heart
hr $\quad$ in heaven
7.

## ADVERBIAL SENTENCES

PATTERNS WITH AND WITHOUT iw

1. An adverbial phrase can constitute the comment of a sentence that is then called an adverbial sentence. A sentence of this kind indicates the position or situation of a person or a thing that is the topic of the sentence. The topic is either a noun or a pronoun. There is no Egyptian word corresponding to 'to be' in these Egyptian sentences.

- If the subject is a pronoun, the suffix-pronouns are used and they are always combined with $i w$. This pattem functions both as a main sentence and as a subordinate clause.
- If the subject is a noun, it has to be preceded by iw for the pattern to function as a main sentence. Without i $w$ the pattem functions as a subordinate clause.
- From the Second Intermediate Period and onwards iw takes on the function of a 'converter' i.e. a morpheme that converts a structure into a subordinate clause.

```
iw.fm niwt main sentence or subordinate clause
iw (A'm niwt main sentence (up to the 2nd Intermediate)
    A m niwt subordinate clause
```

1) A stands for a noun.

iw.fr smr He shall be a Compagnon. (Sin. ${ }^{280)}$

in hm.f $m$ His Majesty was in the midst hry-ib.sn of them. (Urk.IV 657,13)

iw hm.f $m$
His Majesty was at the head of $t p n \boldsymbol{m s c} . f$ his ammy. (Urk.IV 652.II)

iw it im hnr bdt

There was barley together with emmer. (Sin.B 84)

iw hrw h'w $m$ hr-ntr

The sound of rejoicing is in the necropolis. (CT IV 97a)
iw wdpw Each (see below at the end of this nb hr irt.f chapter) servant was at his task.
(Sin.B 246)

is hnw $m$ sgr ibw m gmw

The Residence was in silence, the hearts being in mourning. (Sin.R 8-9)
2. The infinitive is a substantival form of the verb, i.e. it functions in the same way as a noun. It may be used together with a preposition forming an adverbial phrase that often serves as the predicate of a adverbial sentence.

The prepositions used are $h r, m$, and $r . m$ is used with verbs of motion and $r$ expresses the future.

The infinitive of the weak verbs ('infirmae', see chapter 11) i.e. verbs ending in ior $w$ have a feminine infinitive ending in $\%$. Five irregular verbs also have a feminine infinitive:

2. $\infty$ iri 'make'; var. $\infty$
3. $\Lambda$ in 'come'
4. 引 $\|_{\text {/I 'come' }}$
5. $\AA^{-m m}$ int 'bring'

| iw.ir smt | I shall go. (Westc. XII 12) |
| :--- | :--- | :--- |

## THE ADJECTIVE $\rightarrow$ EACH, EVERY, ALL

$\bigcirc n b$ is placed behind the noun to which it is related.

1. If the noun, besides $n b$, is also qualified by a suffix-pronoun, the suffixpronoun is placed between the noun and $n b$.
2. If the noun, besides $n b$, is also qualified by an adjective, $n b$ is placed between the noun and the adjective.
3. $n b$ early became an invariable word.

The word has the following forms:

Singular
Masculine $^{{ }^{( } \boldsymbol{n b}}$
Feminine $\underbrace{}_{n b t}$
$\longrightarrow(0)$
最
$\bigcirc 0$
$\Longrightarrow$
-1 ।

Plural

Feminine o $n b t$
$r^{r} n b \quad$ every day (Peas.B 1.84)
he nbt
t3wnbw
h3swt nbt
all the countries (Urk.IV 9.4)
ht.s nbt all her things (Urk.IV 31.6)

rnw.k $n$ bw all your names (Urk.IV 943.14)

shrw.f $n b \quad$ all his plans (Urk.IV 944.5)

ht nbt nfrt every good thing (Urk.IV 51.3)

## NUMERALS

## 1. Cardinal numbers

The cardinal numbers are placed after the nouns to which they belong. The noun is mostly in the singular.

The cardinal numbers are written with the following signs:

| $w^{\prime \prime}$ | for the units |
| :--- | :--- |
| $m d w$ | for the tens |
| $e_{s t}$ | for the hundreds |
| $h 3$ | for the thousands |

- The number 'one' is generally written as a vertical stroke, but can also be spelled out $\cdots$. $\boldsymbol{u}^{4}, w^{\prime}$ is placed either in front of or behind the noun to which it belongs.

When $\boldsymbol{w}^{\prime}$ precedes the noun, it is linked to the noun by means of the preposition $n$ or $m$. In this case $n^{\prime}$ has the function of an indefinite article.

- I and 出 as well as other numbers can sometimes be placed in front of the noun and are in that cas linked to the noun by means of a preposition $n$ or $m$.

The units and tens are written in the following way:

| 1 |  | wr | $\cap$ | $m d w$ |
| :---: | :---: | :---: | :---: | :---: |
| 11 | $\sqrt{0}$ | snw | $\cap \cap$ | dwty |
| 111 | $\stackrel{0}{0} 111$ | hmt | $\bigcirc \cap \cap$ | $m^{\text {c }}$ b 3 |
| 1111 | $\sum_{\infty}^{\infty}$ | $f d w$ | $n \cap \cap n$ | hamw |

## 2. Ordinal numbers

The ordinal numbers are variable like the adjective (see chapter 10) and are generally placed after the noun.

- The endings ${ }^{\circ} n w$, fem. $\circ$ © $n w f$ are added to the cardinal numbers in order to form the ordinal numbers from 2 to 9.
- From 10 and onwards the ordinal numbers are formed by means of 7 mh , fem. - $n$ $m h t$ with the meaning 'that fills'. 'that completes'.

M99
$17 \%$
"MAD"Io
$s p t p y \quad$ the first time (Urk.IV 175.2)
$w \underline{d} y t \quad t \quad$ the first campaign (Urk.IV 740.7)
$h m$ ntr 2- the second prophet (Stela 22025, Cairo Museum) $n \boldsymbol{w}$
$w d y t 5-n w t$ the fifth campaign (Urk.IV 685.6)

## 3. Fractions

The Egyptians only used the numerator 'one' which was written ${ }^{* s}$. Below the sign $\because \rightarrow$ is an indication of the number of parts into which the unit is divided.

The only exception to this rule are $2 / 3$, written $\gg$, and $3 / 4$, written ${ }^{\infty}$. In order to express for instance $3 / 5$ the Egyptians wrote $1 / 2+1 / 10$.

## 8. <br> ADVERBIAL SENTENCES <br> Patterns with non-Enclitic particles

The topic of an adverbial sentence may be combined with a non-enclitic particle (see below at the end of this chapter). The topic can be either a noun or a pronoun. A special set of pronouns is used in this position, the so-called dependent pronouns (see below at the end of this chapter).

ist wi $m$ tp I was at the head of our $n m s^{c} \cdot n$ army. (Urk. IV 7.7)

## NON-ENCLITIC PARTICLES

Y mam
$y<$

40

010
$418=$
ist lo, var. Y月o, fse, 10

$m k \quad$ behold
$\square$

48 8

$\stackrel{0}{3}$
$\Rightarrow \pi$
sw then
smwn probably
k3
so, then

## DEPENDENT PRONOUNS

The dependent pronouns are used:

1. as objects after all the forms of the verb except the infinitive; it also has the function of a reflexive pronoun;
2. as subject in non-verbal sentences with an adjectival predicate (see chapter 10) and after $n n$ (see chapter 23 I A3);
3. as topic after non-enclitic particles in adverbial sentences.

SELF $f^{2} d s$
The pronoun $d s$ means 'self, 'own'. It is used together with a suffix-pronoun to strengthen it.

## 9. <br> ADVERBIAL SENTENCES <br> Patterns with the stative

The stative is a form of the verb that expresses the state or the condition of the topic in the same way as the adverbial phrase. That is why it can function as the comment of an adverbial sentence or be used as a circumstantial form (cf. chapter 18). As a main sentence the pattern is introduced by $/ w$ or by a non-enclitic particle. Standing alone the structure constitutes a subordinate clause (for this use see chapter 18).
The stative is made up of a verb stem followed by endings indicating the person. (For the paradigm and the use of this form see below at the end of this chapter.)

iw.f $m n m \mathrm{He}$ is established as lord. $n b \quad$ (Urk.IV 17.2)
 rh.kwi bw particles.) I know the place. (Westc.9.3)

iw.i I stood in the water. (Urk.
'hi.k(wi) m IV 894.2)
p3mw

iw.k rh.tit ts
$t p$
You know how to reattach a head. (Westc.8.13)

in twt.i shr m now My statue was overlaid with gold leaf. (Sin.B 307)

iw.f sspd m bwnb nfr

It (=the house) is outfitted with everything that is good. (Westc.11.20)

(

mkwiti.kwi See I have come. (Westc.8.12)
$m k t w i w .[[i]$ See you have returned. (Sin. B 257)
ist wrw $n w$ The great ones of this h3st !nii[w] country had come. (Urk.IV 662.8)
$m k m s$ sy See she has gone away. sm.ti (Westc.12.22)
$m k n$ rh.wyn See we are knowledgesms
able about childbirth. (Westc.10.5)

四 (Peas.B 1 76)
ti sw h3b r He had been sent to hwit hlswt strike the foreign lands. (Sin.R 13)

## STATIVE

and pers.
sdm.tiwny var. Pr m

3rd pers. masc.
fem.

Dual 3rd pers. masc. fem.

 $\infty$ M014
sdm.ti
$s d m w$

sdm.ti (rare form)
sdm.wy Rare forms except in very ancient texts.

- During an earlier period of the language $\theta i$ is found more often than $w$ in the third person singular and plural. In classic Middle Egyptian this ending is found combined with the ion the stem of weak verbs as
- The endings $\stackrel{f}{s} w$ and ${ }^{\circ} /$ are placed in front of the determinative.

## Meaning

- During an earlier period of the language, the stative had active as well as passive meaning.
- In Middle Egyptian the active-transitive meaning is found only with the verb $\stackrel{\rightarrow}{\boldsymbol{\theta}} \mathrm{rh}$ and with a few other verbs in the first person and denoting the past.

Examples:

- The stative of a transitive verb has a passive meaning in Middle Egyptian.
- The stative has a static character. It expresses, as the name indicates, a state, a result that has been obtained.
(This form appears under different names in different grammars. It is called 'old perfective' by Gardiner, 'pseudo-participe' by Lefebvre, 'forme d'état' or 'forme of state' by de Buck.)

## ENCLITIC PARTICLES

Enclitic particles can be inserted anywhere in a sentence. The enclitic particles are:

wy exclamatory particle：how

whit indeed，really
$m[y]$ pray
脽会
$m s$ surely，thus

$r-p w$ or
$\infty$ rf emphatic particle var．
$\square h \mathrm{hm}$ assuredly，indeed

sw but
$\stackrel{\Delta}{0}$
git also，moreover
var． $1 \frac{\square}{0}$
$\rightarrow\{$ 余
tr forsooth，I wonder
var．$D\left\{\begin{array}{l}0 \\ , ~ I I\end{array}\right.$
10.

ADJECTIVES AND ADJECTIVAL SENTENCES

Adjectives can be used in a dependent or an independent position．

## 1．Dependent Adjectives

## A．Ordinary Adjectives

The adjective as epithet agrees in gender and number with the noun to which it is related and is placed after this noun． The endings are：

a. The endings are often omitted in writing.
b. If the noun has other epithets as a demonstrative (see chapter 5), a suffix-pronoun, or $n b$ (see chapter 7), these are placed between the noun and the adjective.
c. In order to express a general concept in the neuter like 'the good', 'the evil', Egyptian uses the feminine form of the adjective either in the singular or in the plural, or the word $b w$ (lit. place) + the adjective.

