THE LANGUAGE OF THE SALINAN INDIANS

BY

J. ALDEN MASON

CONTENTS

INTRODUCTION

This study of the dialects composing the Salinan linguistic group was begun in September, 1910, when I made a visit to the neighborhood of the old Mission of San Antonio in Monterey County, where live the few remaining members of this group. Here a little work was done with the oldest member of each of the two divisions, José Cruz of the Antoniaño and Perfecta Encinales of the Migueleño dialect. An incomplete acquaintance with Spanish, the medium of communication, coupled with a lack of satisfactory interpreters and other disappointing circumstances, rendered this visit not wholly profitable. Consequently arrangements were later made by which Pedro Encinales, one of the middle-aged Indians, visited San Francisco, where I worked with him from Thanksgiving until Christmas. During this time Dr. T. T. Waterman made some researches on the phonetics of the language with the help of various mechanical apparatus. Unfortunately the informant was found to be totally ignorant of all mythology, and the few texts received from him were rather poor. The month of January, 1911, was spent in linguistic work upon the material received.

For five years I was unable to continue my researches upon Salinan, but these were again taken up in January, 1916, to continue throughout that year. A second trip was made to the region of Jolon, Monterey County. In the intervening years José Cruz and Perfecta Encinales were found to have died, but better linguistic informants were found in the persons of David Mora, a pure Antoniaño Indian, and Maria Ocarpia, a pure Migueleño. An unexpectedly good series of mythological texts were secured from these. Another old Indian, Juan Quintana, was found to be an unsatisfactory linguistic informant, but gave a number of mythological stories in Spanish, which were translated into Salinan by Maria Encinales, a sister of Pedro, and by David Mora.

Furthermore, all the extant linguistic material from other sources has been examined in the preparation of this paper. This collection was begun more than a century ago with the preparation of a vocabulary and phrase-book of the language of the Indians of Mission San

Antonio by the founder of the Mission, Fray Buenaventura Sitjar. The manuscript was sent to Washington by the indefatigable A. S. Taylor and published by J. G. Shea.[1] In 1821 Felipe Arroyo de la Cuesta, the author of the grammar and phrase-book of Mutsun, took a vocabulary from the Salinan Mission, which is preserved in Santa Barbara. A transcription was made by Gatschet and deposited in Washington. Coulter recorded a short vocabulary from San Antonio,[2] and Hale a short vocabulary from San Miguel.[3] Yates and Gould collected in 1887 a San Miguel vocabulary, which is now in the possession of the Bureau of American Ethnology, and Alexander S. Taylor recorded short vocabularies and phrases.[4] All of these vocabularies have been examined and compared, but with the exception of Sitjar's they are of small value.

The first really intensive and modern work on Salinan was done by H. W. Henshaw in 1884, when he was engaged in determining the linguistic affinities of the California Indians for Major Powell and the Bureau of American Ethnology.[5] Henshaw's material was kindly loaned by the Bureau, together with all other Salinan linguistic material in its possession, and has been of great value.

Dr. A. L. Kroeber visited the region in 1902, and formulated his ideas concerning the language in a paper.[6] Both this and his manuscript notes have been studied. The phonetic data of Dr. Waterman have also been studied and the chief results noted.

Recently Drs. Dixon and Kroeber have united Salinan with Chumash in an ''Iskoman'' group,[7] which, in turn, they have subsequently come to regard as part of the Hokan family. This reclassification has been accepted by several American anthropologists and many Salinan words have been included by Dr. Sapir in his comparative paper.[8]

The Salinan language comprises the two surviving dialects of the missions of San Antonio and San Miguel. These two dialects are mutually intelligible with little difficulty. Regarding the prehistoric tribal divisions, conjectures only can be made.

For all non-linguistic data on the Salinan Indians the reader is referred to my ethnological paper.[9]

PART I. PHONOLOGY

PHONETIC SYSTEM

The Salinan dialects are characterized phonetically by a rather harsh acoustic effect. In this they differ radically from the flowing and musical Costanoan languages to the north, but bear a superficial resemblance to the Yokuts and Chumash to the east and south. The two Salinan dialects differ very slightly in phonetics, that of San Miguel being apparently more accentuated in its harsh character, possibly by reason of closer contact with the latter-named extraneous languages, or possibly due merely to peculiarities of the informant. Naturally this harsh character is far more evident when the words are given slowly with the careful enunciation inevitable to the recording of native language. In rapid speech much of this harshness, which is evidently due rather to the frequency of glottal stops and surd stops with glottalization than of guttural consonants, is softened.

The phonetic orthography used is based on the Report of the Committee of the American Anthropological Association on Phonetic Transcription of Indian languages.[10] A few minor changes have been made from the recommendations of this committee to suit the peculiarities of the language and to facilitate preparation and printing.

VOWELS

Salinan appears to make use of eight fundamental vowels. These are:

a mid-mixed narrow. This is the broad or Italian *a* found in Spanish *cara* and approximated in English *father*. When short in quantity it approaches more closely the vocalic sound of American *not*.

a, mid-back narrow. This approaches closely the vocalic sound of *but*. In actual practice these two *a* sounds have frequently been confused.

ē mid-front narrow. Nearly as narrow as English *say* and probably as narrow as Spanish *beber*. It is generally but not invariably long in quantity.

e mid-front wide. Like English *men*.

ī high-front narrow. Nearly as narrow as English *meet;* frequently long in quantity.

i high-front wide. As in *pretty*. The wide *e* and *i* are difficult to analyze. When quantitatively long the vowel is invariably heard as *e* and certain short vowels are invariably heard so. Other short vowels are invariably heard as *i* but the greater number are heard as *e* or *i* indeterminately. In such cases the vowel as originally written, either *e* or *i* has been retained. Palatogram tests show the closest occlusion for the narrow *i*, less for the indeterminate *e-i* and least for the wide *e*.

---

[10] Smithson. Inst. Misc. Pub., 2415, 1916.

o mid-back wide round. Intermediate wide-narrow with a greater tendency toward wideness, somewhat as in *boy.*

u high-back wide round. Approximately as in *put.* The *o-u* vowels present the same difficulties as the *e-i* vowels and are frequently confused. *o* is generally certain, especially when of doubled length. Certain other vowels are heard invariably as wide *u;* these appear to be always of short length. But yet others are heard as intermediate between *o* and *u* and when of double length as an *ou* diphthong, approximately as in American *so.* As in the case of the indeterminate *e-i* vowel, this has been written as either *o* or *u* according to the auditory impression received.

ǝ Indeterminate vowel found in Migueleño in rapid speech; related to Antoniaño *a.*

Summary:

	ī				u	
	i		ǝ		o	
	ē			a		
	e			a		

QUANTITY

Consonantal quantity is of small importance in Salinan, and it is dubious whether or not it exists. Vocalic quantity is marked and inherent in the stems and particles. Such doubled length is represented by a raised period following the vowel, as:

a·

NASALIZATION

Vocalic nasalization plays an unimportant part and is found only in connection with a nasal consonant. It is apparently more marked in the case of *m* than of *n,* but is naturally not consummated in the case of surd nasals. It is never very marked in character, but is possibly more evident in the Migueleño dialect. It is denoted by a hook under the vowel thus affected (iota subscript), as:

ạ

VOICELESS VOWELS

Vowels become unvoiced, or nearly unvoiced, in Salinan when final in a sentence or when following an aspiration. A different but nearly indistinguishable phenomenon is found when an aspiration, though not truly a vowel, assumes the tinge of the preceding vowel. Voiceless vowels appear to be more characteristic of Migueleño than of Antoniaño. They are distinguished by the use of small capital characters, as:

A

Weakly articulated vowels are closely related to voiceless vowels, but have a definite sonant resonance. They occur in the same positions

as voiceless vowels, and the difference may be purely fortuitous. They
are represented by superscript vowels of a smaller font, as:

p^a

ACCENT

Stress accent is quite noticeable in Salinan, and appears to be
inherent in the roots and particles and inexplicable by any rules.
Frequently, however, a word bears primary and secondary stress
accents of nearly equal force which may be confused. Primary stress
accent is denoted by an acute accent mark, secondary accent by a grave
accent mark after the vowel thus stressed, as:

a′, aˋ

Pitch accent is found, but is not of morphological significance; it
is likewise inherent in certain syllables, generally of particles and
grammatical elements. Thus the proclitic *t̥ám*, "then", and the
enclitic *tén*, "again", generally bear an inflection of a slightly higher
pitch. Such is marked by an acute accent mark over the vowel, as:

á

It appears to be more characteristic of the Migueleño dialect.

Hesitation in the flow of voice and in general any interruption
between two normally connected sounds is represented by a period
separating these elements, as:

a.i, m.o

This is frequently indistinguishable from and confused with a weak
glottal stop.

Aspiration, when distinct from or weaker than the aspirate *h*, is
denoted by a reversed superscript comma, as:

m^ʻ

CONSONANTS

The general rules of phonetic orthography employed in the writing
of vowels are followed also with consonants. Thus small capitals are
used for the voiceless or surd forms of consonants normally voiced,
and superscript characters for those which are abnormally weakly
voiced.

Semi-vowels

y, ʏ, *w*, ᴡ   The semi-vowels *w* and *y* are both employed.

y is probably always a resultant from an *i* glide preceding another
vowel, and is generally initial or intervocalic; it is rare. The voiceless
ʏ is even rarer.

w on the other hand appears to be a fundamental sound, the occlusion
being firmer than with the vocalic *u*. The voiceless ᴡ is rare. Both ᴡ
and ʏ appear to be more common in Migueleño.

Nasals

m, M, *n*, N, *η*   The bilabial and the linguo-dental nasals are frequent in Salinan but the palatal nasal is rare and of secondary production. *n* is very dental in place of articulation. Final *m* and less frequently *n* often occur with simultaneous glottal occlusion; in such position they are purely sonant.

Nasals are found as sonant, partially surd and entirely surd. It is most probable that these are merely variations from one fundamental sound affected by phonetic laws, but a few aberrant forms hint that possibly two fundamental elements should be recognized. In intervocalic position the nasals are purely sonant; in initial position the kymograph records show them to be frequently unvoiced during a large part of the attack; in final position they are shown to be unvoiced during the latter half of the occlusion. As members of consonantal combinations they partake of the nature of the companion sound, being sonant when in combination with another sonant, slightly unvoiced when preceding a surd and almost entirely unvoiced when following a surd, particularly an aspirate. The pure surd forms are very rare and found only in exceptional conditions. These kymograph results are compiled from records of a number of cases but the individual records vary greatly; it is difficult to find any two exactly alike.

Laterals

l, L   The lateral *l* sounds are articulated in practically the same place as the English *l*, *i.e.*, they are linguo-alveolars. The voiceless form seems, according to the palatogram records, to require a more extensive occlusion than the sonant. In final position, sonant *l* is frequently accompanied by a simultaneous glottal stop.

As in the case of the nasals, two forms are distinguished, the sonant and the surd, with intermediate variants. All these are probably derivations from one fundamental element through the operation of phonetic laws. Thus intervocalic *l* is invariably sonant, as is medial *l* in combination with a sonant. All other cases display varying amounts of surdness and sonancy with the exception of initial L before a surd which is purely surd. The surd character generally proves less by experiment than by auditory impression and the same is true of other elements which vary between surd and sonant. The surd character may possibly be slightly accentuated in the Migueleño dialect.

Spirants

φ, *β*, *γ*, *s*, *c*, *x*, *h*   The voiceless bilabial spirant *φ* and its voiced correspondent *β* are developed from the intermediate stop *p* in rapid speech. *φ* develops when *p* is followed by a surd, *β* when it is followed by a sonant or a vowel. The palatal sonant spirant *γ* is a similar development from the intermediate stop *k*.

The linguo-dental and the linguo-alveolar sibilants *s* and *c* approximate the sounds *s* and *sh* in English. Palatograms of these sounds show a slight difference in place of articulation, that of *s* extending a little farther forward than that of *c*. There is probably less difference between these two sounds than between their correspondents in English. Both

occur only as surd except that the sonancy of a contiguous sound may intrude very slightly upon them.

The palatal spirant x has been frequently confused with the glottal spirant h or '. x appears to occur more often with nominal and verb stems and other important elements, h more often with particles, pronouns and elements of lesser importance. x is articulated rather gutturally; its harshness is most accentuated in final position, less in initial position, and least in medial position. It is invariably surd.

Stops

Stopped consonants are found in Salinan in three fundamental varieties and in five positions. These are: intermediate surd-sonant, aspirate and glottalized; bilabial, linguo-dental, linguo-alveolar, palatal and glottal. In the latter position, only one variety is possible. The intermediate form furthermore varies as sonant, pure intermediate and surd. The kymograph records display all five varieties. In the case of the sonants, sound vibrations commence before the release from the occlusion; these are rare. In the case of the intermediates sonancy commences at the moment of release. With the surds, sonancy begins an appreciable moment after release, during the rise of the oral needle. In the case of aspirates sonancy begins after a marked expulsion of breath, at the crest or during the fall of the oral needle. In the case of glottalized stops the glottis is closed at the time of oral occlusion and the larynx raised to cause a compression. The oral occlusion is then released, causing an explosion of the compressed air, the glottis is subsequently released and voice follows. The explosion, though very marked auditorily, makes little impression on the kymograph.

b, B, p, p^ι, p' The bilabial stop occurs in the three fundamental and two derived forms above mentioned. In the surd-sonant forms it is difficult to decide which of the three is fundamental; the ear hears most often unaspirated surds while the kymograph detects all three forms with a preponderance of intermediates. Pure sonant b has been found only in the case of the demonstrative article pe, but many times in this case, both as initial and intervocalic. It is furthermore frequently reduced to the spirant v. But other records detect it as intermediate or, rarely, as surd in identical positions. Records of all other words show either intermediacy or surdness, frequently with a slightly noticeable hiatus between release and sonancy. In final position the kymograph shows no release, though the ear imagines one; the occlusion is generally long and firm. The same phenomenon occurs when an intermediate stop is the first member of a consonantal combination.

The symbol B (intermediate) has never been used in the accompanying forms and texts, the symbol b (sonant) but rarely.

The aspirate p^ι is normally less marked than in English but occasionally as much so; it is of less frequent occurrence than the unaspirated surd. There is a longer hiatus between the release and the commencement of sonancy during which breath, possibly modified by glottal stricture, is released.

The glottalized p' is the explosive articulation common to many Pacific Coast languages. It is not frequent in Salinan nor of marked force, except in emphatic utterance.

t, t‛, t'   In the linguo-dental series the tip of the tongue is pressed against the roots of the teeth. There appear to be no sonants and marked aspiration and glottalized forms are rare. By far the greater number of cases are intermediates or unaspirated surds. The hiatus following the glottalized form is very slight.

r, ṭ, ṭ‛, ṭ'   The linguo-alveolar stop is one found in many Californian languages. The place of articulation is slightly more alveolar than for the dental but the difference is caused more by the manner of release than by place of articulation. The occlusion is firmer and more extensive, the release slower, causing a semi-affricative effect approximating *tc* and *ty*. It is practically identical, however, with the English combination *tr* but more truly affricative, a simple sound. The sonant variety is unknown in this position also, the most common forms being the intermediate and the unaspirated surd.

In rapid speech in initial and intervocalic position, this form is frequently reduced to the rolled *r*. In the former case this is as in English, untrilled, the tip of the tongue merely approaching the roof of the mouth, but in the latter case there is a single flip of the tongue as in the Spanish single *r*. The palatogram record shows the typical grooved *r* occlusion.

The other varieties, the aspirate and the glottalized articulations, need no comment. Both are pronounced more strongly than is the case with the dental *t*.

g, ɢ, k, k‛, k'   In point of articulation the palatal stops are approximately the same as in English, but may be a little more guttural, particularly when preceding a back vowel, in which cases *q* was sometimes written in text.

As with the other stops, the fundamental varieties are intermediate, aspirate and glottalized. But as with the bilabial stop, pure sonants and surds are also found. The former has been met with in the case of only one particle, but frequently in this case, that of the particle *gas*. This is always heard either as sonant or as voiced spirant. All other cases are either intermediate or unaspirated surd.

The aspirated and glottalized forms require no comment except that the former is occasionally reduced to the spirant *x* under favorable conditions. They are not forcibly articulated.

'   The glottal stop is of a rather different nature from the other stopped consonants in that it frequently modifies and accompanies them. It may occur in medial or final position or simultaneously with certain other consonants, particularly nasals and laterals, but is never initial. In final position it is of marked strength, but less so medially. Frequently also it occurs simultaneously with a vowel in which case the vowel is weakly rearticulated following the stop. This gives a strangulated effect to the vowel. Frequently it has been difficult to decide whether a glottal stop is present or whether there is merely a hiatus which should be expressed by a period.

Affricatives

ts, ts‛, ts'   The affricative *ts* is found most frequently in the glottalized form, the sibilant following the stop without hiatus and before the release of the glottis. As such it is very marked. It may also occur as unaspirate and aspirate but examples are few and equivocal.

tc, tc', tc' The affricative *tc* is less common than *ts* in the glottalized form, and is less forcibly articulated. It occurs most commonly as surd with slight aspiration; both unaspirate and aspirate have been written but are probably variants of one form.

TABLE OF SALINAN PHONETIC SYSTEM

	Labial	Dental	Alveolar	Palatal	Glottal
Semi-vowel					
Sonant	w		y		
Surd	w		Y		
Nasal					
Sonant	m	n		η	
Surd	M	N			
Lateral	-				
Sonant			l		
Surd			L		
Spirant					
Sonant	β			γ	
Surd	φ	s	c	x	h
Stop					
Sonant	b			g	
Intermed.-surd	p	t	t	k	
Aspirate	p'	t'	t'	k'	
Glottalized	p'	t'	t'	k'	
Affricative					
Surd		ts	tc		
Glottalized		ts'	tc'		

PHONETIC PROCESSES

Phonetic processes on the whole are not of great importance in Salinan, and the few found seem to be more or less sporadic and not amenable to formulated rules.

VOCALIC ASSIMILATION

The stem vowels of certain words undergo a modification and change in inflection and conjugation, apparently not in accordance with any rule, as:

ṭ-a·m	house	ṭ-e·m	with possessive prefix
		-om	with 2 plural possessive
		-im	with possessive (S)[11]
akata	blood	ekata	with possessive
a·xak	bone	exak	(S)
xutcai	dog	xosten	plural
		-itco	with possessive
t-cik	knife	t-ca·k	(M)

[11] (S) denotes data taken from Sitjar's Vocabulary; (A) Antoniano dialect; (M) Migueleño dialect; when not otherwise noted, forms are from the dialect of San Antonio.

The initial vowel of stems commencing in a vowel is ordinarily assimilated or contracted to the vowel of the prefixed pronominal possessive. Thus in the second person plural the stem vowel is assimilated to *o:*

ṭ-a·m	house	ṭ-e·mo	his house
		tᶜk-omhaʟ	your houses
epxo	his mother	tᶜk-opex	your mother
tm-itax	thy urine	ṭok-otax	your urine
tm-ik'es	thy robe	tᶜk-ok'es	your robe
ṭ-a·k'at	wood	ṭk-o·k'at	your wood

Occasionally similar changes are found with other prefixes, as:

ṭ-itol	brother	ṭ-atol	our brother
ek-o	father	tm-ik	thy father
ṭ-iken	nest	oken	nest? (interrog.)
m-icim	drink!	k-ostem	drink! (pl.)
		tiṭ-acim	to drink

SYNCOPE

Syncope is commonly employed in Salinan. An unaccented short vowel frequently is so reduced as to be practically or entirely non-existent. It is difficult to determine except by mechanical experimentation whether the vowel is entirely lost or only abbreviated. After an aspirate it generally becomes a surd vowel, in other cases weakly articulated or entirely lost. Some examples are:

spanat	hide	sapanto	its hide
awaten	flies	awatneʟ	flies
ṭ-opinito	fat	t-upento	fat
t-icok'alo	ear	ṭ-ick'olo	ear
sukai·lo	lungs	skoilo	lungs

The majority of cases of syncope are of the vowels *e* and *ɩ*.

REDUPLICATION

Morphological reduplication is absent, but lexical reduplication is found in certain cases, principally with animate nouns. Such are:

tc'emtcem	bat
tciktcik	fish-hawk
tsintsin	sand
nene'	grandmother
tata	father

ONOMATOPOEIA

Stems of onomatopoetic nature are rare and are confined to names of animals with a characteristic cry, as:

tciktcik	fish-hawk
kak'a	crow

METATHESIS

Metathesis, although of rather frequent occurrence in Salinan, is probably of secondary nature. The majority of cases are of the initial syllable *le*.

lemem'	bee	elmi'm	bee (S)
leaṭ'	duck (M)	elpaṭ'	duck (M)
cik'nai	fish-spear	sk'in.ai	fish-hook
simtan	children (S)	sme.ten	children (M)
lice	winter, year	elci'taneʟ	years

DISSIMILATION

Dissimilation is practically negligible in Salinan. But one case was noted:

mamampik	pull it out!	kamant'apik	pull them out!

The occasional reduction of stops to spirants has already been noted under the head of phonetics. *p* is reduced to *v* and *p'* to *f;* *k* to *γ* and *k'* to *x*.

ELISION

A few cases of elision have been found which might better be interpreted as the reappearance, when in expanded form, of a lost final consonant. Thus a final nasalized vowel will be expanded to vowel plus *n*.

ketċa.'	great	ṭiketca'no	his size

Similarly the final *p* of a stem in the Migueleño dialect, which is normally lost or replaced by a glottal stop in the Antoniaño form, frequently reappears in the latter dialect when the stem is expanded.

ṭicxe'xe'	feet	ṭicxe.ple'to	their feet
tcxa'	stone	tcxa'paneʟ	stones

PHONETIC DIFFERENCES IN DIALECT

At the present time the Salinan language is spoken in two slightly variant dialects, mutually intelligible on short acquaintance, but it is probable that the former divisions of the stock were different.[12] The few surviving members of the stock have intermarried to such an extent that no purity can be claimed for either dialect. Dr. H. W. Henshaw was informed in 1884 that only five natives spoke the San Antonio dialect in its purity, the speech of the others being more or less tinged with the characteristics of the Migueleño idiom. Never-

---

[12] Ethnology, p. 104.

theless certain regular differences may be determined by a study of
the forms of the dialects in bulk.

The general phonetic differences of the dialects have already been
noted; the probable greater harshness of Migueleño and the use of the
indeterminate vowel ᵊ being the most evident.

The most striking lexical divergence between the two groups is
that a *p* in Migueleño, in any possible position, is frequently lost in
Antoniaño or replaced by a glottal stop.   A few of many examples
are:

Antoniaño		*Migueleño*
ac	elk	p'ac
a'kata	blood	pakata
axa'k	bone	paxa'k
at‘	oak	p'at‘
as	son	p'as
ṭexa'	stone	cxap
ka'	acorn	k‘ap'
tits‘e''wu	tail (his)	ṭ-its‘e''p
t‘ɪcele''	fingernail	icilip
ṭicxe''wu	foot (his)	ṭicxe'p
ṭaa''	deer	ṭaa''p
sa'nat'	hide	spanat
lea'ṭ'	duck	elpa'ṭ'
ṭ‘a''ak	head	ṭo'paka
ṭa'ai'	ashes	ṭop'ai

But:

. epxo	.	mother (his)	e'xo'

The Migueleño final *p* frequently reappears as *w* in the Antoniaño
form of the 3d singular possessive, as shown in two of the above
examples.   Its reappearance as *p* has already been noted (p. 15).

Stems in Antoniaño frequently possess a final *a* not found in the
Migueleño forms.   Whether the latter have lost an original final vowel
or the former added a suffix is not apparent.

Antoniaño	.		*Migueleño*
ta·ma''	men	.	ta·m
le'ma	sky		lem
pena'na	milk		pena'n
ṭo·'kena	day		ṭo·'ken
tuipe'ya	raft, boat		tuwipe'
tapleya	fire-drill		teneple''
tcala	blackbird		tcal

But:

ṭ‘a·''ak	head		ṭo'paka

Antoniaño forms occasionally possess a final *n*, missing in Migueleño, as:

awa·'ten	fly	a·we·te'
stan'	leaf	sta
k'enin	acorn bread	k'one'
saiya'n	rainbow	saiya·pa'

All of these forms are more or less doubtful.

An intervocalic *n* frequently disappears in Antoniaño, as:

sam'	cat, lynx	snam
sai'yu	eagle	snai
tekalt	eggs	tetek·neʟ
taple'ya	fire-drill	teneple''

Practically every stem differs in some characteristic in the two dialects, but these differences seem to be generally irregular and not amenable to or explicable by any rule. Even those given above are more or less problematical, and, with the exception of the frequent loss of the Migueleño *p*, all seem to be contradicted by as many or more exceptions than examples.

PART II. MORPHOLOGY

In general characteristics Salinan bears a superficial resemblance to certain Californian languages, but differs radically from the synthetic languages of certain other parts of North America. Its most striking feature is its apparent irregularity combined with comparative morphological simplicity. It is with the greatest difficulty that any given element is isolated and assigned a definite idea. In its irregularity and comparative simplicity it gives an impression very much like the English, that of a language which has become simplified and lost much of its grammatical mechanism, and which in this process has achieved considerable irregularity.

There is on the whole an absence of the polysynthesis characteristic of many American languages; most of the different elements of language are denoted by means of independent words and the nominal and verbal complexes are comparatively simple. The great mass of diverse sentiments are expressed by independent roots of restricted meaning rather than by a modification of roots of rather vague signification by means of etymological and grammatical particles.

The various morphological processes are accomplished by means of prefixes, suffixes, and infixes.

ETYMOLOGY

The usual Salinan root may consist of any number of syllables of any phonetic constitution. The normal root is confined to one of the several parts of speech, as noun, verb, adjective, pronoun, adverb, or particle. Others may function in two or more categories, generally by reason of slight changes in form by means of suffixation of etymological elements.

NOMINALIZING SUFFIXES

Verb stems are nominalized by the suffixation of certain elements, as:

1. *-i, (M., wei), nominalizing, abstract.*

meṭ'ik-i'	race	k-miṭ'ik	run
ṭi-kauw-i	sleep	kau	sleep
k'a'ʟ-i'	a fight	k'a'aʟ-a'	fight
p-eta·k-i''	the making	p-eta''ko	make

ts'en-l-i'	amusements	k-ts'e.n-u'	enjoy
lam-a-i'	food	k-lam	eat
lam-a-u" wɪ	food (M)		
t-ici-wəi	draught (M)	k-ici-m	drink
yeṭe-we"	earthquake (M)	yi'te'ᵉ	quake
ṭ-oxoyota.'i'	life (M)	k-o'xoyo.ta-p'	live

This is probably the same as an abstract nominalizing suffix given frequently by Sitjar as *ya* or *y'a*.

