

(U//FOUO) Did You Know? The Geographic Resource Center is Your Gateway to the World

FROM: [REDACTED]
Center for Intelligence Research (S202A1)
Run Date: 03/21/2006

(U//FOUO) The Advanced Intelligence Research Services (AIRS) Geographic Resource Center (GRC) is **the NSA/CSS repository for worldwide geographic information and geodetic data** for both standard and special purpose hardcopy maps, charts, and gazetteers, as well as digital geographic data, atlases, and related geographic and cartographic materials.

(U//FOUO) In addition to all this, the GRC provides geographic research expertise to the NSA workforce and also creates custom maps using Geographic Information Systems (GIS), maintains the Standard Placename Tetragraph Listing (SPNTL), and populates the Enterprise map Repository THORNY HOSTILE with GIS data and technology. The GRC provides support to analysts, linguists, reporters, technicians, engineers, managers, and other NSA/CSS Extended Enterprise personnel.