$\int \cot$

$n t r p f m n h$
that efficient god (Sin.B 44)

nsw mnh the perfect king (Urk.IV 101.8)
$s 3 s m s w \quad$ the eldest son (B.H.I 26.102)
st wrt the great seat $=$ throne (Urk.IV 342.11)
psdt $3 t \quad$ the great Ennead (Urk.IV 343.8)
rnpwt $\mathfrak{C}$ §3wt many years (Sin.B 92)
rwty wrty the great double gate (Sin.R 9)

KY hst vile Ethiopia (Urk.IV 138.13)
bw nfr the good (Sin.B 74)
bw bin the evil (Pt.18)
s3.f smsw his eldest son (Sin.R 12)
s3t.f wrt his eldest daughter (lit. great) (Sin.B 79)
hrw pf hss that vile enemy (Urk.IV 648.14)
ht nbt nfrt w'bt every good and pure thing (Urk.IV 30.3)
bw nb nfr all (that is) good (Peas.B 1.242)
nint the good (Peas.B 1.152)

## B. Nisbe-Adjectives

The adjectives ending in $-y$ are called nisbe-adjectives after the name of this kind of adjective in Semitic languages. They are derived from nouns or prepositions by means of the ending $-y$.

## Examples:

- 蒿

$$
\stackrel{8}{8}
$$

Some examples of nisbe-adjectives derived from prepositions:

II hry 'who is under', 'carrying', 'having', var. $\stackrel{\square}{\infty}$
$4<\quad$ iry $\quad$ 'who is related to', var. $4 \longleftrightarrow 4 \infty$
is sometimes translated as a possessive pronoun
hey＇who is on＇

II ny＇who belongs to＇
＂ny is sometimes used with dependent pronouns of the 3rd person singular

$1 \overbrace{1} \overbrace{1}^{0}$

－18～M

ا
$\cdots, \%$

9造 011

81：澵

$\sum_{3}^{2} \circ$ 体
$4 \|_{0}^{\infty}<\infty<\underbrace{\infty}$

ts i3bty the eastern land（Urk．IV 615．11）
ht i3btt the eastern horizon（Amd．I 26）
gs intr the western side（Sin．R 17）

h3swt rsywt the southern countries（Urk．IV 80．7）
ntr．i niwty my local god（Urk．IV 62．3）
p3wty the primaeval（god）（Urk．IV 517．17）
mitt ir $\quad$ what is equal to that $=$ likewise （Sh．S．172）
ntrw．tn $\quad$ your local gods（Urk．IV 48．4）
niwtyw
sst imyt the daughter who was in his ib．f heart（Urk．IV 361．6）
isfi irt．i the evil relating to me（BD 17．12）
hmm hey tp．f a servant holding his head（lit． who was under his head） （Westc．7．15）
＇now tow ts the living who are on earth （Urk．VII 11．12）

## 2. Independent Adjectives

The independent adjective is invariable and placed in the beginning of the sentence. The independent adjective is sometimes followed by a particle A", var. which gives an exclamatory sense to the sentence. After the independent adjective ( + $w y$ ) follows a noun or a dependent pronoun.

There is no particular form in Egyptian to express the comparison. The idea of the comparative is expressed with the preposition ${ }^{\circ} r$ 'more than'.

nfr tw You will be well with me. $h n^{〔} . i \quad$ (Sin.B 31)

3 bit.f Its honey was abundant. (Sin.B 82)
twt wy How like her this is! (Urk.IV n.s st 368.5)
$n[y]-s w \quad$ He was thirty cubits. (Sh.S. 62)
$m h 30$
wr wy How great is your glory! b3w.k (Urk.IV 907.I7)
nfr st $r$ ht It is better (lit. good more)
$n b t \quad$ than anything. (Sh.S. 134)
wr hstim My praise was great in the $s t p-s 3 \quad$ palace. (B.H.I 26.153)
nfr pr.i My house is fine, and my wsh st.i dwelling place is wide. (Sin.B 155)
wr n.f irp There was more wine than $r m w \quad$ water (lit. wine was great to him (cf. chapter 20 Word order) more than water).(Sin.B 82)
N.B. This pattern occurs only in main sentences. In dependent clauses the adjective is replaced by a suffix conjugation of the adjective verb.
11.

VERBS
Classification
Verbs can be grouped into different categories according to morphological and semantic criteria.

1. Verbs are classified by the number of consonants of their stem. There are verbs with $2,3,4,5$, or 6 radical consonants, called biliteral (2-lit.), triliteral (3-lit.), quadriliteral (4-lit.), etc. Most of the verbs are built up of three radical consonants. Verbs with five or six radical consonants are rare.

2. Verbs are also classified by the nature of the last radical consonant in weak verbs and strong verbs.
a. Weak verbs (called "infirmae") are verbs whose last radical consonant is $i$ or $w$. Note that weak verbs with three radical consonants and certain other weak verbs have a feminine infinitive ending in $t$.

b. Strong verbs are verbs whose stem does not end in a weak consonant (ior $w$ ) and whose last consonant differs from the second last consonant.

3. Certain verbs have the possibility to geminate. This means that the last consonant of the stem can be repeated so that the verb has forms where the last consonant and the second last consonant are identical. The geminating verbs (= the verbs having this possibility) appear in geminated forms as well as in non-geminated forms. (For the use of the geminated forms, see below chapters 16 and 19.)
4. Biliteral and triliteral stems can give rise to new verbs by reduplication of two of the radical consonants thus forming quadriliteral or quinquiliteral verbs.

Ex.

名 sn brother

snsn fraternize
5. or $-s$ placed in front of a verb gives the verb a causative meaning.

6. Verbs can moreover be said to be regular or irregular. Five very frequent verbs are called irregular because of certain particularities mostly of graphic character. (A list of these verbs is given in chapter 7.)
7. Further, verbs can be classified as transitive or intransitive. Transitive verbs can take on an object, whereas intransitive verbs cannot. Examples of transitive verbs are: see, lead, read, build, give; and of intransitive verbs: go, run, live, come.
12.

VERBS
Moods, Tenses and Aspects

## 1. Moods

In order to indicate the attitude of the speaker Egyptian makes use of the following moods:

- The imperative mood is used to express commands, requests, etc. (cf. chapter 13).
- The indicative mood is used to express ordinary, objective statements (cf. chapter 14).
- The prospective mood is used to express a wish (optative use) and is also used in final and consecutive clauses (cf. chapter 15 ).

## 2. Tenses

The verb has to indicate the time of the action. The time can be past, present, or future with regard to the time of the speaker. Time from this point of view is called 'absolute time'. The time of the verbal action can, however, also be considered as prior, simultaneous, or posterior to another action without regard to the time of the speaker. Time from this point of view is called 'relative time'. The Egyptian language is able to express these different time relations. The various ways in which this is done are treated in chapers 14 and 17-20.

## 3.Aspects

The verb can also express aspects i.e. it can indicate whether the verbal action is accomplished (perfective) or non-accomplished (imperfective). An imperfective action can be ingressive, progressive, habitual, repetitive. Aspects and tense are closely linked.

## The sdm.f Form

The verb stem followed by the actor expression (the subject) is called the s $\downarrow \mathbf{m} . f$ form. This denomination is due to the fact that the verb sdm 'to hear' followed by a
pronominal subject (of the third person, he hears) was taken as an example. The same name is used even if there is a substantival subject following (the father hears).

The sdm.f form is a syntactic unit that is used to make up a sentence together with other parts of speech. It is not to be considered as two separate units that are juxtaposed and it cannot make up a sentence all by itself.

In the following we are going to see how this form - bare or together with different morphemes and in combination with other structures - is used to form different moods and tenses in main sentences and in subordinate clauses.

## 13. <br> THE IMPERATIVE

The stem of the verb is used to express the imperative. In the plural the stem is sometimes followed by an ending it or $i$ ow.

- The subject of the imperative is generally not indicated.
- The subject can, however, be indicated in one of the following ways:
a. by a dependent pronoun: in the singular $\Delta t w$, in the plural $\underset{\sim}{m} t n$. A particle $\quad \operatorname{irf}$ (cf. chap. 9) can be inserted in the plural to emphasize the pronoun.
b. by the preposition $s r$ (or $\ell^{\sim} \approx$ ir), followed by a suffix-pronoun.
c. by the preposition - $n$, followed by a suffix-pronoun.
- An emphatic word $m[y]$ can be added to the imperative with the meaning "pray".

## Special imperative forms

 imit is the normal imperative form of di, which occurs very rarely. Sf $A$ $m i$ is the normal imperative form of $\Omega$ is and of $\$ \| \cap$ ii, which are used but very rare,
$\$$ $m$ means "take" and is generally followed by - $n$ and a suffixpronoun.
S $m k$ means "look", "behold", or existence like the French "voici"; this word can be used as an invariable particle and can also be declined as follows:

Singular

fem.

そごごー

## 14. <br> INDICATIVE FORMS IN MAIN SENTENCES

This chapter takes up main sentences where the center of interest of the communication is the verbal action i.e. where the verbal action is the comment.

## A. The Present Tense

The indicative mood of the present tense is expressed in different ways. Transitive verbs can take the sdm.fform preceded by iw or iw: $f$ (the two variants are equivalent). Transitive verbs can also appear in the structures iw f hr sdm or mk $s w h r s d m$ that indicate a progressive action (for examples see chapters 7 and 8 ) and intransitive verbs in the structures iw: f $m$ iit or $m k s w m$ iit (for examples see chapters 7 and 8 ).

The sdm. $f$ used in these structures is called the circumstantial sq/m. $f$ and is equivalent to an adverbial phrase.
iw has the effect of relating the statement to the sphere of interest and to the time of the speaker thus to relate the action to what is called absolute time.

## Transitive verbs

## Intransitive verbs

iw.i di.it I give bread to the ngsy neighbour. (Sin.B 151)

## B. The Past Tense

The indicative mood of the past tense is expressed by iw sdm.n.fof transitive verbs.
The morpheme $n$ inserted between the verb stem and the subject indicates the past. Intransitive verbs appear in the structures iw.i iithwi or $m k w^{\prime} i i . k w i$ i.e. structures including the stative (see chapter 9). (The switch from the 3rd person to the first when denominating the structure is caused by the fact that the stative of the 1st person singular has a distinctive ending that makes it easy to recognize the form as a stative.)

The ssdm.n.f used in this structure is called the circumstantial sdm.m.f and is equivalent to an adverbial phrase.
if has the effect of relating the statement to the sphere of interest and to the time of the speaker.

## Transitive verbs

## Intransitive veribs

 iw.i ii.kwi

 $w^{\prime} m n n n$ peasants. (Peas.B 175 ) shty

iw ms.n.s She gave birth to three nsyw 3 kings. (Westc.12.11)
iw sms.n.i I accompanied the ruler $h k 3 r n m t t . f$ on his journeys. (Urk.IV 944.4)

## C. The Future Tense

The indicative mood of the future is expressed by iw.fr salm / iik. (For this structure see chapter 7.)

Transitive/Intransitive verbs

## 15. <br> THE PROSPECTIVE

The prospective form is the name of a bare $s$ dm.f.

## Morphological properties:

In the prospective form the verb can take on the endings $-y$ and $-w$ and a few verbs can appear with particular distinctive forms:

## Syntactic properties

- The prospective form is used in independent sentences with an optative, jussive, or hortative meaning ('may he hear','he shall hear', 'he will hear').
- The prospective form is used as the object of the preceding verb of the main sentence, particularly the verb rdi, and with final and consecutive meaning, thus in nominal or circumstantial use.
- The prospective form is used after the particles $t h, h r, k 3$.

sdm.i wpwt nt hrdw.s
ir.i rn.k I will make your name. (CT II 219 f)

May I hear the messages of her children. (Sin.B 166)
gmy.k ts pn im.st

You shall find this teaching there. (Sall.II 4.3)

|  |  | You shall take heed to do every thing as that which is according to law. (Urk.IV 1088.5) |

## 16. <br> THAT-FORMS

Chapters 14 and 15 treated sentences expressing action and presented the different patterns with regard to transitive and intransitive verbs in the present, past, and future tenses. There the sdm.f was the comment of the sentence. Sometimes, however, the verbal action is the topic and it is followed by an adverbial phrase functioning as the comment of the sentence. This stm.fis also found after prepositions, a typical position of a noun. We have already met with one substantival form of the verb, the infinitive (see chapter 7). The infinitive is a non-personal form, i.e. the action is not connected with an actor. We are now going to treat a personal substantival form of the verb. This form is called the that-form. That-forms is the name of bare sdm.f forms and bare sdm.n.fforms.