ṭ'upint-e'y'a	corpulence	ṭopinit-o	fat
tipn-iy'a	pain (in abstract)	tipin	pain
ṭ-anim-ike'ya	pardon	k-anem	give pardon
ṭ-ake-uwa''yu	his thirst	k-ake-a'	be thirsty
ṭ-alil-k-e'ya	question	p-ale'l-ek	ask
ṭ-atsintc-ey'a	unction	k-atsintc-a	anoint

When suffixed to adjectival stems the particle appears in the form of *-ni'*.

xumo.-ni'	quarrel (M)	xomo	quarrelsome, mean
ts'ep-ha.ni''	thanks	ts'ep	good

2. *-ṭe, -tce, -a·tc'e, agentive.*

ki'-kau-yel-a.tc'e'	great sleepers	kau	sleep
ke''-kau-iy-a.'tce	sleeper		
k-licxai-t'ic	rain-maker	licxai	rain
k-icim-ṭe	drinker	icim	drink
k-amṭ'a.-tce	hunter	amṭe	hunt
k-amṭ'i-t-cwan	fisher	amṭe-cwan	hunt fish
k'-malox-a.'tce	jumper	malox	jump

Another but rarer agentive form seems to be:

3. *-mak, agentive.*

k-atcen-mak	robber	aten	rob
k-ac-tel-m-il-ak	speakers	as	speak
k'-ʟa'm-m-a.il-ak'	eaters	lam	eat

Other apparent nominalizing etymological suffixes, examples of which are not sufficiently frequent to warrant classification, are:

ṭa-lam-xat	food	lam	eat
pa-xaṭ'	dance	pa.-ka, pa.ta	dance
t-a.'s-e.tiʟ	language	as	speak
ṭi-kak-eʟ	song	ka.k'a	sing
ṭ-eta''ᵃk-oʟ	fire-drill	eta''ᵃk-o	make, do
ṭ-itsipx-aiuṭ'i	rebirth (S)	etseipex	be born
macal-a'k	morning star	maca.ʟ	burn
macal-e'	flames		
moce''	charcoal		

Other miscellaneous and occasional suffixes are affixed to nouns and modify their sense in various ways; some of them might be interpreted differently had we more complete data. Thus certain cases may really be examples of nominal stem composition, the combination of two nominal stems.

t̯-ema-i·c	village, *ranchería*	t̯-ema	house
cxap-alat	pebble	cxap	stone
skoi-kne′ya	beard	sxkoi′′	beard
sul-at	animal's testicles	sol	testicles
cowa-to	poison of snake	cowa	skunk·
hu·-ma′t̯ʻaʟ-ta	white people	ma′t̯ʻaʟ	white
kesiyu′k-ʟa	sweetness	kesiyu′k′	sweet
t̯′o·l	heap	t̯′oi	mountain
lua-nelo	slave	lua	man
lua-nilayo	overseer	lua	man
t̯-icxe-xe′	tracks	t̯-icxe	foot
skan-iltai	rib	skan	belly
axak-elteya	rheumatism	axak	bone
ti-tca-wen	foam	tca	water
ti-cxo-kutcin	mud		
ca-tole	dew		

VERBALIZING SUFFIXES

Certain elements are occasionally suffixed to nominal stems to change them to verbs which predicate actions or conditions intimately connected with the sense of the nominal stem. There are two important and unequivocal suffixes of this class as well as several more or less uncertain.

A suffix of not absolutely definite significance appears to denote possession of the noun, or to predicate the action or condition expressed by it. It may possibly be akin to the abstractive prefix no. 1.

4. *-e, -i, possessive, attributive.*

kʻ-sotopn-e	have a guardian	sotopen-o	guardian
kʻ-co′wa·n-i	catch fish	cwa·n	fish
kʻtsaxel-e	snow	tsa′xeʟ	snow
tc′umya·l-e′	freeze (?)	tc′umyeʟ	ice
ts′a′k′aiy-e	blow	ts′a′k′ai	wind
k-akat-e	be bloody	akata	blood
k′-epx-ai	have a mother	epax	mother
k′-ek-e·l-e	have a father	ek	father

The particle is found frequently in Sitjar:

akut-k′at̯-e	not grassy	k′at̯	grass
ke-teka′lt-e	have eggs	·tekalet	egg

The suffixes -*we* and -*ni,* of which examples are given below, evidently carry a similar signification and probably are related.

litse-we-ko	marry a woman	litse	woman
luwa-we	marry a man	luwa	man
k-lua-ni	marry a man	lua	man
lewa-sai.-ni	married man	se	wife

The second suffix predicates the manufacture of the noun thus qualified.

5. -*te,* -*tene,* -*ate, manufacture.*

ke-*selko*-te-ne (ke-*selk*-ne)	make a fence	selko	fence (Sp. *cerca*)
kʿ-coˑ'lukʿ-te-ne	make holes	coˑ'lukʿ	holes
m-isxa-'te-ʟ	urinate!	ṭ-isxaiʟ	urine
hek-upint-ate	I fatten myself	upinit	fat

A few other cases of apparent verbalizing etymological suffixes, taken principally from Sitjar, are:

ṭaa'k-a	nod	ṭʿa.''k-o	head
k-upint-emak	eat fat	ṭ-upinit	fat
ṭam	hunt pinenuts	ṭo	pinenuts
ṭo·we	fetch pinenuts		
timuy-ak	convene	timuy-o	meeting
sol-eko	feel genitals	sol	genitals
ke-cetene-no	fetch branches	cetene	branches
sen-eu	marry a woman	sen	wife
saiyan-emo	marry a woman		

ADJECTIVIZING SUFFIXES

A few cases have been found in which suffixes appear to form adjectives from nominal or other stems:

taka-lau	capable	taka-t	trade, work
k-exak-op	bony	axak	bone

NOMINAL ETYMOLOGICAL PREFIXES

Several elements of definite meaning are prefixed to nominal stems and qualify their meaning; it is possible that these are petrified examples of nominal stem composition:

6. *tce-, ce-, cte-, old, aged.*

ctelu·wa''	old man	lu·wa''	man
ṭcilu·wai''	old man (M)	lu·wai''	man
celte''	old woman	litse''	woman
tcene''	old woman (M)	lene''	woman

7. *il-, l-, seasonal.*

ilpal, ʟpaʟ	spring (summer)
ilne', il·e'	summer
ilka·p	autumn
iltce	winter

A few other sporadic cases have been found which may be interpreted either as unusual prefixes or, probably more truly, as examples of stem composition:

tetsas-kap	acorn-meal	kap	acorn
tne-paku	upper arm	puku	arm
ma-poko	thigh	puku	arm
we-lak'	world	lak'	ground, land

GRAMMATICAL STRUCTURE
NOUN AND VERB

As with every language, the important parts of Salinan speech are the noun and the verb. These are never combined as with many American languages, and the stems are normally different and unrelated. Those cases in which nominal and verbal stems are connected have already been considered under etymology. Neither nouns nor verbs are subjected to a great amount of morphological modification and inflection. On the contrary, the majority of inflections, declension, and conjugation are expressed by means of independent adverbs and particles. The stem is modified in very few directions, but these are for the most part very fundamental and frequent, affecting practically every stem.

Plural

One of the most striking peculiarities of Salinan is the development of the plural. Every noun, verb, and adjective must display in its form its number, the plural of the verb conveying ordinarily the idea of repetition as frequentative or iterative, and frequently implying plurality of the pronominal subject or object.

The methods of plural formation fall into several different types, but the details are very variant and almost inexplicable. The two principal methods are by suffixes and by infixes. As subdivisions may be differentiated the various elements employed, which are, generally speaking, composed of one or more of the three elements *t, n,* and *l.*

·The majority of stems permit of but one plural form, and it seems to be impossible to determine which of the many types of plural formation any given stem will follow. But certain other stems permit

of several different forms, according to the several types of plural. It is probable that each of them carries a slightly different significance, such as distributive and iterative, but it has not been possible to differentiate them according to meaning. Thus the following plural forms of one stem, claimed to be of identical meaning, were given:

ṭa·m	house	ṭama·'neʟ
		ṭamelax
		ṭa·ma·tén
		ṭemhal
		ṭa·ma·tenáx
		ṭa·ma·niʟáx
		ṭamaniʟten
exoxo'	brain	exoxa'lax
		exotenax
		exoten
icxe·'u	foot	icxepa·'l
		icxe'xe'
		icxe·ple't

Similar varied plural forms are found with certain verbal stems, though possibly in less degree:

a·m(k)	kill, be able	a·mkNe''lk
		a·mt'elik
		a·mxot'e
amauc	guard, preserve	amaulic
		amaucelte
		amaucelayo

Most of these varied forms are from Sitjar, suggesting that the different classes of plural formerly had an active functional value, but that these have now become lost or static, resulting in great irregularity. An insight is given into the solution of the problem by the following excerpt from Sitjar:

kaxo'-ta	A man hunts an animal
kaxo'-ten	A man hunts many animals
kaxo-to'ta	Many men hunt an animal
kaxo'-nilet	Many men hunt many animals

The various types of plural formation with their elements are:

8. *-ten, iterative plural.*

The suffix *-ten* possibly should not be regarded as a true plural, but generally functions as such. Suffixed to either nouns or verbs, it means "another", "again", and evidently carries an iterative significance. In the example given just above from Sitjar it denotes plurality of object and singularity of subject, one of the phases of the

iterative, but examples taken from linguistic texts do not support this explanation. This particle generally carries a slightly raised pitch accent, *-tén*. Thus:

wa′kiṭ	wakiṭ-ten	frogs
a′xa·k	a′xa·k-tén	bones
tatcuaniʟ	tatcuaniʟ-ten	stars
ketca	ketca-ten	big
kristia′no	*kristiano*-ten	Christians
	ta·sko′mcuka·′yi′k-tén	but do not tread again
	k′al-ten-a	we will fight again
	p′cola·′tko-ten	he treed him again
	ṭa·′mulox-ten	he jumped again

When other nominal suffixes or inflections are used with this plural the plural sign precedes such endings, as:

kotos-na	kotos-ten-na	noises
oxot-o	oxot-ten-o	his testicles

Two other pluralizing suffixes are evidently akin to the suffix *-ten: -tenax* and *-tenat*. These are used solely with nominal forms, and principally with names of animals. They occur rarely.

9. *-tenax, nominal plural.*

ṭaiʟ-tenax	fleas
ṭamuʟ-tenax	pumas

10. *-tenat, nominal plural.*

map′-tenat	rabbits
ska·k′-tenat	crows
as-tenat	elks
ʟk′a′-tenat	coyotes
lua′-tenat	males
tama-tenat	men
asak-tenat	flints
ts′akai′-tenat	winds

A large class of nouns, many apparently irregular, form their plurals by the suffixation or infixation of a particle containing an *n* element, frequently also with a *t* element, and probably related to *-ten*.

xutc	xosten	dogs
celṭe	sle·ten	old women
tcini′	tcinten	old women
saxe	saxtin	birds
simla′	sem′ta′n	boys
litse′′	le·tse-n	women
lene′′	le′ntsen	women (M)
ṭ′o-s	ṭ′os-en	brothers

t̲-etiya	t̲-etiyen	arrows
ts'axe'ʟ	ts'ax-an-eʟ	snows
tcumieʟ	tcumi-an-eʟ	ices
kiyo't e'	kiyo't-n-e'	shake
ko'yi'	ko't'ne	reply

The plural suffix -*lax* is also used solely with nouns or adjectives. Like -*ten*, it is of very frequent occurrence.

11. -*lax, nominal plural.*

tepen-lax-o	his belly
topoi-lax-o	his knees
ketpoi-lax	cedars
ts'open-lax	spiders
ke'-kau-iatce-lax	sleepers
k'pat̲'-lax	hard
kesiyuk'-lax	sweet

Occasionally -*ax* is used alone. Compare the -*ax* of -*ten-ax.*

| t'katn-ax-o | anuses |
| k'-ts'ep-ax | good |

Another very common class of plural suffixes is that ending in -*el*. There are several varieties of this suffix.

12. -*el, -neʟ, -aneʟ, -naneʟ, -teʟ, plural.*

-*el* alone is comparatively rare.

| tcak-el | knives |
| smat-el | beautiful |

A far more common suffix is -*neʟ*:

elk'a-neʟ	coyotes
tik'e-neʟ	lice
telek-nel-o	their mouths
tetalak-nel-o	his horns
at-neʟ	acorns
apek-nel-op	good

-*aneʟ* is probably a phonetic variation of the above:

t'elow'-a'ɴeʟ	storms
titol-anel	brothers
saiy-aneʟ	eagles
tcxap-anel	stones

-*naneʟ* is occasional:

eskaiya-naneʟ	raccoons
toolec-naneʟ	squirrels
cumk'om-o-naneʟ	squirrels

-*te*ʟ is occasional:

ṭo.'kena-teʟ	days
smakai-ya-teʟ	nights
ka'-teʟ	acorns

Apparent phonetic irregularities in the use of this suffix are:

ṭepaʟ	ṭepa'neʟ	tongues
ṭa'kat	ṭak'aneʟ	sticks
ṭoxo	ṭoxo-lanel	wolves
ṭaasx-o	ṭaasx-aknel-o	livers
lice'	elci'-tanel	winters
akata	akat-nel-o	bloods
ṭaa''	ṭaa'-tneʟ	deer
atᶜ	at-nelat	acorns
ka'	ka-tᶜ-nelatᶜ	oaks

Many verbs also form their plurals by the addition of a suffix which contains the element *l;* these forms are undoubtedly related to the nominal plural forms in -*el.* The vowel of this verbal suffix is very variable.

kac-il	sit down
ka'mes-il	call
kaiya-ʟ	go
lam-x-al	eat
yom-al	see
pamaṭ'-el	chase off

A probably related element is the suffix -*let,* containing the same sound *l;* it is found most frequently with nouns, occasionally with verbs.

13. -*let,* -*elet, plural.*

ṭopok-let-o	his arms
exak-let	bones
sk'ot-elet	serpents
ticok'al-et-o	his ears
itol-ilete	brothers
ṭipxat-elt-o	his entrails
k'wak-elt-a	long
kak'-elt-a	sing

Seeming irregularities in the use of plural suffixes involving the element *l* are:

maṭᶜ-elak	animals, meats
t-icxe-p-lip	feet

Probably related to the suffixes in *l* are the pluralizing infixes in -*l*-. These are found more commonly with verbs, less often with nouns.

The element, generally in combination with a vowel, is interpolated within the apparent stem of the word, generally before the final vowel or before the last syllable.

14. *-l-, -il-, -el-, -al-, plural.*

ţexiwaiy-o	ţexiw-il-aiy-o	their hearts
ts'waketi''	ts'waket-il-i'	hats
hak'i	hak'-el-i	bows
makawi''	makaw-il-i'	flowers
katcenmak	katcenm-il-ak	robbers
k'pat'ak	k'pat'-il-ak	dancers
kLe''tax	kLe''t-al-ax	sharp
takat	tak-el-at-o	trades
	t-al-akat-o (S)	
kaua	kau-l-a	be robust
ka·set	ka·s-il-e	name
katsintca	katsintc-el-a	anoint
k'aLi'	k'al-el-i'	fight
xata	xat-L-a	weep
k'miţ'ik	k'miţ'-L-ik	run

Judging from Sitjar's example above quoted, it would seem that this element denotes plurality of subject and object. Other examples refute this hypothesis. Minor irregularities in the use of the *-l-* infix are:

ke'o	ke-la'-o	knuckles
epeselet	epesel-elm-et	enemies
inexa'	ine-lk-xa	parents
anemtak	anem-til-tak	pardon
komop	kom-ol-op	finish
k'aLa	k'aL-el-a·'kot	fight
paitceko	paitc-ilt-eko˙	visit

The iterative phase is most commonly expressed by the infix *-t-*, generally with accompanying vowel. As in the case of *-l-*, it is normally interposed before the final vowel or syllable of the stem. It is found with both nouns and verbs, but far more frequently with the latter. It is very common. Sitjar's example above quoted would seem to suggest that this infix denotes plurality of subject with singularity of object. Certain other examples dispute this, as, for instance:

pa'le'ltko	he asked them several times

15. *-t-, -te-, iterative plural.*

kola'le'	kola-t-Le'	penises
ţeţeyini''	ţeţeyi-ti-nai	arrows
kaxap	kaxa-te-p	corpse, dead
ţikelele	ţikelil-t-e	round

kwi'le'	kwi'l-t-e'	straight
kma'lox	kma'l-t-ox	jump
ma·	ma-tele'	carry
kco'lukne	kco'luk-te-ne	make holes
mamampik	kaman-t 'a-pik	take out
anem	ane-te-m	remain
ṭas-il-o	ṭas-t-il-o	names
pale 'lko	pa'le 'l-t-ko	inquire

In a few cases, principally of nouns, the plural is formed by the infixation of an aspirate -*h*-, frequently with repetition of the stem vowel.

16. -*h*-, *plural.*

t-a' 'k-o	t-ahak-o	heads
to-le't-o	le'het	teeth
me'n-o	mehen-o	hands
sokent-o	sukehenet	eyes
kau	kaxau	sleep
k-na'ye'	k-na'hye'	yank away
k-ʟa'm-aiyak	k-ʟam-ahyak	eaters

Plurals which apparently follow none of the above categories are:

t-e·nt-o	xenet	teeth
taken	ta'nta	shamans
lua	lua-yato	males (S)
tciluai	cteluai	old men (M)
steluwa'	steluwi'	old men (A)
koiyakten-o	lokoiyini	beards
sla'	sla'at	basket
istau''	iskunṭa'm	girls
stexa'	senta'n	boys
kuwaiyo	kuyata	horses
ats-o	its-ak-o	*presas* (S)
ṭitcu·-o	ṭitcu·-ak-o	breasts (S)
atcaka	atcakoi	times(S)
kʟa	kʟapat	broken
ts'epen	ts'epeyitini	small
k'tai	k'taiyai	stink
liyax	litax	shoot
m-icim	k-ostem	drink
komiyota	ko 'kiutne	lie down
k'se'yine	k'se'ne	walk

The foregoing examples demonstrate the great irregularity and complexity as well as the great importance of the Salinan plural. It is not impossible that a very intensive study might elucidate phonetic laws governing these cases, and also assign various significations to the different classes; at present the irregularity would seem to be due to historical or other fortuitous causes unexplainable without an extended comparative philological study.

THE NOUN

The Salinan noun invariably stands in independent position; it is never incorporated in the verb and is seldom used in apposition to any particle in the verbal complex. It is varied in form only for plural number and possessive case and in certain etymological relations. Gender and the other grammatical cases are expressed by independent means. The etymological and plural modifications have already been treated; it remains to consider pronominal possession and one other minor grammatical phenomenon.

NOMINAL PREFIXES

One of the most puzzling and equivocal features of Salinan is a prefix ṭ-. It stands in close analogy to the verbal prefixes p- and k-, to be considered later. It is prefixed to most nouns derived from verbs, and on this account should possibly be considered as an etymological element were it not for the fact that practically all other etymological elements are suffixed. Moreover, it, or a similar prefix, is found with most pronominal possessive prefixes and with certain forms of the verb. Examples of ṭ- as a nominalizing prefix are given below; its other functions will be considered later.

17. *ṭ-, nominal prefix.*

ṭ-olol-a'iyo	his flute	k-o'lo.l-iꞌ	play flute
ṭ-olal-a'iyu	his shame	k-o'la'l-e'	be ashamed
ṭ-a·'s-o	his name	k-as-et	be called
ṭ-ecxai	dawn	k-ecxai	to dawn
ti-ka·'keʟ	song	ka·'k'a	sing
ṭ-au-yi	heat	k-au-yak	be hot
ṭ-alel-k-eya	question	p-alel-k-o	ask
ṭ-atce-x	seat	k-atce-k	sit down

With certain nominal stems, principally those denoting terms of relationship, a prefix a- is found, which seems to have no definite significance unless it may be an abstract possessive form. Many of these are forms taken from Sitjar, the same stems occurring in modern usage without this prefix.

18. *a-, nominal.*

a-ton-o	his younger sister	ton'	my younger sister
a-pe-u	his elder sister	pe	my elder sister
a-tos-o	his younger brother	tos	my younger brother
a-kay-o	his elder brother	kai	my elder brother

a-xalau-o	his grandfather	xa'la	my grandfather
axomo	foster father		
apai	mother		
ama	grandfather		
asa'k'o'	uncle		
a-kom-lua'we	unmarried woman	lua''	man
a-lua-nil-ayo	overseer	lua''	man
a'teloi	friend		
a-laxam	door, entrance		
a-*mis.*'ayo	mass (Sp. *misa*)		

PRONOMINAL POSSESSION

Pronominal possession is expressed by the prefixation, or in certain persons the suffixation, of elements only distantly related to the independent forms of the personal pronouns. The prefixes are closely welded to the nominal stem and the combination is normally without phonetic change, except as noted below. The elements of the first and second persons are prefixed, those of the third person suffixed. The pronominal possessive prefixes with examples are given below; they are practically identical in the two dialects.

Singular	
1	(t̥)-
2	tm-, t̥um-, tme-
3	(t̥)——o
Plural	
1	t̥a(t̥)-
2	tk-, t̥uk-, tko-
3	(t̥)——ot, (t̥)——o

Nominal stems beginning in a consonant require little comment. The bare stem expresses the first person singular possessive, the bare stem with suffix -*o* or -*ot* the third personal possessives. The other persons take the prefixes *t̥um-, t̥a-,* and *t̥uk-:*

sa.'nat'	my hide	tasa.'nat'	our hide
tumsa.'nat'	thy hide	tuksa.'nat'	your hide
sana'to	his hide	sana't'ot	their hide

Stems ending in -*a* normally change this to -*o* in the third person:

t'me.'ma	thy house	te.mo' his house

The suffix -*o* of the third person generally takes the stress accent and stems ending in -*o* distinguish their third personal possessives by this method alone.

t̥a.'mo	my boss	t̥a.mo' his boss

Stems ending in -*i* take a *y* glide before the -*o* suffix; stems ending in -*u* take a *w* glide.

ṭololi′	my flute	ṭolola′yo	his flute
ṭu	my face	ṭu·wo′	his face

Nominal stems commencing in any vowel except *a*- take the nominal prefix *ṭ*- (no. 17) in the first and third persons. In the case of the first person plural this follows the pronominal *ṭa*-, forming the prefix *ṭaṭ*-. Thus in every case the first personal plural possessive form is equivalent to the first personal singular form plus the prefix *ṭa*. The accent generally falls on this prefix. In the second person nominal stems commencing in vowels take the possessive prefixes *ṭm*- and *ṭk*-.

It will be noticed that the prefixes of the second person invariably contain the initial sound *ṭ*- (frequently heard as *t*-). As this element is not found with the pronominal forms of this person in the other classes, it is probable that this is the same nominal prefix *ṭ*-.

ṭu	my face	ṭaṭu	our face
ṭmu·	they face	ṭku	your face
ṭu·wo′	his face	ṭuhe′not	their faces

Except in the cases of stems commencing in *a*- and monosyllabic stems, the initial stem vowel is dissimilated to *e*- in the case of the second person singular and *o*- in the case of the second person plural; this suggests that these vowels are intrinsic to the pronominal forms. Cf. the stem for ''dog'', absolute *xutc*:

ti·′tco	my dog	ṭa′titc	our dog
t‘me·′tco	thy dog	t‘ko′tco	your dog
ti·tco′	his dog	ti·′tcot	their dog

Nominal stems commencing in *a*- display several irregularities. They retain this vowel unchanged in the second personal forms. Certain examples take the nominal prefix *ṭ*-:

ṭa·k	my head	ṭa′ṭak	our head
t‘ma·k	thy head	t‘ka′k	your head
ṭa·′ko	his head	ṭa′kot‘	their head

Others do not take this prefix:

a′xak	my bone	ṭa·′xak	our bone
tuma′xak	thy bone	tuka′xak	your bone
axa′ko	his bone	axa′kot‘	their bone

It is probable that those which do not take the nominal prefix are either reduced from an original initial *pa*- (p. 16), or else composed with the nominal prefix *a*- (no. 18).

In the third person plural an optional form is the use of the singular suffix *-o* followed by the appropriate independent pronoun *heyo't,* ''they''. It is possible that the difference between these two forms may be that between the normal possessive and the distributive. But examples are equivocal, as:

t-etc-a.'t-o	their dogs
tꞌ-e.'tc-ot	every one's dog
ṭ-e.'m-oṭ	their house
cpoke't-o·ṭꞌ	every one's hair
luwuy-iya·t-o	their respective husbands

In the first and last examples there seems to be a suffix *-a·t* employed. Another element of similar portent seems to be a prefix *ku-:*

ko'-otc-te'	every man's dog
ṭat-ku'-*kuwai*	every man's horse

The suffix *-tꞌye'* in such instances means each:

ko'-otc-te'	every man's dog
pa.'*ka*-tꞌiə'	each cow

The adjective pronouns ''mine'', ''thine'', etc., are supplied by the independent forms, generally with the substantive verb appended.

PRONOMINAL SYSTEM

The pronouns function in the Salinan dialects in independent and affixed forms, the latter being closely welded to the stem. There are several different series of forms, more or less divergent, but in the majority of cases displaying some resemblance *inter se.*

INDEPENDENT PRONOUNS

The independent pronouns occur mainly as subjective, less often as emphatic or appositional forms for the objective or possessive. The forms in the two dialects differ to some extent:

Singular	*Antoniaño*	*Migueleño*
1	he·'kꞌ (kek)	kꞌe'
2	mo'	mo'
3	heyo''	heo'
Plural		
1	ha·'kꞌ (kak)	kꞌa'
2	mo·m	mom
3	heyo·''t	hewo''t

These independent forms are frequently affixed to the verb as enclitics or proclitics to represent the subjective relation; they will be more thoroughly treated under the caption of verbs.

The other forms of the personal pronouns function as true prefixes or suffixes, integral elements of the complex in which they stand. The possessive nominal prefixes have already been considered; the objective suffixes will be treated under the analysis of the verbal complex. It remains to consider a special oblique or locative form.

LOCATIVE PRONOUNS

These are a special group used only after locative prefixes or prepositions. They show for the most part genetic relationship with the independent forms, but are somewhat variant. The form of the second person plural is not absolutely certain, for lack of sufficient examples. The forms employed are:

Singular		
1		k'e
2		me
3		ke'o
Plural		
1		k'a
2		ko
3		kewa'ʟ

Thus:

ṭewa.'kok'e	near me
akeme'	where art thou?
umke'o	up to him
ump'ak'a	beyond us
akeamko	where ye will be
makewa'ʟ	to them

TABLE OF PRONOMINAL FORMS

Although some of the forms of the personal pronoun have not yet been considered, a table of the various forms is appended below for purposes of comparison. It will be seen that, though there is a superficial resemblance between all classes, yet the variations are great. Practically every form shows resemblance with some other, yet it can not be said that any of the classes fall together as opposed to others, except, of course, the enclitic and proclitic forms of the independent. The objective and possessive forms are possibly the more variant.

Singular	Independent	Proclitic	Objective	Locative	Possessive
1	he'k	e	ak	-k'e	-------
2	mo'	m	ka	-me	ṭum-
3	heyo''	-------	o, ko	-keo	-o
Plural					
1	ha'k	a ·	t'ak	-k'a	ṭa-
2	mom	(om)	t'kam	-ko	ṭuk-
3	heyo''t	-------	ot, kot	-kewa'ʟ	-ot

THE VERB

As with most American Indian languages, the Salinan verb is the crux of the sentence, but it does not play the all-important part that it does in many of them. The Salinan verb normally displays within its complex the number of the pronominal subject and the number and person of the pronominal object. It may also show certain etymological and modal phenomena, but tense only incidentally.

The etymological relations have already been considered, as has the question of the number of the verbal stem; the other relations remain to be elucidated.

The verbal stem is modified by prefixes, infixes, and suffixes, to a lesser extent by the affixation of enclitics and proclitics. The infixes are concerned exclusively with pluralization and have been already considered; the prefixes express the principal modal qualifications, the suffixes the lesser ones. The various appurtenances of the verbal complex: proclitics, prefixes, suffixes, and enclitics will be considered in this order.

PROCLITICS

For the sake of convenience in nomenclature, certain preposed elements are termed "proclitic" in order to distinguish them from the modal prefixes. In certain respects, however, as they are never found independently and may carry the accent, they might better be termed "prefixes of the first class."

The verbal proclitics are divided into two classes, temporal and interrogative.

Temporal Proclitics

A number of proclitics introduce temporal clauses, preceding the pronominal subject. The principal ones are *me-, ma-, be-, le-,* and *kacta-,* all meaning "when."

19. *me-*, "*when*," *indefinite time.*

me-t-amp⁪	when it rises
me'-t⁪ya	when it is finished
me'-p-ṭ'ekaxo	when he kills
me-p-a·'lxo	whenever he wished
me'-ṭ-k⁪onlox	whenever people came
me-yam-ṭem	when I see my house
me-ṭ-epts'e'n	when they stung him
me''e·-ka·wi'	whenever I get sleepy
me-cko	when I am
me'-ṭ-a'mṭ⁪ele⁪ (M)	when they go to hunt

The prefix *ma-* probably differs only phonetically from *me-*:

ma'-yaʟ	when we go
ma'-paʟa	when we dance
ma'-yomal	when they see

20. *be-*, "*when*," *definite past time.*

be·-ya'	when I went
be-tom-he''k	when I fell

21. *le-*, "*when*," *indefinite past time.*

le-yax	when I came
ʟi-ctexa-ē·'n	when I was a boy
le-sko (M)	when I was (small)
le-t-eta-ha'pu (M)	when it was made

This proclitic is probably related to the temporal adverb of past time, *lelo.*

22. *kacta-*, "*when?*" *temporal interrogative.*

kacta-m-amp	when will you finish?
kacṭa'-umulop⁪	when will we finish?
kacta-m-ka'ka	when will you sing?
kacta-t-iyax	when will he come?
kacta-konox	when will I arrive?

There are several other possible temporal proclitics but examples are insufficient to establish their case.

With the temporal proclitics should probably also be considered the particle *ṭam, ram,* or *am,* "*then*," one of the most frequent connectives.

Interrogative Proclitics

Interrogative proclitics are few in number and genetically related to independent forms. In addition to the temporal interrogative given just above there are two adverbial forms: *ake-*, "how?" and *mena'ko-*, "why?", and two pronominal forms: *ta-*, "who?" and *tas-*, "what?"

23. *ake-,* *"what?"* *"where?"* *"which?"* *"how?"* *interrogative adverb.*

ake-noṭa·'siʟ	what shall we do?
akī·'c	what is there?
ake-t'm-e·'ke'	where art thou going?
ake·'am'	whither?
ake-me·'nax-ta	whence dost thou come now?
akī·ca'	how art thou?
ake-te-ke'o	where is he going?
ake'ho' (M)	which is it?
ake-ṭa'tī' (M)	what shall we do?
ake-to'n-ho' (M)	which is this?
ake-ton-ke'u (M)	where is he?
akī'-tenó-p{a'mka(M)	where is he who is going to kill thee?

The particle *ton* in the last three Migueleño examples is of doubtful nature.

24. *mena'ko-, (M) miyo'k, "why?" interrogative adverb.*

me·'nak'-t'-kom-i'ye	why don't you go?
mi'yo'k-ṭo-ku'm-icəx (M)	why don't you eat it?

The same particle is also used as conjunctive "because" and as an interjection.

25. *ta-, (M) tēk'a'-, "who?" "which?" "whose?" animate interrogative pronoun.*

ta-p-k'-t-aten-ko	who stole it?
ta·'ru-p'	which of (them)?
ṭạ·-kera·'ne	whose?
ta·-ko·'-otce-wa·xo'tc	whose dog is this?
ta·-lwa''·	which is the better man?
tá·-p'-iem·o''	who knows?
tē'k'a' (M)	who is he?
tē·k'a (M)	who is——?

26. *tas-, (M) ṭaltom', "what?" "which?" inanimate interrogative pronoun.*

ta·'s-ten no'vi'	what is that which——?
ta·s-tm-a·'lox	what do you wish?
ta's-ta·'va'	what were they which——?
ta·'s·-t'm	what (animal)? what (did he say)?
ṭaʟṭum, ṭa'lṭom' (M)	what is it?
ṭalt'ᴍa'' (M)	what saidst thou?

PROCLITIC PRONOMINAL SUBJECT

The pronominal subject of a verb is typically not expressed in the verbal complex but rather by the use of the independent form of the personal pronoun, generally following the verb and sometimes enclitic

to it. These independent forms have already been considered (p. 32) and the enclitics will be treated following verbal suffixes. When the verb expresses the third person it frequently stands alone without pronoun and also occasionally in the case of the other persons when no confusion will ensue. In a few cases when, due to special conditions, the independent pronoun precedes the verb, it may become coalesced with the verb in rapid speech and thus act as a proclitic. This phenomenon is rare and inconsequential.

But in certain constructions the pronominal subject becomes an integral part of the verbal complex. As such it is much reduced or abbreviated in form. Thus certain verbal proclitics and prefixes always require the pronominal first or second personal subject between themselves and the verbal stem. Such are the temporal proclitics and the negative and interrogative prefixes. These reduced subjective forms are:

Singular		*Plural*	
1.	e	1.	a
2.	m	2.	(om)

me''-e·-ka·w-i'	when I get sleepy
ke'ra' k-e-koʟ	I am not hungry
kacta-m-amp	when will you finish?
u-m-kaka	are you singing?
ke'ra' k-a-suxtox	we are not afraid

There are no forms for the third person and that of the second person plural is doubtful.

PREFIXES

Prefixed to the verbal stem may stand one or more of ten elements which signify modal relations. These are for the greater part the more abstract and general ideas, the more particular ones being expressed by suffixes. They are generally prefixed directly to the verbal stem though a few of them interpose the pronominal subject between themselves and the stem. But the combination is complete; there is no suggestion of the nature of proclitics. Some of them are mutually exclusive, while others permit of combination with other prefixes.

These ten verbal prefixes are of the greatest importance in Salinan morphology. The majority of verbs display one or more of these elements in their complexes. The first three undoubtedly are the most recurrent features in the language and their elucidation supplies the most difficult feature of Salinan grammar. The remaining seven are

more or less clear and unequivocal in meaning. For convenience in arrangement and nomenclature, each element has been assigned a number, a definite form, and an explanatory title. But in many cases, as the imperative and interrogative, the element appears to be pronominal in nature, and in others, as for instance the transitive, intransitive and nominal, the titles given by no means adequately explain the meaning and nature of these elements.

The ten prefixes with their approximate forms and significances are:

    27. p-, transitive
    28. k-, intransitive
    29. ṭ-, nominal
    30. m-, imperative
    31. ko-, negative
    32. o-, interrogative
    33. ṭa-, conditional
    34. en-, dependent
    35. na-, purposive
    36. se-, substantive

Transitive, Intransitive, Nominal

The three prefixes, 27 *p*-, 28 *k*-, and 29 *ṭ*- supply the most striking and at the same time the most elusive feature of Salinan morphology. The majority of verbs contain one of the three elements. But their great frequency only lends added difficulty to the elucidation of their proper values. If they have any absolute meaning it has eluded the present writer for many years. For convenience in nomenclature the titles as above given have been assigned to them for reasons which will be given below. But the titles are applicable to only a restricted number of cases and many examples absolutely refute the suggested explanations. It is possible that they are the vestiges of a once fully functional process, now petrified in its irregularity, or else broken down with the approaching extinction of the language.

The three prefixes are mutually exclusive; only one of them may occur in any verbal complex.

The sign *p*- frequently precedes stems with an object, generally personal, while *k*- may precede the same stem when used intransitively. *k*- also normally precedes stems when used passively, most intrinsically intransitive verbs and most adjectives. On this account these two prefixes have been designated by the terms "transitive" and intransitive."

k-ecxai''	I woke up	t-ecxai''	dawn
kʼ-ts'axe'le	it snows	ts'ahe'ʟ	snow
kʼ-ṭ'e'pine	he is fat	ṭ'e'pen	fat
k-iltce-wi'a	winter is coming	i'ltce	winter
k-cta'ne	it is budding	ctan'	leaf
k-'a'mes	he shouted	p-'a'mes-ak	he cried to me
k-a·wiyakʼce'	it is hot	p-a'wi·lo-ko	she heated it
k-e'nai	he hurt himself	p-e'nai-ko	I wounded him
k-ospolo'x	he commanded	p-espolo'x-o	he seized it

But many cases are found in which *p-* introduces an intransitive phrase and *k-* a transitive one.

pʼ-iem.o'	I think
p-ikele·'ntx-o	he circled around
p-a'lx-o	he wished (to)
p-a'mk-o	I am able
k-a'metʼi	he hunted for him
k-ena·'y-ok	he wounded him
k-tc'a·uye'	they sought him
k-mala·-k	they told him

Many of these apparent cases of the use of *k-* for the transitive may truly be passives.

One of the few features of practical certainty regarding these two prefixes is that the *p-* prefix nearly invariably takes the suffix -*o* or -*ko* as its third personal objective form while the objective form in -*k* occurs exclusively with the *k-* prefix.

In many cases the difference between the *p-* and *k-* prefixes appears to be that between singular and plural subject.

p-a·ke'ʼn-o	I thought	k-a·ki'n-yi'	they thought
pʼ-me·'t-o-tén	he tried again	kʼ-me·'ti	they try
ᴍa'ita-ko	he told them	kʼ-maltau-k	they told them
pʼha·'iya·k	he paid me	ke-pʼha'iyak	they paid me
p-as-iem (M)	he was named	k-a's-ile	they are named

It is possible that the above cases are also passives, that construction being preferred with plural subjects.

When the prefix *p-* precedes a stem commencing in *m* the combination results in a surd ᴍ, the *p* disappearing.

Many different hypotheses have been advanced and considered concerning the nature of the *p-* and *k-* prefixes, but none of them seems to be applicable to every case.

The prefix *ṭ-* seems to be an alternative form for either of the above prefixes. It is termed ''nominal'' merely because its form is the same as that of the nominal prefix no. 17 and there may be some con-

nection between them. This prefix seems to be found in two circumstances: it may stand initial as a prefix to certain stems which ordinarily utilize it, or it may replace one of the other prefixes when preceded by another prefix or proclitic.

The verbs which ordinarily take the t- prefix initially are principally verbs of motion:

ṭʻ-ia	he went
ṭʻ-iax	he came

Occasionally, though rarely, other stems, principally those commencing in a vowel, are found with the prefix t- in initial position. But the most frequent use of t- is in place of one of the other prefixes after another prefix or proclitic. The prefixes p- and k- are generally not found following other prefixes. They do occur under certain conditions:

am-p-ia'tleko	he sent them
am-kʻ-ɴa·'yi'	he fled

But in the great majority of cases, particularly with stems commencing in a vowel, after the proclitic *ṭam (ram, am)*, *me* and the other temporal and interrogative proclitics, the negative and the other verbal prefixes and the preposition, the transitive and intransitive prefixes are replaced by t-.

ṭa'm-ṭ-a·lel-a'ikʻ	they asked him	p-ale'l-ko	he asked him
ṭa'm-ṭ-amp	it came out	k-a·'mpʻʟo	it came out
ra'm-ṭʻ-xwen	he arrived	xwe'nelax	they arrived
am-ṭʻ-yax	he came	yax	come!
me'-ṭ-amtʻeleʻ (M)	when they hunt	k-a'mṭi' (M)	he was hunting
me-ṭ-ampʻ -	when it came out	p-a·ma'mpʻko	he took it out
me-ṭ-epts'e'n	when they stung him	am-k-epts'en-la'ik	they stung him
me'nak-t-kum-sa mo''	why don't you speak?	kʻ-sa'	he spoke
ko'-ṭ-amai	he could not	ko'-p-amko	I can not
ṭi-ṭ-a·'leyix	if they wish	p-a'lxo	I wish
ṭi-ṭ-a·'mpta'	to come out	k-a·'mpʻʟo	it came out

Imperative

The imperatives are confined to the second person; other forms are always academic and theoretical. It is very difficult to formulate the exact rules for the use of the imperative, as puzzling and apparently inexplicable exceptions to any rule are found, but the normal system seems to be:

Singular positive imperatives make use of the bare verbal stem if it commences with a consonant, or of the stem plus the prefix *m-* if it begins with a vowel. This prefix *m-* is very probably the *m* of the second personal singular pronoun. Singular negative constructions employ the prefix *kum-* in all cases.

Plural imperatives are scarce in the data secured but the prefix *k-* appears to be used in the majority of cases, the stem in the plural form in other cases.

A few examples seem to suggest that the *m-* and *k-* prefixes are used with transitive verbs, the bare stem with intransitives, but exceptions to this hypothesis are likewise found.

30. *m-, k-, imperative.*

kʻakʼa	sing!
xaʼla	shoot him!
maleˑʼntax	remember it!
m-iʼcim	drink!
m-etʼeyineʼʼk	shoot him!
m-ultʼiʼk	cut him!
m-amaʼmpek	draw it!
kuʼ-m-xaˑtą	do not cry!
koʼ-m-icax	do not eat!
koʼ-m-ptʼikaʼ	do not beat her!
ko-m-eckʼwala	do not cut yourself!
yaxteʼʟ	come on!
k-osteᴍ mom	drink!
kʻ-tsʼeʼikʻ	go and see him!
kʻ-mitʼkaˑtek	drive them off!

The imperative takes its third personal pronominal object in *-ik*, never in *-o* or *-ko:*

k-aʼmamp-ik	take it out!
aʼmes-ik	shout to him!
m-alel-ik	ask him!

Negative

The negative is expressed in two ways in Salinan: by the independent negative *keʼraʼ* and by the negative verbal prefix. The two are normally used jointly, probably to avoid possible confusion with the intransitive prefix *k-*, as:

keʼraʼ koxoˑʼyeʼ	he did not reply

31. *ko-, negative.*

The normal negative prefix seems to be the element *k* followed by the proclitic form of the subject pronoun. An alternative explanation

might be that the negative prefix is *k-* and that when required by phonetic laws the proclitic pronoun is interpolated. In either case the result is the same. As the third person is by far the more common in running text, the most frequent form of the negative is *ko-;* this again may be the true form of the prefix, the others assimilated to other vowels.

Verbal stems beginning in a consonant, form their negatives by the prefixation of the negative element *k* plus the proclitic form of the pronominal subjects, forming the prefixes:

Singular		*Plural*	
1	ke	1	ka
2	kum	2	(kum)
3	ko	3	kotʻ, ko

Thus:

keʻraʻ ke-kʻa.ʻkʻa	I will not sing
keʻraʻ kum-ketcaʻ	you art not large
ko-tsʻeʻno	he is not happy
keʻraʻ ka-suxtax	we are not afraid
kotʻ-koʻnox	they did not arrive

Verbal stems commencing in a vowel seem to be less regular. In the first person the vowels of the pronominal subject and the stem appear to fuse, but not according to rule; in the second person, the prefix ending in a consonant, no change is necessary; in the third person singular one of the other verbal prefixes, generally *p*, is interpolated; in the third person plural the same prefix *kot* is generally retained. Frequently the sole difference between the singular and plural is in the use of the plural verb stems. When confusion is likely to ensue, the independent prefix *keʻraʻ* is also used, as:

k-a.ʻmko	I am not able
kum-ʻaʻmes	you did not cry
ko-p-a.ʻmko	he is not able
k-amxo-tʻe	we were not able
keʻraʻ ka-aʻcax-tʻelix	we will not eat
(kʻo-kʻ-aʻmko	you are not able)
meʻnak tʻkom-iye	why don't you go?
kot-amai	they are not able
k-yam-anel-ak	they did not see me

Interrogative

The interrogative is expressed in Salinan by the prefixation to the verbal stem of the reduced proclitic form of the pronominal subject. Since in running text the third personal interrogative is by far the

most common, the third personal element is arbitrarily adopted as the sign of the interrogative.

The prefixed elements are:

	Singular		Plural
1	e	1	a
2	um	2	(um)
3	o	3	o

32. *o-, interrogative.*

e-ki' he'k	am I going?	a-kiya'ʟ ha'k	are we going?
um-ki' mo'	are you going?	um-ki'aʟ mom'	are you going?
o-ki' heyo'	is he going?	o-kia'ʟ heyo't	are they going?

om-ya'mcep	do you see?
um-petxa'u	have you it?
um-ka'xa·uló'	are you asleep?
o-una''	this one?
o'-yo'	is it this?
o-ko'nsele	will (he) sell

The negative interrogative is formed by the interrogative prefix followed by the negative prefix, as:

o-ko'-p-enai	won't he hurt (me)?

The interrogative is used in many cases of doubt or possibility but where no question is asked:

o'-yema'	who might be seen
o-yo' 'ló	(to see) if he is there
o'yo' 'ló	(to see) where he is
o'-t'ika	(go) to see if there is
o'-tica·'mko	(I wish) I were able to
o-pa·'mko	(he tries) to be able to
o'-t'amai	(they try) to be able to

The same or a similar prefix appears to be used for the vocative, as:

o-k'ewe'ʟ	O, West Wind!
o'-ta'mi·ko	Hello, friend!
o-cetelua''	Say, old man!

Conditional

Conditional constructions are expressed by the use of a prefix *t-* with following vowel. In the majority of cases this vowel is assimilated to agree with the following vowel of stem or prefix, but other cases seem to show no regularity. In a few cases the vowel may be that of the subjective pronoun.

33. *ṭ(a), conditional.*

ṭa'-amka se	if I am able
ṭa-ko'm-a·mko	(asked) if he could
t'an-t'i-itxa·'-tic se	if I had
te-etxa' se	if I have them, when I have them
ṭi-ko-ṭ-ep'eʟ	if it is not filled
ṭi-'a'pau-te'	if I overtake him
ṭi-ki'e-k'a·ka·	if I don't sing
tic-ṭa'-a'mka se	if I were able
ṭo-ko-lecxai-ta	if it does not rain

Dependent

Dependent clauses of purpose, intent, doubt, possibility, following verbs of command and similar constructions are introduced by the prefix *en-* (*em, ę, in, įη, an, on, um,* etc.).

34. *en-, dependent.*

en-t'-ya'	(commanded) to go
en-ka'u	in order to sleep
e·'n-i-ts'e·na''	to please myself
'ęn-ts'ę''n	in order to see
'en-ṭico·'p	in order to tell
em-k'-cu·'lukne	so that it entered
em-ya''	(said) to come
em-e'tɪkas (M)	to see if I can
em-tc'au	(she whom I) seek
em-sek'	(he who) speaks
tas-em-a·'lox	what I may desire
ęᵐ-p-eta'ko	(commanded) to make
ęᵐ-p-etc'e·ko	(commanded) to stop it
ï'ɴ-t-i'ts'e·k'	(go) to see
įη-kera''-k'a'ʟi''	so that not to fight
'iη-kera'-racrake	so that not
an-p-alelek (S)	if I ask
ąn-ṭi-xo'ṭ'op'	(let me) pass
ą'-ą·'mko	(to see) if I can
oɴ-p-apa·'yu	in order to copulate
on-e'-p-o'x	in order to enter
um-ta·'ne (M)	(told) to give

Purposive

Another prefix of somewhat similar significance but much rarer than *en-* is *na.* In the majority of cases it appears to introduce dependent clauses of purpose. Its characteristic vowel seems to be modified by that of the pronominal subject.

35. *na-, purposive.*

na-acak	in order to eat
n-um-ye′′m	that you may know
na-paLa	let us dance
na-k′a′ltena	they are fighting

Substantive

A prefix of very dubious nature is *se-*. In some cases it appears to be an independent auxiliary verb, either preceding or following the main verb. (Cf. four of the examples of the conditional prefix.) But ordinarily it precedes the verb and may be considered either as prefix or proclitic. In many cases it appears to have a substantive value and consequently is thus named, though in many other examples its exact value is problematical.

36. *se-, substantive.*

se-a′telo′i	thou art my companion
se-ke′ra′	no
se-k-ts′e′p	thus it is worth
se-ko-ts′e′p	it is not good
se-k′-La′m-a·ilak′	they are gourmands
se-k-sa·′teL	they used to speak
se-ka′′wu.ox	he slept
se-ka′wu-cko′′	he was sleeping
se-k′ɪ-cxa′lo·′	he was afraid
se-k′-ce′tep′-Ló	he was already dead
se-p-astcene′′ko	he lost it
se-p-eta′′ko	he must respect
se-′Mma′wu-mo′′	and thou carriest it
se-k-icxa′′-u-mo′	they will eat thee
se-kī-lo′	he went
se-cko′′	he remained
se-p′-xa′p′ko	he dug
se-k′o′lpax ·	it sprung up

VERB STEM

Following the verbal proclitics, the proclitic subjective pronoun and the prefixes comes the verb stem. Little need be said about this. A complete list of verbal stems is given in the vocabulary. They are of many phonetic types and apparently of no standard form. The exact form of any verbal stem is frequently difficult to determine in the absence of numerous paradigms, due to the practical universality of certain affixes with certain stems. Thus it has been impossible to determine in many cases whether an initial *p, k, m,* or *t* is a part of the stem or not. Such dubious elements have ordinarily been placed in parentheses and all *hapax legomena* have been starred.

Verbal stems are varied by means of infixes and suffixes to form the plural. These have already been treated under pluralization (p. 22). Pluralization of the verbal stem may denote any form of duplication: plurality of the subject or the object, or iterative, habitual or repetitive action. The context generally determines the exact meaning.

A few examples by Sitjar suggest that a change in the character of a stem vowel may denote the frequentative:

p-amoᶠleko	give alms frequently	p-amaᶠleko	give alms
m-amoʼᶠlek	Give alms thus!	m-amaᶠlek	Give alms!

OBJECTIVE PRONOUNS

Immediately after the verb stem follows the pronominal object. This is expressed by suffixing to the verb stem pronominal elements more or less closely related to the other forms of the personal pronoun. The combination seems to be closer than in the case of the enclitic subjective forms. When a personal pronominal object is indicated the subject is always expressed by the independent form. The objective pronouns of the Antoniaño dialect are:

Singular
1	aκ, hak
2	ka
3	o; ko

Plural
1	t'ak
2	t'kam
3	ot, kot, tko

The simple forms need no explanation:

p-aleˑʼl-hak mo'	thou asked me
p-aleˑʼl-ka' he'k	I asked thee
p-aleˑʼl-ko mom	you asked him
p-aleˑʼl-t'ak heyo''	he asked us
p-aleˑʼl-t'kam ha'k	we asked you
p-aleˑʼl-kot heyo''t	they asked them
mo' p-cik'a'iy-ak	thou kicked me
heyo'' p-cik'ai'ka	he kicked thee
he'k p-cik'ai'-ko	I kicked him
heyo''t p-cik'ai'l-t'ak	they kicked us
heyo'' p-cik'ai'-t'kam	he kicked you
mo' p-cik'ai'-ko heyo''t	thou kicked them

The forms of the first and second person require absolutely no comment but those of the third person are more variable.

Third personal objective forms are *-o, -ko, -xo, -tko, -ot, -kot, -xot, -tkot* and *-k*. With a few inexplicable exceptions, forms involving the element *o* are found only in connection with the verbal prefix *p-*, those ending in *-k* only in connection with the verbal prefix *k-*.

The forms *-o, -ko* and *-xo* are probably phonetic variants of one form and the same may be said for the forms *-ot, -kot* and *-xot:*

p-eta''-ko	he made it
p-ise'l-xo	he carried all
p-axo·'t-o	he smoked him out
p-cik'ai'-kot	I kicked them
pesno'-xot	you heard them
p-iam-ot	he saw them

Of these the forms *-ko* and *-kot* are by far the most frequent. Just what is the difference between the objective form in *-ko* and that in *-o* is not clear; it is possible that the forms in *-xo* are really *-o* preceded by an *x* of the verbal stem, but they are unexpectedly frequent.

Between the singular and plural forms of the third person objective there is considerable interchange. It will be noticed that the differentiating element between the similar persons of the different numbers is in every case the element *t*, probably related to the plural infix *t* (no. 15). Thus it appears that the forms of the third person singular may be used optionally for the plural if the third person plural independent pronoun is added. The plural infix or suffix *t* is also more or less optional when the subject is plural, forming the suffix *-tko* or *tkot*. The following examples of third personal objectives will well illustrate the variability possible:

ke'k p-iam-o	I saw him
ram-pꞌ-iax-te-ko	then he brought another
p-t̲'a·kꞌio'-xo	he killed them
p-cik'ai'-ko heyo''t	I kicked them
heyo'' pꞌ-iam-aɴe'lko heyo''t	he saw them
ram-pꞌ-ts'e·n-tko	he observes them
p-cik'ai'-tko	I kicked them
pꞌ-ia'm-o't ꞌ	they met him
p-esno'-xot heyo''	they heard him
mom pꞌ-yam-ot heyo''t	you saw them
p-cik'ai'-kot	he kicked them

Some of these forms may be paradigms incorrectly given, but the mass of material seems to show no uniformity, the third personal element *ko* or *o* being used for either number and the pluralizing element *t* added to form *kot* or *tko* for either plural subject or object, the independent forms being added in apposition in case of possible confusion.