These forms are also called dass-Formen, emphatic forms, formes substantives personnelles, or second tenses. The most convenient denomination seems to be that-forms and this expression will therefore be used throughout this book.

## Morphological properties:

- Weak verbs i.e. verbs whose last radical is a weak consonant (ior $w$ ) reduplicate the second radical in the sg m .fform.

- Irregular verbs appear with the forms:
$\mathrm{A}_{\mathrm{mmm}}^{\mathrm{mmm}} \mathrm{inn} \quad \mathrm{B} \quad \mathrm{Cld}$

## Syntactic particularities:

The that-forms are substantival forms of the verb and function in all positions where nouns are found.

## A. in non-initial position

- after prepositions
- as a genitive
- as the object of the verb
- as the topic in an adjectival sentence / as the subject of a verb
- in a nominal sentence:

## B. in initial position

- as the topic of an adverbial sentence.

## A. In non-initial position

That-forms are used

## 1. after prepositions

irr hm.k m Your Majesty acts as he mrr.f likes. (Sin.B 236)
 $m$ 3d ib.k r.f Don't allow your heart to be hft h.ss.f angry because he is wretched. (Pt. 74-76)

## 2. as a genitive

3. as the object of the verbs of perception, knowledge, etc.
 n!rr.f a god. (Urk.IV 363.6)
4. as the topic of an adjectival sentence

ksn m.ss.s Her travail (lit. she gave birth) was painful.(Westc. 9.22)
5. in a nominal sentence

## B. In initial position

An initial bare substantival sdm.for sdm.n.f functions as the topic with a following adverbial phrase as comment according to the pattern of adverbial sentences. The adverbial phrase can consist of a circumstantial clause (see chapter 18). These forms are regularly used in questions (see chapter 21). As stated above the 'that'-form is also called
'the emphatic form'. This is because the adverbial phrase is sometimes the center of interest of the communication: I saw him in the street (and not somewhere else). If the adverbial phrase is strongly stressed, the pattern can be translated as a so called cleft sentence: It was in the street I saw him.

wnn.k $h n^{c} . i \quad$ That you exist is with me or It is with me that you shall stay. (Sin.B 77)
dd.k ib.k You shall put your heart behind $m-s 3 s s^{3} w \quad$ the papyrus rolls. (Sall.II 4.2)
it.n.i r.sw That I seized the Southerners $\underline{h r} w d$ k3.f was on the command of his Ka mhtyw hft and the Northerners according to ssm.f his guidance. (Urk.IV 1228.1516)
shr.n.i st It was according to his command hft wd.f that I felled them. (Urk.IV 1236.10)
wnn irf t3 How then is that land? (Sin.B pf $m i m$ 43)
ph.n.k nn Why did you come here? (Sin.B hr syisst 34)
$\begin{array}{ll}\text { dd.tn } n . f \text { hr } & \text { Why do you give to him? (Adm. } \\ \text { 5.9) }\end{array}$
ii.n.i hr.k It is so that you can bring me $n b . i$ int.k and so that I can see your wi m3n.i perfection (2 prospective forms) nfrw.k that I have come to you, my Lord. (RB 116.3-4)

## 17.

## OTHER STRUCTURES USED IN MAIN SENTENCES

A.

Other auxiliary elements than iw can be placed in front of $s d m . f$ and $s d m . n . f$ and in front of adverbial sentences giving rise to composed tenses. The auxiliary elements are $\#!\cdot n, w n, w n . i n$, and $w n . h r$.

## 1. 'h'. $n$

$\mathscr{T} \cdot n$ is used in front of $. v i d m . n \cdot f$ of transitive verbs and in front of sentences with adverbial predicate (preposition + infinitive or the stative of an intransitive verb). The sentence structure is actually that of the adverbial sentence with $\$\lceil. n$ (initial bare ssdm.nl:f), a 'that'-form, as topic and the following expression (circumstantial sdm.n.f, preposition + infinitive, or slative) as comment.

There is a time difference between a sentence introduced by iw and one introduced by $\% \cdot \pi$. The iw structure links the event to the present situation of the narrator or to the sphere of interest and the time of the speaker, whereas $\% / n$ links the event to the past as an objective historical narration. Thus iw sdm. $n$. $f$ corresponds more or less to a present perfect and $\boldsymbol{T c} \cdot n . \mathrm{sdm} / \mathrm{m} . \mathrm{f}$ to a past tense.

|  | ' $h^{〔}$. $n$ <br> sdm.n.s hrw | She heard a sound.(Westc. 12.1) |
| :---: | :---: | :---: |
|  | $\begin{aligned} & h^{\top} \cdot n \quad d d . n . f \\ & n . i \end{aligned}$ | He then said to me. (Sh.S. 158) |
|  | 'he.n in.n.i ht.f | I brought away his possessions. (Sin.B 143) |
|  | $\begin{aligned} & \text { 'h.n rdi.n.f } \\ & \text { n.imw } \end{aligned}$ | He gave me water. (Sin.B 26) |
|  | 'h'.n wsb.n.i $n . f s t$ | And I answered him this. (Sh.S. 86) |
|  | $h^{\prime} \cdot n s^{\prime} h^{\prime} \cdot n . f$ <br> sw | And then he raised him up. (Westc.8.1) |
|  | 「h'n smnh.n.i $s[v]$ | I have embellished it (=the city). (Urk. VII 29.8) |
|  | ' $h^{\top} . n$ 3tp.n. $i$ st rdpt in | I then loaded them onto this boat. (Sh.S. 166) |
|  | rh.n <br> htm.n.sn't | Then they locked the room. (Westc.10.7) |

慁

自

＇hr．n it．n sy And a crocodile caught her． msh（Westc．12．18）（Cf．ch．24）
＇$h\ulcorner. n d d . n s 3$ And then the king＇s son said： nsw ．．．（Westc．7．16）
＇h＇．n rdi．n Then my master gave me n．i nb．i nbw gold．（Urk．IV 893．10） （Cf．ch．24）
${ }^{\prime} h{ }^{〔} . n \quad$ dd．n．f And then he said to them：．．．
n．sn

2．wnn．f
wnn．f can introduce a sentence with adverbial comment（ $w n n: f \mathrm{hr} s \mathrm{~s} / \mathrm{m}$ ）and is the substantival form（that－form）corresponding to iw．f hr s d dm ．

wnn．k hr You shall see to it that they rdit di．tw give him provisions，without n．f rew nn letting him know that it is you rdit rh．f ntt who give it to him．（Peas．B ntk rdi n．f 1．83）（See chapters 18.2 b and 20．） st

## 3．wn．in

$w n . i n$ is used in front of $s d m \cdot f$ ，a stative，or $h r+$ infinitive and introducing a sentence referring to the past．

|  | wn．in．tw <br> hr rdit n．i | The pharao（lit．one）gave me gold．（Urk．IV 3．15） |
| :---: | :---: | :---: |
| $8 \text { Ifres }$ | nbw <br> wn．in hm．f <br> hr rdit st | So his Majesty gave them to me as servants．（Urk．IV 4．13） |
|  | n．ir hmw wnin．tw hr ＇h3 hr | They（lit．one）fought on the water．（Urk．IV 3．10） |
|  | mw <br> wnin shty pn hr rmit ＇3w wrt | This peasant wept very much．（Peas．B 1．24） |

## 4．wn．hr

wn．hr can be used introducing a sentence referring to the past．

wn．hr．i hr $s_{m s}$ ity＇$n h$ may he live，be prosperous $w d 3 s n b h r$ and well，on my two legs． $r d w y . i \quad$（Urk．IV 3．5）
wn．hr．i I travelled freely．（Urk．IV wstn．kwi 1075．4）

## 5．wnnh hr

wnn．hr can be used in front of a ．sdm．f with regard to the future．

B．
The morphemes．in，$k^{k} 3$ ，or ．$h r$ can be inserted between the verb and the following subject（a noun or a suffix－pronoun）and give rise to the composed verb forms sglm．in．f，sqm．K3．f，and sqlm．hr．f．

## 1．sadmin．f

$s d m$ iint frefers to the past and gives an inchoative meaning（expressing the beginning of the action）to the verbal action．This form can be translated either as＂he heard＂or as＂and then he heard＂．This form is rather frequent in Middle Egyptian，particularly in the literary texts．

24－8： 70.0

dd．in hm．f His Majesty said to the queen $n$ hmt nsw（lit．royal wife）．（Sin．B 264）
ddin shty This peasant said to his wife． pnnhmt．f（Peas．R 2）
m3．in．sn They saw His Majesty． $h m . f \quad$（Urk．IV 657．17）
ir．in．sn sw They washed him． （Westc．10．11）

四
2 If $n w^{\boldsymbol{c} m n n}$ these Companions. (Sin.B $n$ smrw 256)

## 2. sdm.hrf

ssdm.hr. $f$ refers to the future and expresses an action or a result that is sure to come about. This form is used particularly in medical and mathematical texts.
You shall make. (P.Rhind

## 3. sdm.k3.f

sdelm.k3.f refers to the future and expresses an expected action that is likely to take place.

$\xrightarrow{2}$ dd.k3.sn | They shall say. |
| :--- |
| 569.12 ) |

srd.k3 st Your Majesty shall make them hmt.t ds.t grow yourself. (Urk.IV 346.16)
18.

SUBORDINATE CLAUSES
Circumstantial clauses
A circumstantial clause is a clause that functions as an adverb. It can be either marked i.c. introduced by a word or expression indicating that it is a subordinate clause or unmarked i.e. without introduction.

1. Marked circumstantial clauses

A circumstantial clause can be introduced by a 'conjunction' (see below at the end of the chapter) or marked by the particle is (cf. chapter 9). is is used as a subordinating morpheme of non-verbal sentences without $i w$, as nominal sentences and adjectival sentences.

$\because$ мит $\triangle A x=0$
iw w3h.n My Majesty has instituted a n.f hm.i festival of victory for him $h b$ nht $m$ miwt hft iit hm.i m wdyt tpt $n t$ nht
st hm.f hr $h r t n t 3 t h f t$ stl skr'nhw
m3 wi r-s 3 Look at me, now that I have s3h.it3 touched land. (Sh.S. 180)
$d d m 3^{t} t$ ir Speak justice and do justice, $m 3^{c} t d r$-ntt for it is mighty. (Peas.B wr.s 1.320)
$m m h i b . k$ Do not fill your heart, because hr-ntt tw you are one who knows. (Pt. $m r h \quad$ 53)
$m k$ wi $r$ Look, I shall take away your nhm '3.k ass, peasant, because it eats shty hr my barley. (Peas.B 1.11) wnm.f
$s^{s} m^{c} . i$
in mrwt For the sake of his continuing wn.f hr dd to speak, keep silence! $g r$ in kn.f If he is brave, he saves nhm.f.sw himself. (Adm.13.3)

## 2. UNMARKED CIRCUMSTANTIAL CLAUSES

There are also other ways of expressing a circumstantial action. The following structures are used:
a. the stative of intransitive verbs of motion and of transitive verbs with pronominal subject.
b. $h / m d r+$ infinitive.
c. bare .vdm. $f$ of both transitive and intransitive verbs. There are no morphological marks to distinguish this sgm.f from other sdm.fforms. However, verbs IIlae inf. do not reduplicate the second radical. In this respect it resembles the prospective. To give appears in the form di, which is also typical of the prospective.
d. bare $s d m . n$.fof transitive verbs.
N.B. 1. The fact that these forms are bare i.e. not combined with iw and further not initial makes it possible to recognize them as circumstantial forms.
N.B. 2. The time indicated by. $\mathrm{s} d \mathrm{~m}$. $f$ and $s$ time and is influenced by the time of the main clause. $s ⿷ d m$. $f$ indicates a concomitant action and $s d m . n$.fa previous action in relation to that of the main sentence.

'h'.n in.n.i Then 1 carried off his goods ht.f h3k.n.i after I had robbed his cattle. mnmnt.f (Sin.B 143)
sh3 n.k hrw Remember the day of burial, $n$ krs sb.ti $r$ when you pass to the state of im3h the blessed. (Sin.B 190)

## 19.

## SUBORDINATE CLAUSES

## Relative and Adjective Clauses

A clause that is equivalent to an adjective is called a relative or adjective clause (a young man - a man who is young).

## 1. Clauses with nty

Relative clauses can be introduced by the relative adjective $n t y . n t y$ is a variable word agreeing in gender and number with the antecedent.

a. The expression following nty is generally adverbial.
b. nir tends to become an invariable word.
c. $I t \nu \quad$ without antecedent means 'he who'
$\prime \prime \prime \prime$ without antecedent means 'what', 'that which'.
nty nt means 'whoever'.
ntr nbt means 'all that'.
(For inry, the corresponding negative relative word, see chapter 23.)

## Resumptive words

If the subject of the relative clause is not identical with the antecedent, Egyptian adds a resumptive pronoun or adverb that modifies the relation to the antecedent. Thus 'the man whose son was there' is in Egyptian 'the man who was there his son' ('his' being the resumptive pronoun) and 'the place where they are' would be 'the place that they are in it' ('in it' being the resumptive adverbial expression).

bw nty ntrw ... the place where the gods im $\quad$ are (Cairo 20485)
ssm pn nty $\ldots$ the situation in which I was wi hr.f (Sin.B 173-174)
nty hr.f $m \quad \ldots$ (as to this god) whose face tsm $\quad$ is (that of) a dog (Urk.V 67.1)
going to consider the cases where a form of the verb functions as an adjective. These verb forms are called the participle and the relative form.

The participles and the relative forms are the relativisation (transposing into a relative clause) of the indicative forms: he makes it, he made it, and he will make it. Now if we want to transpose these sentences into relative clauses, we can either focus 'he' or 'it'. If we focus 'he', we get a sentence like: '(he) who makes it' and this is the participle. If we focus 'it' instead, we get a sentence like '(that) which he makes' and this is the relative form.

The relation between the indicative, the participle, and the relative form is shown the following table:

| Indicative <br> he loves | Participle <br> (he) who loves <br> he loved <br> he will love |
| :--- | :--- |
| (he) who loved who will love |  |

## Relative form <br> (that) which he loves <br> (that) which he loved <br> (that) which he will love

1) Weak verbs and geminating and irregular verbs have geminated forms.

## N.B. 1. The sidm.fy.fuform

The sdm. $\%$ y.fy form is a participle with prospective meaning. It agrees in number and gender with the antecedent and takes the following forms:

Sing. masc.

fem.

Plur. masc. and fem.

## N.B. 2. The prospective relative form

The prospective relative form is characterized by the ending $y$ in the masculine and by or //in the feminine.

These forms are used as adjectival epithets agreeing in gender and number with the antecedent. They can, however, also be used alone as a substantive without antecedent. The endings are the same as those of the adjective (cf. chapter 10 ). The plural ending $\omega$ is very often left out.

There are both active and passive forms of the participles. The passive forms can take the endings $w$ in the present tense and $y$ in the past.

## Resumptive words

As in the relative clauses with nty, resumptive words (suffix-pronouns, adverbs, or adverbial phrases) are used with the participles and the relative forms to modify the relation to the antecedent from 'who', 'whom', 'that' to 'whose', 'of which', 'to whom', 'where', etc.

They give invocationofferings consisting of bread, beer, oxen, and fowl, and all things good and pure on which a god lives (Urk. IV 76.7)

You shall see the capital in which you were born. (Sin.B 188)

## 20. <br> EMPHATIC NOMINAL SENTENCES

An adjectival verbal form (participle, relative form, cf. chapter 19.2) without antecedent, which is the equivalent of a noun, can also be used in the patterns of nominal sentences (cf. chapters 4 and 5 ).

A nominal sentence, bipartite or tripartite i.e. without or with $p w$, comprising an adjectival verbal form in the rear position is a cleft sentence.
A. Cleft bipartite nominal sentences

The first position of a cleft bipartite nominal sentence is occupied by a noun or noun equivalent (= adjectival verbal form) preceded by in or by an independent pronoun.

$\min _{x \rightarrow 1} 9 \rightarrow 1$
in ntr.i wid It is my god that makes it n.i st green for me. (Urk.IV 132.12)
in wnm $d p \quad$ It is the eater who tastes. (Peas.B 1.215)

It is the sleeper who sees the dream. (Peas.B 1.216)
in snt.f scnh It is his sister who makes his rn.f name live. (Urk.IV 12.12)
in $n n \quad n$ It is these gods who make the ntrw $s^{\text {r }} r$ words of those who are on $m d w t p w-t 3$ earth ascend. (Amd. 2nd Hour, Hornung I 25)
ink $\xi^{r} d$ drt.f It is I who cut his hand. (Urk.IV 894.1)
ntf ddi n.f It is he who gives them to st him. (Peas.B 1.85)
ntf ddi $t p$ - It is he who gives the $r d$ instructions. (Urk.IV 363.11)
ntf d3ir It was he who controlled the h3swt foreign lands. (Sin.B 50)
ntf sssm wi It is he who leads me. (Urk.IV 363.8)
N.B. This pattern refers to the present or the past. A similar pattern that has a prospective $s d m . f$ in the rear position refers to the future. The future can also be expressed by the prospective relative form.

## B. Cleft Tripartite nominal sentences

A cleft tripartite nominal sentence consists of a noun or noun equivalent (for instance an adjectival verbal form) $+p w+$ an adjectival verbal form.

It is the one who is called who
comes. (Westc.8.11)

For a similar pattern cf. chapter 27A, sdm pw ir.n.f.
21.

INTERROGATIONS
A. The interrogative converter in

A sentence can be converted from a statement to a question by means of the particle in.
$\cap \operatorname{mon} \ell$ e
 $r w 3 t$ (Peas.B 1.5)

$\cap \operatorname{lom} \$ in iw m3't Is it true the saying?

$\because \min \triangle H^{\circ}$
fmonflid
in iw wn ky nht
in kn.f Is he brave? (Adm. 13.3)
$4 \rightarrow-\ln$ 'w3.tw.i rf $\begin{aligned} & \text { Shall I then be robbed on his } \\ & m d 3 t t . f\end{aligned}$

## B. Interrogatives

There are also interrogative words meaning 'who', 'what', etc. These words can have different functions in the sentence and are placed according to their function.
1.

This word can have different functions in a sentence and is placed in accordance with its function.
 what
This word is used as a comment.

3．Л 1 ， $\boldsymbol{\pi}^{\prime \prime}$ ， $\boldsymbol{J}_{s y}$ who，what，which．
This word is used as a comment and as an adjective．

This word can have different functions in the sentence and is placed according to its function．

5． 4 是 40 ih what
6.
 wr how many

7．мпм

| olldon on | pty st | What is this？（Westc．8．10） |
| :---: | :---: | :---: |
| $\infty$ | ptr $t w$ | Who are you？（BD ch．125） |
| Y | isst pw | What is this？（Westc．6．25） |
| $\text { J } 40=\square$ | sypw | Who is it？（Urk．V 37．1） |
| -oden | ptr rn．k | What is your name？（BD ch． 125） |
| ail余伿 | pty irf $p^{3} \boldsymbol{i b}$ | What now is this mood（lit． heart）？（Westc．9．13） |
| $\cos 0 \cos ^{2}$ | iry．im | What do I do？（Adm．2．9） |
|  | ir．k n．fisst | What do you do for him？ （Urk．V 182．6） |
| $\infty$ | ir．k n．sn isst | What do you do for them？ （Urk．V 162．15） |
| aptren | ir．tw $n n m i$ $m$ | How could such a thing be done？（Sin．B 202） |
|  | dd． i n mmin | To whom can I speak today？ （Leb．103） |

sdd.tw mdt Why was this word spoken? in hrih (Urk.IV 27.11)
wnn irf $t 3$ pf How shall this land fare? (Sin. mim B43)
ph.n.k nn hr Why have you come here? m (Sin.B 34)
ii.n.k tny Where do you come from? ( Nu 98.6)
$w n . k!n \quad$ Where have you been? (Lac. TR 32.2)
$m s . s$ irf sy When shall she give birth? (Westc.9.15)
'nh.k irf $m$ What shall you live from? isst (Lac. TR 23.35)
sh3.tw nn hr Why is this called to mind? sy isst
(Urk.IV 27.10)

## 22. <br> THE PASSIVE VOICE

The passive voice is expressed as follows in the different moods and sentence types.

## Main sentences

| Indicative Present | iw sdm.ow.f |
| :---: | :---: |
| Indicative Past | iw sdmw $N$ for transitive verbs with nominal subject |
|  | iw.irdi.kwi for transitive verbs with pronominal subject |
|  | Th'n.sdm.f |
|  | 'h'n+.sdm.kwi |
| That-form Present | $s d m . t w . f ?$ |
| Past | sılm.n.tw f |
| Prospective | şlow.f |

## Circumstantial sentences

Present sdon.tw.f
Past $\quad \operatorname{sdn} w N$ for transitive verbs with nominal subject sdm.kwi for transitive verbs with pronominal subject

is rdiw n.k Air has been given to you. t 3 w (Lac. TR 2.72)
in hos ni A pyramid of stone is being $m r m i n r$ constructed for me. (Sin.B 300)
in st3.tw.f He is ushered in together with $h n^{\prime}$ nsyw the kings of Upper Egypt. (Budge 268.9-11)
iw.f $m n m$ He is established as lord. $n b$ (Urk.IV 17.2)
iw.f sspd $m$ It is outfitted with everything bu nb afr that is good. (Westc.11.20)
' $h$ '. $n$ in n. $f$ So there was brought to him a $s m n$ goose. (Westc.8.18)
'h'.n sspd Boats were prepared for the ' $h^{\prime}$ 'w $n$ s $\quad n \quad$ king's son. (Westc.7.9)
now
'h'.nw3hp3 The carrying chair was put knew down. (Westc.7.14)
'h'.n wish His Majesty's camp was ihs em $n$ pitched there. (Urk.IV 655.15) $h m . f$
'hen rdi.kwi I was appointed follower. $r$ smew (Sh.S. 177)
' $h$ '. $n$ in.kwi Then I was brought to this $r$ is $p n$ in island by the surf of the sea. w3w $n$ w3d (Sh.S. 109)
$w r$
ir.n.tw $n n$ Why was this done? (Urk.IV hr 365.11)
nnk $\quad d f 3 w$ To me belongs the provisions. ir.n.t[w] ni (See chapter 26B). It is for me htpwt that the offerings were made. (CT IV 134b-c)

ir sn.nw $n$ A second festival of the $h b n p 3 h b$ festival of victory is to be nht $m$ hrw $n$ made on the day of $s^{c k}$ ntr introducing the god. (Urk.IV 740)
ic.in.sn sw They washed him, when his scd hpw.f umbilical cord was cut. (Westc. 10.11-12)
in hm.f rdi ir. $t[w] . f$
iw.f $r$ smr
m-m srw $r d i . t[w] . f m$ $k 3 b s n y t$

He will be a friend among the noblemen, when he has been placed in the midst of the courtiers. (Sin.B 280-281)

THE NEGATIVE
All patterns studied so far were in the affirmative. As it is necessary to be able to express the negation of a conception or a sentence, there are also negative patterns.

The negative can be indicated in different ways: by means of a negative adverb like 'not', by means of prefixes like 'in-', 'un-', and 'mis-' (inactive, unaware, misunderstand), by means of opposite words, where one word is the counterpart of the other, like rich and poor, and by the use of words with negative meaning like 'lack'. It is the same in the Egyptian language, there are, as we will see below, several different ways of expressing the negative.

Sometimes the negation concerns only one word or one expression of the sentence as in "We meet them now and again, not every week but perhaps once a month", sometimes the sentence as a whole "We do not meet them very often". In the last sentence it is the nexus (= the relation between the subject and the predicate, in this case between 'we' and 'meet') that is negated. This distinction between the negation of one word or one expression and the negation of the nexus is important in the Egyptian language.

Let us now look at the different expressions of the negative and see what happens to the affirmative patterns we have studied, in which cases the negative is obtained by the addition of a negative word like 'not' or by means of a negative verb, and in which cases the language has resort to negatival counterparts.