Passive Forms

Frequently, particularly when the pronominal subject is plural and especially with an object of the first person, the passive construction is preferred to the active. Generally either the independent form of the subjective accompanies the construction or else the agentive phrase "by him," "by them" is appended.

The passive verbal complex requires the prefix *k-* instead of *p-* and the objective prefixes end in *-k* instead of in *-o* or *-ko*. The forms are *-aiyik (-aiyak, -i'yax)* in the singular and *-t'aiyik* in the plural.

k-ci'k'aiy-aiyik he'k ṭe hiyo''t	I am kicked by them
heyo''t p-cik'ai'y-ak	they kick me
k-alel-aiyik mo'	thou art asked
heyo''t p-ale'l-ka'	they ask thee
ram-male'nt-a'iyax	then it was remembered
malent-xo	he remembered it
yom-al-t'aiyik ha'ḳ	we were met
heyo''t p-yam-al-t'ak ha'ḳ	they saw us
k-ale'l-t'ayik mom'	ye are asked
heyo''t p-ale'l-t'kam	they asked you
heyo''t k-ci'k'ail-taiyik	they are kicked
heyo''t p-ci'k'ail-tko	they kicked them

ṢUFFIXES

The elements of the verbal complex following the stem and the objective pronoun are rather difficult to classify. Certain of them appear to be true suffixes, generally expressing modal distinctions and others, such as temporal qualifiers and the pronominal subject, are normally independent and, when combined in the verbal complex, evidently serve only as enclitics. Others appear to fall in the class of enclitics as regards their meaning but are not found in independent position. These have arbitrarily been classed as enclitics. The modal suffixes will first be considered.

There are four elements which may be considered as true verbal suffixes expressing various modal distinctions. These are passive, causative, and two desiderative forms.

37. *-a', (M) -ap, passive, reflexive.*

ṭ-eta·x-a'	which should be done
ra'm-ṭ'-eta·h-a'	and it was done
me'-p-am·k-a'	how you may be killed
ko-yem-a''	he was not seen
k-yam-a he''k	I was seen
mo-t-as·io-a-ko (S)	thy being named

p·esnai′′-ya	he was heard
a′me-ṭ-etax-a′p (M)	and it was done
le-t-etah-a′pu (M)	when it was done
m·ax-ap (M)	climb up! (ax *place*)
la′lu-a′p (M)	he departed (la′lu-o *leave*)
mi′s-lip-ap (M)	stinking (mis *smell*)

38. *-at, -t, (-te), causative.*

yema-t-a·′k (S)	show me!	p′-iem-et′	I will see you
am-p-ia·′-t-ko	he sent them	ame-t′-ya′	he went
yax-te′-k′	bring him!	yax	come on!
k′-miṭ′k-a·′t-ek′	he chased them off	k′-mi′ṭ′ik	I run
p·aktci-u-at-ak (S)	they made me thirsty	k-akca′	he is thirsty
p·col-a·′t′-ko-ten	he treed him again	k-coL	he climbed
m·anem-t-ak (S)	pardon me!	ik-a′nem (S)	snall I remain?
Possibly:			
k-a·′s-et′	he is named	k-a·′s-e	they call

39. *-ce', desiderative, substantive.*

The suffix *-ce'* is doubtless related to the prefix *se-* and is equally difficult to analyze correctly. A number of cases undoubtedly express a substantive meaning, identical with prefix *se-* when used as a substantive. Yet others appear to express some psychological idea such as desire, generally being suffixed to verbs which are themselves dependent on some verb of desire, thought or some similar concept. It is therefore not a true desiderative. It is quite possible that both here and in the case of prefix *se-* the substantive forms should be eliminated and placed in a separate category as constituting a different, though homonymous element.

ctelwa′′-1-e′′k-ce′′	I am getting to be an old man
ka·′wiya-k′-ce′	it is very hot
kauya-c-e′k	I am hot
ṭa′me-la·′p′-se-ṭo′ (M)	and there was the raven again
p·alox-he′′k-ce′	a desire, I desire
p·alox-nel-kek-ce	desires
p·alxo-ce′	a desire
p·aLxo-xek-ce	I would like to (but can't)
ram-ko·′-neka′-ce′	he did not wish to
ṭa-a·′mela·′i-ce′	(he wanted) them to be killed
p·i·se·′lxo-k′sa′-ce′	(he tried to carry) them all
ku-t′ia·′-t′-ia′-lo·′-ce′	he did not wish to go yet
ram-k′u-ts′e·′nu′-k′sa-lo·′ce′	then he was very contented
p·a·kē′′n-u-k′sa-lo·′ce′	he thought that
malenṭxo-ce′	he remembers

40. *-ya', desiderative.*

The suffix *-ya'* is a rather dubious and rare suffix but the few examples of it found seem to carry a desiderative significance.

ra-ko''-icxai'-ya'	that it did not wish to dawn yet
kwa·'haliya	I wish to kill
kī'-at'-ya-lo-he''k	I wish to go now
ṭe-ce'tepʿ-ya'	he was as if dead
ko-citipʿ-yʌ'	he did not die
k-iyɑx-eʟ-yı	they wish to come

ENCLITICS

There are six particles of varied significance which are never found in independent position but always suffixed to a verb or, rarely, to some other part of speech. These might possibly be considered as verbal suffixes were it not that their meanings are rather different from those of the true verbal suffixes and more akin to those of the true enclitics. These may be termed the quasi-enclitics; they express modal and temporal qualifications. The true proclitics, which are normally found in independent position are the tense elements and the pronominal subject.

Quasi-enclitics

41. *-tén', (M) ton', iterative.*

The verbal suffix or enclitic *-tén'* in Antoniaño, *-ton'* in Migueleño is doubtless akin to the nominal plural *ten'* (no. 8) and indicates "again," "another."

ra-ke'ra'-te'n'-loʿ	(he told them) that there was no more
p-a·'lxo-teɴ	I want more
ka·'u-tén'	he also slept
kʿ-ṭʿo'xo·ke-tén	he was also a murderer
pʿ-ɴe''ᵉwu-tén	he seized him again
ko-citip-tén'	he did not die again
na'lye-ton' (M)	they await another
ne'u̧-to'ɴ (M)	he also seized it
noi'yo'ton' (M)	he went to gather again

42. *-ts'e, iterative.*

The verbal enclitic *-ts'e* appears to mean also "again," "another," and the difference in meaning from *-tén'* is not apparent.

ra'm'-ecxa·i-ts'e	it dawned again
ra'm-ṭʿ-ia-ts'e	he went again
ra·m-sma'kʿai-ts'e	and it became night again
ra'm-ṭʿı-cko-ts'e	and he was there again

ṭa'm-ṭica·k-ts'e'	and he began again
p·eta''ᵃko-ts'e'	he did (evil) again
ca·ke·ni'-ts'i	they aimed again
k'a·'ltena-lo-ts'	we will fight again
no'ʿ-k'e·-ts'a (M)	l first
p'-maṭ'axo-tsa	I used to tamp them
p-ya·'m-ts'e	I used to look

43. -ṭ'ɪa', *distributive.*

The enclitic *ṭ'ɪa'* means "each," "every" and when suffixed to verbs gives to them a distributive significance.

k-otco·xna-gas-t'ɪa'	he ran dripping
ṭe-to''m-ṭ'ɪa'	wherever it dropped
t'oʟ-ṭ'ɪa	every one

44. -an, (M) -ani, *expletive.*

An enclitic -an or -ani is frequently suffixed to imperative and other forms of verbs, apparently as a mere expletive, though it may be akin to the future particle. It is frequently translated by the Spanish "pues."

ya'x-tek'-an	well, let it come!
ts'ep'-a·n	well, good!
m-i'cxo'-ha''k'-a'ɴ	it is better that thou eat me
ma'we·'xe'-an-k'sa'ʿ	place thyself firmly!
ka'xaw-an	they slept
xai-pa'ko-a'ɴɪ (M)	well, impel thyself!

There remain two quasi-enclitics which appear to refer to tense; at least the examples of them suggest no uniformity except that of past intransitive tense. The main tense signs are independent adverbs and only sporadically enclitic, while these two forms appear never to occur independently or to be related to any independent adverbial form. They partake therefore of the nature of enclitics and are occasionally suffixed to other parts of speech than verbs. No difference between them has been discerned.

45. -tek', (M) -tek, *past intransitive.*

ce'tep-te'k'	he died
ce'tep'-ᴍa'as-te'k'	he died
ke'ra'-te'k'-ksa	he was not seen
ts'a'telo·m-tek'-k'sa'	it became cold
ṭ'o'loinox-tek'	it is finished
ṭa'mi-ya·-tek (M)	he went (to bring)
ṭa'mi-yax-tek (M)	I came
ṭáme-xwe·n-tek	he arrived
ṭame-lam-tek	and he ate

The enclitic *-ṭo'* is found principally in the Migueleño dialect.

46. *-to, (M) -ṭo', past intransitive.*

raм-t'·ia·'·to	soon he went
ṭ'i-k-iya·'·to	who knows where they went
p-ɵcxai'-ṭo'ᵘ (M)	it dawned
mé-p-ecxa·i-ṭo' (M)	in the morning
ṭa'me-lam-tek-ṭ'o° (M)	and I ate
ṭame-nal-k'e'-ṭ'o' (M)	I filled myself
ki-ke·'ṭo' (M)	I went
nɵu-k'e-ṭo' (M)	he went to fetch
toi'x-ṭo' (M)	another

Tense Enclitics

Absolute tense is normally expressed in Salinan by means of independent adverbial particles. These normally follow the verb and frequently are interposed between the preceding verb stem and the following enclitic pronominal subject; in this case the three are frequently combined by elision into a single complex. The same particles are frequently suffixed to other parts of speech and give to them the same qualifications of tense.

Past tense is normally expressed by the particle *lē·ló, le·lu·, lel, lo'*, (м) *le·ló'*. This is generally reduced in the enclitic forms.

47. *-lo, -le', -leu', -l-, past tense.*

ki-lo-he''k	I went
ki-he''k-lo	I went
ki-l-e''k	I went
ra·ko-ṭ'·ia·'-lo	and they did not go
ko'-yema'-lo'	they did not find him
k'·cē·'pa'-lo''	he became afraid
p-yam-hek-lelo	I saw her before
k-amṭ'e-l-ek	now I can hunt
nap'-ʟe'' (M)	he cooked this
kewe·ts'na-le'' (M)	he comes shouting
sekelelep-le'u' (M)	he enveloped it
yent'xo-le'u' (M)	he almost overtook him
ki'yax-leu' (M)	he is coming

Some instances of the same enclitic suffixed to words other than verbs are:

k'ʟu'wa-ló	long ago
ha''k-lo	now from henceforth
ke'ra'-lo	there is no more
k'o'nxa-lo'	it was already late
ma-keu-leʟ	where they were
rump'a-kē·'u-lo-ta'	there where he is
lo·'ra'	already
ctelwa''-l-e'k-ce''	I am an old man already

Present time is normally not expressed in the verbal complex; when required it is denoted by the independent adverb *taha* or *ta·*, (M) *tana'*. The idea expressed seems to be that of proximate time, either just passed or approaching. Very rarely is this element found as a verbal enclitic in the form of -*ta*.

48. -*ta, present tense.*

ki·yɑx-ta	he is coming now
hek-ta-p-iam-o	I am going to see him
kʻ-yam-o-l-ek-ta	I saw him just now

In combination with other parts of speech it occurs also:

me-smɑ'kai-ta	tonight
na·ta·-smɑ'kai	tonight
me-ko'nxa-ta	this afternoon

Future time is expressed by the adverb *no·nó,* or *non,* appearing as enclitic in the verbal complex in the form *no* or *n.*

49. -*no, -n-, future tense.*

kī·'-n-e'kʻ	I am going
ki'-no-hek	I am going
ki-he'k-no	I am going
tc'a·'uye'-no'ʻ	they seek him
te-tʻ-iya-no'ʻ	in order to go
ake-tʻme·'-ke'-no'ʻ	where are you going?
napʻ-no'na (M)	it is cooked
xa·ta-no-kʻe'' (M)	I am going to weep
p-a'mtak-no' (M)	he will seize them
ki'yɑx-no'ʻ (M)	there he comes
pt'eka·-n-ek heyo''	he will kill me
pt'eka-n-he''kïyax	he will kill you
pt'eka-n he''k	I will kill him
me·'to-n-e'kʻ	I will try it
tas-k-co'une·-n-ekʻ	I am going to kindle it
kī·-n-e''kʻ	I go

The same particle is also found suffixed to other parts of speech:

ka's-no	just now
kʻʟu'wa'-no'-pʻ	a little time passed

A more or less dubious particle which apparently denotes future time, possibly more distant than *no* is *mas.*

50. -*mas, future tense.*

hek-mas-p-yam-o	I will see
ke'ra'-mas-ko-licxai''	it will not rain forever
xa'ta-mas-he'k	I will weep

A few uniform examples secured by Henshaw from the Migueleño dialect suggest that position may be of some importance in the determination of tense. Thus in several examples the pronoun is suffixed for the present tense and prefixed for the past. It is a question how much reliance is to be placed on this material.

seku-ke-meka	I am talking	ke-seku-meka	I was talking
hati-ke-meka	I am crying	ke-maka-hata	I was crying
kaka-ke-maka	I am singing	ke-maka-kaka	I was singing

In the material of Sitjar and Henshaw many verb endings are found which are not explicable by any of the above rules and do not appear to be parts of the verb stem. A few such examples are also found in the present textual material. It has been necessary to disregard these sporadic irregularities since not sufficient examples of any instance have been found to warrant formulation and inclusion here would only tend to confuse the work of Salinan comparisons.

Enclitic Pronominal Subject

As has before been remarked, the pronominal subject, in independent position and form, normally follows the verb. But in rapid speech tense adverbs and the pronominal subject tend to become abbreviated and to coalesce with the verb stem, forming a complex. Practically, this phenomenon is limited to the first person singular which is abbreviated to *-ek*. The first personal plural form does not seem to abbreviate to *-ak,* possibly to avoid confusion with the first personal singular objective pronoun *-ak.* The forms of the second person, commencing as they do with a consonant, are not susceptible of abbreviation and the third personal pronominal subjective forms are ordinarily not expressed.

ctelwa''-l-é'k-ce	I am an old man already
tas-k-co'une·-n-ék'	but I will kindle it

ADVERBS

Independent adverbs play an important part in Salinan, owing to the paucity, in the verbal complex, of particles expressing adverbial concepts. Thus most of the locative and temporal relations are expressed by independent adverbs. Lists of these adverbs will be found in the vocabulary. In a few cases adverbs are composed with prefixes; these will be given below.

TEMPORAL ADVERBS

A particle *me-* when prefixed to temporal nouns or adverbs denotes time when. It is undoubtedly the same element as the verbal prefix *me-* ''when,'' (no. 19).

51. (19) *me-, time when.*

me-t'oʟ-ṭo'kena'-tén	another day
me'-t'ol-lice''	the following year
me-ʟpa'ʟ	in the summer
me'-smakai	tonight
me-ko'nxa'	this afternoon
me'-ecxai	in the morning
me-t'oʟ-ten	the next time
me'-t'oʟ-k'we'ʟ	another time
t'a·cne'ʟ-me'	sometimes

Similarly a nominal prefix *no-* appears to denote definite time in the past.

52. *no-, time when (past).*

no-ko'nxa'	yesterday
no-icxai''	this morning
no-wa·na''	yesterday morning
no-tcieyo	yesterday
no-p'a'	day before yesterday

LOCATIVE ADVERBS

Locative constructions are expressed in three ways.

The broader and more general relations expressed by many English prepositions are in Salinan expressed by an independent or proclitic particle *ṭu* (less often *ṭe, ṭi*), evidently related to the prepositional *ṭe*. In such cases it means ''in,'' ''on,'' ''from,'' ''onto,'' ''upon,'' ''to,'' ''by,'' ''up,'' ''into,'' ''over,'' ''within,'' etc. Either rest or motion is implied. In many, possibly most cases, it appears as *ṭum*, rarely as *ṭumá*, the difference in meaning from *ṭu* being not evident.

The second class of locative constructions comprises the more general locative adverbs such as ''here'' and ''there.''

The third class comprises the more definite adverbs, generally expressed by prepositions in English, such as ''down,'' ''beneath,'' ''beside,'' ''within,'' etc. Lists of both of these classes are given in the vocabulary. Many of these are nominal in character and require a locative adverbial or prepositional prefix. These prefixes seem to be varying combinations of four elements: *ṭu (ru or ṭi), ma, um* and *pa*.

53. *ma-, place whither, place where.*

ma-le·mo′	over, above
ma-la·′k′o	at the foot, below
ma-ṭ-ika′ko	up
ma-t-icxe′wu	at the foot
ma-t‘uʟni	on the hill
ma-*swida*	to the city
ma-ke′u	to where they were
ma-ṭe·mo′	on the house
ma-k′e′weʟ	to the north
ma-pxa′nol	at the south
mạ·‘	there

54. *tuma-, place whither.*

tu-ma-kʟī·he′′	down
ṭu-ma-k′e·′nax	whither I had come

55. *um-, place where.*

um-te′ma	in my house
um-titc′o′′ma	on his back
um-le′saᴍ	at Morro
um-la·′mka	at the beach
em-k′we′ʟ	through the world
em-ṭ′ka′teno	on the buttocks

56. *ṭum-, rum-, hom-, place where.*

rum-t‘ca′′	in the water
hom-t‘-a′′ᵃko	on his head
tum-ṭetoke′u	from there
ṭum-tce′ɴ	outside

57. *umpa-, rumpa-, ṭumpa-, place whither, place where.*

umpa-k′e′ᵉ-nax	where I came
umpa-t‘k-o′ma	at, to your houses
umpa·-tc‘a′′	to the water
ump‘a-ka-le·lu·	where you were
ṭumpa, rumpa	there, thither

58. *ṭu-, ru-, place whither.*

ṭu-wī′′	hither
ṭu-wi-tce′n	outside
ṭi-sk′am	close by

OTHER PARTS OF SPEECH

PREPOSITIONS

The connective prepositional relations, as distinguished from the locative prepositional relations are expressed by the omnipresent particle *ṭe*. This is most frequently translated by the English preposition "to," but also by "of," "from," "with," "in," "by," "than," "that," "for," and others. It expresses most of the oblique case relations of the Latin genitive, dative and ablative, the infinitive and participial relations, besides following most verbs of thinking, desiring, trying, beginning, ceasing, ability, knowing, purpose, etc. Its normal form seems to be *ṭe* or *ṭi,* but the vowel is very often assimilated to the vowel of the following stem as *ṭa, ṭo* or *ṭu.* It similarly often combines with the particle *pe* to *ṭup* and with the pronoun *mo* to *ṭum.* Examples of its use are innumerable in the texts. They include such constructions as:

He finished *from* work

We began *to* shoot

I wish *to* eat

I told him *to* do it

I shot *with* an arrow

I think *that* he will come

You know it *to be* bad

Better man *than* you

In order to sleep

It was given *for* her

Why *did* he go?

He came *to* us

Some *of* my arrows

Go *with* him

Was killed *by* them

I am able *to* shoot

He tried *to* run

Makes no difference *to* me

It is full *of* atole

ADJECTIVES

As in the case of many or most American languages, the adjective partakes very largely of the character of the verb and might possibly be considered as a verb, though lacking many typically verbal functions. Thus "blue flower," "strong man," "warm day" are syntactically rather "the flower is blue," "the man is strong," "the day is warm." Adjectival roots thus normally bear the intransitive verbal prefix *k* and are susceptible of change to denote the singular or plural number to agree with their qualified noun. They lack the tense-mode affixes peculiar to verbs.

Several good examples of the inter-relation between adjectival and other stems are:

k-ī·′sil-e'	all
p-i·se·′l-xo	(carried) all
m-isil-i	(tell) all!
k-ecxo′n-e	poor
p-ecxo′n-ect	it pains you
ṭeṭ-ecxo·n-i'	the poor one

In two of these cases an adjectival suffix -*e* appears to be present; this is not found in a sufficient number of examples to warrant its formulation as a rule. A large number of apparently adjectival stems are given in the appended vocabulary.

DEMONSTRATIVES

The principal demonstratives ''this,'' ''that,'' ''these,'' ''those,'' are employed very frequently, *pe,* ''that,'' ''those'' generally serving as equivalent to the English definite or indefinite article. They are invariable in form as regards number. Full lists will be given in the vocabulary.

CONJUNCTIONS

Conjunctions or connectives are of considerable importance in Salinan and frequently used. They are generally prefixed as proclitics. A list of them will be found in the vocabulary.

PART III. TEXTS

The texts following are appended as material illustrative of connected Salinan speech. Interlinear translations are given following as closely as possible the sense and order of the Salinan original, and free translations are appended for a fuller understanding of the context, and because of the interest they bear to mythological and folklore studies. Both the dialects of San Antonio and of San Miguel are represented, the former composing the first part and the majority of the material.

The Migueleño texts were all taken in 1916 from Maria Ocarpia, an elderly woman living at the "reservation" at the foot of Santa Lucia Peak, a little north of San Antonio Mission. All of the texts secured from her are original and the great majority are of mythological importance. It is doubtful if the dialect is represented in its aboriginal purity, but undoubtedly no better material is securable at present.

The Antoniaño texts are a more heterogeneous body. First in order in the following material are the texts of David Mora, a pure Antoniaño Indian. These also probably represent as pure a dialect as is procurable at present. These texts supply the bulk of the material and are for the most part original, and of considerable mythological interest. Two texts at the end of this group were translated into Salinan by the informant from the Spanish originals taken from Juan Quintana, an aged Indian unavailable for linguistic purposes. They are of mythological value but the native form and syntax can not be above suspicion of Spanish influence.

The balance of the material was given by Pedro and Maria Encinales, members of the best known surviving Salinan family. The father, Eusabio Encinales, was of the San Antonio group but the mother, Perfecta, belonged to the other division and spoke Migueleño. It is generally admitted that the language spoken by the children is rather hybrid and must therefore not be taken as a standard. Moreover they are quite ignorant of stories of mythological value. First in this group are a series of texts, mostly short, given by Maria Encinales. They were translated into Salinan from the Spanish of Juan Quintana and are included because of their mythological value and because voluntary

text material was rather scanty. But they should not be regarded
as standard. Last are a series of texts secured from Pedro Encinales,
the first informant used. All but one of these were secured in the
fall of 1910 in San Francisco, the one exception being secured in 1916.
Most of them were voluntary but only a few of any mythological inter-
est. Three were translated from mythological texts secured from other
linguistic groups and already used several times in similar circum-
stances with other Californian languages.

The reader is referred to page 186 of the author's ethnological
paper for a discussion of Salinan mythology. In the appended mytho-
logical material the importance of cosmogonical legends is again
demonstrated, an interesting point being the widely variant forms
which a myth may assume even among closely related and contiguous
groups, as witness the variant forms for the "Beginning of the
World," "The Theft of Fire" and other myths of this type. These
kinds of myths are of widespread occurrence on the Pacific Coast.
Apparently of more local interest are the incidents, evidently parts
of an important culture epic, relating the adventures of the culture
heroes, Prairie-Falcon and Raven, in ridding the country of maleficent
characters. The explanatory element, already referred to in the
former paper, is again well exemplified in the accompanying material.

DIALECT OF SAN ANTONIO

PRAIRIE-FALCON, RAVEN AND COYOTE [13]

kʟa′p·ai	βehiyo·′t̯	ra‵mt̯‵ia·′teʟ	xo′t̯‵ʟop‵	ro‵pt̯‵e·mo′
Are three	the they.	Then went they,	passed	by his house.

ra·′mt̯‵e′ɪ	belk′a′	k‵ts′e′ik‵	nacte·lwa′′	k‵cau‵wena·′ni
Then said	the coyote,	"Go see	this old man,	is dancer!

polo′x	t̯at̯o·′ki	po′lox	ra′mt̯et̯a′k‵	ka′c·el	o‵smahate′ʟ
Enter	within!	Enter!"	Then said,	"Sit down,	beauties!"

ra′mt̯′e	pa·ta′′	‵ents′e̯′′en	roβata·′má′	smɑhate′ʟ
Then said,	"Dance	in order to see	by the men	beautiful."

ra′mt̯‵e′e	ai‵	ctelwa′′lé′k	ce‵me·′tone′k‵	a′′a·mko
Then said,	"All right,	old man already I.	Try will I	if can

t̯i′ca·′wena·ni	ka·′wiyak‵ce′	na′taá‵	taskco′une·nék‵
to dance.	Hot is	now,	but kindle will I.

ra′′me·t	ripa·′ta	ra′mpet′e·ko	t̯ets‵e′′wu	ra′mt̯ica·k‵
Then try	to dance."	Then straightened	his tail,	then lifted

---

[13] Told by David Mora, 1916. Cf. Ethnology, p. 193.