## I. Main sentences

## A. Negation of the predicative nexus

1. n...is is the negation used in sentences without iw. It thus serves as the negation in:
a. nominal sentences.

NB. The particle is is missing in bi-pronominal sentences.

$n$ ink is $k 3 s 3$ I am not presumptous (lit. $g r$ high of back) either. (Sin.B 230)
$n$ ntf pw $m$ It is not he, surely. (Sin.B
m3't 267-268)
b. sentences with adverbial comment and with a that-form as topic.
 4ns

sm.n.k 'nh.k It was living that you $n$ sm.n.k is departed, it was not dead that $m w t . k \quad$ you departed. (Pyr. 833a)
$n$ ii is $h \mathrm{ht}$ it is not by itself that riches $d s$.[s] arrive. (Ptahh. 180-181)
2. $n$ is the negation of the indicative verbal patterns of the present and the past.

Patterns with $/ /$ are the counterparts of the affirmative patterns with iw as follows:

3. $n n$ is a predicative negative. It is always the comment of the sentence where it occurs, with the following expression as a topic. $n n$ is used as the negation of:
a. sentences with adverbial predicates whose affirmative counterparts are introduced by iw.for iw $N$ or iw $w n$ (for iw wn see chapter 26). Sentences with $n n$ are adjectival in character and that is why the dependent pronouns are used as subjects.

$n n \quad s[y] \quad m$ It (= the flight) was not in my ib.i
nn gry im.f There is no falsehood in him. (Urk.IV 14.12)
nn wi $m$ hr- I was not among them. ib.sn
nnsnw.f He has no peer (lit. his second does not exist. (Sin.B 47)
$n n m 3^{\prime} t y w \quad$ There are no just persons. (Leb. 122)
b. sentences with a prospective form in initial position, $n(n) s d m . f$. The prospective can also be negated by $n s p s d m . f$ in initial position.

nn wn.i $n$.k I will not open to you. (BD ch. 125)
nn sh3.i n.k I will not call to mind to you $s 3 t k t t \quad a \operatorname{little}$ daughter. (Sh.S. 128)
$n n$ snd.f He shall not fear. (Sin.B 279)
$n$ npm3.k iw You will never see this $p n \quad$ island. (Sh.S.153)
4. imf is a negative verb that occurs only in the $s$ d $m$.fform. It is a negative verb with modal nuances and serves sometimes to negate the initial prospective form.

Allirmative Negative
.$s d m \cdot f$ imi.f.sdm

imi.k wsr $m$ May you not be mighty in her ht.s womb. (Westc.10.9)

## B. Negation of a word or expression

1. im is a negative verb. It is a complete verb that is conjugated instead of the main verb. $t m$ is then followed by the form called the negatival compliment of the verb. This negatival complement can take the ending $w$ but the ending is normally omitted. The infinitive gradually replaces the negatival compliment of the verb.
lm negates nominal forms of the verb and we thus find it before:
a. the that-forms sdm.fand sdm.n.fas well as the infinitive.

b. the prospective in non-initial position.

iw wd.n Gb Geb, the father of Osiris, it Wsir tmi commanded that I do not eat wnm hs tmi excrements and that I do not swr wsst drink urine. (Harhotep 396397)
c. tm also serves as negation of the forms scdm.in.f, sdm.hr.f, and sdm.k3.f.
$h d n . t \quad r \quad$ use the smell of your $h d n-$
plant against N. (PT 696g)

## $\bigcirc \mathrm{N}$

2. $m$ which is the imperative form of the negative verb iminegates the imperative.
$m$ snd sp 2 Do not fear, do not fear! (Sh.S. 111)

SCJ bint evil！（Peas．B 1．152）

$m \underline{d} \boldsymbol{g r g} \quad$ Do not speak falsehood！ （Peas．B 1．159）

mrdikt mst kt

Do not set one thing in the place of another！（Peas．B． 1．152）

## II．SUBORDINATE CLAUSES

1．$n$－is negates adverbial phrases that constitute a part of a sentence or form an independent sentence．

pn n－mrwt wnn．［i］hnref $m$ st w＇tt $n$ is $n \mathrm{tm}$ wnn hr－ r $n$ irt is
snwy
rdi．n．［i］swt I caused myself to be buried krs．t［w．i］$m$ in one tomb with this Djau is $w^{\ulcorner } h n^{c} D^{\prime} w$ for the sake of being with him in one place and not through the non－existence of the wherewithal to make two tombs．（Urk．I 146．16－147．3）

2．The use of tm ．
a．$t m$ is used to negate the adjectival verbal forms：the participle，the $s d m f y$ form， and the relative form．

|  | t3w nb tmm hnd st in kwy bityw | ．．．all lands that had not beer trodden by other king： （Urk．IV 780） |
| :---: | :---: | :---: |
| ～肌○心号 | $n n \quad s t \quad n b t$ tmt．n［．i］ir mnw im．s | There was no place in which did not make monuments （Louvre C 15） |
|  | ir grt fhry．fy sw $\operatorname{tmt}[y] . f[y]$ ＇ha hr．f | Now as for him who shal lose it（＝this boundary）an shall not fight on behalf of $i$ ．．．（Berlin ÄI p．258．19） |

b. m is also used to negate the construction $r$ sdmr. $f$ (cf. chapters 18 and 27).

ir sp hncf Deal with him privately until $w^{〔} w r$ tmt.k you are not troubled about his $m n$ hert.f condition. (Pt.465-6)
3. Twty is a negative relative adjective and can as such function as a substantive. /wty enables negative constructions with $n$ and $n n$ to function as a substantive or attribute.

The word takes the following forms:
 fem.

ink iwty hsf.f I am one who is not driven $m$ ntrw away among the gods. (Urk.V 10.13)

ksn wy w3t How bad is the road that has iwtt mw.s no water. (Bibl.Aeg.IV 1 25.9)
 h3rt iwtt hi who has no husband. (Urk.IV 1078.6)

ind hrw.tn imyw wsht.tn

Hail to you who are in your no $n t \quad m 3^{\prime} t y$ whose body there is no

hwt.sn

The negative is expressed as follows in the different patterns of main sentences and subordinate clauses:

1) NB. To mir:fcorresponds $/ 1$ mr:f is.
${ }^{2)}$ NB. Later usage is in + negative main sentence.
24. 

## WORD ORDER

## THE POSITION OF DIRECT AND INDIRECT OBJECTS

Apart from the questions of word order that have been mentioned in connexion with the presentation of the different sentence patterns, we also have to consider a few word order peculiarities that occur in sentences with a pronominal object and a pronominal adverbial phrase equivalent of a dative. The general rule is that
a. suffix-pronouns take the precedence over dependent pronouns and
b. both suffix-pronouns and dependent pronouns precede a nominal subject.

As personal pronouns are used referring to persons or things already mentioned their leftward movement is part of a tendency to present old information as early as possible in the sentence.

Example with a pronominal subject:

Example with a nominal subject:

|  | 'h'.n rdi.n n.i nb.inbw | Then my master gave me gold. (Urk.IV 893.10) |
| :---: | :---: | :---: |
|  | $\begin{aligned} & \text { 'he.n it.n sy } \\ & \text { m.sh } \end{aligned}$ | And a crocodile caught her. (Westc.12.18) |

## 25. <br> TOPICALIZATION

The speaker/writer may feel the need to highlight one or several components of a sentence. In the spoken language this can be done by intonation, which is a device we know nothing about in Egyptian but it can also be done by morphological or syntactic means visible in the written language. Let us call the way of marking a member of the statement as being more important than the others topicalization.

1. The topicalization can be obtained by frontal extraposition. This means that a word is taken away from the position it normally occupies in the sentence and is placed in the beginning of the sentence. In the position then left vacant a deputy pronoun is placed. A sentence with frontal extraposition of the subject is then realized as: noun $+s d m$. $f$ and a sentence with frontal extraposition of the object as: noun + $s g / m . f+s w$. The sadm.f in question is generally considered to be circumstantial. The analysis of the sentence on the pragmatic level is that the noun is the topic and the $s d m$.f the comment. Normally the extraposed noun is definite.

2. This structure can be preceded by iw or a non-enclitic particle (e.g. mk, isi). These additions bring the statement, which is otherwise timeless, in relation with the actual present moment of the speaker/writer i.e. in relation to absolute time. This structure is often used to express generalizations.

iw $p^{\prime} t$ di.sn Mankind gives him adoration. n.f t3w (Urk.IV 17.9)
iw htw Even trees fall. (Leb.21) hr.sn
ist nsw The king had completed his km.n.f lifetime of many years. 'h'w.f $m$ (Urk.IV 896.14)
3. 

MISCELLANIES I

## A. There is/was

To express general existence the Egyptian uses /iw/wn.
 Ddi rn.f

in iw wntw3 mrrw
in iw wn ky nht' 'h3 r.f

There was a citizen. His name was Djedi. (Westc.6.26-7.1)

Is there a man of low station that is loved? (Sin.B 120-121) Is there another strong man who can fight against him. (Sin.R 158)

The corresponding negative expressions are:

> nn + noun
$n n w n+$ noun
$n$ wnn:f
$n$ wnt.f
$\rightarrow \operatorname{mos}$ OLI
nn snw.f He has no peer (lit. his second does not exist. (Sin.B 47)

nn drw.s Its limits do not exist. (Sin.R 16)

$\rightarrow \sim \sin \circ \frac{51}{1}$
$n n \nmid w t \quad$ There is no evil. (Urk.IV 115.2)
$\cdots$

$$
\begin{aligned}
& \text { nn wn } \begin{array}{l}
\text { There is no end to it (lit. there } \\
\text { phwy.fy } \\
\text { does not exist its end). (Leb. } \\
\text { 130) }
\end{array}
\end{aligned}
$$

nn wn $m^{\text {'r }} r$ There was none wretched in $n h 3 w . i \quad$ my time. (B.H. I 8.19)
 (Eb. 100.15)

## B. Possessive sentences

There is no Egyptian verb meaning 'possess' or 'belong to'. This idea is expressed in different ways:

1. by means of an adverbial phrase consisting of the preposition $n+$ a suffix or a noun (the dative).
2. by means of - $n(y)$ followed by a dependent pronoun; in the 3rd person the hieroglyphs are then linked together by the sign " 7 so that we find the orthographs $T$ To and $T h$.
3. by means of the independent pronouns of the 1 st and 2 nd person as the possessor expression followed by a noun or a dependent pronoun. The first person pronoun can then take the orthography $\stackrel{\rightharpoonup}{\approx>}$.
4. by means of the expressions n.i-imy, n. $k$-imy followed by a noun or a dependent pronoun.

| $A B \rightarrow ?$ | iw n.k'nh | You shall have life. (Urk.IV 561) |
| :---: | :---: | :---: |
| $\cdots m \cos ^{5}$ | $n[y]$ wi $R^{\text {c }}$ | I belong to Re. (Eb. 1.7) |
| $\overbrace{0}=\square$ | $\begin{aligned} & n[y]-s[y] \text { imy-r } \\ & p r \end{aligned}$ | It (-this province, fem.) belongs to the steward. (Peas.B 1.16) |
|  | $n[y]-s w n h 30$ | It (=the snake, masc.) was of 30 cubits. (Sh.S. 62) |
| $\sum_{0}^{\infty} \mathrm{rmm}$ | $n t k n b w$ | The gold belongs to you. (Urk.IV 96) |
| min 迎 | nnk pt nnk t3 | Heaven belongs to me, earth belongs to me. (Harh.562) |
| $\infty 4040$ | n.k-imy hd | The silver belongs to thee. (Urk.IV 96) |

27.

MISCELLANIES II
A. $s d m p w$ ir.n. $f$

This pattern is mostly found with verbs of motion. It consists of an infinitive followed by $p w$ and a relative form of $\langle r i$. The relative form of $\langle r l$ is always in the masculine. It is a sentence pattern that occurs mainly in tales.

## B. $\operatorname{sdm} \operatorname{in} N N$

The pattern sdm in $N N$ i.e. an infinitive followed by a subject in the form of an agent noun preceded by in occurs in texts relating an historic event and mostly accompanying a pictorial description of the same event.

| $\square 0 \sin \\| x$ | prt in hem.f | His Majesty went out. (Urk.IV 653.8) |
| :---: | :---: | :---: |
|  | iit in wrw nw Pwnt | The great ones of Punt arrived. (Urk.IV 324.3) |

三-ak = enthin

$n^{\prime} t \quad m$ hd in His Majesty sailed hm.f northwards. (Urk.IV 9.3)
$\xi_{m t}$ in ntrt tn The goddess set out at dawn. $m d w \leq w$ (Destr. 1.22)

## C. sadmt.f

The $s d m t, f$ form is a form of the verb with an inserted $t$-element that marks perfective aspect. (This form can be called 'terminative'.)

The use of this form depends on the surrounding text (= the co-text) and it is mostly found in the expressions $n$.sdmt.f'before he has heard', $r \operatorname{sdmt} . f$ 'until he has heard', and after a few other preposition-conjunctions like $d r, m, m-h r, h f f, m i$.

Do not provide for to-morrow, before it has come. (Peas.B1.183)
 i3st.f Do not speak to him, until he has invited. (Pt.126)
 $n t$ nsw hr $r$ the king ( $n t n s w h r$ ), until the
 day of mooring came. (Sin.B 309)

## 28. <br> SUMMARY I <br> SIMPLE AND COMPOUND TENSES

Here follows a survey of the verb forms found in the texts and how to interpret them.
First of all one has to consider whether the form in question is in initial position or not and whether it is bare or not.
A. Basic forms
$\mathrm{s} d m \cdot f$
sdm.f.
Sdmwf
Stative
$h / m / r+$ Infinitive

- These forms are non-initial and bare.
- They are circumstantial and constitute subordinate clauses (see chapter 18).

## B. Auxiliary + basic form

These above-mentioned basic forms preceded by auxiliary elements become compound verb forms with full predicative force and constitute a system of main sentence patterns in initial position. (See chapters 14 and 17.)

The compound verb forms are:

## Basic forms

sydm.f sdm.n.f sadmw:f Stative $h r+i n f . \quad m+i n f . \quad r+i n f$.
Auxiliaries

| iw | x | X | X |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| iw:f | x |  |  | x | x | x | x |
| wnif | x |  |  |  |  |  |  |
| wnin.f | x |  |  | $\mathbf{x}$ | x |  |  |
| 'h! $n$ | x | x | $\mathbf{x}$ |  |  |  |  |
| KT. |  |  |  | X | X |  |  |
| mk | (x) | (x) | x |  |  |  |  |
| mksw | X | (x) |  | $\mathbf{x}$ | x | x | x |

Note that $m k$ in front of $s d m . f$ and $s d m . n$.fis not an integral part of the structure but a free initial element (called a free presentative) and that the following verb form has to be considered as in initial position.

## C. Initial bare $\operatorname{ssfm}$.f

If we find an initial bare sdm.f.

- This can be a prospective form (see chapter 15) with full predicative force.
- This can also be a that-form (see chapter 16 ) which is the topic of the sentence, i.e. non-predicative, followed by an emphasized adverbial complement as comment.

## D. Initial bare ssdm.n.f

If we find an initial bare sdm.n.f.
-This is also a that-form (see chapter 16). It is the topic of the sentence and is followed by an emphasized adverbial complement as comment.

## E. Continuative sadm.n.f

There is also a bare $s d m . n$. $f$ with predicative function in non-initial position in a main sentence. It carries on the narration and is called continuative. There is no formal distinction between the continuative sdm.n.fand other sdm.n.fforms. "As a rule only the context, i.e. considerations of the natural sequence of events, can guide us in the choice between a circumstantial and a continuative rendering." (Polotsky, Egyptian Tenses, § 13).

## F. The forms .sdm.in.f, sdm.hr.f, sdm.k3.f

There are also the forms sdimin.f, sdm.hr.f, and sdm.k3.f(see chapter 17) and the form sdm.r.f(see chapter 27).

## 29. <br> SUMMARY II <br> A KEY TO SENTENCE AND CLAUSE PATTERNS

As the Egyptian verb functions as an adverbial (the basic form) or as a noun (the thatform and also the prospective form) the two main sentence structures are adverbial sentences (see chapters 7-9) and nominal sentences (see chapters 4-5).

Here follows a survey of the principal sentence and clause patterns in classical Middle Egyptian as a kind of rule of thumb for students. As Middle Egyptian is the designation of material from a long period, one is, however, always likely to come across examples that do not fit into this schema. The patterns are arranged according to the nature of the initial word.

## Pattern

A. Sentences starting with a substantive

1. Substantive + substantive
2. Substantive $+p w$
3. Substantive $+p w^{\prime}+$ substantive
4. Substantive + stative
5. Substantive + adverbial phrase
6. Substantive $+h i d m+$ infinitive
7. Substantive.+
8. Substantive $+1 p w /+$ adjectival verb form
B. Sentences starting with an independent pronoun
9. Independent pronoun + substantive
10. Independent pronoun $+\boldsymbol{p w}$
11. Independent pronoun + independent pronoun
12. Independent pronoun + adjectival verb forms
C. Sentences starting with an adjective
13. Adjective $/ n \prime+$ dependent pronoun/substantive
14. Adjective with suffix/noun ( $n f, j$ )
D. Sentences starting with a verb
15. Infinitive $+i n+$ substantive
16. Infinitive $+p w+i r \cdot n \cdot f$
17. Imperative
18. . $4 / \mathrm{m} . f$
19. sybuif
20. rechif+ adverbial phrase/circumstantial form
21. . $.4 / m . \mu$
22. .refm. $11 . f$
23. sdon.M.f+ adverbial phrase/circumstantial form
24. sidnw.f
25. sylmow $N$
26. sy/m.m: $f$
27. ry/m.n. $n$ : $f$
28. sgdonitra'
29. .sy/min.f, s.
E. Sentences starting with in
30. In/ln in'+ any sentence pattern
31. int + substantive + adjectival verb form
32. $n n+$ substantive + sdm. $f$
F. Sentences starting with auxiliary elements

1a. InI.f. .x/m.f
b. In. for sy/m
c. $m A^{\prime} s w$ hr. $\mathrm{cs} / \mathrm{m}$
d. in sulm.ow'f

2a. Iw.fm mil
b. $m k$ sw $m$ iil

3a. /w.ç/m.n. $f$
b. In glonn $N$
c. Iw.irdi.twi'

4a. /w. $/ 1 /$ kwi
b. mk wi il.kwi

## T. WARFARE, HUNTING, BUTCHERY

Prehistoric mace with dish-shaped head. - P. $m n$ esp. in $m n . k$ 'take to yourself.
2.

3. 9
$3 a$.
4.
5.
6.
7.
8.

8 a.
$9 . \backsim$

9a.

Variant of last. - Used as last.
10.

Composite bow. - I. or D. Bow (iwnt). - Substitute for T9 in pdt bow, foreign people and derivatives.
Dagger of M.K. and later type.

Bow. - 1. or D. Bow ( $p d t$ ). Hence $p d$ 'stretch' and related words.
11.
16.

Arrow. - I. or D. Arrow ('h3 or 'ḩ3w, s'sr). P. or D-P. shr in 'overlay' (shr), sin or swn in physician (sinw).

Bow-string. - I. String, bow-string ( $r w d$ ). D. Oppress, drive away ( $3 r$ ). D-P. $3 r$ and $3 i$ in 'wretched' ( $m 3 i r$ ), $r w d$ in 'be hard' ( $r w d$ ).

Pieces of wood joined and lashed at the joint. - P. rs in 'be wakeful', 'dream' (rs).

Throw-stick, club as a foreign weapon of warfare. - I. or D. Throwstick ( ${ }^{\prime} m^{\prime} 3 t$ ), throw ( $\left.{ }^{\prime} m^{r}\right\}, k m 3$ ). D. Asiatic ( ${ }^{\prime} 3 m$ ), Libyans ( $T h n n w$ ). Foreign people in general. D-P. km 3 in 'create' ( km 3 ), tn in 'distinquish ( $\ell \mathrm{ni}$ ). . With the sound-value of km 3 and $\ell n$ the sign is often combined with the duck alighting (G41).
O.K. form of last. - Used as last.

Scimetar. - I. or D. Scimetar (hps).

Mace with pear-shaped head (vertical). - I. Mace (hd). P. hd.
Variant of last.

The same with strap. - Used as last. Also P. sk.
Combination of T3 and I10. Used as P3.

Combination of T3 and 110 twice. - P. hdd.

Axe. - I. or D. Axe (mbit, minb), carpenter (mdhw). Hew (mdh).
Axe of more recent type. - D. Axe (3khw).
Dagger of archaic type. - I. or D. Dagger (bg.sw). P. tpy in 'first' (tpy).
17.
18.
$\pi$
32.

!

Chariot. - I. Chariot (wrrt).
Crook (S39) with a package containing a knife, etc. lashed to it. - I. Follow, accompany ( Sms ) and derivatives.

Harpoon-head of bone. - I. or D. Bone (ks). D. Bone, ivory, tubular objects. P. or D-P. ks in 'be irksome' (ksn); krs in 'bury' (krs); gn in 'annals' (gnwt).
O.K. form of last. - Used as last.

One-barbed harpoon. - I. One (w) and derivatives.
Two-barbed spear-head. - I. Two (snw) and derivatives. P. sn.
Variant form of last. - Used as last.
Fishing-net. - D. Capture animals (' $h, i h$ ). P. 'h or ih.
Reed-floats. - P. $d b 3$.

Bird-trap. - I. or D. Trap, snare (birds) (sht) and derivatives.
O.K. form of last. - Used as last.

Butcher's block. - I. (?) Under (hr). P. hr.

Combination of T28 and T30. - I. Place of slaughter ( $n m t$ ).
Knife. - I. or D. Knife (ds). D. Be sharp, pronounce a name (dm). Cut, slaughter, carve.

Knife-sharpener (?). - P. ssm in 'guide', 'lead' ( $s^{\Sigma} s m$ ) and derivatives.
Combination of T31 and D54, with the same phonetic value.
Butcher's knife-sharpener. - I. Butcher (ssm(?), mnhty(?)).
Butcher's knife. - I. Knife (nm). P. $n m$.

## U. ACRICULTURE, CRAFTS, AND PROFESSIONS

1. 

2.
3.
4.

Variant form of last. - Used as last.
Combination of U1 and D4. - In 'see' (m33).
Combination of U1 and Aall. - In 'truth', 'justice' ( $m 3^{\text {t }} \boldsymbol{t}$ ) and derivatives.
14.

Corn-measure beneath grains M33. - I. Barley (it). D. Corn.
Combination of U9 and S38. - In the corn-measusre (hk $3 t$ ).
Combination of U9 and D50. - In corn-measure ( $h k 3 t$ ).
Plough. - I. or D. Plough ( $h b$ ). D. Plough ( $s k 3$ ). Seed (prt). P. $h b, . \leqslant n^{r}$.
Two branches of wood joined at one end. - Old sign for $\zeta^{r} n^{c}$ later replaced by U13.
15.

Sledge. - I. Sledge (tmt). P. tm.
16.
18. $\rightleftharpoons$

Sickle. - I. Sickle-shaped end of the wi3-boat (m3). D. Reap (3sh). P. $m 3$ in 'see' (m33).

Variant form of last. - Used as last.
Hoe. - D. Cultivate, hack up. P. $m r$ in 'love' ( $m r i$ ).
Alternative form of last. - Used as last.

Hoe without the rope connecting the two pieces. - D. Hoe (hnn). P. hn in 'hnw-bark'.

Corn-measure with grain pouring out. - D. Grain, spelt (bdt, bty), corn ( $s \not{ }^{\xi} r$ ), measure ( $h 3 i$ ).

Sledge with head of a jackal, bearing a load of metal (?). - I. In the adjective 'of copper' (bisi). P. or D-P. bli.