ṭipa·'ta   pike'le·ntxo   me'ca·k'   ṭupke·'wu   ita·má   sk'amksɑ'ʿ
to dance.   Whirled around   continually   to where   men,   close more

me'ca·k'   ṭupṭuhe'nu   peta·ma''   ṭ'kɑ'teno   becuwa'
continually   to their faces   the men   his anus   the skunk.

ra'mṭeta'k   yax   rask'a'm   ksa   yaxtén   k'sa
Then said,   "Come   to close   more!   Come again   more

rask'a·'mk'sá'   we'tenk'sa'ʿ   pa·'lxo   ṭep'a'lo   ramha'la'
to close more!"   ?   Wished   to fire.   Then threw

ṭuβeka·'wi   tc'xa''   ke'na·yok'   k'sa'   emk'cu·'lukne
with the hot   stone.   Hit him   more   so that entered hole.

ra·me'heṭ'ę·nxá'   ra'mṭ'e'ᵉ   ąhą'   peʟk'a'ʿ   xomo'ʿ   lwa''
Then ran around.   Then said,   "Yes!   The coyote   bad   man!

xai'ya'   ṭema·'ṭ'u   ra'mṭ'xwene·lax   pese·mta'N   'amṭeβeck'an
Many   to kill!"   Then arrived they   the children.   Then said the hawk,

semtɑ'N   ṭeskī·'ntui'   me'na'ko   ṭuksu'nun   kara'*mas*
"Children,   to be thin   why   your legs?   Not more,

ko'ṭap'e·ʟ   name·'n   ra'me·ti'   ṭeṭa·'poi'yax   peṭicxe·ple'to
not fill   this hand!"   Then tested   to feel   their feet.

amko'ṭapeʟ   ra'mṭetauⁿlaik'   rake'ra'tén'lo'   kera·lo'ʿ
And not filled.   Then said   to not again already,   not already.

ra'mMoṭ'oxo   ra'mpleᵢ·t'xo   rumṭoki   kwa·'p'   mɑ'lo·ʟ
Then squeezed them,   then threw them   to within   sweathouse.   Flew

taa'so   rumṭo·'ki   ṭaa'u'   ra'mṭetak'   peʟk'a'   ma''ntén'ri'
helplessly   to within   fire.   Then told   the coyote,   "Come also here!''

ra'mṭi   ṭame'na'ko   ṭi'ya'tén'   te·'le'   po'xra'   ramko'neka'ce'
Then said,   "Then why   to go also?"   "Hurry!   Enter!"   Then not obeyed.

ra'mṭispa'lax   kli''yai'yax   rumṭo·'ke   ṭaa'u'   amkʟo·'ʟ
Then seized,   threw   to within   fire.   Then burnt

roβé   belk'a   xomo·'lwá'   pa·'lxo   ra'a'mela'i   tercṭé'
by the   the coyote.   Bad man!   Desired   to be killed.   Therefore said,

polo'x   ko'ṭe'ik'sá'   xomo'ʿ   lwa''   pa·'lxo   ṭaa'mela·'ice'
"Enter!''   Not said more.   Bad   man!   Desired   that be killed

yo'ʾu   ra'Mṭ'ia·teʟ   ramko'lo·li'   ṭ'iaʿ   bela''   pe'snai'yax
he.   Then went they,   then played flute.   Went   the raven.   Heard

a'ha·tí'   ṭuɸṭulola'iyo   bela''   ra'mṭe'ta'k   taa'steN
music   of his flute   the raven.   Then said,   "What again

no'vi'   k'ɑ'mes   ṭa·koi'yu'   nuk'a'xa·t'i   lwa''   raŋke'rum'
this which   cried?   Not it   is music   man!   Then wherefrom

ke·no'xo   pek'a'xa·te   ṭeti'cupax   k'sa   peaha·ti''
comes   the music?"   To hear   more   the music.

ramko'tictok'sa'   ra'ke   rakoṭ'ia·lo   ra'ké   se'Nɪ'   kas
Then not seen more   anywhere;   to not go already   anywhere;   walked   only

ṭepa′sia·lten′   yo′   k‘a′le′p   bela′′   ramku′yema′   akaa·′su
to stroll again. He lost himself the raven. Then not was seen. ''What think

me′na′ku   ṭika′lep   ramktc′a·′uye′   ramko′yema′ᴍ   keṭe·ke′′wu
why   to lose?''   Then sought,   then not found   went where.

tc′a·′uye′   me′ca·k   yo′   ram·ale·′nta′iyαx   ṭeno·′nanax
Sought   continually he.   Then remembered   to collect

peṭ‘ᵃxa·′yuxten   tc′a·′uye′   no‘   ṭ‘a·penyα′   yora′ᴍ
the bears.   Sought   ?   gathering.   He then

ṭa′na·ta′iyαx   teho′ṭ′ap‘   ca·xα′ta   ca·ke′′nu   ṭ‘iα′‘
allowed them   to pass.   ''Open mouth!''   Pointed,   went.

ra·′mp‘iαxteko   ṭ′oʟtén′   ca·xα′ta′   p‘ca·′ke′nu   ṭ‘iα′‘   pexwe′n
Then brought   another.·   ''Open mouth!''   Pointed,   went   the arrive.

xoṭ′o′p   yαxte′k‘ten   ṭ′oʟ   ra′mṭ‘e′   peselo·′i‘   k′α′mes
Passed.   ''Bring another   one!''   Then told   the mouse,   shouted

ṭ‘iyα′x   ra′mṭ‘e′   ka′xai   telwane′   ra′ts′am·is   co·′ᵘʟ
to come.   Then said,   ''Afraid!   Strong!''   Then shouted,   climbed up,

ṭ‘iα′x   telwane′   ka·mxwe′n   peṭaxai′′   ra′mṭ‘i′   peselo·′i‘
came   strong.   Arrived   the bear.   Then said   the mouse,

ka′xk‘o′   na‘   setelwane′   a′mca·kē·ni   a′mṭ‘e′ta′k   ca·xα′ta′
''Careful!   This   is strong!''   Then pointed,   then said,   ''Open mouth!''

ra′mṭ‘i′   te′peɴ   ṭu′le·ṭ   ka′′a·mko   ṭe‘ca·′xatα′
Then said,   ''Hurts   tooth!   Not able   to open mouth.''

ra′mca·ke·ni′ts′i‘   ca·xα′ta′   skomo′‘   gas   amk‘ne′ka′
Then pointed again.   ''Open mouth   little   only!''   Then obeyed;

peṭa′′ko   k‘su·′lukni   ka′skumú   peṭee′lko   a′mṭeta′k
made   opening   only small   the his mouth.   Then said,

a′‘imya′‘   ra′mhala′   umck′aᵘ′yu   ʟk′e′lṭ‘epak‘saṭ‘yα′
''Go ahead!''   Then used   his talons;   went rolling down.

‘amṭeta′k   beselo·′i   ma′a′‘   cko′′ra′   mo′piem′ó‘   ṭumti·′′u
Then told   the mouse,   ''Carry him!   Is here! ʼThou knowest   thy ability.''

ki′ca·k   ma′a·′wu   pi·se·′lxo   k′sa′ce′   ramko′pa·mko
Went   carried   all   more.   Then not could;

keɸtc‘o·′plo‘   ra·′mp‘ts′e·′nṭko   emk′we′ʟ   akaa·′so   o′yema′
tired already.   Then watches   in world   who   sees.

ra′mp‘ia·′mo   betoo′wu   k‘so·′menxa′   ko′la′le   ṭopṭoo′wu
Then sees   the his face   stretched.   Ashamed   of his face.

rume‘pia·′mo   ramko′niyi′   ṭeṭia′‘   make′ᵉwu   bexai′yα′
Then sees it;   then afraid   to go   where they   the many.

ra·′mpox   ruɸṭo′ke   k′aṭ‘   ko′ho·ma′   ṭoɸṭolola′iyu
Then enters   to within   grass,   hides   of his shame.

ko′iyema′lo‘   gas   yo′lopṭiat′a′iyo
Not is seen already   only.   He went away.

The three friends Prairie-Falcon, Raven and Coyote passed by the house of Skunk. Then Coyote said, ''Let's go in and see this old man, the dancer. Come on in!'' He wanted Skunk to kill them. They went inside and Skunk said, ''Sit down, my good fellows!'' Then said Coyote, ''Please dance, so that these gentlemen may see it.'' Skunk said, ''All right; I am getting pretty old, but I'll try to dance. But it's very hot; I'll light the fire and then try to dance!'' Then he straightened his tail out, lifted it and began to dance. He whirled around, continually bringing his anus closer to the faces of the friends. ''Come closer!'' he cried. ''Come closer!'' For he wished to shoot his poison at them. Then Raven threw a hot stone at him so that it entered his anus. He ran around in pain. Then he cried out, ''Yes, this Coyote is a bad man; many has he killed.'' Then he died.

Then came the children of Skunk who were little birds. Prairie-Falcon said, ''Children, why are your legs so thin? They wouldn't fill my hand!'' He seized their legs to feel them and they did not fill his hand. ''No,'' he said, ''there is no more.'' He seized them tight and threw them into the sweathouse. Blindly they flew around into the fire.

Then said Prairie-Falcon to Coyote, ''Come here also!'' ''Why should I come?'' asked Coyote, frightened. ''Come on! Hurry up!'' But Coyote did not obey. And Prairie-Falcon seized him and threw him into the fire when he was burnt. A bad man was Coyote; he wished the others to be killed and so said ''Enter!'' at the house of Skunk. But he said no more; he was a bad man for wanting the others to be killed.

Away they went, Raven playing his magic flute. All the people heard the music of Raven's flute and said, ''What is that noise? Surely it is not human music! From where comes this music?'' More clearly sounded the music but suddenly it ceased and was not heard anywhere. The people wandered about but could not find him; Raven had been lost. ''Why do you think he has lost himself?'' they asked. They hunted for him but could not find him; they hunted him everywhere. Then Prairie-Falcon bethought himself of the bears and decided to collect them; he sought them out and gathered them together, for he suspected that one of them had eaten Raven. He made them pass by him one by one. ''Open your mouth!'' he ordered and pointed his arrow at them. Then he inspected their mouths. One by one they went and another came. ''Open your mouth!'' and he pointed again. ''Bring another one!'' Finally there remained only

one; Prairie-Falcon told Mouse to call to him to come. But Mouse said, "I am afraid! He is too strong!" At last Bear came, climbing up and shouting loudly. Then said Mouse, "Be careful! This one is very strong!" Prairie-Falcon ordered him "Open your mouth!" and pointed his arrow. "My tooth hurts," said Bear. "I can't open my mouth!" Then he pointed his arrow again. "Open it just a little ways!" Bear obeyed and opened his mouth a very little bit. "Go ahead!" he said. Then Prairie-Falcon stuck in his talons and Bear went rolling down, dead. Then said Prairie-Falcon to Mouse, "Carry him away! There he is; you know your strength!" Mouse endeavored to carry Bear away whole, but he could not; he became tired. Therefore his nose is stretched out and he goes through the world watching who notices it. He is ashamed of his face. When he sees it he is afraid to go where there are many people. Therefore he keeps in the grass and hides for shame. And he is never seen; he went away.

Analysis

To give a clearer idea of the nature of the language an analysis of the foregoing text is presented below. Many of the constructions are doubtful; in such cases the most doubtful have been assigned a question mark, the others given the explanation which seems most probable.

The following symbols are employed in the analysis:

S	denotes the stem, verbal or nominal
adj	denotes an adjective
adv	denotes an adverb
art	denotes the article (demonstrative)
con	denotes a conjunction or connective
dem	denotes a demonstrative
int	denotes an interjection
loc	denotes a locative adverb
neg	denotes the negative
num	denotes a numeral adverb
pre	denotes a preposition
pro	denotes a proclitic
plu	denotes the plural, when this is irregular
tem	denotes a temporal adverb

The various numbers from 1 to 58 refer to the numbers given the morphological elements in the preceding grammar.

The pronouns are denoted by a combination of three elements; the numbers *1, 2* and *3* for the persons, *s* and *p* for the singular and

plural numbers, and *i* for the independent, *s* for the subjective, *p* for the possessive, *l* for the locative, *o* for the objective and *pas* for the passive, as:

1ss   first person singular subject
2po   second person plural object
3ppas   third person plural passive

PRAIRIE-FALCON AND WHITE OWL [14]

teci'k'   ka'meṭʻi   ruβasna·'k'   paxo·'to   me'ca·k   ramka·'ᵃk'a
White Owl   hunted   for the kangaroo rat.   Smoked it   constantly.   Then sang:

ts'o'xwa·nle'to   ti'cxeple'to   ticxeple'to   ts'o'xwa·nle'to
"Shrunk   his foot!   His foot   shrunk!"

ra'mpesnai'ya   ṭuφsk'a'n'   ra'mṭi'ⁱ   yo'   p'ia·'mo   ce'loʻ
Then was heard   by the hawk.   Then told,   "He   knows   already

keᵉwuʻ   ṭice'tep   ra'ᴍṭiʻts'omyac   peṭʻika·kelu   ra`mwa·ti''
where   to die."   Then liked   the his song.   Then told

ṭikʻa·'k'a   ramkai''yax   ṭo·loli''   rumṭi·lekʻ   peṭo·loli''
to sing.   Then put   flute   in hole   the flute.

ra'mṭa·mumpai'ɪ   ṭa'au'ᴜ   ṭiṭʻo''n   ṭa'mwa·ti'   rik·akʻa
Then drew out   fire   to burn.   Then ordered   to sing.

---

14 Told by David Mora, 1916; cf. p. 110.

ramkópa·lxo   ṭipaʼlo   peṭʻɪkaʼkeʟ   bekʻɛpeʼsnaiʼya   ṭupɛskʼɑʼn
Then not wished   to use   the song,   that heard   by the hawk.

piʻem.óʻ   ṭisaʼl·iʼ   peṭikakeʼl·o   koʻpa·ʼlxo   ṭepʻa·lo
Knew   that disliked   the his song;   not desired   to use

peṭʻka·keʼlo   heyoʼʼ   paloʼwu   ka·ʼkʼanoʼʻ   tsʼututuyaʼ
the his song   he   used.   Sang,   ʻʻTsututuya!

skʼa·ʼmanleto   raʻmṭeta·koʼiyoʼ   betʼoʟtén   tʻɪka·ʼkeʟ
Skamanleto!ʼʼ   Then said, ʻʻNot that!   The other   song

stiyoʼʼwɑnʼ   ra·ʼmṭiʼ   kestiyoʼʼwɑnʼ   ṭamkaʼsno   ṭumxaʼlanón
beautiful!ʼʼ   Then said,   ʻʻIs beautiful   then only   thy use just now!ʼʼ

ake·ʼmxaʼlanón   ankaʼsnostiyoʼʼwin   oᵘnaʼʻ   kapᵊṭika·ʼkelo
ʻʻWhat to use just now?ʼʼ ʻʻOnly just now beautiful!ʼʼ ʻʻThis is the his song?ʼʼ

ąaʼ   yoʼᵘváʼ   ṭʼaʼu·yeʼ   ṭe·leʼkʻ   ṭaʼmṭa·lelaik   oʼyoʼ
ʻʻYes,   that one.ʼʼ   Seek   hole.   Then asked   ʻʻIs that?ʼʼ

ʻamṭiʼ   kaʼraʼ   akeʼrum   saʻxwelyoʼx   ke·ʼwu   namaʼṭʻ
Then said, ʻʻNo!ʼʼ ʻʻWhere?ʼʼ ʻʻSmooth-edged,   where   these animals.ʼʼ

raʼmteʼauyeʼ   kʻieʼmaʼ   peṭe·lekʻ   ramṭicpaʼnʼ   bekʼaṭʻ
Then hunted,   was seen   the hole.   Then removed   the grass

rupṭoʼme·lo   peṭe·leʼkʻ   raʼmṭetak   wikē·ʼu   ramṭʻuxwen
from the its edge   the hole.   Then told,   ʻʻHere!ʼʼ   Then came

pehiyoʼʼ   raʼmṭʻeyoʼʼ   naʻ   aʻmṭetak·a·ká   raʼmkʻa·kʼa
the he.   Then told him   this   then to sing.   Then sang.

raʼmṭetak   koʼiyoʼ   ṛamṭi   ake·ʼrumten   taŋkaʼsnoṭumhaʼlanón
Then said, ʻʻNot that!ʼʼ Then said, ʻʻWhich again?ʼʼ ʻʻThat only thy use
                                                              just now!ʼʼ

akeʻemhaʼla   taŋgaʼsnostiyoʼʼwen   ramka·ʼkʼa   ramṭetak
ʻʻWhat to use?ʼʼ   ʻʻThat only just now beautiful!ʼʼ   Then sang.   Then said,

koiʼyoʼ   akeʼrum.tenʼ   tanga·ʼsno   noṭumhaʼlano·ʼnóʻ   o·naʼʻ
ʻʻNot that!ʼʼ ʻʻWhich then?ʼʼ ʻʻThat only just now. Thy use just now!ʼʼ ʻʻIs this?ʼʼ

yoʼoviʼ   kʻa·kʼa   paxo·ʼto   ckoʼʼ   aʻmṭetak   mena·níʼ
ʻʻThat is.ʼʼ   Sang.   Smoking it   was.   Then said,   ʻʻCome close

ksaʼ   ṭiskʼam   pa·ʼŋko   ṭiṭa·ʼmptaʼ   kaʼxa·nloʼksa·loʼʼ   tsʼeʼik
more   near!   Can   to emerge now!ʼʼ   Shouted loud already,   ʻʻLook

kʻsaʻ   ṭiskʼaʼm   ya·ʼko   ṭumaʼpa·uʼ   yoʼʼ   raʼmxotʼ   peṭʼaʼaʼu
very   close!   Watch   to catch   he!ʼʼ   Then blew   the fire.

anpena·ne·ʼuʼksa   ckoʼ   raʼmxoṭ   rumeʼ   ramkʟo·ʼoʟ   pecukeʼnto
Then approached very   was.   Then blew   then.   Then burnt   the his eye.

kaʼxa·telaʼ   kʻsaʻ   ṭʼoʼɴe·wu   kʻsaʼ   euke·ntu   kaʼxa·telaʼ
Wept   very.   Scratched   thus   his eye.   Wept,

tʻyaʼ   rumlé·m   ramṭetakʻ   meʼʼna·ko   ṭeṭecxo·niʼ   nakaʼmeṭʻi
went   upwards.   Then said,   ʻʻBecause   poor   this hunter;

keʼexo·nelwaʼʼ
poor man!ʼʼ

White Owl was hunting for kangaroo-rats; he constantly smoked their holes to drive them out. He was feeling happy for he had found the body of Little Hawk and he sang "His foot is shrunk! His foot is shrunk!" Prairie-Falcon was looking for his younger brother and overheard White Owl's song. "He knows where he died" said Prairie-Falcon to himself; he wanted to hear the song again and told him to sing again. He went to the other end of the hole and inserted his magic flute and sucked out the smoke.

White Owl did not want to sing the song over because he knew it would anger Prairie-Falcon. So he sang instead "Tsututuya! Skamanleto!" Then said Prairie-Falcon, "No! Not that one! The other beautiful song! It is beautiful, the song you sang a moment ago." "Which one?" "The beautiful one you sang just now!" "This song?" "Yes, that one!"

Prairie-Falcon looked for the kangaroo-rat's hole. "Is it this one?" he asked. "No!" "Where then?" "The one with the smooth edge, where the animals are." Prairie-Falcon hunted and found the hole; he removed the grass from the edge of the hole. "Here it is!" he said. Then came White Owl. Again Prairie-Falcon asked him to sing and he sang the meaningless song again. "Not that one!" "Which one?" "The one you sang just now." "Which one?" "The beautiful one." Then White Owl sang again. "Not that one!" "Which, then?" "The one you sang just now." "This one?" "Yes, that one." Then White Owl sang it.

The hole was smoking. Then Prairie-Falcon said, "Come closer! He may come out now!" Then he shouted loudly, "Look very close! Watch and catch him!" White Owl put his head very close. Then Prairie-Falcon blew with his magic flute from the other end of the hole. The smoke and fire came out and covered White Owl's head. His eyes were badly burnt and he wept and rubbed his eyes. He wept and flew upwards. Then said Prairie-Falcon, "Because of this you will be a poor inoffensive hunter, a sorry man!" And White Owl's eyes are still black.

CRICKET AND MOUNTAIN LION [15]

xo'ṭ'up̓	beṭa''muʟ	ru¢ṭc·mo'̓	beṭa''muʟ	ramko'p̓iem.o̓
Passed	the puma	by the his house.	The puma	then not knew

tiṭá·m	ṭip̓ha'topa·'ka	p¢cuk'a'iko	beṭip̓hatopa·'ka	ra·'mtekatop̓
that house	of her dung cow.	Trod it	the of her dung cow.	Then came

rumtcén	ra·'mṭe'	me'na'k̓	rumco'k'a'iyik	maṭe·mo'	nata·má'
to outside.	Then said,	"Why	to tread	on their house	these men?"

---

[15] Told by David Mora, 1916.

ra′mṭi’   beṭa′′muʟ   uwi′ᶜ   k‘arme′   a‘a′ᶜ   tacṭ‘ma·′lox
Then said   the puma,   ‘‘Here   we walk.’’   ‘‘Yes,   what thy desire

rumco′ka’yi’k   naṭē·′ma   ruma·′lox   ruma·′x   k’a‘ʟī′′
to tread   this house?   To desire   to start   fight?

yaxtele′k‘   t‘me′*so·lta·to*   ri¹cxa′i   yo’ra′k’a·ʟtena’   ‘enṭico·′p
Come   thy soldiers   tomorrow!   Go to fight   to see

ta·lwa′′   ma′a′wuhék   beṭi′*solta·to’*   yo′kē′ʷrá’yema·lt’e’
who man.   Bring I   the soldiers   where to see,

yo’ra′ma’me·′t‘   ra′mṭ‘xwene·′lax   ra′mtēta’k   ruφʟk’a   emyɑ′ᶜ
to test.’’   Then they came,   then said   to the coyote   to go

ts’e′ntek‘   oyo′′ló   ra′mpa·leʟko   petc‘e·′l’   haa′   maʟtak
see   if there already.   Then asked him   the cricket.   ‘‘Yes,   tell him

rume′   entiyɑxte·′ʟ   rume′   ramkī′   ra′mṭi’   betce·′l’
then   to come   then!’’   Then went,   then said   the cricket

ruφti*solta·to’*   k‘miṭ’ka·′tek‘   palwa′′   ampia·′tko   ka′k‘cu
to his soldiers,   ‘‘Chase him off   that man!’’   Then sent   two

leme′m’   amkepts’enla··’ik   emṭ’ka′teno   amk‘na·′yi’   me′ṭepts’e’n
bees.   Then stung him   on his rump.   Then fled   when stung.

amk‘ᴍe′ṭ’ik‘sá   ṭipa·′lxo   tiṭo′k‘onox   t‘xwento   rumtc‘a′′
Then ran much   to desire   to reach   soon   to water,

ṭipa·′lxo   rimo′kʟop   belime′′m   tercṭo′p‘o’inox   rumtc‘a′′
to desire   to drown   the bees.   Therefore dove   in water.

pa′lxoṭela·ᵘwa   betep‘ɴi·′′   klu′wa’   ṭeti′ca·k   rumtc‘a′′
Wished to stop   the pain.   Long   to be   in water.

yo’ra′mla·wá’   betep‘ɴī’   k‘luwa’   ṭeticko′′   rumtca′′
Then stopped   the pain.   Long   to be   in water.

koṭ‘ia·′t‘ia’   lo·′ce’   k‘cē·′pa’   lo′ᶜ   k‘ʟu’wa’gá·s   ra′mṭa·mp
Not wished to go   already;   afraid   already.   Long only   then left

ṭet‘iyano′ᶜ   ṭemа·′lta·ko   ṭetickol’lo   ra′mṭ‘konox   ra′mtatc’a·ᵘwi’
to go   to tell him   that there was.   Then came,   then met

t‘uxwe′nto   ruφṭa’muʟ   a′mṭa·lela’ik‘   oyo′′ló‘   ‘aa′te‘
at last   with the puma.   Then was asked   if there already.   ‘‘Yes,

cko′l’ló‘   roβa′′   ra′mka’ase·′lo   raŋkaa·′sna   k‘wo′slop‘   k‘sa′ᶜ
is already there!’’   Then added already,   ‘‘Then but this   powerful very!

ta·‘p‘iem’o′ᶜ   ṭati′ca·kai’   kwu′slop   k’olop   ra·′mṭi’
Who knows   to go?   Strong   very!’’   Then said

beṭa′′muʟ   ka′me·′t‘   rome′ᶜ   ra′mī·′tel·ak   ra′mṭi’   peṭaxai′′
the puma,   ‘‘Try   then   to beat them!’’   Then said   the bear,

kera’   ko′ṭeni·lak   ṭehe·′′k‘   ṭ’o′′ɴe’wu   he·′k‘   yo’   ra′mṭ‘ia·teʟ
‘‘No!   No difference   to me!   Rub I.’’   He   then went,

ka′tc’a·uli’   yo’ra′mṭi’   beṭa′′muʟ   he′l·a‘   kutc’e′lnocri
encountered.   Then said   the puma,   ‘‘Wait!   Stop here!

ki·he′k‘   īN   ṭi′ts’e·k‘   ko′nox   ṭuɸke′u   ruβrē′   tc‘el’
Go I   to   see.''   Arrived   at place   of king   cricket.

ra′mṭe’   peṭa′′muʟ   oyo′lo′‘   ai‘   ramo·′mce’   raŋkaa′snayo’lo′‘
Then said   the puma   if he already.   ''All right   then you!   Then but there already!

kaa′st‘ka·′me·ṭ‘rum’   ‘amp‘ia·′tleko   rume’   ṭisolta·téno
But we will try it.''   Then sent   then   soldiers.

mi·telau’k‘   k‘sa′   beṭaxai’’   ṭ’o’Ne’wu   k‘sace’   kaske′ra’
Stung him   much   the bear.   Rubbed   much   but not

ti·′ṭ‘u   xwe′nksa′‘   gacko’’   a·′mṭi’   beʟk’a′   xala′‘   mpa·tc‘a’’
did.   Came more   only were.   Then said   the coyote,   ''Jump   in water!''

a′mt‘iya   kme·′ṭ’ik   k‘sɑ′   t‘iɑ‘   ramko′ṭimxoya·k   roptep‘Ni’’
Then went   running,   but   went.   Then not endured   the pain.

xwe·n   ga·′cko   beleme′m’   kī′sile’   lo‘   gas   umṭika’’wu
Arriving   only were   the bees   all   already   only   on his hide.

ra‘mkick’e·le’   loga′s   me′ca·k   ra·′mṭe’   peʟk’a‘   kop‘oiteno′x
Then rolled   already only   continually.   Then said   the coyote,   ''Jump

rumtc‘a’’   yo’ra′ka·mk‘Ne·′lik   kick’e·′’le’   ga·s   me′ca·k
in water!   Or to be killed!''   Rolled   only   constantly

beṭaxai’’   becuwa′‘   ce′tep‘ya   me′ca·k   ta·′i   lo‘ga·s
the bear.   The skunk   dying   constantly,   pest   already only.

amk‘Na·′iyi’   beʟk’a   ṭ’o′ʟga·‘s   ke·′u   ṭiha′la’   ra′mṭ‘iɑ‘
Then fled   the coyote,   one only   place   to sting.   Then went,

ku′yema’   lo‘   ṭi·ke′’wu   ṭa′mye·ma’   besto’’   ra’mhala·t’i’
not seen   already   to place.   Then seen   the fox.   Then stung,

tet‘ia·′yu   yo’   βeʟk’a′‘   amk‘Na·′yi’   k‘sa′‘   a′mṭeta’k
thought   him   the coyote.   Then fled   swift.   Then said,

ko′mna·yi’   mitela·′tak‘   ramke′ra’   ko′pṭ‘a·co   ko′ṭelkele·ŋxa’
''Don’t run!''   Attacked.   Then no   not noticed.   Not returned

k‘sa′‘   mē·iyo’’   gas   beṭ‘ala’’iyu   ko′ṭapa·uye?   ki·   ra’ke’
more.   Same only   the his appearance.   Not overtook.   Went   there.

ramk‘o′ne·t’ak   betc‘e·l’   pece·′’wu   beṭa’’muʟ   ra′mṭeta’k
Then won   the cricket;   beat him   the puma.   Then told

peṭa’′muʟ   ta·lwa’’   homo’’   uska’he′’k‘   ragga·′smo’   i·n
the puma,   ''Who man?   Thou   or I?''   ''Surely thou   more

luwa’’   ṭihe·′’k‘   ts’ep’ɑ·′n   ṭuhe’k‘   luwa’’   rumo’’
man   than I!''   ''Good!   That I   man   than thou!

ta·sko′mcuka·’yi’ktén   ṭeᶦmha·′lo   na‘   ta·má’   numye′m’
But don’t tread again   their houses   these   men.   In order to know

ṭ‘ᵘxo′mo   rumco′ka’yik   ṭemha·lo   nata·má’   meca·′k‘   ga·s
how bad   to trample   their houses   these men.   Always   only

eⁿts’ep‘   t’mi′ca·kai’   iⁿkera’’   k’a‘ʟi’’   kots’ep‘   ṭiki′cβi’
to be good   thy going   to not   fight.   Not good   to be thus.

gasme'ca·k   ke'ra'   ké'tc'a·uwé'   na'xumo·ⁱni'   ke'ra'   ke·'u
Only always   no   not I seek   the evil.   No   where

When I am sleepy   enter   I   to within,   sleep I.   No   more.

ka''a·ke'N   k'sá'   teṭ'ıya'x   ta·'rake''   t'e'ⁱyo·'   he'k'   ṭuwī'
Not think   more   to come   anyone.   Alone   I   here

k'ē   ts'ep'   sma'kai
me.   Good   night!''