Pick excavating a pool (N38). - I. Found, establish (grg). D-P. 'Falsehood' (grg).

$$
18
$$

O.K. form of last. - Used as last.
19.
20.
-
22.
28.

Spindle. - I. Spin (hsf). P. hst P. hsf in 'repel', 'oppose' (hsf) and derivatives

Combination of U34 and I9. - The same use.

Club used by fullers in washing. - I. Fuller (?) (hmww). P. hm in 'servant' (hm) and related words; also in 'Majesty' (hm).
37.

Adze. - I. Adze (nwt). P. $n w$.
O.K. form of last. - Used last.

Adze at work on a block of wood. - D. Cut up (stp). P. In 'choose' (stp) and derivatives.

Chisel. - I. or D. Chisel, carve ( $m n h$ ), efficent ( $m n h$ ) and derivatives.
Different kind of chisel. - P. mr, $\mathbf{3 b}$.
Stone worker's drill weighted at the top with stones. - I. Craft, art (hmt).
O.K. form of last. - Used as last.

Drill used to bore a hole in a bead. - I. Open (wbs) and derivatives.
O.K. form of last. - Used as last.

Fire drill (d $d 3$ ). - P. $d 3$. Abbreviation for prosperity ( $w d 3$ ).
O.K. form of last. - Used as last.

Potter's kiln. - I. Kiln (t3). P. 13.
Instrument employed in baking. - I. Baker (rthty). D. Restrain (rth, hnri). Ab. In 'harim' (hnr) and 'prison', 'fortress' (hnrt).

Pestle and mortar. - D. Pound ( $s m n$ ). Salt, natron (hsmn). Heavy, difficult (dns, wdn). D-P. smn in 'natron' and 'bronze' (hsmn). 'Establish' ( $s m n$ ). Ab. for 'natron' and 'bronze' (hsmn).

Pestle. - I. Pestle (tior t). P. ti, t.

Razor. - I. or D. Shave ( $h^{c} k$ ) and derivatives.
38.
$\Delta]_{\Delta}^{T}$
39. む
40.
41. $0^{\circ}$

Post of balance. - D. Lift, carry (wts), raise, lift (tsi).
Variant of last. - Used as last. - Replaces sometimes T13.

Plummet used in connection with the balance. - I. or D. Plummet (th).

## V. ROPE, FIBRE, BASKETS, BAGS, ETC.

1. $\rho$

ese
2. 
3. 

11.

Rope for tethering animals. - P. !.
14.
15.

Coil of rope. -
D. Rope, tie ( $(s)$ ), drag (ith), surround ( $s n t$ ). P. $\xi_{n} n$.

Wooden beam with cord. - I. Drag, draw ( $s t 3$ and $s t 3$ ).
D. Hasten (3s).
P. sts in 'aroura' (st $3 t$ ).

Similar sign with three cords. - P. st $3 w$ in 'necropolis' ( $\boldsymbol{R}-\boldsymbol{s}!3 w)$.
Lasso. - P. w3.

Looped rope. - D. Plan, plot out, found (snt).
Cord. - I. Cord, rope ( $\xi_{s}$ ).
D. Clothes. P. Is.

Loop of cord with the ends downward. - I. (?) Encircle ( $(n n i)$. P. Šn.
Variant form of last. - Used as last.
Cartouche in original round form. -
D. Cartouche ( $\left.\mathbf{s}^{\boldsymbol{n} w}\right)$.

Cartouche in secondary oval form.
 name ( $r n$ ).

Cartouche cut in half. - D. Dam off, restrain (dni), split (ph3).
Band of string or linen.
D. Head-band (.ssd), book, writing. Swear ('rk), loose (fh). D-P. 'rk, fh, fnh.
13.

The same as last with an added diacritical tick. - P. t.
Combination of V13 and D59. - In seize (iti).
16. 888
17. 8
18.
19. $A$

The same without the cross-bar. - P. md in 'ten' (mdw).
Combination of V20 and I10. - I. Stable (mdwt). P. $m d$ in 'be deep' ( $m \ell$ ).
22.

Whip. - P.mh.
O.K. form of last. - Used as last.

Cord wound on stick. - P. wd in 'command' (wd).
Alternative form of last.
in 'be in good condition' (cd $d$ ).
27.

21.

Herdsman's shelter of papyrus matting. - I. Protection (s3).
O.K. form of last. - Used as last.

Hobble for cattle. - I. or D. Stable (mdt). D. Mat ( tm 3 ), sack ( $h 3 r$ ). DP. tm 3 kind of land division. - By confusion with a similar sign D. Palanquin, portable shrine (kni), shrine ( $k 3 r$ ).
23.

-
O.K. form of last. - Used as last.

Wick of twisted flax. - P. h.

Swab made from a hank of fibre. - P. sk in 'perish' (ski); wsh in 'place' (w3h).

Wickerwork basket. - I. Basket (nbt). P. nb.
$\infty$
Wickerwork basket with handle. - P. $\boldsymbol{k}$.
Wickerwork frail. - D. Hippopotamus hunter, harpooner (msnw). Possibly the same sign in bundle ( $g 3 w t$ ). P. msn, g $\xi w$.
33.

Looped cord serving as hobble for cattle. - I. Hobble (s3). P. s3 in 'protection' (s3).

Bag of linen. - I. Linen, cloth ( $s s^{*} r$ ). D. Pack, envelop ( ${ }^{\prime} r$ ). Perfume (sty). P. ssr in 'thing', 'corn' (ssr); $\boldsymbol{g}$ in 'Koptos' (Gbtyw); wgg in 'misery' (wgg).
34. $\theta$
35. $A$
36.

Alternative form of last. - Used as last.
O.K. form of last. - Used as last.

Receptacle of some kind. - P. hn.
Bandage (?). - D. Bandage, bind (idr). P.idr.
Bandage. - D. Bandage, mummy-cloth (wt).

## W. VESSELS OF STONE AND EARTHENWARE

4. 
5. 

6.
7.
O.K. form of last, straight at bottom. - Used as last.
13.

Combination of W3 and T28. In 'lector-priest' (hry-hb).
O.K. sign for a particular vessel. - In 'cauldron' (wht).

Granite bowl. - D. Red granite ( $m 3 t$ ), Elephantine ( $3 b w$ ). D-P. $m 3 t$ in 'proclaim' (m3t), $3 b$ in 'family' (3bt).
8.
9.
10.

10 a.
11.
12.

Sealed oil-jar. - I. or D. Oil, unguent (mrht, mdt).
Oil-jar showing no tied ends. - D. Jar (b3s). P. b3s in 'Bastet' (B3stt).
Basin of alabaster as used in purifications. - D. Festival, feast ( $h b$ ). P. $h b$ in 'mourn' ( $h b$ ).

Combination of W3 and O22. - I. or D. Feast (hb). D. Feasts.

Deformation of the last. - In $3 b w$ 'Elephantine' and $3 b t$ 'family'.
Stone jug with handle. - P. $\underset{n n m}{ }$ in 'join' ( $\underset{n}{ } n m$ ) and the god Khnum ( Hnmw ).

Pot. - P. b3.

Ring-stand for jars. - I. Seat ( $n s t$ ), red pot (dstr). P. g.

Red earthenware pol, O.K. form, round at bottom and plain. - Used as W11.
14.

Jar with handles.
D. Vessel (krht), anoint (wrh). - Replaces W22 in butler (wdpu).

Bowl. - I. Bowl (nw). P. $\boldsymbol{n w}$, in 'I' (ink). - Replaces other signs for example $\mathrm{Z8}$ in form ( $k d$ ).

Combination of W24 and D59. - In ini bring.

## X. LOAVES AND CAKES

1. 

Bread. - I. Bread ( $t$ ).
2. $\theta$
3.
4.

(a)

Tall water-pot. - I. Water-pot (hst). D. Jar. P. hs in 'praise' (hsi).
Water-pot with water pouring from it. - D. Be cool (kbb) and derivatives, libate ( $k b h(\underset{)}{ }$ ) and derivatives.

Combination of W15 and W12. - I. Libation (kbhw) and derivatives.
Three water-pots bound together. - I. Set of water-pots (hnt). P. hnt.
O.K. form of last. - Used as last.

Milk-jug as carried in a net. - I. or D. Milk-jug ( $m h r, m r$ ). P. $m i$ in 'like' (mi).

Milk-jug with a leaf covering the milk. - I. Milk (irtt).
Twin wine-jrs. - I. Wine (irp).
Beer-jug. - I. Beer (hnkt), butler (wdpw), vessel, pot (hnw). D. Vessel ( $k r h t$ ), measure, fluids, offerings. Be drunk (thi).

Loaf. -
D. Bread. - Replaces X1.

Bread and beer (W22). -
D. Food, meals, offerings.

Roll of bread. - D. Food offering (snw), cake (fk3), bread. D-P. sn, fk3.
5.

Semi-hieratic form of X4. - Used as last.
6.

> A round loaf bearing mark of the baker's fingers. - D. Loaf $(p 3 t)$. D-P. in 'primeval times' $(p 3 t)$.
7.
8. A

Slice of bread. - I. or D. Eat (wnm).
Conical loaf (?). - I. Give (di, rdi). P. rarely $d$.

## Y. WRITINGS, GAMES, MUSIC

1. 

Papyrus rolled up, tied, and sealed. - I. Papyrus-roll, book ( $m d 3 t$ ). D. Writing, abstract notions. P. md $3 t$ in 'chisel' ( $m d 3 t$ ). Ab. Total ( $d m f$ ).
2.
3.
$\rightarrow$
4.

Alternative form of last.
5.

Draught-board. - I. Draught-board (snt). P. mn.
6.

Draughtsman. - I. Draughtsman (ib3). P. In 'dance' (ib3).
7.
8.

Harp. - I. or D. Harp (bnt).
Sistrum. - I. Sistrum (sš̌t). P. shm (rare).

## 2. STROKES, SIGNS DERIVED FROM HIERATIC, GEOMETRICAL FIGURES

1. 

Stroke. - I. Unity ( $\boldsymbol{w}$ ). Occasionally serves merely to fill an empty space.

1a.
Horizontal form of last.
2.

2a. I
Three strokes. -
D. Plurality.

2a.
Variant form of last.
3.

Alternative form of last.
3a. -
Variant form of last.
3b. -
Variant form of last.
4.

4a.
5.

5 a.
6.

7.
8.
$\times$
9.
10.
11.

Two diagonal strokes. - D. Duality. P. y, i.

11
Variant form of last.

Diagonal stroke. - Replaces determinatives that were difficult to draw.

Variant form of last.
Hieratic substitute for A13 and A14 and sometimes for other signs that were difficult to draw, in 'die' (mt).

Abbreviated form of G43.
Oval. - D. Common in words from the stem $k d$, 'form', 'character' (kd); often replaced by W24.

Two sticks crossed. - D. Damage (hdi), divide (wpi), reckon (hsb), cross ( $d 3 i$ ). P. sw3 in 'pass by' (sw3); sd in 'flame' (sdt); sbn in 'mixed', 'various' (sbn); wr in 'drink' (swri).
O.K. form of last. - Used as last.

Two planks crossed and joined. - I. (?) imy 'who is in'. P. imi in the verbs of negation.

## Aa. UNCLASSIFIED

1. 

Human placenta (?). - P. h.
Pustule or gland (?). - D. Suffer (whd), wound (wbnw), swell (sfw), be fat ( $d d 3$ ). - Replaces other signs and takes other sound values: I. or D. in 'bandage', 'embalmer' (wt). D. in 'perfume' (sty), 'granite' ( $m 3 t$ ), 'cedar' (' 5 ), 'reckon' (hsb). P. wh3 in 'oasis' (wh3t).

Sign $A a 2$ with liquid issuing from it.
D. Urine (wsst), brains (3s), perfume ( $s$ ).
4.
5.

Doubtful (PT). - In PT soul (b3), bush (b3t). Later replaced by R7 in the word for soul.

Part of the steering gear of ships? - I. or D. Proceed by boat (iti hpt) in the PT and sail (dsr hpwt) in the M.K., oar (hpt). P. hp.
6. $M$

Doubtful. - D. Mat (tm3). P. tm3.
7.