Mountain Lion was passing by the house of Cricket; he did not know that the cow dung was a house and trampled upon it. Then Cricket came out and said, "Why do you trample upon men's houses?" "I walk where I please," returned Mountain Lion. "Yes, but why do you want to trample on my house? Do you want to start a fight? All right! Let your soldiers come tomorrow and we'll have a fight to see who is the better man! I'll bring my soldiers anywhere to make the test."

Mountain Lion went home and gathered his soldiers, who were all the animals. They all came. Then he told Coyote to go and see if Cricket was ready. The latter went and asked Cricket if he was ready. "Yes," said Cricket. "Tell him to come!" Coyote left and Cricket said to his soldiers, who were the bees, "Chase this fellow away!" And he sent two bees after him; they stung him on his rump. When they stung him Coyote fled; he ran headlong in his desire to reach water and drown the bees. Then he dove into the water to lessen his pain and stayed a long time swimming in the water. At last the pain stopped but he did not wish to go; he was afraid. He was in the water a long time. At last he came out and went to inform Mountain Lion that Cricket was ready for him.

Coyote arrived and at last met Mountain Lion who asked him if Cricket was ready. "Yes," said he. "They are already there!"

Then he added, "But they are very powerful. Who knows what we can do? They are very strong." "Nevertheless we will try to defeat them," said Mountain Lion. Bear laughed derisively and said, "No, they make no difference to me! I'll just rub myself all over and brush them off!" So they went. Then said Mountain Lion, "Wait here! I will go and look." So he went and soon arrived at the camp of King Cricket. He inquired if they were ready. "All right! You fellows! We will try it!"

Then Cricket sent forward his soldiers; they attacked Bear in swarms. He brushed himself vigorously but could not rid himself of them; more came every moment. Then Coyote cried from his hiding-place, "Make for the water!" Bear ran; he could not endure the pain. The arriving bees covered his hide. He rolled over and over in the dirt. Coyote cried to him, "Jump in the water! Or you will be killed!" Bear rolled continually. Skunk, the pest, was dying too. Then Coyote fled, one sting was enough for him. He ran and was not seen again. Then the bees caught sight of Fox; they thought he was Coyote and stung him. "Don't run!" they cried to him, attacking him. But he took no notice of their entreaties and fled not to return. They did not overtake him.

And so Cricket won the fight; he defeated Mountain Lion. Then he said to him, "Now who is the better man, you or I?" "Surely you are a better man than I!" said Mountain Lion. "Good! I am a better man than you! And now never again go trampling on people's houses. You ought to know how evil it is to step on men's houses. It is good not to fight, but not good to be as you were. I never seek trouble anywhere and no one must molest me. You shall always wander along the roads and I will pass my time in the house. I constantly walk about my house; I never go far away, not like you. Every day you travel far, not like me. I do not wander much; I am always in my house. When I get sleepy I go inside and go to bed. That's all. I do not think that anybody may come; I am alone here by myself. Good night!"

GREAT HAWK AND THE COLD [16]

la·'mka   ta·stmetxa'   txa·'uhe'k   li'cxai   taxts'a·kai'
"South,   what thy possession?"   "Have I   rain   and wind

said   the hawk.   Then went   again to same   tree.

ramsmɑ'kaits'ē   ramt'xwen   pets'a·kai'   taxpetc'umye'ʟ
Then night again.   Then came   the wind   and the ice.

ramk'ᴜts'ē·'nu   k'salo·'ce'   pa·kē''nu   k'salo·'ce'   ṭe'ho'ne·tak
Then contented   very already;   thought   very already   that would win.

ra'mṭe   rupk'ewe'ʟ   ra·nmo''   ok'ewe'ʟ   tactmet'xa'
Then said   to the west,   "And thou?   O West,   what thy possession?"

ra·'mṭe   pek'ewe'ʟ   pet'xa·'wuhe''k'   le'cxai   tax   ts'axe'ʟ
Then said   the west,   "Have I   rain   and   snow,

k'eune'ʟ   taxts'a·kai'   taxwatc'umye'ʟ   yo'ra'mṭe'   pespe·'k'
hail   and wind   and that ice!"   Then said   the hawk

rako''icxai'ya'teŋksa·i''   kept'a''   ksa'luk'o'lup'   xwe'n
that not wished to dawn yet.   "I am cold   already very!"   Came

k'sa·i·ŋk'o'lup'   ·   bek'eune'ʟ   amkepṭ'a·'k'sɑ   k'olupló
more yet much   the hail.   Then was cold more   much already.

xwe'nksa   lok'ol·up'   k'eune'ʟ   tca'atén   amkepṭ'a·''k'sa
Came more   already much   hail   great.   Then was cold more

lok'olop'   raŋko''icxayak'sa·ī'n   k'olop'   ạⁿxwe'nk'sa
much already.   Then not dawned more yet   much.   Then came more

lopts'axéʟ   yo'ra·'mtom'   meṭ'xwen   pets'a·kai   ṭamk'mc'ṭ'oᵘlo
already snow.   And fell.   When came   the wind   then thick already

pets'axe'ʟ   me'ṭ'xwen   ts'a·k'ai   yo'ra'mto'ᴍ   tc'umya·'ᵃle'
the snow.   When came   wind   then fell   icicles

loɣasβekē·'wu   ra'm'ecxai   ra'mṭeta'k   keten.a·'so   naspe·'k'
already only the his place.   Then dawned,   then said,   "What befell   this hawk?

nok'i·'c   ṭ'ko'ticko'   ce'tep'ᴍɑ'ɑste'k'   ke'ra'   te'k'ksa'
Seems   that not is,   has died!   No   appears

ko't'ıco·pra'kē'   ter'a'·ke'N   tice'tep   ka'me·'t   ra'ts'e''k'
not anywhere.   Therefore think   that dead.   Try   to see

o't'icko'   ṭuɸṭeṭ'o'ina·'so   o'ṭicko'   k'o'nlox   k'we'L
if is   on the his seat,   if is.''   Arrived   people

ruɸkē·'wu   ªmko'ye·ma'   ʳa'mts'e''n   peṭ'o'oi'yu   peṭa·'k'aṭ
to the his place.   Then not seen.   Then looked   the its trunk   the tree.

ramku'yema'   ra'mṭeta'k   cko''   *mas*   ra'la·'ko   pa'ts'a'xe'L
Then not seen.   Then said ,   "Is   more   below   that snow;

nokī·'crum'   keṭ'me'l   pats'axe·'L   ka'me·'ṭa   xa'pek'   o'ticko'
seems   mass   that snow.   Try   dig   if is.''

ra·mcko''   yo'ra'mṭeta'krume'   ce'tepte'k'   ts'a'telo·mtek'k'sa'
Then was.   Then said then,   "Died!   Was cold very.

terᶜto'm   yo'ramṭeta'k'   ṭ'o'loinoxtek'   bek'la'k'мak'   ye'mno'
Therefore fell.''   Then said,   "Finished   the brave one!   Henceforth

rapṭ'e'la'   kī'ya·te'   ce'tepto'wa·t'ló   pepeta''ko   ṭ'ıka·'pṭ'ela
to be cold.   always.   Dead he already   who made   that not be cold.

t'oL   ka'tap'nehe'   no'ᶜ   ra'ko·'maṭ'eltene'   no'   ṭiṭa'ṭeᶦk'es
One   must   henceforth   to buy   now   blankets.

ce'tep   ṭo'wa·tLo   ṭuβepeta''ªko   ṭıka·p'ṭ'ela'   ha''klo   piem.o'
Died   already   this who made   that not be cold.   We already   know

ṭa'tıca·kai'
to go.''

Great Hawk wished to test whether the weather was mild enough to be endured by the people without the aid of blankets. So he went to the South and said, "South, what have you got?" "I have rain and wind and ice!" replied the South. "Let them come!" said Great Hawk and he went and perched on top of his favorite dead tree. All night it rained and blew and froze. At last it dawned and Great Hawk was well content. Then he went to the East and said, "East, what have you?"- "I have wind and ice!" replied the East. "Let them come!" said Great Hawk, and he went to his favorite place again. All night it blew and froze but when it dawned he was well content and went to the North. "And you, North, what have you?" "I have wind and rain and ice!" "Let them come!" said Great Hawk and he went to the same tree again. Then again it became night and the wind and ice came. But at last it dawned again and Great Hawk was very happy; he thought he would get the better of the winds.

Then Great Hawk went to the West and said, "And you, O West, what have you?" Then the West replied, "I have rain and snow,

hail and wind and ice!'' ''Send them along!'' said Great Hawk and he went to his tree again. All night long the blizzard continued and Great Hawk said, ''It doesn't want to dawn yet; I'm very cold!'' And yet came more hail and it became colder. And great hail-stones fell. And it did not dawn yet. And then fell more snow. When the wind came the snow was very deep, and great icicles formed on Great Hawk's perch.

At last it dawned and the people said, ''What has happened to Great Hawk? It seems he is not around; has he died? He does not appear anywhere, so we think he must be dead. Let's go and see if he is on his accustomed seat.'' Then the people came to the place but Great Hawk was not to be seen. They searched the trunk of the tree but could not find him. Then someone said, ''There is something beneath the snow; it seems that there is a heap there. Let's dig to see what it is.'' And there was Great Hawk. Then they said, ''He is dead! It was very cold and therefore he fell. The brave one is dead!'' they said. ''Hereafter it will always be cold; he who wished it not to be cold is dead! Now we must buy blankets; he is dead who would have it not cold. Now we know what we must do.''

THE ANIMALS AND GOD [17]

pe*kuwa·'yu*   sepastccne'ku   bek'e'nca·ni   repa'mt'a'k
The horse   beseeched   the God   to kill him.

[17] Told by David Mora, 1916.

pema′t‛   sepastc ’ene′’°kotén   bek‛e′nca·nɪL   ṭipa′mk‛ɴe ’°ʟko
The beast   begged him also   the God   to kill them

na‛ṭ’u·ṭ’a·′ʟ   pa·′lxo   ṭipo′taxlele’eko   ‛ensa·mo′x   ra‛mṭeta’k
this people.   Wished   to gore them   in order to die.   Then told

ru𝜙k‛e′nca·nɪL   ke′ra’   mo’   lamxa′to   me′pam·ka’
by the God,   ‘‘No,   thou   his food.   When kills thee

ko′p‛tc ’ē·wa·nuwi’   rako′ki·cmo’’   pṭ’a·′kioxomo’γás   seke′ra’
not thrown away,   then not like thou.   Killest him thou only;   is not

t‛me’’envi′‛   ṭumṭ’a·′k‛iax   kera’   ko′micax   pecxont’a’’womo’γás
thy need   to kill.   No,   not thou eatest.   Poor killest thou only,

rako′kichīyo’’ṭ‛   ruma′ma’i   sekicxa’’umo’γás   ṭu𝜙hīyo′t‛
that not like them   to kill.   Art eaten thou only   by them.’’

The Horse begged God for permission to kill men. But God replied, ‘‘No! You are his friend; he must command you always. It is better that you do not kill him. It is his place to command, yours to do your friend’s orders. It is not good to do as you ask. Your friend is poor also. Do you not see that it is not painful to be commanded when it is your friend who commands you? Therefore you must carry him to the place where he wishes; you are his foot. So it is not well that you should kill him, for he is your friend. Likewise you are a friend of his. It is well that he should command you and that you should not do him any harm.’’

The Ox also begged God for permission to kill people; he wished to gore them so that they would die. But God replied, ‘‘No, you are his food. When they kill you they do not throw you aside. You would not do that; you would only kill them. You have no need to kill them for you could not eat them. You would only kill the poor fellows; you would not do as they, for they kill you merely to eat you.’’

belits'ē·'   k'i'cva'   kī·'ya·te'   ṭ'ika''ᵃwu   ṭ'ɪpa·mko
the woman,   "Thus was   always   to do   to kill

ṭ'o'wuṭ'
people.

Long ago Pelican was a murderer of the people. His bill was very
long. When people came by he would invite them to pass the night
in his house. He would tell them that he had a daughter and would
say to them, "You may sleep with the woman; don't be afraid!''

"Good!" the visitor would reply. Then the stranger would sleep with the daughter. Pelican slept close by and when he heard his guest snore he would arise and go there and ask three times, "Are you asleep? Are you asleep? Are you asleep?" And if he got no answer he would drive his long bill into his heart and kill him. That was the way he always killed people.

At last one day Raven and Prairie-Falcon came by; they had heard that there was a murderer there. He greeted them and asked them what they wished. They replied that they wished shelter for the night. Pelican agreed and they remained. He said to them, "You may both of you sleep with the girl!" So they lay with the girl but slept only a little. Then they pretended to snore. The girl was sound asleep for they had given her something to make her sleep soundly. Then they put two logs of dry wood in their places and hid themselves. They caused the logs to snore like people. Then Pelican arose and said, "I will go and kill them!" He came close by and asked, "Are you asleep? Are you asleep? Are you asleep?" And as he received no answer he gave a hard stroke with his bill. He hit the log and split his head all to pieces. He fell dead. Raven and Prairie-Falcon then awoke the woman who said, "That is the way he always did in order to kill people!"

COYOTE AND THE SALT WATER [19]

Lk'a	kakca'	kopia·'mo	tcʿa'	ra·'mtʿīᵞa	rumco·k'a'
Coyote	thirsty.	Not saw it	water.	Then went	to stream

---

[19] Told by David Mora, 1916; translated from Spanish of Juan Quintana.

ra'mt'ierumkeu   xa'iya   ṭe·le'k'   ṭepe'me·'lko   pecumk'o'm'
Then went to where   many   holes   to catch them   the squirrels.

ra'mṭam   pet'oʟ   cumk'om'   ra'mpa·lxo   ṭepe't'eine·'ko
Then came out   the one   squirrel.   Then desired   to shoot it.

ra'msa·teʟ   wi·ṭ'e'peno   ra'mts'okox   pecumk'om'   tc'e'xe·na
Then murmured   in his bowels.   Then frightened   the squirrel.   Angered

peʟk'a'   me'na·ko   ṭits'o'kox   pecumk'om   ṭa'mṭam
the coyote   because   to frighten   the squirrel.   Then emerged

t'oltén   ts'o'koxtén   pe·lk'a'   tc'e'xe·nalo·ts'   pa·ma'mpko
another,   frightened again.   The Coyote   angered was again.   Drew out

petse'uto   ṭet'eyinai'ʸᵘ   ṭa·'mṭo'xot'ɴap'   beṭika'no
the point   of his arrow.   Then ripped   the his bowels.

yo'ramṭa'xap   yo'ra·mpet'e'yine'korumlé·m   yora·'myema''ᵐ
He then died.   He then shot arrow upwards.   He then was seen

ṭupck'a'n   ko'yema'   pelk'a'   ṭa'mwa'ʟi'   pexo·pnéʟ
by the hawk.   Not was seen   the coyote.   Then sent   the vulture

ṭetc'a·uye'   ra·myo''   p'ia·'mo   ra'mpokolca·'ko
to seek.   Then he   saw him.   Then reported

ṭuβesk'a'n'   ṭamṭ'oke·lax
to the hawk.   Then revived him.

Coyote was thirsty and could not find any water. He went to a distant stream to drink where the water was running. As he bent over to drink, the water ceased running and the stream dried up. This made Coyote angry but he went to another stream where the water was running also. This also dried up as he tried to drink and he became more angry at not being able to quench his thirst. Then he remembered that there was plenty of water in the sea, so went to the shore and drank some of the salty water. It made him a little sick but he said, ''Good!'' for it had quenched his thirst a little.

Then he took his bow and arrows and went to hunt squirrels; he went to a place where there were many squirrel holes in order to catch them. At last one squirrel came out and he prepared to shoot it. But his bowels made a noise and the squirrel caught fright and ran away. At that Coyote was very angry because the squirrel had become frightened. Then emerged another; Coyote's bowels murmured again and again the squirrel fled. Then Coyote became very angry; he took an arrow-point and ripped open his bowels. Just before he fell dead he shot an arrow high into the sky. This was seen by Prairie-Falcon but he could not see Coyote so he sent Vulture to find him. The latter found him and reported to Prairie-Falcon who came and revived him.

THE BEGINNING OF THE WORLD [20]

lēlo''ᶜ   k'lu'wa'loᶜ   lice'   ka·'mpᶜ   beckᶜe'ᴍ   ka·'wi
Formerly,   long-ago   years,   rose   the sea.   Hot

k'sa'   ko'poṭoṭᶜna'   papᶜene''ᵉko   kī'sile'   hoᴍk'we'ʟ
very,   boiled.   Covered all   world,

kī'sile'   bekeṭ'po'i   ta·s   bes*antalusī'a*   ke'ra'
all   the mountains   but   the Santa Lucia;   no

rises again.	It then ends	world.

Many long years ago before there were any people on the earth the sea suddenly rose, boiling hot and flooded the whole world. It covered all the mountains except Santa Lucia Peak which remained about two feet above water. And there on the summit gathered all the animals with Eagle as their chief. Then he said to Duck, ''Cannot you dive down and bring some earth?'' ''Yes,'' replied Duck. ''I can do it.'' So he dove in the sea. But before he reached the bottom he became tired and had to come up again. Once again he entered the water and tried to reach the bottom. At last he reached bottom and seized a little bit of mud. ·Then he came up to the top again but when he arrived he was dead from lack of air. But Eagle took the earth that remained beneath his nails and rolled it into a lump. Then he cut it into four pieces and made balls of them. Then he threw one of the balls to each of the four cardinal points of the world. Then the sea sank and the world became as it is today. The mountains and the streams and the gullies were made and the sea retired to where it is today.

But some time in the future the rains may end and the world will end again and the people will die. The sea will rise again and the world will come to an end.

THE THEFT OF FIRE [21]

the his light.   Then arrived   to not extinguish.   Finally   kindled

rumkē·'ᵂu   ṭi*ka·mpo'*ʼtʻ
in place   their field.

Long ago the people had no fire, but some other distant people possessed it. So they said, "What shall we do?" Then the Kangaroo-rat said, "I can go and fetch fire!" "You!" they said. "How can you fetch fire?" "I know what to do," he replied. So he ran hard until he arrived at the camp of the people who had fire. He jumped in the fire and his tail, which was then long and bushy, caught fire. Then he ran away with the people in pursuit. He was afraid that the fire would go out before he arrived but he managed to arrive with the tail still burning. So the people kindled their fires from this and ever since have possessed fire. But Kangaroo-rat's tail is no longer bushy.

HOW PEOPLE WERE MADE [22]

besai'yu   pa·'xo   t'oʟ   lits'e''   rumkē·'wu   beʟk'a'
The eagle   placed her   one   woman   in his place   the coyote

named   of Santa Lucia   he then died   the murderer.   Then there

ra'mt'ɪcko'   kitc'a̤·'   saxe·'t'
then are   large   mescal.

Once upon a time long ago there was a man who murdered the
people. He had a basket full of boiling tar and when anybody would
come by he would greet him and say, ''Hello, cousin!'' Then he
would offer to shake hands with him and as soon as he took his hand
he would throw him into the boiling tar. Prairie-Falcon and Raven
were scouring the country to find and kill all the murderers and came
to him. He greeted them and extended his hands. Prairie-Falcon
seized one and Raven the other and they threw him into the boiling
tar. Then they set fire to the tar with their fire-drills. All ablaze the
murderer ran all over the country with the blazing tar dropping. And
everywhere that a drop of tar fell sprang up a plant of mescal. On
the other side of Santa Lucia Peak the murderer died and there are
great quantities of mescal.

PRAIRIE-FALCON AND WOODPECKER [24]

bela·''   taxck'a'n   p'ia·'mo't'   petc'a'm'   ak·ī·'c

the rattlesnake   to sting   the people.   He   therefore fierce

nata'a'   besme·ko'i'
today   the rattlesnake.

---

[24] Translated by Maria Encinales from Spanish of Juan Quintana, 1916.

Raven and Prairie-Falcon met Woodpecker. "Hello, old man! What are you doing?" "I am burying the bones of the people who have died!" For Woodpecker was also a murderer of the people. He was digging a hole in order to bury the bones so that they could not see the bones of the people he had killed and eaten. Then Raven seized something white like a handkerchief and said, "Good! Old man, I'm going to give you this present. Put it around your waist!" "Many thanks!" said Woodpecker, and he put the cloth around his waist. At first it did Woodpecker no harm but later it bewitched him and made him die. They did this because Woodpecker was evil and had sent Rattlesnake to sting the people. It is on this account that Rattlesnake is dangerous today.

COYOTE AND WILDCAT [25]

beʟk'a'	p'ıa·'mo	e·'ᵉts'	pa·'lxo	rept'e'kaxo
The coyote	saw	*pinacate.*	Desired	to kill him.

ra'mṭ'e'	beʟk'a'	tactʿmī'yo'kʿ	weṭʿ *a'ᵃmiko*	kītcʿa
Then said	the coyote,	"What thy doing,	friend?"	Standing

great magician. ''Shoot him from farther away!'' shouted Coyote's father. The fire spread rapidly but did not overtake Coyote. He returned alive. Hare was a very evil man.

COYOTE AND RABBIT [27]

beʟk'a'	pa·'lxo	restī'yo'ᵒwan	kic	bema'p'	ra'mt̓e'
The coyote	desired	to beautiful	like	the rabbit.	Then said

a'keṭumtī·''yo	ṭet̓'xa'uwut̓'	ba'ṭumla·'k'oi'	ṭa·mt̓'i'
''What thy deed	to yellow	that thy neck?''	Then said

pema'p'	pox	he'k'	kī'ya·te'	ruᴍṭe'le'k'	ṭamt̓e'
the rabbit,	''Enter	I	always	in holes!''	Then said

beʟk'a'	poxne'kīya·t̓e'	rumṭe·le'k'	ra'mt̓ɪya	bema'p'
the coyote,	''Enter will I always	in holes.''	Then went	the rabbit,

p̓'ne''ᵉwu	k'a·'t̓'	ra'mpopo'ᵒxo'	ṭuᴍṭe·le'k'	kē·'ᵉwo
brought	hay.	Then threw it	in hole	his place

peʟk'a'	ra'mpa·xo	ṭa'a'u'	raᴍ	yo'tercṭet̓'ᴀxa'wut̓'
the coyote.	Then put	fire.	Then	he therefore yellow

beʟk'a'
the coyote.

Coyote wanted to be as beautiful as Rabbit. So he asked him, ''What did you do to have such a yellow shoulder?'' Rabbit was afraid of Coyote and told him, ''Why, my neck is yellow because I am always going into holes in the ground.'' ''Good!'' said Coyote. ''Then I'll go into holes too!'' So he found a hole and went in. Then Rabbit went and got some hay and threw it into the hole behind Coyote. Then he set fire to it. Coyote was badly burnt in trying to get out of the hole and on this account has a yellow patch behind his ears.

COYOTE AND BULL [28]

beʟk'a'	pa·'lxo	ṭepi'cxo	beto·'lo	ṭam	humt̓'a'ᵃk̓'e'
The coyote	desired	to eat	the bull.	Then	in road

died   the coyote.   Then went   the bull.   No,   not died.

p‘ɴe’ʹᵉwutéɴ   bekaʹke’lt’a   paʹᵃ’xotén   raʹmṭ‘ɪarumé
Seized   again   the testicles,   placed them again.   Then went away.

Coyote was desirous of eating Bull. One day he met him and Ram in the road and greeted them, “Hello, old friend! Where are you going?” “To such and such a place” replied Bull. Coyote went with them for he desired to kill Bull and eat him. They walked along conversing. Finally Coyote said, “Ah, how good those things you are carrying there shaking look! What are they?” “My testicles” replied Bull. “Why, do you want them?” “Surely! I’m awfully hungry!” So Bull cut off the things he carried, his testicles, and

gave them to Coyote who immediately ate them. "Ah, how good they are!" he said. "Aren't you full?" asked Bull. "No, but there aren't any more!" And he still wanted to kill Bull.

Then Bull was afraid and said to himself, "He still wants to kill me!" So he turned to Coyote and said, "If you want to be full, you had better eat me whole!" "Fine! I can eat you whole!" "All right," said Bull. "Stand there and open your mouth so that I can jump into it!" "Good!" said Coyote. And he opened his mouth very wide; he wanted to swallow Bull whole. "Stand firm!" said Bull and he motioned to Ram. The latter ran hard and butted Coyote so hard in the mouth that he fell down with his head smashed. Soon he died. Thus Bull did not die. He went and cut open Coyote and took out his testicles and put them on again. Then he went away.

COYOTE AND THE SUN [29]

beɫk'a'	peta''ko	cko''	xa''ᵃk'o	rumṭiṭakē''wu
The coyote	making	was	his arrow	in his road

pena''	ṭa'mt'ɪyaχ	pena''	we'ten	le·ta'na'
the sun.	Then came	the sun	about	noon.

now.''	Then arose,	then took	the his arrow	and	the all.

tanbena′′	sekī′lo‘	tanbeʟk′a′	secko′′γás	peta′′ako
And the sun	went already	and the coyote	was only	making

cko′	xa′′k′o
was	his arrow.

Coyote was making arrows in the sun's path. About noon the
sun came along and when he came to the place, Coyote was making
arrows there. There was his fire to heat the arrows and he had tar·
with which to stick on the point. Then the sun said, "What are you
doing here?" And Coyote replied, "I am making arrows!" Then
the sun stopped still a little while and watched him. Then he said,
"Good! And now please let me pass." "Wait a couple of moments"
replied Coyote and the sun waited a little longer without continuing
his journey. "Good!" he said again. "Let me pass!" But Coyote
did not answer and the sun waited a little longer. At last Coyote
said, "All right now!" And he arose and took his arrows and every-
thing. The sun continued his journey and Coyote continued making
his arrows.

THE SUN AND THE MOON [30]

le·ló‘	seksa·′teʟ	kī¹sili′	pena′′	tax	ṭats′o·′opi′
Long ago	they spoke	all,	the sun	and	the moon

taxbeṭatcwa·′niʟ	kī·′sili′	pema′ṭ‘e′lak	ṭa′mṭ‘e′	bena′′
and the stars,	all	the animals.	Then said	the sun,

naṭ′oⁿṭ′a·′ʟ	se	k‘ʟa′ma·ilak‘	k′o′lop‘	k‘ʟa′mhaʟ
"This people	are	eaters	very.	Eat they

gaskī′ya·te′	ke′ra′	ke′ʟyamk‘a′	ṭik‘a·weʟ	ra′mho′yi′
only continually.	No,	not I see them	to sleep.''	Then replied

beṭats′o′opi′	ke′ra′	ke′ra′	ku′kicvi′	ki′kaueycla·tc′e′
the moon,	"No!	No,	not thus is!	Are sleepers!

k‘a′weʟ	gas	kī′ya·te′	me′′yima‘ne′elk‘	ke′ra′
Sleep	only	continually!	When see them	no

ki′yamk‘a′′	ṭila′mhaʟ
not I see them	to eat''

Long ago everything was able to converse, the sun, the moon, the
stars and all the animals. Then the sun said, "These humans are
great eaters; they eat all the time; I never see them sleep!" But the
moon replied, "No, it is not so! They are great sleepers; they sleep
all the time. When I look I never see them eating!"

Ah!	Shoot now!	Draw	thy knife!	Cut him

packo'tʻ	yo·loʻ
that snake!	Ah!''

Crow was the guardian of Xui, the murderer of the people. The latter used to kill them by throwing them over the hill where some little black birds would eat them. There was laurel on the hill. Prairie-Falcon and Raven came along looking for Xui in order to kill him. Crow saw them and told Xui that they were there on the hill. ''Be quiet now!'' said Prairie-Falcon. ''Now hit him!'' They

---

went closer but Xui seized Prairie-Falcon and threw him over his head. But Prairie-Falcon possessed a magical flute and alighted on this without injury. Then Raven came up. "Hit him! It's your turn now! Hit him!" Then Raven took good aim and knocked Xui's head off.

Then Prairie-Falcon and Raven came in search of the great striped Serpent. They saw him. "Ah!" said they. "This is the fellow we are after!" Prairie-Falcon shot at him but Serpent spied them. "Now it is your turn! Be careful!" cried Prairie-Falcon. Then Raven shot also but they did not kill him. "Run!" yelled Prairie-Falcon. "Here comes Wind!" So they fled with Wind and Serpent in pursuit. "Don't cry!" said Prairie-Falcon to Raven. "Quick! Hurry! We are getting there! Now we are there! Don't forget your magic! Here comes the snake! Hit him. Draw your knife and cut the snake! That's the way!"

THE MURDERERS [32]

tatcwa·'niʟ	k'tumlo'	macila·'k'	tumle·mó'	me't'ya
Star	fell already,	morning star	from above.	When came

k'a'k'a
sang.

In the beginning the morning star fell from heaven. When it reached earth then came Prairie-Falcon and found the people dead. Then he revived the people. But it was God who made people.

There was a rock named Xui who had Crow as guardian. He used to kill people by throwing them over his head so that they might be eaten. And another murderer was a one-footed character of limestone who always sang a song before he killed people.

---

THE RAINMAKER [33]

cko'   ctelua''   klicxa·i't'ic   peta·'kᵒ   le'cxai
Was   old man   rain-maker.   Made it   rain

me'pa·'lxo   a'mṭi'   *pa·'tel*   kospolo'x   pestelua''   empeta·'ko
when wished.   Then said   Padre,   ''Seize   the old man   to make

lecxai   taa'   ṭokolecxa·ita   sekoṭ'ak'   ṭakoxwete·lek
rain   now!   If not rains now   tie him,   and punish him.

ṭikoṭep'eʟ   titc'a''   ṭa'koxwete·lek   k'ts'ep'   ṭake'meṭumka·'s
If not fill   of water,   to punish him.''   ''Is good,   I try

a̧'a̧·mko   amk'a·k'a   ṭamṭump'   pai'   ṭumle·'m
if can.''   Then sang,   then came   cloud   in sky.

a·mṭ'uk'   peṭ'e'lo·wa'   a'mṭuxwen   ṭume'   belicxai
Then thundered   the thunder.   Then came   then   the rain

k'αtαpɴe·xe'   beli'cxai   kera   ko'luwa'   ṭamṭep'ena·t'eʟ
hard.   The rain   no   not late.   Then filled them

be*pale·'lt*en   t'ma·'xo   be*pa·'te*ʟ   kma·la'k'   pestelua''
the barrels   that placed   the Padre.   Told   the old man

ȩᵐpetc'e·ko   pali'cxai   k'la·uwi'   ṭaɪnṭe'   ṭoku'ka·luxtén
to stop it   that rain.   Left it.   Then said   that not wish again,

ke'ra'   k'o'lop'lo·'va'
no   enough already!

Long ago there was an old shaman who had a reputation as a rain-maker who could make rain whenever he wished. One year there was a long drought and the Padre of the Mission said, ''We will test his powers.'' He gave orders that the old man should be caught and brought before him. Then he said to him, ''If you do not make it rain so that it will fill these barrels I will have you tied and whipped.'' ''It is good,'' replied the shaman, ''I will try.'' Then he sang. Soon the sky became overcast with clouds and it thundered. Then came the rain furiously; it did not delay long. The barrels which the Padre had placed were filled quickly. Then he told the man to stop the rain. And it stopped. ''We do not wish any more,'' he said. ''No, there is enough already!''

THE MOUNTAIN LION HUNT[34]

ke'*se·lko*tene   hak'   peta'ka   *ka·'mpo*   ṭa'maiyaʟ

ta·'mamesiktén   ba'a's   ta·'mxo·yi'   ta'mtuxweɴ   ta·'menek'
Then called him again   the son.   Then replied,   then came.   Then said,

met'eyine'k   ta'mt'ye'   ke'ra'   skī'tana   naha'k'
"Shoot him!"   Then went.   No,   small   this rifle.

ko't'uxapta'   bata·'muʟ   met'eyine·'k'   mo'   ta·'met'eyinek
Not dead   that puma.   "Shoot him,   thou!"   Then shot him,

ta·'mtoм   tume'   pa·'mkohak'   tumé   ta'mama·
then fell   then.   Killed him we   then.   Then carried

tumta'm   ta'malau   sana·''to   ta·'mayopik'   tumé
to house.   Then removed   his hide.   Then staked it   then.

ta'mamaa   t'umholǫ'ɴ   p'xanse·'ko   hak'   bere'dmond.
Then carried   to Jolon,   sold it   we   the Redmond.

We were making fence-posts and made a camp. One morning we went and felled an oak tree. We sawed it into lengths and bored holes in it. Then we put powder in the holes and set it off. It split and then we made posts of it. Then we dug holes in the ground and put the posts in. We tamped the posts and fastened the wire on them. Then we left the work and went to our camp to sleep.

The next day we made breakfast and ate it. When we had finished my son went up on the hill with his dog to see an eagle which was nesting there. Before they arrived where the eagle was they saw the mountain-lion passing by on the slope. The dog chased him and treed him in an oak. The dog barked so that my son came after him. Then he saw the mountain-lion and called to me. I also went to see but before I arrived there the lion jumped and ran with the dog after him. He chased him into the woods and back again and treed him again in the same oak. Then I called to my son but he did not answer and I thought he had been wounded by the lion. Then I shot but missed him and he sprang again and again the dog chased him. The dog was tired but still followed the lion and treed him again in the same oak he had climbed before. Then I called to my son again and he answered and came. "Shoot him!" he cried and I did so, but my rifle was very small and I did not kill him. "You shoot him!" I cried and the boy shot him. Then he fell; we killed him. We carried him to the house and skinned him. We staked the hide and dried it and then we carried it to Jolon and sold it to Mr. Redmond.

A FOREST FIRE [35]

septie'mbre   ṭa·'mticko'   ṭa'a'u'   ketcạ·'   ko·'mai'ye
September,   then was   fire   great.   Began

the amusements.	All to see	beautiful!	

When your messenger came to my house I started from Jolon. On arriving in San Francisco I met my friend—what's his name?—

[36] Told by Pedro Encinales, 1910; University of California Museum of Anthropology, phonograph record, 14–1582.

Mason; I met Mason. He met me. It was already late when I arrived. Then he took me to his house; we arrived there. Then he took me to the city to see the amusements; I saw many people. We came to where there were great amusements. At midnight we returned to the house. In the morning we worked all day and at night he took me to the city again. In the morning we went again to the house and worked all day. At night we went to see the amusements again and returned in the morning. The next day we two went to another town, Oakland and at night returned to the house. That night we went again to see the amusements and saw them all; they were beautiful.

IOY AND BLUEJAY [37]

yoi	tax	pa·t'o·'so	skī·'tana	pewi·tcele'?	kmai'yaʟ

ṭemai·'ic   ke'ta'   ṭate't'   ṭᵉpeṭama·'niʟ   a'mt'ya·'ʟ
village.   No   smoke   from the houses.   Then went

peṭixɑpi'cxo   ṭa·m   peketcɑ·'lē·'lo   ṭa·'m   a·m   heyo''
the last   house   the large already   house.   Then   he

p'ya·'ma   ṭate't   ṭumpa'   a·m   heyo''   kī·   t'uma'
saw   smoke   there.   Then   he   went   there.

ṭa'mp'ya·'mo   peape'u   ketcɑ·'   a: pet'o's   skī·'tana
Then saw her   the his elder sister   large.   ''Ah!   the younger brother   little!''

heyo''   pse·'eko   heyo''   akēme·'naxta   umka'xap'   'mo'
She   told him   he,   ''Whence thou comest now?   Art dead   thou?''

heyo''   ksa   ke'ra'   ka'xap'   petcxa''   maat'ɑk
He   said,   ''No,   not dead.   The rock   carried me

ṭuwī'   ˑtitc'o''ma   ṭa·'mpo'maiyeu   ṭope'lextʟo   t'oʟt'ya'
here   on back!''   Then began   to open   one every

ṭupeṭ'ama·'niʟ   t'oʟt'ya'   ṭupeṭa·'m   kɑp'xe'na·teʟ   axa·ktén'
of the houses.   One every   of the house   was full   bones!

t'oʟ   ṭa·''ko   ka'xap'   t'oʟke'u   ṭupeape'u   ketcɑ·'
One   head   dead   near place   of the his elder sister   large.

heyo''   pse·'ko   heyo''   tast'ma'lox   ṭum.e'tak'
He   told   her,   ''What thy desire   to do

naaxa·'ten   ṭena   t'axa'ko
these bones   of these   heads?''

Ioy and her younger brother Bluejay lived together. One night the ghosts came to buy a wife and Ioy was the woman they purchased. They gave their beads for her. That night she was married there and the next day they took her away with them. Bluejay lived alone for a year and then he got lonely and said, ''I will go and seek my elder sister.'' So he inquired of every one of the trees, wanting to know, ''Where do people go when they die?'' But they could not tell him. So he returned and asked every one of the birds. But they could not inform him either. At last he asked a rock which said to him, ''Give me your money and I will carry you there.'' So Bluejay paid him all his money and the rock carried him to the country of the dead. The rock and Bluejay came to a village. But there was no smoke coming out of the houses. They went to the large house at the end of the village and there he saw smoke. So he went in and there was his elder sister. ''Ah!'' she said. ''It is my little brother! How did you get here? Are you dead?'' ''No,'' he replied. ''I am not dead. This rock carried me here on his back.'' Then he began to open every

one of the houses. And every one was full of bones! One skull was very close to his elder sister. So he said to her, ''What do you want me to do with these bones and skulls?''

THE ELK [38]

to here outside,	to that field,	O	Elk!''		

Long, long ago Juan lived with his grandmother Maria. She always told him to go and hunt elk. Every day he went out to kill elk, but he always killed only coyotes and squirrels. Sometimes he killed mice. But nevertheless he always went out to hunt. One day he went again to the hunting country and cried, ''Come on out into the open, Elk! We will fight and dance!'' Then something came out of the woods; it was a rabbit! Then the man said to the rabbit, ''I didn't call you! Your ears are like spoons with long handles!'' Then the rabbit wept

You   not able   to shoot us   with the   your arrows!

pet′eyine·′t′kam   hak‛   ka′xatep   mo·′mta'   pse·′t′ko
Shoot you   we!   Dead   you soon!''   Told them

hek‛   ṭel.ī·′n   k‛ts′ɑ′ktox   ṭupesk′a·′mo   k‛ts′ɑ′ktoxák‛
I   while yet   were afraid   to the near.   Feared me

pa·′mko   keti'   hak‛   ko′kculo   ṭeheyo·′t‛   t′oL
killed   because   we   two already   of them.   One

t‛eheyo·′t‛   pet′eyine·′ko   ksɑ'   pe′a′teloi   k‛mɑ′Ltox
of them.   shot him   very   the friend.   Jumped

hak‛   k‛o‛k‛ot′na·′pelṭ′e   hak‛   ṭa′mt‛yɑx   peṭet′o·′iyiN
we,   dodged   we.   Then came   the arrows ·

t‛eṭ‛ewai′yu   kī·′sile   pa′a′teloi   pṭ′e′kaxo   hak‛   t′oL
to his side   all   that friend.   Killed   we   one

ticke·′m   t‛yɑ'   ṭ‛iha′k   ṭa′mameṭ′Lik   mask′a·′mkeu
Tulareño   each   of us.   Then ran   to near him.

ṭa·′m.met‛Lik   ṭumatce′N   k‛e·′po·ṭ′ilau   hak‛   heyo·′t‛
Then ran   to distance.   Followed them   we   them.

ko′xom′tela'   kasp‛a′mko   hak‛   k′i′ca'   t‛eheyo·′ṭ‛   xai′ya'
Escaped they   but killed   we   four   of them.   Many

heyo·′ṭ‛   pake·′no   hek‛   teṭ‛o′e   tạ·ma''   ṭa′mauLṭ′ek‛
they.   Think   I   that ten   men.   Then cut

kī·′sile'   peṭaxa′ko   peki′ca'   tạmạ^{n}'   ka′xatep‛   pa′a′teloi
all   the their heads   the four   men   dead.   That friend

k‛e′nai‛   me·′no   ṭa·′m′oma·iyi'   ṭai′ya′L   ṭumṭa·′m
wounded   his hand.   Then began   to go   to house.

ṭa·′maiya·L   t‛umat‛a·′t‛e·ma   t‛a′pa′tLa
Then came   to our houses,   and danced.

Once I went out to hunt deer. I saw one and he didn't see me. I think he didn't smell me because the wind was blowing the other way. So I shot him with my bow and arrow. I got him in the heart. Then I went up to him and began to cut him up. But while I was busy there I heard somebody speak. It was a party of Tulareños who were speaking. But they didn't see me. So I ran back to where I had left my friend and said to him, "Friend, I think that there are some Tulareños coming up to us. Let's kill them!" And my friend replied, "Yes, we can kill them all right! We are brave men. They are many and we are only two but just the same they won't be able to kill us! They aren't brave; I think they'll be afraid when they see us." That's what my friend said to me.

So we went into the brush. I took my friend's knife and I gave him some of my arrows. Then one of the Tulareños came near us and we shot him. I shot him in the eye and my friend hit him in the belly. He fell dead and I ran up to him and cut his head off with my knife. Then the other Tulareños came up and we began to fight. We shot at them and hit one of them. Then I yelled out, "Come on! We aren't afraid of you; you can't shoot us with your arrows! We'll shoot you; you'll all be dead pretty soon." That was what I said to them while they were afraid to come close. They were afraid because we had killed two of them already. One of them kept shooting at my friend. But we jumped and dodged and all the arrows passed by on the side. Then each of us killed another Tulareño and ran up to them. Then they fled to a distance and we followed them. The rest of them escaped but we killed four of them. They were very many; I think there were ten men.

Then we cut off the heads of the four slain men and then started out for our house. My friend was wounded in the hand. And when we came to the house we had a great celebration and dance.

DIALECT OF SAN MIGUEL
THE BEGINNING OF THE WORLD [40]

letetaha'pu	wela·'k'	t'a'miyαx·olap'e''	ta'mico·L
When made was	the earth	then came the sea.	Then rose

tot'op'o'iya	xolap'e''	ke'kaxosna'it'o'	t'up'o'iya	ketc'ą''
to the mountain	the sea.	Was the eagle then	mountain	great.

[40] Told by Maria Ocarpia, 1916. Said to be version of San Antonio. Cf. Ethnology, 190; present paper, pp. 81, 83.

ṭa′meyexotcʻene′′   ta′meyaxhoṭʻa′muʟ   ṭa′meṭʻe′t   hosna′iʻ
Then came the old woman.   Then came the puma;   then said   the eagle,

umta·′netʻᴍe′cax   patálokʻē′   hopʼa′ta′ʟ   tameṭʻe′t
"Wilt thou give thy whiskers?   Lassoo it I   the basket.''   Then said

ṭoṭʻa·xwe′n'   xosna′i   neʻ′cxo'   ṭa′mepetak   ṭuhela′k'
to the dove   the eagle,   ''Fetch earth!''   Then made   of the earth

hosna′i   ṭa′mepetakṭo   lene′′   ṭoteta′pʻkoʟ   la′pai
the eagle.   Then made did   woman   of elder,   three

a′meṭetaxap   hólene′′   a′mepuxumkʻuwa′pʻ   ṭa′meṭe′t
then made   the woman.   Then entered in sweat house.   Then said

hockʼa′n'   ni′′hoti′tcʼe·lak   yikʻe′   ẉe′amɑs   ki·′   ma′a′ᴜ
the hawk,   ''Fetch the *barsalillo!*   Go!''   The coyote   went   bring

hotcʼe·′lak   kera′′   ku·′′ʷhuwu′titcʼe·lak   ṭa′mekīkʻeṭʻu'
the *barsalillo.*   ''No!   Not is my *barsalillo!*''   Then went did,

keno·′lkʻe′to'   ṭamepeta′ko   lama·′ta   komoleple′′   hoṭʼepo·′ṭ'
sweated did.   Then made   bower,   finished   the people

ṭotenake′tʻo'   ṭa′meṭetai   pʼe′napʼe'
made did.   Then made   fiesta.

The old Woman of the Sea was jealous of Eagle and wished to be more powerful than he. So she came towards him with her basket in which she carried the sea. Continually she poured the water out of the basket until it covered all the land. It rose nearly to the top of Santa Lucia Peak where were gathered Eagle and the other animals. Then Eagle said to Puma, "Lend me your whiskers to lassoo the basket." He made a lariat out of the whiskers of Puma and lassoed the basket. Then the sea ceased rising and the old woman died.

Then said Eagle to Dove, "Fetch some earth!" Then Eagle made the world of the mud brought by the dove. Then he took three sticks of elder and formed from these a woman and two men. But still they had no life. They all entered the sweat-house. Then said Prairie-Falcon, "Fetch my *barsalillo!* Coyote went to bring it but brought a load of different wood. "No!" said Prairie-Falcon. "That is not my *barsalillo,*" and Coyote had to go again. Then they all sweated. After sweating the eagle blew on the elder-wood people and they lived. Then they made a bower of branches and held a great fiesta.

THE THEFT OF FIRE [41]

sɑ′nenexoc·kʼa′n   ho′ṭoxwa′ṭʻo'   hockʼa′n   wa′lual'   ṭʻa′so'
Married the hawk,   the mother-in-law his   the hawk   bullbat,   her name.

art!	Eat	running!''	And wept did	the vulture.	

tc'a'uhopa'mat	aketīhopoxe'm'	mi'caxka	ta'meteto
''Seek the carrion!''	''How make the sinew?''	''Eat only!''	Them told did

'elk'a	yike''	aketīhopoxe'm'	mepe'noxka
coyote,	''Go!''	''How make the sinew?''	''Gulp only!''

Long ago when all the animals were people Prairie-Falcon was married and his mother-in-law was Bullbat. She wished to kill her son-in-law. Prairie-Falcon went out to make her some grubs to eat, as the animals in this time could make whatever they wanted. Then he said to his wife, ''The grubs are ready; bring your mother.'' So they went and ate grubs. Then it began to rain and the old woman and her daughter returned to the house.

Eagle and Coyote were in the sweat-house when it became dark and rained hard; the old woman couldn't find the door in the darkness.[41a] ''Where is the door?'' she asked. ''To the north!'' But she could not find it. ''Where is the door?'' she demanded again. ''To the south!'' Then the old woman became furiously angry and said, ''I swear I will go and bring the sea!'' And she went away.

Many days passed and it did not dawn but rained continually. Then said Eagle to Martin, ''Fly up to see if there is any light.'' Martin flew high in the sky and finally returned and said, ''Yes, there is light.'' ''Good!'' said Eagle. ''Go, Kangaroo-rat and bring it!'' Kangaroo-rat went and stole some fire from those who were guarding it. They fought with him but he wrapped the fire around him with a white bandage. On this account he still has a white band around his body. But the fire went out during the long journey and Kangaroo-rat arrived fruitless. Then said Eagle, ''Go thou, Roadrunner!'' Roadrunner went and secured the fire and put it in his cheeks. But he liked it so much he remained there eating fire. On this account he has red cheeks. Then they said, after waiting, ''He did not arrive there.'' So they said to Martin, ''Go up thou!'' Martin went and brought fire in his beak. Then there was light and it dawned.

Then Puma wept because he was hungry and cold; he was the king of the animals. But Eagle said, ''Why dost thou weep? Go

41a Cf. E. W. Gifford, ''Miwok Myths,'' this series, XII, 290.

hunt deer! Thou shalt not be human!'' ''But how shall I treat them?'' inquired Puma. ''Guard everything thou catchest!'' And Wolf also wept. ''Don't weep!'' said Eagle. ''Go hunt antelopes!'' ''How shall I treat them?'' ''Eat them running! Thou art not human!'' And Vulture also wept. ''Seek carrion!'' commanded Eagle. ''How shall I treat it?'' ''Merely eat it!'' And Coyote wept also. ''Go!'' ''How shall I treat my food?'' ''Just gulp it down!''

THE TAR-WOMAN [42]

she   is   north,   there.   Ended

hapok'e'lec
the story.

In former times there was an old woman known as Chahe. Her stomach was a basket full of boiling tar which she carried on her shoulder. She would inveigle people to approach her and then throw them into the boiling tar where they were digested. One day she was seated on a hill waiting for someone to pass by. Then there came Prairie-Falcon accompanied by his uncle Raven. They saw Chahe and Prairie-Falcon said, ''Have you got your flute?'' ''Yes,'' said Raven. ''What charms have you?'' For both of the friends possessed magic flutes which aided them in everything they undertook.

When Chahe saw them she said, ingratiatingly, ''Nephews, you have a long journey to go. Better get up on my shoulder and let me carry you.'' So they flew up on their flutes and sat on her shoulder; she was very tall. Then she sang:

Wayawaye! Hesekola!
It is crying, that which I am going to kill!

Then they stood up on their flutes but Raven missed his balance and fell into the basket of tar. That is the reason he is so black; before this Raven was as beautiful as Prairie-Falcon. But the latter reached down and caught Raven by one feather and hauled him out and revived him. Then they pulled out their fire drills and set fire to the tar. Chahe jumped as the fire touched her and cried out, ''Oh, grandfather!'' Her skin began to peel off and she ran about furiously. She ran into the earth in her endeavor to extinguish the fire, and then came out again. ''I am burning up!'' she cried. All over the earth she ran leaving drops of burning tar, and every place where the tar fell there sprouted the mescal. Much tar fell to the southwest and there is a great mescal. Her course fiinally ended in the north where she still is heard running in circles. And so she will continue all her life to the end of the world, dropping seeds of mescal. There is still the old woman in the north.

My story is ended.

PRAIRIE-FALCON AND ELF [43]

ṭa'mīyax   umṭake''   otcilwa'ıyı   ṭeci'k'   ka'ro'

great.   Then said,   ‘‘Go to see I him   the doctor.’’   Then said

hocokeno′i’   akī′teno‛pa′mka   anaṭo′°poka   eme‘′tɪkas
the great owl,   ‘‘Where he who kills thee?   Allow head   to see if can

te·tc’o′inọ‘‘
suck will!’’

Old man Barn-Owl came along the road; he had been hunting with
the aid of his magic feather with which he killed his game. Prairie-
Falcon came after him, spying. Then the old man sang:

> Because of my feather,
> Elf hangs by his foot!
> Whee! Whee! Whee!

For he had caught Elf and hung him up by one foot in his sweat-
house so as to kill him. Then he went away.

Then Prairie-Falcon went to the sweat-house and wept; he wept
so long that the house filled with his tears, they reached the head of
Elf hanging there and revived him.

Elf was seated smelling his arms when Bunting came by and
laughed and said, ‘‘Who is this who is smelling himself?’’ At that
Elf went and turned himself into stone. Then Prairie-Falcon got
angry and said, ‘‘I will throw fire at him!’’ He did so, and for that
reason Bunting's breast is yellow to this day.

Then, after reviving Elf, Prairie-Falcon went to meet the other
brave animals. There was an old woman named Hui who was pound-
ing pil in a mortar. She had no eyes. Raven was there putting his
foot in the mortar and stealing some pil. Prairie-Falcon came along
and said, ‘‘Take care!’’ ‘‘Yes,’’ replied Raven, ‘‘but this pil is very
sweet!’’ Whenever she raised the pestle Raven would seize a hand-
ful of pil. ‘‘Do you not see?’’ he said. At last Raven was a moment
slow and Hui pounded him in the mortar. Then Prairie-Falcon
reached in his talons and caught him by the tip of the wing and pulled
him out. He blew on him and Raven assumed his present shape.

Prairie-Falcon then went and encountered Crow who cried to
him, ‘‘The Humans are coming now!’’ Prairie-Falcon caused him to
sleep and snore.

Great-Owl was a medicine-man. The big Deer was sick and said,
‘‘I will go and see the doctor.’’ Then said Great Owl, ‘‘Who is the
man who is trying to kill you? Let me suck your head.’’