Doubtful. - P. skr in 'smite' (skr).
7a.

Variant of last.
8.

Irrigation runnels (?). - I. or D. Estate ( $d 3 t)$. P. $d 3 t$.
9.

Doubtful. - D. Rich (hwd).
10.

Doubtful. Pencil (?). - D. Writing (drf).
11.

11 a.
Vertical form of last.
12.

13.
$14-$
15.
16.
17.
18.
20.

Two ribs of a gazelle (?). - P. im, m, gs.
O.K. form of last. - Used as last.
$\Longleftarrow \quad$ Variant form of Aal3.

Shorter variant of Aal 3.
b

O.K. form of last. - Used as last.

Back of quiver. - I. Back (s3). P. s3.
Alternative form of last. - Used as last.

Doubtful. Different from V19. - P. hr

Doubtful. - P. 'pr in 'equip' ('pr) and derivatives.
A carpenter's tool (?). - In 'sever', 'judge' (wd').
Combination of Aa21 and D36.
Doubtful. - In 'hit (a mark)', 'adhere to (a path)' (mdd) and derivatives.
O.K. form of last. - Used as last.

Fetish. - I. Title of priest (wb3,sm3 (?)).
Doubtful. - P. sbi in 'rebel' (sbi).
27.

Doubtful. - P. $n d$ in 'ask', 'inquire' (nd), 'take counsel' (n dmd), 'hail to' (ind hr).
28.

An instrument used by bricklayers (?). - In 'form', 'build', 'character' ( $k d$ ) and derivatives.
29. f
O.K. form of last. - Used as last.
30.8

Ornamental design on tops of walls. - I. or D. Ornament, adornment ( $h k r w$ ). Be adored ( $h k r$ ), and related words.
31.
O.K. form of last. - Used as last.
32. §

Doubtful. - I. or D. Nubia (T3-sti) and a Nubian mineral (sty).

## INDEX <br> and <br> TERMINOLOGY DEFINITIONS

Absolute time: pp. 33,36,48,73.
Adjectival sentence: a sentence with an adjective in initial position, pp. 31,40-41, 71, 80.

Adjective: quality word like 'good', 'bad', 'tall', genitival adjective, p. 6;
the adjective $n b$ each, every, all, p. 18;
nisbe-adjectives, pp. 20, 29;
adjectival verbal forms, p. 52, in cleft sentences p. 59, in the negative p. 69;
interrogative adjectives, p. 61;
nn functioning as an adjective, p. 67.
Adjective clauses: with nty p. 51, with participles and relative forms p. 52.
Adverb: a word modifying a verb, an adjective, or another adverb expressing time, place, manner, degree, quantity cause, modality.
Adverbial phrase: pp. 15-17;
stative, pp. 24-25;
circumstantial sdm.f/sdrn.n.f pp. 48, 77;
negation, pp. 68-71
Adverbial sentence: a sentence whose most important constituent is an adverbial phrase or its equivalent, pp. 16-26, 79-81.
Antecedent: word that the relative clause, the participle, or the relative form refers to, for exemple 'I will show you the picture that I bought yesterday' pp. 51-58.
Aspect: a characterization of the verbal action obtained by morphological oppositions of the verbal system, for instance indicating whether the action has been accomplished (perfective aspect) or not (imperfective aspect), pp. 33, 77.
Bare: 'bare' in front of sdm.f and sdm.n.f means that the verb form is used by itself without any accompanying element like $i w,{ }^{\prime} h^{\prime}, m k, p p .33-34,38,40,48,77,78$.
Biliteral: one hieroglyphic sign for two consonants, pp. 1, 3, 32.
Causal conjunction: a word that indicates that the relation between the clauses is that of cause and effect, the subordinate clause indicating the cause, p. 50.
Causative: a term used with verbs to indicate that the verbal action was caused/made to take place, cf. the examples: 'She ate the apple.' and 'He made her eat the apple.', p. 33.

Circumstantial clause: a subordinate clause indicating manner, time, or conditions of the main statement, pp. 47, 80-81.
Cleft sentence: a cleft sentence is a sentence split up into two parts by means of a relative clause, for instance 'It is an oak that stands there in the field.' 'It was the new book that I gave to him.' 'It was on his birthday that I gave it to him.' This device is used to give emphasis and prominence to one particular part of the sentence. pp. 41, 59.

Comment: is the new information given about the topic. Another term is rheme. pp. $10,16,21,24,36,40,41,43,61,65,67,71,72,78$.
Comparative of adjectives: p. 31.

Composed tenses: consist of an auxiliary element followed by sdm.f, sdm.n.f, or an adverbial phrase, pp. 43-45, 77-78.
Conditional conjunction: a word that indicates that what is said in the main sentence is valid under the conditions given in the subordinate clause, p. 49.
Conjunction: a word that indicates the relation of the following part of the sentence to the previous part, pp. 49-51, 77.
Dependent pronouns: designation for a set of personal pronouns used as objects and in certain sentence patterns, pp. 21-23, 30, 31, 34-35, 67, $72,75$.
Determinative: a hieroglyph used after phonograms in order to indicate the sense of the word, 2, 3, 26.
Emphatic: implies that one member of the statement has been chosen as the pivot around which the predication turns (cf. cleft sentence), pp. (34), 40, 41, 59.
Enclitic particles: designation for a set of words of dependent use closely linked to the prececding word, p. 26.
Final clause: p. 38
Final conjunction: indicates the aim of the statement of the main sentence, p. 51.
Gemination: a repetition of the second consonant of the stem so that the verb has forms where the last consonant and the second last consonant are identical, pp. 32,52.
Ideogram: a hicroglyph used to express the idea that the sign represents, pp. 2, 4.
Imperative: mood of the verb expressing commands, example: 'go!', 'listen!', pp. 33, 34, 68, 71.
Independent adjectives: p. 31.
Independent pronouns: designation for a set of personal pronouns used in certain sentence patterns, pp. 9, 10, 59, 75.
Indicative: one of the different moods of the verb. Indicative is the normal, neutral form used in ordinary, objective statements, pp. 33, 36, 52, 63, 71.
Infinitive: substantival verb form, examples: 'to hear', 'to go', pp. 6, 15, 17, 32, 48, 68, 76, 77.
Initial position: place at the beginning of the main sentence, pp. 41, 67, 77-78.
Interrogation / Interrrogative: questioning form, pp. 9, 22, 61-62.
Intransitive: designation for a verb that cannot be accompanied by a direct object, example: 'to walk', pp. 33, 36-38, 43, 48.
Juxtaposition: placing side by side without a connecting link, p. 8.
Main sentence: in this book used as a designation for a construction that can constitute a sentence by itself or be used as a principle clause in combination with a subordinate clause, pp. $16,24,31,33,36,38,43,48,63,65,71,77-78$.
Mood: categories of the verb used to indicate the attitude of the speaker toward what he is saying, as wish, command, emphasis, pp. 33, 34, 36-38, 63.
Morpheme: a minimal, grammatical unit that cannot be divided into smaller independent parts, pp. 16, 33, 37, 45, 47.
Morphology, morphological: the pattern of word formation, pp. 32, 38, 40, 48, 72.
Negative: negative sentence patterns, pp. 65-71,74.
Nexus: designates the intimate connection between subject and verb, pp. 65, 71.
nisbe: designation for adjectives derived from other word classes, pp. 20, 29.
Nominal sentence: a sentence constituted of nouns or noun equivalents only, pp. 8, 10, 40-41, 47, 59, 65, 71, 79.
Non-enclitic particles: designation for a word in initial position with functional or relational use , pp. 8, 21-22, 24-25, 73.

Noun or substantive: a word designating a person, an animal, a thing, or an abstraction, pp. 2, 3, 8, 10, 15, 17, 40, 53, 59, 72; gender and number p. 3; genitive p. 5-6.
Numerals: words and symbols denoting numbers, p. 19.
Particle: a small word of functional or relational use. pp. 22,26.
Participle: form of the verb functioning as an adjective and corresponding to a relative clause whose subject is the relative word, pp. 52-56.
Passive voice: manner of expressing the relation between the subject and the verb when the subject undergoes the action of the verb, ex. 'He is carried.' as opposed to the active voice 'He carries.' , pp. 8, 25-26, 53, 63, 66.
Phonogram: a hieroglyph with phonetic value, p. 1 .
Possessive: pp. 7, 9, 13, 29.
Possessive sentence: p. 75.
Pragmatic: used concerning the relation between the words, expressions, or symbols and their users, p. 72.
Predicate: what is said about the subject, p. 65.
Preposition: short words expressing, in their concrete use, relations of space, time, manner, or means, in their abstract use, mostly causal and final relations, pp. 6, 7, 1416, 16-17, 19, 29, 31, 34, 40, 43, 49, 75, 77; used in propositional phrases, p. 14-16.
Pronoun: a word replacing and referring to a noun, known from the context, pp. 6-8, 9-10, 12, 15, 16, 23, 34, 52, 58, 72, 75.
Prospective: mood of the verb expressing command, wish, prohibitions, or the like, pp. 33, 38-39, 48, 53, 60, 63, 67, 71, 78.
Prospective relative form: a relative form with future meaning, p. 53.
Reduplicate: repeating of two of the radical consonants of the verb thus forming new verbs of four or more radical consonants, pp. 32, 40.
Relative clauses: pp. 51, 52-58, 70, 71.
Relative form: form of the verb functioning as an adjective and corresponding to a relative clause whose subject is not identical with the antecedent, pp. 52-53, 56-58, 59, 69, 71, 76.
Relative time: pp. 33, 48.
Resumptive words: words used together with participles and relative forms and in relative clauses modifying the relation to the antecedent, pp. 52, 58 .
sdm.ty.fy: a participle with future meaning, p. 53.
Strong verbs: verbs whose last radical consonant is not a weak vowel (ior w), p. 32.
Subject: the designation of a noun or a pronoun (or its equivalent) used as the actor expression of an active verb or denoting the one undergoing the action of a passive verb. The combination of verb and subject can be used in different functions in Egyptian sentences. pp. 7, 16, 33, 37, 45, 48, 52, 63, 65, 72, 76.
Subordinate clauses: a syntactic construction that is part of a sentence in combination with a main sentence, pp. 16, 24, 33, 47-58, 69-70, 71, 77.
Substantive or noun: a word designating a person, an animal, a thing, or an abstraction.
Suffix-promouns: designation for a set of personal pronouns, pp. 6-8.
Syntax, syntactic: the pattern or structure of word order, clauses, and sentences, pp. 33, 38, $40,72$.
Temporal conjunction: a word that indicates that what is said in the main senence is valid at a certain time, p. 49.

Tense: verb category to indicate the time of the verbal action, pp. 33, 36-38, 40, 43, 48, 53, 78.
Tertiae infirmae: designation for verbs whose third root consonant is $i$ or $w, \mathrm{pp} .17$, 32.

That-form: a personal substantival form of the verb, pp. 40-41, 63, 65, 68, 71, 78.
there is / was: general existence, p. 74.
Topic: what is taken as the communicative point of departure of the sentence. It is what is known by the context. It is also what is known, presupposed through the knowledge of the cultural or situational context. Another term is theme. pp. 10-11, 16, 21, 23, 24, 40-41, 43, 66, 67, 72-73, 78.
Topicalization: a way to mark a single member of a statement for specification or contrast. It is the extra marking of the topic by means of frontal or rear extraposition. pp. 72-73.
Transitive: designation for a verb that can be accompanied by a direct object, example: to see (something), pp. 26, 33, 36-38, 43, 48, 63.
Triliteral: a hieroglyphic sign for three consonants and a stem designation, pp. 1, 3, 32.

Verb: a word expressing action or state, and that can, by means of additions, be made to express tense, aspect, voice, and mood, pp. 7, 17, 23, 24-26, 31, 32-33, 34, 36-38, 40-42, 43-47, 48, 52-53, 59-60, 63, 65-71, 72, 76-78.
Weak consonants: $i$ or $w, p .32$.
Weak verbs: verbs whose last radical consonant is $i$ or $w$, pp. 17, 26, 32, 40, 53.
Word order: pp. 5, 10, 13, 18, 28, 72.