THE SERPENT[44]

ke'ka'   hoṭinele''   p'i'cxo'   hoṭ'ipo'ṭ'   petak'a'u
Was   the serpent.   Ate him   the Indian.   Named him.

nonack'ot   leᴍ   t'me·'ke'   ṭa'mī¹ṭo'   kīyalumle·'ᴍ
will this snake!   Up!   Go!''   Then went did,   went upwards,

ko'ṭ'atnoxṭo'   ṭa'meṭee'l'hoċk'at'ṭo'   ka·ᵃloṭo'   k'e'l·o'
went headlong did.   Then preceded the snake did.   Was already did.   Enveloped

hole'saᴍ   ṭa'meṭko'nox   ṭ'u'inox   umṭ'ɪka'ko'   hoċk'o't
the Morro.   Then arrived,   settled   on peak.   The snake

se'kelelep   le'u̱'   hoċk'o't   ye'nt'xole'u̱'   ṭa'meṭot'oinop
enveloped   then.   The snake   caught him then.   Then jumped

hoċk'a'n'   ṭa'mepeta·no   hoṭitomu'i'   ṭa'mepoko't'o'ṭo'
the hawk.   Then seized   the charm.   Then killed him did;

k'i'ċa'   ṭ'a'kai'   hoċk'o't   he'u'wa'ṭikasmeko'i
four   pieces   the snake.   Therefore are rattlesnakes,

ṭacni'ʟ   wa''ṭika'   ṭeṭ'xa'ptep   le'   tinele''
others;   therefore are.   Died   already   serpent.

hewucwa·'t'oxo'   hoṭik̲alno'   ka'xwen   ne''wo't
Therefore poison   the flesh.   many   got they

co'watot   ṭa'miyαx   helk'a'   ne'u̱to'ɴ   co'wato
poison.   Then came   coyote,   got also   poison.

ṭa'miṭika   hosku'ntui'   smiko·'i   umla'mka   he''k'a'
Then are   the little   rattlesnakes   at shore   Said

hoċk'o't   ku'xo¹ yo·tap'   kīyαx   ċe'tep   ṭaʟk'e'
the snake,   ''Live   always.   Die   I

le̱'u̱'   kasko'xo·yoita'p
already,   but they live.''

Once there was an animal which ate the Indians and was called Serpent. The whirlwind was his protector and brought him food. Prairie-Falcon heard of him and said, ''What shall we do?'' ''How many powers have you?'' asked Raven. ''I have one so fast that the snake will not be able to catch me.'' ''Good!'' ''In two or three different mountains, there are my powers.'' ''Where?'' asked Prairie-Falcon. ''At Asomeneka.'' ''And the other?'' ''At Asumloyam.'' (Both mountains are near to Cholam where the snake also lived.) ''And you?'' ''Oh, I'll risk my neck anywhere!'' ''Good! Where is your power?'' ''At the Morro; that is the last power.'' ''Good! I have been there; that's all right. Let's go and see the snake.''

They went and the snake awoke, and when he awoke he cried out for the whirlwind. ''Come along, nephew!'' cried Prairie-Falcon. Along came the wind, felling everything in its path. ''Good! Run!! Come on!!!!''shouted Prairie-Falcon and they fled across country with the snake and the wind close behind them. ''Fly up!'' yelled one.

"No, down!" shouted the other. "Summon up your strength or he will catch us! Good!" Serpent came yelling. "Just remember your powers," entreated Prairie-Falcon. "Good! They have passed." "I am going to cry," said Raven. "No! Don't cry! Cast your spell! Good!" "Wait a moment; there in the mountains are my powers!" "Yes, fly up! Good! I remember mine at the Morro." "Good!" said the Raven. "Fly ahead; I am tired, uncle!" "Just summon all your strength or the snake will get us! Fly up! Go!" And they flew towards Morro with the snake in pursuit. They flew upwards, headlong, before the serpent. He wrapped himself around the Morro from beneath and the allies seated themselves on the top. He had almost caught them when up jumped Prairie-Falcon and seized his charm. With it he cut the snake into four pieces and killed him.

And from these four pieces were formed the snakes of today. On this account there are rattlesnakes and others; therefore their flesh is poison. Many snakes got their poison thus. Coyote also came and secured poison. There are many little rattlesnakes at the coast near Morro. The old snake said, "They shall live forever; I have died, but they will live."

THE ELF AND THE BEAR[45]

ke'kato	hotaa''pɪ	ho.e·'xo'	hoskamaxa'n'

Come out!''   Went rain.   Then came out,   came out did.

kace'ʟ   t'i't'o'   a'mekepṭ'a   a'mecitipṭo'   kepṭ'ą'
Tried   to do.   Then was cold,   then died did.   Was cold.

ṭámetetoanęų'   ko'milio·ta   nak'olcīyip   ṭa'meṭan'ṭo'
Then said the his grandmother,   ''Don't concern thyself   these things!''   Then
                                                                                  arose did,

ṭe'mīyi'   k'ī·ṭ'o'   tc'a'wo'   le·'   pokoṭ'xo   e·'xo'   īya·'mo'
then went,   went did.   Sought him   previously   killed her   his mother.   Saw them

hakɪsme·'teno'   ṭamepokoṭ'xo   ho·sku'nt'ui'   hoṭaxa·'iyak'ten'
two his children.   Then killed them   the little ones,   the bears,

papa'to'   pani'k'o'   ṭa'ntica   hoṭʌxai'   xa'pko'
roasted them,   gave him.   Then wandered   the bear,   dug,

k'o·tc'e'ʟ   táminap'ʟe''   a'mexwen   mi'caxna   nata'pata
cacomites.   Then cooked then.   Then came.   ''Eat this,   this which roasted.''

a'mepicxoṭo'   ṭa'meṭitowetcele''   tē'k'a'   pi'cxo'
Then ate did.   Then said the bunting,   ''Who is   eats him

pa'so'   ṭalt'ᴍa''   kerą''   naṭe'ko'iyɪ   kicksa'na
his son?''   ''What thy remark?   No,   this root   resembles

ṭicxi'po'   nap'a's   le'uṭ'ɪie   ṭa'meṭe·t   ake''
his foot   the son.''   When went   then said,   ''Where

ṭikia'ṭ'onosme·'ten   nap'no'na   kotc'e'ʟ   ts'axwen'
then went did the children?   Cooked these   *cacomites!*   Dried

no'na   ṭameṭet   howe·tcele''   kị̆k'ẹ'   pema'ṭ'ko
this!''   Then said   the bunting,   ''Go I,   follow him

k'e'   poko't'xoke·'´   ṭia'pautec   kera'mas   kea'pa·u
I,   kill him I   if overtake him!   No more,   not I overtake him.

kerako'ṭ'a·te   me'tok'é
No, not has,   try I!''

Once there was a doe, the mother of an elf. A bear came and said, "Let me louse you." "All right." "I will hunt for them." So the bear loused the doe but threw the lice away. "Why don't you eat them?" asked the doe. "I can't eat toads!" replied the bear. "Good!" said the doe. "Then I will." "Come and catch your lice," said the bear. He was angry at her and when she came bit her on the neck and killed her. Then he ripped open her belly and out came the elf. But the bear continued eating the doe. Then said the elf, "Scabby will be your feet, your eyes small, your tail stubby!"

In a little cave the elf grew up. At last he decided to go to his grandmother, the rainbow, and there grew more. Then he decided to fight with the thunder. But his grandmother said, "Don't bother with him; he is evil and will harm you." "No," said the elf, "he can't hurt me!" "What! Who are you that he can not harm you? You are weak." "In the morning," said the elf, "I will try conclusions with the thunder. I will shout to him!" At dawn came the thunder and they fought. "He did not wound me," said the elf. "He kicked me but did not hurt me." And he pursued him to the end of the world. "I will wrap myself in a red feather, grandmother." "Put ashes all over your body and urinate," she advised him. "The rain will not hurt me," said he. "Good!" he cried. "Come out, rain!" The rain came and it was very cold, so cold that the elf died, but revived again. Then said his grandmother, "Don't bother yourself about these things!"

Then he arose and went to seek him who had killed his mother long before, the bear. He found the two cubs and killed and roasted them. The bear was away digging out cacomites. When he came, the elf said to him, "Eat this food which I have cooked." And the bear ate it. Then cried the bunting, "Who is this who eats his children?" "What did you say?" asked the bear. "Yes, this root resembles my child's foot!" Then the elf fled and the bear moaned, "Where have my children gone? They are cooked and dried with cacomites!" Then he said to the bunting, "I will go and follow him, and I will kill him if I overtake him. I am afraid I will not overtake him, but I will try."

THE OLD PEOPLE[46]

le·lo''	hoṭi'poṭa'ʻa'ʟ	hokóṭʻi'cnoma·ic	umk'we'ʟ
Long ago	the people	the not believed	in world.

[46] Told by María Ocarpia, 1916.

roots and venison. Then all the animals lived in this land and all the birds. The Indians ate antelope and rabbit. They made blankets to protect themselves from the cold. Some hunters were able to shoot elk and ate them. They made acorn mush. They made dresses of tule. The women wrapped up their children and put them in the cradle and carried them on their backs. They also took their carrying baskets and gathered wild seeds, chia and acorns from the china oak. When they returned they roasted the seeds and ate them. They were not familiar with the white people and were frightened when they came. They escaped into the mountains; some died and some hid in caves.

THE ECLIPSE[47]

kekake′msạli′s	lelo′′	ce′tipona′′	cmak‵a‵′i
Was I in San Luis	formerly.	Dead the sun,	dark,

ts′ne′teʟ	me·′ten′	poxna′′	ṭa·meṭi′c‵o′p	hona′′
cold.	When again	rose sun	then beheld	the sun.

p'te′lo·to
bellies.

When I was a child there was an earthquake; the earth shook and the ground cracked in Cholam. We were frightened and thought that the end of the world had come. It was many years ago. The fish came out of the ground; it was a great earthquake. The animals were frightened at the water from the earthquake. The oak trees bent to the earth and the people were frightened and fell on their faces and prayed.

---

[50] Told by Maria Ocarpia, 1916.

PART IV. VOCABULARY

In the preparation of the present discussion, all the data available were collected and transferred to card-index and arranged under their respective stems. As the data were large, a considerable body of material was thus secured which is presented in the following pages both for the better understanding of the accompanying texts and for purposes of comparison with other Indian languages. Unfortunately it will never be of any practical value, as the Salinan dialects are doomed to extinction in a very few years.

Practically all the material here presented is from three sources, the forms collected by myself from the surviving natives in recent years, those recorded by Sitjar more than a century ago and published in his Vocabulary and those recorded by Henshaw in 1884 for the Bureau of American Ethnology. To these have been added a very small number from the vocabularies of De la Cuesta, Yates and Gould, Coulter and Taylor. The forms recorded by Henshaw are for the most part phonetically correct and required but few and uniform changes to make them conform to the most modern phonetic usage.

The largest extant vocabulary of Salinan is that of Fray Buenaventura Sitjar, for a long time the resident padre of San Antonio Mission. This is quite large but almost inaccessible to the student on account of the faulty system of orthography employed. Practically all the characters of the English alphabet with the exception of *v* and *w* are found, and in addition, many superscript characters, characters crossed by others and by lines, besides various diacritical marks such as asterisks, crosses, acute and grave accents and subscript accents, compounded characters and other similar usages. Comparison shows that no uniformity has been followed in the orthography, rendering the work quite useless for one unacquainted with the language.

Most of the characters naturally have the approximate value of their correspondents in Spanish but the sounds not found in Spanish require some explanation.

The alveolar stop *ţ* evidently gave Sitjar his greatest trouble and has been written most variantly as z, c, zp, tz, tzz, tzp, ts, pc, ch, c crossed by a line, etc.

The fortis stop was generally expressed by an asterisk after the vowel.

The alveolar sibilant *c* was written as x, ch or z.

The dental sibilant *s* is found as s, z, ss, zz, etc.

z has been found standing for *t*, tzz for *ts*, x for *ts*, x for *s*, etc.

Most of the other phonetic peculiarities, such as qu and c for *k*, g and j for *x*, ch for *tc*, etc., are explicable by the ordinary usages of Spanish.

An initial consonantal cluster is generally preceded by a preposed vowel, evidently on the analogy of Spanish.

On the whole the orthography is so irregular that little reliance can be placed on its accuracy unless checked up by modern researches. When this is done it is seen that the change in the language has been very slight in the century and more which has intervened since the completion of the vocabulary.

Sitjar's vocabulary has therefore been transcribed to phonetic characters as accurately as possible following the evidence presented in cases where the modern form has been preserved. In the majority of cases, forms taken from Sitjar and absent in the modern material are accompanied by the sign (S).

In a few cases of possible confusion, forms from the San Miguel dialect have been accompanied by the sign (M).

The lexical forms have first been arranged in their several categories as nouns, verbs and so forth, and in some cases further subdivided. They have then been arranged in several columns giving the Antoniaño form, the Migueleño form, the plural form, which unless specially noted is from the Antoniaño dialect, and finally the meaning. In these columns the ordinary alphabetic order has been followed for convenience in consultation.

In very many cases, due to a lack of sufficient forms and to the presence of prefixes, infixes and suffixes, the exact form has been impossible to determine. In such cases the doubtful elements are enclosed within parentheses. In the case of verbal stems, those occurring only once, and for this reason of doubtful accuracy, are preceded by an asterisk.

	ska·′u		blue crane
	sk′e·′′n		shellfish
skaiya′′	s′kai′ya	skaiyana′neL	raccoon
sk′almo′k′	sk′almok′	sk′almok′oten	rat
	slipə′pə		green-winged teal
	smate·′xan		quail
smo′kat	smo′ket		bee
sme·koi′	smekoi′	smekoiiten	rattlesnake
	smohel		female skunk
smokok′e′	smokike′		mole
smic			cat
sai′yu	snai	saiyane′L	eagle
sna·k	sna‘k		kangaroo-rat, tusa
soko′ko	soko′ko		butterfly
	so′ha		spotted faun
	sopokan		very small ant
spe·k′	spi·k′		red-tailed hawk
	sp‘oko′′		burrowing owl
sto′	sto′		fox
	sumhe		young squirrel
stamaka′la			bat
suhao′ye			bat
swe′ho	swī·′yo		black-shining flycatcher
	swaa′		male coyote
	ta·lwa·′x		crane
ta′lmui			worm

Antoniaño	Migueleño	Plural	Meaning
taka'la			nuthatch
ta'nukupel			Lawrence's goldfinch
	tapṭe'ʟ		crane
tena'k			woodpecker
	tepce'		male antelope
təsik'	ṭeci'k'	ticik'neʟ	owl
tē·'u	tewe'		pelican
	tik'mo'ʻ		pigeon
	time'hai		worm
titcʻk	te'tc'		great California vulture
tʻma'cax			badger
tʻo·'i			seal
	tʻo·'io		badger
	t'sne		sea-otter
tʸa'i			whale
ṭ'ai'	ṭahi		bluejay
ṭa·yiʟ	ṭaiyeʟ'	tayiʟtena'x	flea
	ṭaitc'a·'tak		crab
ṭa·li·ye''			serpent
ṭa''muʟ	ṭ'a'muʟ	ṭa''multenax	puma
ṭaa''	ṭaa''p	ṭaatne'ʟ	deer
ṭapilale			bat
ṭa·xwe'ne'	ṭ'a·xwe'n'		turtledove
ṭaxai''	ṭ'ʌxai''	ṭaxai'yukten	bear
ṭawai	ṭawə'	ṭawaiiten	turtle
ṭetiyau'	ṭ'etēyau	ṭetiyauutén	salmon
ṭike'	ṭ'ike''		kingbird
	ṭ'i·kolə'		small frog
	ṭinele''		serpent
	ṭ'iope''		grubs, worms
	ṭ'oiyələ''		mountain lizard
ṭooloc	ṭo·lo'c	ṭoolecna'neʟ	gray squirrel
ṭ'o·'xo	ṭo·xo''	ṭ'o·'xolanel	wolf
tca	tca		curved-bill thrush
tca'la	tcal		Brewer's blackbird
tc'am'	tc'a'mi		red-shafted woodpecker
tcʻe·l'			cricket
tc'ele'u'			bluejay
	tc'e'mtcem		bat
tcik'	tc'iktcik		fishhawk
tcoana'hi	ṭaau'		caterpillar
	ts'aike''		mottled snake
	ts'e''ʟ		yellow-bellied woodpecker
	ts'ə't'enek'		owl
ts'ope'n	sopne't	ts'ope'nlax	spider
wakeno'			red-winged blackbird
wa·'kiṭ	wa'kaṭ'	wakiṭten	frog
		*wa'kaṭ'ṭʻa'ʟ	
	wa'lwal'		bullbat
waʻtc	watc'		Oregon bunting
	wau		white goose

Antoniaño	Migueleño	Plural	Meaning
witcele''	wetcele''		bluejay, bunting
	we·telo''		martin
	we'tok		woodpecker
xaii'k			mussel
xalau''			crane
xane'o			ground tit
xakele'	xapailə''		lizard
atce'tc	xatca'tc'		yellow-billed magpie
xom	xo·''mɪ		roadrunner, ground cuckoo
ho'mlik'			quail
xopne'l	xo·pɴe'ʟ		red-headed vulture
xutc	xutca·i	xoste'n	dog

BODY PARTS

Antoniaño	Migueleño	Plural	Meaning
a·pela·'i	amel		finger, toe
a·''ak	o·'p'ak	axa·'k	head
aa'cx	acx	aasxaknel	liver
axwe'm		axwenlax	skin, hide
a·'u			animal's heart
ca'lo			shell of egg
ca'ᴍteʟ			corpse
	cipainism		sole
	cma·'i		cheek
ck'o''il	cukaiel		lung
cuke·'net	coke'net'		eye
	co'wat		poison of snake
co'wan	cuwa'n		calf of leg
cu·la·'t', so·lo		sola·'xo	testicles
	cpai'atak		beard
eiwi's			spine
e·'lek'	elik	elekne'l	mouth
e·'net'	e'nenat	xe'net	nose
	e'ntat		ear
ecax	aca'x	ecaxneʟ	feathers, whiskers
etala·k		etalakneʟ	antlers
etca·i'	ci'tc'ai'	etcaiila·'x	neck
ita''l	e'taʟ		shoulder
epa·'l	i'paʟ	epa'ne'ʟ	tongue
e·xiwai'		e·xiwilai	heart
exoxo'	ihoho'	exoxa'lax	brain
		exoten	
		exotenax	
	exas		body
ewa'la	ewa'l		fish scales
ets'e''u	its'e''p	ets'e'wulax	tail
icaha·'l	isxa·ʟ		urine
icxe·'u	icxe·'p	icxepa·'l	foot
		icxe''e, icxe'xe'	
		icxe·ple't	
icele''	i'cilip'	isi·lewula'x	nails

Antoniaño	*Migueleño*	*Plural*	*Meaning*
ico''	icu''		breast
ick'o''ol		icok'alet	ear
ikau''	ikau'		body
ika'n	ika'		belly
ita·la'k'			horn
ita'c			urine
	its'a'lto'		point of wing
ihalte'ya			saliva .
ka'ke'lt'a	.		testicles of animal
kacwatni'lea	ke'cxauʟ		eyelash, eyelid
ke'o		kelao	knuckle
ko·'la'le'		ko·'latʟe'	penis
k'uwoke·'t'	ko'naki't		hair
	kuma'n		belly of fish
la'k'oi'	la'k'ai		neck
lamha't			dung
	lē·'wet'		lips
ʟko·'ik'tén'		lokoiyini'	beard
lo'kon	lu'kana		rump
	lo'taʟ		palm
ma'pok	ma'puk'		thigh
mas			pubic hair
mat'	ma't'	ma't'e'lak'	meat, flesh, animal
mata·'n	mata'n	matane'l	limb
me·'n	me'nen	mee'n	hand
eno''ol	noʟ		penis
	notapka'co	.	dung
o'oi'			trunk, body
uca't	oca·'t	ucate'l	tears
o'na'a'i'			waist
	otewo'ts'o'		feather
o'xot		oxote'n	testicles
a·'kat'	pa·'kata	akat'ɴe'ʟ	blood
akainai'	pakenai'		animal's womb
a'katcanai	paktaina'		thumb, big toe
p'xat'	p'xat	p'xa'teʟet	excrement, intestines
	pa'telpai		third finger or toe
axa·'k'	paxa'k	axa·ktén	bone
		axa·'kʟet	
	pa'mat		carrion
pena·'no	pena'n		milk
pē·nik'a·i			throat
oxwe'm'	p'oxe'm'		tendon, ligament
setilkai'	ske'nluwe		first finger
	sie't'		feather
skan			stomach
aske't, swɣt	skaniltai,		rib
	kane'lt'o		
askwe't, swɵt			heel, sole, talons
skoikne'	sxkoi''		chin, beard
	smo'kutu		animal's windpipe
	sni'pik		bones of wing

Antoniaño	Migueleño	Plural	Meaning
so'non	sa'nan		leg
sa'tik	soti'k		elbow
sa.'nat'	spa'nat		skin, hide
se'kel	spe'keʟ		eyebrow
spoke't	spoke't		fur, hair
spuk			muscle
	suluknai'		tooth
taknat	. takna't		sweat
	tamai		third toe
	t'an		animal's tongue
	te·rwa'k		second toe
titaka'ʟ	te·tek'ɛneʟ		egg
tema'i			bird's entrails
te'rk	tie'k		animal's gall
teteka'i	tete'ka		animal's joint
tetse'lel	titsele'l		rattles of snake
	tikai'e		bird's crest
	tilta'l		breast of fish
	titertikup		knuckle
	tito'k		second finger
titc'o''mo'	ti'tc'o''m		back
	titcai		wrist
toho'l	to'hul		lung, gizzard
tolola'i			animal's windpipe
tulalna'i			bird's crest
ṭa·ʟ	ṭa·xʟ		forehead
ṭa·t	t'aʟ		skin, hide, flesh
ṭ'e'pen	ṭ'e'pen	ṭepenla'x	belly
ṭ'ka'ten		ṭ'ka'tna·x	buttocks, anus
ṭo'poi	t'o'p'oi	ṭopoiilax	knee
ṭ'o'puk	ṭ'ne'puk'	ṭopokʟe't	arm, wing
		t'caknel	gills
tce'nya			glans penis
tcokelti'nai			ankle
uca·t'			lips
ule·'t'	oi'ʟit	le·'heṭ	teeth
u·	u·		face
uprent	upe'nt		fat
xapi'cucwe·t			navel

BOTANICAL TERMS

	atʟo·'s		wild oats
awu''ʟ	awuʟ'		bark
a·xo'ʟ		axone'ʟ	tule
ayexte'ya		ayextel'i'ya	seed
ca'l		ca'ltine	bud
ck'ua'			*quijara de pala*
	ck'alə''		large soap-root
	cpo'k'at'		clover
	cpoku'mt'a		
ca'tala			brush

Antoniaño	Migueleño	Plural	Meaning
ctan'		stanane'L	leaf
	elpo'nə		blackberries
	he·Lka'ᶜ		wild seeds
k'a·ṭᶜ	kat	k'atsane'l	hay, grass
	k'a·'ciL		sunflower
	k'ɑ'mtaᶜ		tule
kᶜa'	kɑp'	ka'te'L	acorn
ka'pitc'			small young oaks

		ṭa·ma·tén	
		ṭa·ma·tenáx	
		ṭa·ma·niLáx	
		ṭamaNiLten	
elkai'tingey'a			door
(ṭ)e'tak	(ṭ)eta'xk		awl
ek'es			blanket
et'oi'yiN'	et'eyini''	et'eyitinai'	arrow
icemet			bed
ioko'c			breech-cloth
itxau'			cane
	kanelt'ə'		storage-basket
k'ualane'l	kanelt'ə'		jewelry

Antoniaño	Migueleño	Plural	Meaning
keluktu'xne		keluktuxtine	prison
kitpe'lel			paint
kitpekle'y 'a			ligature
k'enin	k'one'ᶜ		acorn-bread
kua·p'	k'uwap'		sweat-house
laha'm	laxa'ᴍ		door
	lemi', lime'ɴ		rabbit-skin blanket
moxweto			sack, bag
mawe¹ya'			net-sinker
	mosiwe'		fish-pole
asi'l	na'siʟ		acorn atole
olient			whiskey
o'nus	o·ni'su'		skirt
oxwa't			moccasins
ame'ya	pana'me		quiver
	payosne''		whistle
	pane', p'an'ᴇ		pestle
pape'ye			beads
	paxuwe'		bow
	pasuwe'r		doll
	p'a'taʟ		carrying-basket
	pēu.'ᶜ		bones for game
pili	pe'ʟɪ		*pil*
umawi''	pomnawə''ɞ		arrow-straightener
salinhe'ya			fish-net
	sa·ma'k'		winnowing-tray
	sap'k'a'ts'		seed-granary
	sas		acorn-meal
sekeuetni'a			olla, pot
setami'ya			cap
sikara'na			clothes.
	ska'pə, sk'a'pe'		tray, cooking-basket
sone'y 'a			snuff
sokai'kis	su·kaikis		floor
	spok'ai'xa'ᵃ		drinking-cup
	t'a'iʟ		trap
ta'tukat			meal of seeds
	təca'ᶜ		basket
	təcoinə'		basket-game
	təkausnə''ə		small pots
	təki'wi		bed
	t'e'ltaʟ		hunting-net
	t'enika'ntec		bridge
taple'ya	t'ənəple''		fire-sticks
ti'cxa'			money
te'penca	tipintca		whiskey
tet'amnai	tet'aut'onə''		rattles
ticxlələ'			doll
	t'kamatl'		shallow grave
t'aa'k			handle
t'a'uun, t'o·'nt	t'anǫ		pipe

Antoniaño	*Migueleño*	*Plural*	*Meaning*
ṭaua'ṭ			bar, drill
ṭau'usi·'a'			bed
	ṭayu'wic		well
ṭeme'		ṭemele'u	instrument
	ṭo·na'ʟ		seed-beater
	ṭopai		fish-basket
	ṭopə's		twined-basket
ṭ'xo'l	ṭ'oxo'ʟ		mortar
ṭo'wi'i	tuwipe'	ṭowiyilī·'	raft, boat
	tc'aname''		baby-carrier
tcelela'o			leggings
	tc'oxo'k		cocoon-rattle
tcu'leye			*isley*
tcueyke''ya			trap
tsa'ta			blanket
tse'uto			arrow-point
ts'wa'keti''	ts'wa·ke·tə''	ts'wa·ketili''	hat
wumətamu'			wall
xak'e'i', xak'		xak'eʟ	bow
		xak'ten	
xɑ'nis	xe'nes		beads

NATURAL PHENOMENA

aiyate'ya			garden
asak'a		asak'te'nat	flint
(t)ca', tc'a'	ṭ'ca', t'ca', tc'xa'		water
capawe'			tide
ck'eᴍ			sea, ocean
ckoɴ		ckonane'l	glade, cave
